Volume 135

Ded. 35 AsQ.

New York, Saturday, December 31 1932.

Number 3523

The Financial Situation

HE December number of the Federal Reserve "Bulletin," just issued, contains an elaborate study of "Seasonal Variations in Money in Circulation." Incidentally it furnishes information regarding the composition of the item of "money in circulation" which should always be kept in mind for proper interpretation of the figures as published from week to week and from month to month. Decidedly erroneous views prevail as to what is meant by the phrase "money in circulation," and the official definition now given of the term should serve to correct such erroneous views and should also induce caution against laying undue stress on the changes from week to week and prevent strained deductions and inferences which are all too common with reference to such changes, though the Reserve Board's study of the seasonal variations are not of course presented with any such purpose in mind.

The Board points out that the volume of money in circulation is computed by the Board in three principal ways-monthly averages of daily figures, weekly averages of figures for weeks ending Saturday, and single-date figures for each Wednesday. The monthly figures, it says, are the most stable of the three, and are best adapted to analysis of longtime changes, because the influence of occasional erratic variations which are inevitable from day to day or week to week is reduced by the process of averaging. Weekly figures, on the other hand, have the advantage, we are told, of greater promptness and measure more accurately the extreme movements accompanying holiday requirements and similar seasonal demands. Of the two weekly series, weekly averages of daily figures-which become available on the Tuesday following the calendar week to which they relate—are more stable than the Wednesday series, because erratic single day fluctuations are smoothed out by the process of averaging. The figures for Wednesday-which are issued on Thursday as part of the statement of condition of the Federal Reserve banks, and are published in the Friday daily papers—are available to the public more promptly than the weekly averages, and for that reason are more widely used. Notwithstanding occasional erratic movements, Wednesday figures, it is averred, ordinarily reflect with fair accuracy the direction of week-to-week changes.

Now, what is the exact meaning of the term "money in circulation"? "As officially defined," we are informed, "'money in circulation' comprises all United States money issued and outstanding outside the Treasury and the Federal Reserve banks, except United States coin known to have been ex-

ported to foreign countries. It includes, therefore, not only money in active use in hand-to-hand transactions and money held by individuals and business houses for ordinary use, but in addition money in the vaults of banks, money in hoards, United States paper currency held abroad, money lost or destroyed, etc."

To the ordinary student there is nothing new in this "official" definition. He well understands that money in circulation does not signify what the words appear to imply; it does not mean money actually in circulation in the sense of being in the hands or the pockets of the people, or actively being used in business and in the ordinary course of daily affairs. By far the greater portion of it represents money in bank vaults and when that is said the changes from week to week and from month to month, which are given such great prominence in the discussions in the daily papers, are deprived of the greater part of the significance with which they are ordinarily invested.

To the casual reader, however, and to the general public this is not known. To the ordinary observer the term money in circulation means just what the words seem to imply, namely money actually in circulation in the course of daily trade. And erroneous conclusions inevitably follow, not infrequently with harmful results. In other words, an increase in the figures of money in circulation does not necessarily mean an expansion in the ordinary use of money, and vice versa a decrease in the figures of circulation does not necessarily imply a contraction in the use of money for current business purposes. Yet in general comment that is precisely what the changes are taken to signify.

Nor do the changes in circulation always reflect some very important movements relating to money. Just now gold is flowing into this country in enormous amounts from abroad. To those not acquainted with the subject and not familiar with the preparation of the statistics, it is natural to think that the result must be a huge expansion in the volume of money in circulation. Not so, however. The influx of this gold adds to the stock of money in the country, but not to the volume of the circulation. This is so because the gold in the ordinary course reaches the Federal Reserve banks, and gold in the vaults of the Reserve banks does not, as noted above, count as money in circulation, though gold and other money in ordinary bank vaults does count as part of the volume of money in circulation. We say this, not for the purpose of criticizing the figures of money in circulation, nor to take exception

thereto, but simply with the view to correcting erroneous impressions and conclusions. The present me od of compiling the statistics has long been in vogue, and we want to caution, as already stated, against laying undue stress on the changes as re-

ported from week to week.

This word of caution seems called for in view of the fact that in the various statistics given out from week to week the item of money in circulation is always singled out for special comment, and it is important to bear in mind that for the reasons enumerated the changes do not possess the significance ordinarily attached to them-that even when they do not lead to false inferences they are far from representing the whole case. This last is a matter of great importance. In its study of the seasonal variations in money in circulation the Reserve Board has collected and compiled a vast mass of statistics bearing on a subject of great interest and value, made all the more serviceable by the Board's illuminating comments thereon. Now that the Board has given us the official definition of money in circulation, it could be wished that the Board would also undertake to explain what "Treasury currency adjusted," as given in the weekly returns for Wednesday night, means, and how it is arrived at. This item has always been a puzzle, and it would tend toward general enlightenment to have the veil of mystery about it removed.

HE report prepared by Judge Samuel Seabury, as counsel to the Hofstadter Committee, which for nearly two years has been investigating financial and political conditions in New York City, possesses a degree of interest and value which extends far beyond the confines of this city. Mr. Seabury, in the course of his investigations, unearthed conditions here which are a great discredit to the city. These same conditions, however, are duplicated in many other cities, where one political party holds overwhelming control and where as a consequence bossism rules, and it seems almost impossible to dislodge the bosses. The report covers 105 printed pages, and Mr. Seabury has drawn the outlines of a new city charter which he asks the New York State Legislature to submit for approval of the people at a referendum election to be held the coming spring. We need not concern ourselves here with the details of the charter, but some of his recommendations have a wide bearing and should find ready acceptance. Describing the rule of Tammany Hall and how it holds control of the city government, Mr. Seabury declares the political machine maintained its power through the "horde of exempt and so-called temporary positions," places which "are in innumerable instances created only to provide revenue to faithful party workers as a recompense for services rendered not to the city but to the organization, while over their heads is kept the threat of dismissal if party loyalty should wane." Enlarging on that point, he says:

"A comparison of the budgets of 1922 and 1932 will give some idea of the extent to which this practice is increasing and what it costs the taxpayers. In 1922 the personal service charge in the budget, exclusive of the Board of Education, courts and quasipublic institutions, was \$198,369,437.89. Of this amount only \$71,829,007.40 was for the salary and wages of regular salaried employees, the balance was appropriated to cover the salaries of additional employees whose number and rate of compensation was not disclosed and the character of whose service was not specified except in general terms.

"By 1932 the personal service charge in the budget had mounted to \$365,534,298.87, of which \$233,-558,559.85, or about 60%, was appropriated for these casual and indefinite employees. Obviously, the taxpayers pay dearly for the maintenance of this sub-

sidized political army.

"The selfish and unsocial motives of the group in control of our city government, coupled with the incentive to insure the continuance of their power by the creation of a large class of dependent employees, who will, by their own votes and the votes of those dependent upon them or interested in them, strive to continue the existing order, results not only in inefficiency but in reckless spending of the city's money.

"It has brought what should be the strongest city in the world, financially speaking, to the verge of default with a public debt of \$2,500,000,000 on which the interest alone is \$200,000,000 a year and an annual budget so great that it was impossible to meet it, and a general financial situation so unbalanced that the public has refused to buy any more of its

obligations."

Mr. Seabury's remedy is a new charter and proportional representation for the minority party. This is a feature that might well be copied in other cities suffering under the dominance of a political machine. On that point he observes:

"I labor under no delusion that minority representation will be the panacea of all our governmental ills. I am convinced, however, that there is every reasonable ground to believe it will result in a tre-

mendous improvement.

"As a result of opposition, protest and difference of opinion, the light of publicity should flood a vast realm of city administration which is now concealed or inadequately exposed; it should tend to diminish the appropriation of large sums of money, ostensibly for city improvement but in truth for the creation of excuses for hiring hordes of party workers; it should tend to the reduction in the number of unnecessary boards, bureaus, departments and commissions now existing only for the purposes of patronage and of the politically appointed and controlled heads thereof; it should tend to a more critical attitude toward the functioning of all the city departments and the elimination of a great deal of favoritism, graft and inefficiency therein."

Mr. Seabury believes in the home rule principle, but obviously where John F. Curry is in undisputed control of the Borough of Manhattan and John H. McCooey in control of the Brooklyn machine, and the political party which they dominate holds an overwhelming proportion of the popular vote, the home rule principle cannot be effectively applied. Therefore, he is moved to say:

"The City of New York stands in immediate need of reform in its governmental structure and methods of carrying on municipal business. Under the Home Rule Amendment and the city home rule law the city itself, through the Municipal Assembly, has the power, upon a referendum of the people, to bring about most if not all of the reforms that I propose.

"The present city government can scarcely be relied upon to act to this purpose, more especially since I propose that the Board of Estimate and the Board of Aldermen be legislated out of existence. Governing boards rarely commit political suicide. Reform by action of the city government under the city home rule law will arrive, if at all, only by a slow and tedious process. Such a process is excellent in theory provided there is no emergency demand. But there is such a demand at present.

"I believe in home rule, but I also believe in good government. The government of the city under its present form and with its present personnel has clearly demonstrated its insufficiency and incompe-It will not initiate reforms that are imtence.

In my judgment it was to meet just such a situation as this that those who drafted and adopted the home rule amendment wisely provided that the Legislature should, despite the home rule grant, still have power, upon an emergency message from the Governor and by two-thirds vote of each house, to enact special city laws.

"I urge the Governor and the Legislature to exercise this power by enacting into law an amendment to the present charter which will embody the basic principles set forth in the charter which I submit herewith. But I would preserve the principle of home rule by providing that such action by the State Legislature shall not be effective unless approved by the voters of the city at a special election called for that single purpose."

A large part of Mr. Seabury's report is devoted to a detailed analysis of the reasons for his recommendations. His analysis of the city's financial condition is keen and he does not mince words. He indicates that if the ruling powers had not constantly indulged in raising assessed values the debt limit as provided by the Constitution would long since have been reached. He points out that the increase in the total funded debt of the city has been more than \$1,000,000,000 in the last 11 years, and that the increase in assessments against real estate had, during that time, been above \$9,000,000,000. Some of the increases in assessments he described as "fantastic." He recalled the testimony of more than 30 real estate experts called from all parts of the city, the consensus of them being that land within the city was over-assessed about 30%.

The authorities of other cities suffering in a similar way cannot do better than to study Mr. Seabury's report, which will always remain a model, and apply his observations and recommendations to their own city affairs so far as they can be made available. Corruption in municipal affairs is one of the unfortunate features in municipal government in many of our large cities, and it is a feature that should be speedily eradicated in the interest not only of good government but in the interest of good morals and the probity of municipal administration.

HE condition statements of the Federal Reserve banks show no very striking changes the present week. After last week's increase in the amount of Federal Reserve notes in circulation from \$2,713,-935,000 to \$2,756,363,000, there is the present week a decrease again to \$2,735,458,000. This is a falling off, roughly, of \$25,000,000. At the same time a decrease of \$43,000,000 is reported in the total amount of money in circulation. We have explained above how changes in money in circulation are apt to be misleading, and it may be that the changes in amount of Federal Reserve notes in circulation are a better indication of current conditions than those based on money of all kinds in circulation under the method of compiling the figures. Last week the holiday demand for currency evidently added to the amount of Federal Reserve notes in circulation, but already the present week this is returning, the necessary contraction being in the amount of Federal Reserve notes outstanding.

Reserve credit outstanding, as measured by the volume of securities held, has again been further reduced, though only in very small measure, the amount the present week being \$2,157,075,000 as against

\$2,159,806,000 the previous week. The shrinkage is almost entirely in the discount holdings, reflecting member bank borrowing, which each week is being further reduced. The discount holdings this week stand at \$267,382,000 as against \$270,315,000 last week. The holdings of acceptances purchased in the open market and now composed almost entirely of foreign bills, largely in the nature of frozen assets, stand at \$33,307,000 Dec. 28 as against \$33,221,000 Dec. 21. The holdings of United States Government securities also continue without change, at least as far as the grand total is concerned, though there are some changes in the separate items composing the total. For Dec. 28 the amount is reported at \$1,850,-737,000, in comparison with \$1,850,699,000 on Dec. 21. Gold held abroad has been reduced during the week from \$95,550,000 to \$72,638,000, indicating shipment of \$22,912,000 of the metal from England out of the debt payment to the United States made by Great Britain on Dec. 15. This shipment of \$22,912,000, along with other importations, served to swell gold reserves of the Federal Reserve institutions from \$3,111,621,000 to \$3,148,531,000 during the week. Notwithstanding this large augmentation in gold reserves and a reduction in the outstanding volume of Federal Reserve notes, as already indicated, the ratio of total reserves to deposit and Federal Reserve note liabilities combined has risen only from 62.2% to 62.7%. This small rise in ratio is explained by the fact that deposit liabilities during the week increased from \$2,521,398,000 to \$2,563,238,000, the greater part of the augmentation being due to the increase in member bank reserves from \$2,446,056,000 to \$2,481,674,000.

The amount of United States Government securities used as part collateral for Federal Reserve notes outstanding decreased during the week from \$471,-600,000 to \$428,500,000. Holdings of bankers' acceptances for foreign central banks record very little change, the amount this week being reported at \$36,-338,000 as against \$36,171,000 last week. Foreign bank deposits held by the Federal Reserve institutions also show only a very slight change, with the figure this week at \$19,053,000 as against \$19,221,000 last week.

COME further dividend reductions and omissions have the present week been added to the long list of those that have marked the record during the period since the autumn of 1929. The Puget Sound Power & Light Co. omitted the quarterly dividend on both the \$5 cumul. prior pref. stock and the \$6 cumul. pref. stock. McCrory Stores Corp. deferred the quarterly dividend payments on the 6% cumul. conv. pref. stock until more definite results as to the year's operations are known. The Hershey Chocolate Co. declared a quarterly dividend of only \$1.25 a share on the common stock and the regular quarterly dividend of \$1 a share and an extra dividend of \$1 a share on the conv. pref. stock. Quarterly dividends of \$1.50 a share were paid on the common shares during 1932, besides which an extra dividend of \$1 a share was also paid on Feb. 15 1930, 1931 and 1932. The Horn & Hardart Co. of New York reduced the quarterly dividend on common from $62\frac{1}{2}$ c. a share to 50c. a share. The American Light & Traction Co. likewise reduced the quarterly dividend on common from 621/2c. a share to 50c. a share. The Montreal Tramways Co. reduced the quarterly dividend on common from \$2.50 a share to \$2.25 a share. The Bucyrus-Monighan Co. reduced the dividend on class B stock to 60c. a share as compared with \$1.10 a share paid the previous year.

As a welcome deviation, the directors of the Northwestern Improvement Co., a wholly owned subsidiary of the Northern Pacific Railway Co., declared the regular annual dividend of 4%, amounting to \$992,000, and also a special dividend of \$5,600,000. Declaration of this special dividend, however, it is stated, will not involve any transfer of cash from the Northwestern Co. to the parent railroad, since it serves merely to cancel an indebtedness incurred by the carrier during the year for coal and other items. Last year the Northwestern Improvement Co. declared a special dividend of \$5,000,000. The company was organized in 1897 to acquire certain assets of the Northern Pacific Co., including land, coal mines and iron ore properties.

HE New York stock market, while somewhat irregular on Saturday last, showed a disposition to rally on Tuesday after the Christmas holiday on Monday, and this rallying tendency has continued the rest of the week, though it was interrupted on Wednesday by heavy selling of General Motors stock in which liquidation of a large block of stock was in progress. There appears to have been extensive selling of stocks throughout the list in order to establish losses in income tax returns before the close of the year, but at the same time there seems also to have been extensive covering of outstanding short commitments. As a result the market at times had a confused appearance. Bonds gave a good account of themselves, and this had a strengthening influence on the share list, and many foreign government issues, in particular German bonds, established substantial gains. The railway list, while not giving any particular evidence of strength, and New York Central stock at times being distinctly weak, yet showed a rising tendency on the whole, this being due to the fact that the November returns of earnings as they have been coming in registered in many cases increases in net earnings as compared with a year ago in the face of continued heavy shrinkage in gross revenues, indicating sharp contraction in operating expenses.

The "Iron Age," while describing 1932 as a disastrous year in the steel industry, nevertheless took occasion to say that the year ended with "better production than expected," this statement being based on the fact that the steel mills of the country dropped to only 13% of capacity, which, though being 1% smaller than the 14% of capacity of the previous week, nevertheless did not fall quite so low as 12%, the low point reached during the holiday period of the Fourth of July. The holiday suspensions were given as a reason for the further decline to 13%. Copper showed greater firmness, some of the metal selling at 51/8e. a pound c.i.f. European ports; the volume, however, was said to have been small and the offerings light, while the domestic market held firm at 5c. for delivery to the end of March, with 51/8 and 51/4c. ruling for second quarter shipments. In the oil trade there appeared to be fears of a further reduction in crude petroleum. Silver dropped to new low records in all time, the London price on Dec. 29 touching 163% pence per ounce and the New York price to 24%c. per ounce. The sterling rate of exchange also weakened somewhat, cable transfers on London being effected at a range of

3.301/8@3.311/4 yesterday as against a range of 3.325/8@3.331/2 on Friday of last week. Wheat prices showed a sagging tendency, but later recovered, and the December option for wheat at Chicago closed yesterday at 433/8c. as against 431/4c. on Friday of last week. Cotton developed an improving tendency, and the spot price for cotton here in New York yesterday was 6.10c. as against 5.95c. on Friday of last week. Of the stocks on the New York Stock Exchange, 59 fell to new low figures for 1932 during the present week and 20 stocks established new high records for the year. The Stock Exchange call loan rate again remained unaltered at 1%.

Trading has been on a somewhat larger scale the present week. At the half-day session on Saturday last the sales on the New York Stock Exchange were only 329,699 shares; Monday was Christmas Day and a holiday; on Tuesday the sales were 801,578 shares; on Wednesday, 1,581,670 shares; on Thursday, 1,607,289 shares, and on Friday, 1,045,224 shares. On the New York Curb Exchange the sales last Saturday were 85,310 shares; on Tuesday, 198,943 shares; on Wednesday, 317,890 shares; on Thursday, 447,962 shares, and on Friday, 190,937 shares.

As compared with Friday of last week, prices are irregularly changed, but moderately higher as a rule. General Electric closed yesterday at 151/4 against 14% on Friday of last week; Brooklyn Union Gas at 79 against 76; North American at 291/2 against 265/8; Standard Gas & Elec. at 13 ex-div. against 13; Consolidated Gas of N. Y. at 593/4 against 575/8; Pacific Gas & Electric at 301/2 ex-div. against 293/4; Columbia Gas & Elec. at 163/8 against 151/8; Electric Power & Light at 63% against 55%; Public Service of N. J. at 531/8 against 507/8; International Harvester at 211/2 against 20; J. I. Case Threshing Machine at 421/4 against 371/2; Sears, Roebuck & Co. at 193/8 against 18; Montgomery Ward & Co. at 131/4 against 123/4; Woolworth at 36 against 35; Safeway Stores at 41 against 383/4; Western Union Telegraph at 28 against 25; American Tel. & Tel. at 105 against 1013/8; International Tel. & Tel. at 67/8 against 57/8; American Can at 55% against 52%; United States Industrial Alcohol at 25% against 23½; Commercial Solvents at 101/4 against 95/8; Shattuck & Co. at 87/8 against 9, and Corn Products at 541/4 against 50.

Allied Chemical & Dye closed yesterday at 831/8 against 761/2 on Friday of last week; Associated Dry Goods at 33/4 against 33/4; E. I. du Pont de Nemours at 37% against 35%; National Cash Register "A" at 8 against 75%; International Nickel at 81/4 against 71/2; Timken Roller Bearing at 141/2 against 14; Johns-Manville at 201/2 against 181/4; Gillette Safety Razor at 181/8 against 175/8; National Dairy Products at 17 against 17; Texas Gulf Sulphur at 221/2 against $21\frac{1}{4}$; Freeport Texas at $25\frac{1}{2}$ against $22\frac{3}{4}$; American & Foreign Power at 61/4 against 61/8; United Gas Improvement at 20 against 19; National Biscuit at 39\% against 38\frac{1}{2}; Coca-Cola at 74 against 70\frac{1}{4}; Continental Can at 393/8 against 373/4; Eastman Kodak at 551/2 against 521/4; Gold Dust Corp. at 151/4 against 141/8; Standard Brands at 15 against 133/4; Paramount Publix Corp. at 11/8 against 11/8; Kreuger & Toll at 1/8 against 1/8; Westinghouse Electric & Manufacturing at 281/4 against 253/8; Drug, Inc., at 36½ against 34¼; Columbian Carbon at 29 against 26½; Reynolds Tobacco class B at 28½ against 29½; Liggett & Myers class B at 52 against 541/4; Lorillard at 121/4 against 121/2, and Yellow Truck & Coach at 3 against 23/4.

The steel shares have fluctuated with the general market. United States Steel closed yesterday at 273/4 against 261/4 on Friday of last week; United States Steel preferred at 601/2 against 561/2; Bethlehem Steel at 141/2 against 121/2, and Vanadium at 12½ against 105%. In the auto group Auburn Auto closed yesterday at 50% against 45% on Friday of last week; General Motors at 131/8 against 127/8; Chrysler at 161/2 against 151/8; Nash Motors at 133/8 against 125/8; Packard Motors at 21/4 against 2; Hupp Motors at 21/4 against 23/8, and Hudson Motor Car at 41/2 against 41/2. In the rubber group Goodyear Tire & Rubber closed yesterday at 151/8 against 14 on Friday of last week; B. F. Goodrich at 41/2 against 41/8; United States Rubber at 4 against 4, and the preferred at 81/8 against 75/8.

The railroad shares have displayed growing firmness. Pennsylvania RR. closed yesterday at 14¼ against 13½ on Friday of last week; Atchison Topeka & Santa Fe at 41½ against 36½; Atlantic Coast Line at 18 against 16; Chicago Rock Island & Pacific at 3¾ against 3; New York Central at 17½ against 15; Baltimore & Ohio at 9 against 7¾; New Haven at 14¾ against 11¾; Union Pacific at 71¾ against 65¼; Missouri Pacific at 2½ against 2½; Southern Pacific at 16¾ against 13½; Missouri-Kansas-Texas at 5¾ against 5; Southern Railway at 4½ against 4¼; Chesapeake & Ohio at 27¼ against 24½; Northern Pacific at 13 against 12¾, and Great Northern at 8⅓ against 6¼.

The oil shares have moved with the general list. Standard Oil of N. J. closed yesterday at 30¾ against 29½ on Friday of last week; Standard Oil of Calif. at 24¾ against 23¾; Atlantic Refining at 16⅓ against 15¾, and Texas Corp. at 13⁵% against 13. The copper group has improved with the rest of the list. Anaconda Copper closed yesterday at 7⅓ against 5¾ on Friday of last week; Kennecott Copper at 8⅓ against 7⅓; American Smelting & Refining at 12⅓ against 11; Phelps Dodge at 5 against 4⅓; Cerro de Pasco Copper at 6⅓ against 5⅙, and Calumet & Hecla at 2⅓ against 2.

PRICE movements were generally favorable this week on stock exchanges in the leading European financial centers. The London Stock Exchange was closed until Wednesday, in observance of the Christmas holidays, but the Paris and Berlin markets reopened Tuesday. The volume of business transacted was very small in all markets, but the tone was cheerful. Christmas trade far exceeded expectations in Great Britain and Germany, department stores in the larger cities reporting striking gains over last year notwithstanding the lower values now prevalent. Impressive improvement in the heavy industries of these countries also is reported. Money rates remain low in all important markets, no changes of note having been occasioned by the gold movement to New York now in progress. Securities markets were again stimulated this week by these favorable aspects of the European situation, which are considered more significant than the unfavorable items. Foremost among the latter must be listed the unemployment in all countries, which does not reflect the trade and industrial improvement reported. National budgets constitute a second problem that crops up persistently, despite the efforts of all legislatures to achieve a balance of income and expenditures.

Trading on the London Stock Exchange was resumed Wednesday, after the long holiday suspension, with a firm tone in almost all sections. British funds were quiet but slightly higher. What trading there was centered largely in industrial stocks, which advanced as a group. Keen interest was aroused by the monetary developments in South Africa, but Kaffir gold mining stocks were mostly lower owing to a profit-taking by speculators who anticipated the lapse from the gold standard. A sharp upswing in German bonds featured the international list. Business expanded to a degree on the London Exchange, Thursday. British funds were a shade easier, in line with sterling exchange. Industrial stocks resumed their upward movement, and good features also appeared in communications stocks. South African mining shares were mixed, while most of the international stocks reflected better sentiment. Turnover was modest at London yesterday. Kaffir gold mining issues improved sharply, as a result of the definite suspension of the South African gold standard. British funds were steady, while industrial stocks gained.

The Paris Bourse was steady in the first business session of the week, Tuesday. Bank stocks were stimulated by the declaration of a Bank of France dividend of 100 francs for the second half-year, making the total dividend 200 francs for 1932. This compares with aggregate dividends of 384 francs last year, but the market considered the return a favorable one and shares of the French banking institutions were in demand. Industrial issues were mostly unchanged, but international securities were improved. The session Wednesday was exceptionally quiet, but there were no great changes in quotations. German bonds were marked up in accordance with the universal trend. Most French securities closed with small losses. Trading was almost at a standstill, Thursday. The tendency was firm in all sections, with gains especially pronounced in German bonds. A firm tone prevailed in yesterday's session at Paris.

The Berlin Boerse was fairly active in the initial trading session of the week, with the tendency good. Reichsbank shares were in excellent demand, and a substantial part of the aggregate market turnover occurred in this issue. Mining stocks also were favored, while some sizable advances appeared in electrical issues as well. Chemical and shipping issues were relatively quiet. An irregular session followed, Wednesday, partly because of unsatisfactory overnight reports from New York. Profittaking affected the mining and electrical stocks, but Reichsbank shares were well maintained. Most industrial issues were somewhat softer, as attention was turned to fixed interest securities, which were very firm. The tendency in Thursday's dealings again was uncertain, with the volume of trading declining. Bonds were materially better, but equity issues moved diversely. Lower prices were registered in stocks at the opening, but improvement toward the close wiped out most of the losses. The trend toward improvement was maintained yesterday.

WAR debt discussions between European nations and the United States Government were brought to a temporary end, this week, pending the change in the Washington administration on Mar. 4, next. It has been made clear in Washington reports that this sound procedure will be followed, unless some unforeseen developments occur. President

Hoover having been unsuccessful in his attempt to secure the co-operation of President-elect Roosevelt for an immediate survey, the problem will be handed over to the President-elect on Mar. 4 in its present condition, it is stated. Governor Roosevelt, it is said, will continue in the meanwhile to study the war debt situation, in preparation for the negotiations which now seem inevitable. What form such discussions will take will, no doubt, be the subject of a great deal of conjecture during the next two months. No definite suggestions have been made as yet, and it is unlikely that any authoritative information will be available until after Mr. Roosevelt's inauguration.

The default by France on the interest payment of \$19,261,432 due Dec. 15 apparently is causing an understandable and continuing concern in Paris. Former Premier Edouard Herriot, who fell when the Chamber of Deputies refused to vote funds for the payment, argued almost every day in the Chamber, this week, that the payment must be made and France's word thus honored. Joseph Paul-Boncour, as the present President of the Council, indicated his concern with the problem when he called on United States Ambassador Walter E. Edge late last week. Premier Paul-Boncour's course of action, as he stated in his Ministerial declaration, is "traced out by the Chamber's vote" against payment. His call on Mr. Edge was evidently little more than a diplomatic courtesy, as the entire diplomatic corps in Paris was similarly honored. The Premier made it plain, however, that his Government is anxious to continue negotiations with the United States, while respecting the wishes of the Chamber. But the attitude of the Washington Government also is unchanged. Authoritative statements were made, Tuesday, that payment of the sum now overdue is an indispensable preliminary to any negotiations with France for debt revision. The unfounded rumors circulated after the Premier's visit to Mr. Edge have found a reflection in elaborate precautions against similar misunderstandings when Mr. Edge makes the traditional return call today. The Ambassador, it is stated, will merely shake hands with M. Paul-Boncour in the presence of the entire diplomatic corps when these representatives assemble at the Elysee Palace this morning.

The French debt default already is proving embarrassing to that country in other connections. A Government proposal to guarantee a loan to Austria of approximately \$14,000,000 was placed before the Finance Commission of the Chamber of Deputies, Tuesday, in accordance with the agreement reached last summer for an international loan aggregating about \$42,000,000. Pointed comment on this proposal was made in a number of French journals to the effect that the sum really owing to the United States was refused, while an almost equal amount is now to be turned over to Austria, to whom France "owes nothing except the shells she fired at us." When the bill was placed before the Chamber itself, Thursday, determined opposition was expressed by Louis Marin, leader of the Nationalists. "How could we lend to Austria after our gesture toward the United States, our ally who fought on our side?" he asked. Approval of the loan was voted late the same day, however, by 352 to 188, after Premier Paul-Boncour made the question a matter of confidence in his regime. The bill was sent to the Senate for consideration by the upper house of the Parliament, which voted its approval yesterday.

HE impending change in the Administration at Washington made necessary some unusual measures, this week, to insure continuance of properly qualified American representation at the General Disarmament Conference in Geneva, and at the conference called to prepare an agenda for the World Economic Conference. President Hoover has virtually relinquished the conduct of foreign affairs that do not require immediate attention and on which his policy might differ from that of his successor. A method for giving due weight to Presidentelect Roosevelt's views was found this week, when Norman H. Davis, American representative at Geneva, exchanged views both with Mr. Hoover and with Governor Roosevelt. Mr. Davis, who is a Democrat, served first as Under-Secretary of the Treasury and then as Under-Secretary of State in the Wilson Administration. He spent three months in Geneva and other European centers as the special representative of the United States Government on disarmament and economic matters, returning Dec. 22. He conferred the following day with President Hoover and Secretary of State Stimson in Washington. A further talk on the problems which have been his peculiar province lately was held by Mr. Davis with Governor Roosevelt at Albany, Monday.

Mr. Davis returned to this city the following day, and discussed the agenda for the World Economic Conference with Professors Edmund E. Day and John H. Williams, who sailed Wednesday to attend the preparatory meeting of experts in Geneva, Jan. 9, for the World Economic Conference. It is now believed that progress can be made on the disarmament and economic questions along lines that will not embarrass the President-elect when he takes up the problems more definitely after Mar. 4. The suggestion was made in Albany reports, this week, that tariffs may constitute a more important part of the World Economic Conference than was contemplated originally by President Hoover. This meeting probably will not take place, however, until next summer. Disarmament was discussed in general terms by Mr. Davis in New York, Wednesday. He predicted reduction in armaments by the nations of the world in the comparatively near future "unless something happens."

COUTH AFRICA was forced off the gold standard, Tuesday, as the result, it is understood of the reentry into politics of Judge Tielman Roos, who advocated the formation of a coalition Government and the depreciation of the South African pound sterling. Eric H. Louw, South African Minister to Washington, stated Thursday that the strained political situation and the feeling of insecurity caused by the demands of Judge Roos led to abnormally heavy purchases of foreign exchange and the withdrawal of gold coins from circulation. Judge Roos, as the leader of the Nationalist party in the Union, gained popularity through his advocacy of currency devaluation, a Cape Town dispatch to the New York "Times" states, as maintenance of the gold standard was generally unpopular. Prime Minister J. B. M. Hertzog called a Cabinet meeting, Monday, and debated the question of resignation with his Ministers, but no action to this end was taken. There was a good deal of confusion early this week, as to whether the Union was on or off the gold standard. Measures actually taken appeared to indicate abandonment of the gold standard, but the Government was said to have decided to remain on the standard. All doubts on the point were removed Thursday, when it was announced officially that the gold standard had been abandoned. The incident is especially interesting, since the Union produces more than half the gold mined in the world.

In order to ease the strain caused by the demand for foreign exchange and the hoarding of gold, official announcement was made, Tuesday, that the Reserve Bank had been relieved from responsibility for redeeming notes in gold. "Although the Government protests its adherence to the gold standard, the effect of this regulation is much the same as if it had been abandoned," a report to the New York "Times" remarked. "The export of gold by South African banks will be controlled, gold sovereigns will be withdrawn from circulation, and exchange quotations must be made by banks on this basis," it was added. Reports of Wednesday indicated that an attempt might be made to keep South Africa on the gold standard externally, and off it internally. Johannes Postmus, Governor of the Reserve Bank, and a firm advocate of the gold standard, was said to be determined to maintain the international value of the currency by paying externally in gold. Late the same day, however, the Chamber of Mines at Johannesburg informed Finance Minister Havenga that the Reserve Bank had refused to honor its notes in gold, and that the agreement for the sale of gold to the Reserve Bank had thereby been abrogated. The Chamber reserved the right to sell its gold to the highest bidder. Finance Minister Havenga declared thereafter that South Africa is "virtually off the gold standard." The Reserve Bank issued a statement Thursday that "exchange rates are canceled; the Bank is not quoting to-day." Quotations on London again were made by the South African banks yesterday, with the rate per £100 British at £91 South African, as against the former level of £70 South African.

REPRESENTATIVES of the British Government and of various groups of the Indian peoples completed last Saturday the third of the Round Table Conferences regarding the Constitution under which a measure of autonomy is to be granted India. Many important points were settled at the third conference, which began Nov. 17, with representatives of almost all groups excepting the Indian Nationalists present. The followers of Mahatma Gandhi, who is still in jail at Poona, refused to participate, and there is considerable doubt, for this reason, regarding the acceptability of the Round Table Conference findings to the Indian people as a whole. The final conference was concerned chiefly with the financial and defense safeguards upon which the British authorities insisted. During the final session of the last conference, a week ago, it was indicated that the conclusions will now be incorporated in a Government White Paper, which will become the basis for legislation to be placed before the British Parliament during 1933. London dispatches indicate, however, that it may be some years before the proposed constitutional changes are placed in full effect.

The new Constitution will provide, essentially, for a vast Federation of the Provinces of British India and the States ruled by the Indian Princes. It will become effective only if more than half the ruling Princes agree to enter the Federation. Provisions

will be made for a Cabinet on the British model and a bi-cameral legislature. The question of representation in the legislature was settled by the British Government award of last summer, made after the Hindus and Moslems failed to compose their differences on this point. In the third Round Table gathering favorable consideration was given a report by the Marquess of Lothian recommending broadening of voting powers in India and the enfranchisement of millions of Indian women. The final sessions of the third conference were concerned chiefly with the financial safeguards. A report submitted Dec. 23 recommended that the Governor-General of India should keep, regarding budgetary arrangements and borrowing powers, "such essential powers as would enable him to intervene if methods were being pursued which would, in his opinion, seriously prejudice the credit of India in the money markets of the world." A financial adviser, presumably British, is to assist the Governor-General in these duties, a London dispatch to the New York "Times" remarks. It is also provided that an Indian Reserve Bank is to be established before the Federation is formed under the new Constitution. A delay of five years or more is considered likely on this basis, the dispatch states, owing to present economic conditions. The safeguards which, in effect, place the control of Indian fiscal affairs in the hands of a British administrator, are unpalatable to the Indians, who are greatly concerned over the prospect of delay.

The political differences which resulted in the imprisonment of Mahatma Gandhi were prominent in the closing sessions of the gathering. Sir Tej Bahadur Sapru, leader of the Indian Moderates, made an appeal to the British representatives for the release of Mr. Gandhi in order to placate sentiment in India and make possible a wider discussion of political questions than is feasible under present conditions. "So far as Mr. Gandhi is concerned, he will simply refuse to discuss any political question with me or anyone else inside jail," Sir Tej declared. "He is far too honorable to break any rule of the jail. I do not agree with the estimates which have been supplied to the British public on political sentiment in India. The situation there has been very serious and the amount of dissatisfaction, discontent and bitterness is far greater than at any previous time in my experience. I ask people to wake up to realities. I am not an alarmist and I am not a National Cangress man, but I suggest that the Congress is still a power. We want to discuss these Constitutional questions among ourselves and with men of the Congress party, and it is impossible to do so as long as Mr. Gandhi is in jail."

Sir Samuel Hoare, Secretary of State for India, closed the final plenary session with a speech in which he promised to consider the question of Mr. Gandhi's release carefully and without prejudice. Referring to the "eloquent appeal of Sir Taj Badahur Sapru for a chapter of renewed co-operation between every section of Indian opinion and ourselves," Sir Samuel remarked: "There is nothing I should desire more myself." Whatever the decision may be, he added, "the thing we wish above all others is that he and his friends shall go back to India and tell every section of Indian opinion that there is an opportunity for their help and that we need their help." Sir Samuel indicated, at the same time, his belief that a scheme will be produced which will

be a credit both to British and to Indian statesmanship. He refused, however, to fix any date for establishment of the Federation, merely pledging that this will be accomplished "at the earliest possible moment." Chief results of the conference, as summed up by Sir Samuel, are: "First, we have clearly delimited the field upon which the future Constitution is going to be built in a much more detailed manner than in the last two years; we have delimited the spheres of activity of various parts of the Constitution; secondly, we have created an esprit de corps among all of us that is determined to see the building that is going to be reared upon this field both complete in itself and completed at the earliest possible date. My advice to the Indian people is to strive for the ideally perfect, but to accept as an installment the practically possible."

IPLOMATIC efforts by neutral nations to arrange a truce in the undeclared war between Bolivia and Paraguay remain unsuccessful, and hostilities are now raging on a larger scale than at any previous time since fighting started last June. The Commission of neutrals in Washington, composed of representatives of the United States, Colombia, Cuba, Mexico and Uruguay, suggested Dec. 15 that the two countries agree to suspend hostilities and submit their dispute regarding the boundaries of the Gran Chaco area to arbitration. The proposal called for the withdrawal of Paraguayan troops to the Paraguay River, and the withdrawal of Bolivian forces to a line running from Fort Ballivian on the Pilcomayo River to Fort Vitriones. The juridical position of either party would remain unimpaired, and negotiations would be started promptly regarding a basis for arbitration, the proposal stated. Bolivia promptly indicated that it regarded this suggestion with favor, but Paraguay rejected the proposal as "unsatisfactory and unjust," since Bolivian forces would be left in occupation of half the Gran Chaco, while Paraguayan troops would be withdrawn from the area entirely. Juan Soler, Paraguayan delegate at the Commission meetings in Washington, was ordered to return to Ascuncion and he started on the journey Tuesday. It was indicated in Buenos Aires dispatches of last Saturday that the Argentine Government is considering a further offer of its services in behalf of the re-establishment of peace. Diplomatic "feelers" put out made it appear that Paraguay might agree to such endeavors, but Bolivia would object. In view of this situation, consideration was given in Washington for a time to a proposal for an embargo on arms shipments to countries at war, but no action has been taken.

The tide of this war has now turned with some difiniteness in favor of the Bolivians. The Paraguayan armies were successful for several months in their endeavor to drive their opponents back. A number of the tiny "forts" occupied in peace times by the Bolivians fell into Paraguayan hands during the autumn months. It was generally believed that the advent of the rainy season would force a cessation of hostilities, chiefly because of the difficulty of transporting troops from the relatively distant Bolivian centers of population. The Bolivians constructed a new 75-mile road, however, along the dry Platanillos-Ballivian route, and they were able to continue the struggle with augmented forces. Buenos Aires dispatches stated, early this week, that a new army of 20,000 Bolivians had been sent to the

area, augmenting the forces on this side to 60,000 men. The German General, Hans Kundt, who trained the Bolivian forces and directed their operations from La Paz, assumed personal command in the battle area, Monday. There are no recent official reports of the number of Paraguayans in the field, but they are estimated by observers at 20,000 to 30,000. A truce of 48 hours was observed by the two armies over the Christmas holidays at the request of the Pope, but hostilities were resumed Monday by Bolivian bombing planes, which swept over a wide area. The Bolivian troops resumed the offensive at the same time, with a drive that is obviously designed to recapture Fort Boqueron and other points lost to the Paraguayans in September. It is believed in Buenos Aires, dispatches state, that General Kundt will attempt to push on to the railheads of two narrow-gauge roads running from the Chaco to Puerto Casado and Concepcion on the Paraguay River, and thus carry the operations into acknowledged Paraguayan territory.

NUMEROUS recent developments in Latin America reflect the political unrest which has prevailed ever since the business depression became acute more than three years ago. There is an unfortunate prospect of an informal war between Colombia and Peru over the possession of the tiny port of Leticia on the Amazon River. Peruvians seized the village on Sept. 1, although it was for many years under the Colombian flag. Efforts by neutrals to adjust this conflict peacefully have been unavailing. Colombian authorities are treating the incident as a matter of internal violence, calling for police action, but it is generally expected that Peru will interfere. Both countries are making extensive preparations for war.

In the Central American republic of Honduras revolutionary activities have been in progress for some weeks, and a battle is now considered imminent. General Jose Maria Reina heads the insurgent forces, while the Nationalist troops are under the command of his brother, General Camillo Reina. Minor engagements already have occurred in this conflict. Preparations have been made in Nicaragua for the withdrawal of the last contingents of United States marines, in accordance with the arrangements made earlier this year. The withdrawal will be completed by Jan. 2 1933. Malcontents in that country gave emphatic evidence of their warlike intentions, Tuesday, when an insurgent band attacked a detachment of 70 Nicaraguan guardsmen. Three guardsmen and 22 rebels were killed in this engagement.

THERE have been no changes the present week in the discount rates of any of the foreign central banks. Present rates at the leading centers are shown in the following table:

DISCOUNT RATES OF FOREIGN CENTRAL BANKS.

In London open market discounts for short bills on Friday were 1 1/16@11/8%, as against 11/8@11/8% 1 3/16% on Friday of last week, and 1 1/16@11/8% for three months' bills, as against 11/4@11 5/16% on Friday of last week. Money on call in London on Friday was 3/4%. At Paris the open market rate remains at 1%, and in Switzerland at 11/2%.

HE Bank of England statement for the week ended Dec. 28 shows a loss of £34,359 in gold holdings and this, together with an expansion of £1,095,000 in circulation, brought about a decline of £1,130,000 in reserves. Gold holdings now aggregate £120,593,672, in comparison with £121,348,721 a year ago. Public deposits increased £1,040,000 and other deposits £3,282,690. The latter consists of bankers accounts which rose £3,511,314 and other accounts, which fell off £228,624. The reserve ratio dropped further to 16.82% from 18.14% a week ago, and compares with 18.45% last year. Loans on Government securities increased £2,695,000 and those on other securities £2,840,948. The latter consists of discounts and advances which rose £6,-676,435, and securities which decreased £3,835,487. The rate of discount is the same at 2%. Below we furnish a comparison of the different items for five years:

a On Nov. 29 1928 the fiduciary currency was amalgamated with Bank of England note issues, adding at that time £234,199,000 to the amount of Bank of England notes outstanding.

HE Bank of France statement for the week ended Dec. 23 reveals a decrease in gold holdings of 148,364,459 francs. The Bank's gold now stands at 83,119,500,173 francs, in comparison with 68,481,174,225 francs last year and 53,577,608,974 francs the previous year. Increases are shown in credit balances abroad of 49,000,000 francs and in French commercial bills discounted of 610,000,000 while bills bought abroad, advances against securities and creditor current accounts record decreases of 23,000,000 francs, 42,000,000 francs and 120,000,000 francs respectively. Notes in circulation rose 530,-000,000 francs, raising the total of notes outstanding to 82,565,068,350 francs. Circulation a year ago was 83,546,911,580 francs and two years ago 76,436,-267,485 francs. The proportion of gold on hand to sight liabilities is now at 77.72%, last year it was 60.57%. Below we furnish a comparison of the various items for three years:

HE Bank of Germany statement for the third quarter of December shows an increase in gold and bullion of 1,539,000 marks. The total of bullion is now 800,076,000 marks, which compares with 984,886,000 marks a year ago and 2,215,597,000 marks two years ago. Increases appear in silver and other coin of 27,831,000 marks, in notes on other German banks of 62,000 marks, in investments of 554,000 marks, in other assets of 57,674,000 marks and in other daily maturing obligations of 32,231,000 marks. Notes in circulation reveal a decline 29,200,-000 marks, reducing the total of the item to 3,371,-244,000 marks. The total of circulation last year was 4,512,131,000 marks and the previous year it was 4,275,312,000 marks. Reserve in foreign currency, bills of exchange and checks, advances and other liabilities record decreases of 83,000 marks, 95,827,000 marks, 7,287,000 marks and 18,568,000 marks respectively. The proportion of gold and foreign currency to note circulation, at 27.2% compares with 25.6% last year and 64.4% the previous year. A comparison of the various items for three years appears below:

HERE has been no change of any importance in the New York money market this week. Funds remained available in huge amounts, and even the heavy requirements of the year-end failed to make so much as a dent in the market. Call loans on the New York Stock Exchange prevailed at 1% for all transactions, whether renewals or new loans. In the unofficial "Street" market, call loans were arranged at 1/2% Tuesday, 3/4% Wednesday, 5/8% Thursday, and 3/4% yesterday. Time loans were unchanged at their former range of ½ to 1%. Brokers' loans against stock and bond collateral declined \$1,000,000, according to the usual tabulation by the Federal Reserve Bank of New York, which covered the week to Wednesday night. Gold movements for the same period reflected a net gain in United States stocks of \$15,728,000. Imports of the metal at New York amounted to \$39,057,000, but this sum included \$22,912,000 from England which had previously been earmarked by the Bank of England for account of the New York Federal Reserve Bank. There was a net increase of \$885,000 in gold earmarked here for foreign account. Arrivals at San Francisco in the period amounted to \$468,000. There were no exports.

DEALING in detail with call loan rates on the Stock Exchange from day to day, 1% was the ruling quotation all through the week both for new loans and renewals. The time money market has shown no improvement this week. Rates are quoted nominally at ½% for 30 to 90 days, ½@¾% for four months and ¾@1% for five and six months. There has been some improvement in the demand for commercial paper this week. The market has

been brisk and more paper is available. Quotations for choice names of four to six months' maturity are $1\frac{1}{2}@1\frac{3}{4}\%$. Names less well known are 2%. On some very high-class paper occasional transactions at $1\frac{1}{4}\%$ are noted.

HE demand for prime bankers' acceptances has been fairly good this week, but there is little paper available. Rates are unchanged. The quotations of the American Acceptance Council for bills up to and including three months are ½% bid, 3/8% asked; for four months, 5/8% bid and 1/2% asked; for five and six months, 7/8% bid and 3/4% asked. The bill buying rate of the New York Reserve Bank is 1% for 1 to 90 days; $1\frac{1}{8}$ % for 91 to 120 days, and $1\frac{1}{2}$ % for maturities from 121 to 180 days. The Federal Reserve banks show a trifling increase in their holdings of acceptances, the total having moved up from \$33,221,000 last week to \$33,307,000 this week. Their holdings of acceptances for foreign correspondents increased during the week from \$36,171,000 to \$36,-338,000. Open market rates for acceptances are as follows:

	SPOT DELIVE ——180 Days—		150	Days-	120 Days		
	Bid.	Asked.	Bld.	Asked.	Btd.	Asked.	
Prime eligible bills	36	34	36	34	98	35

Prime eligible bills	36	36	36	3/8	3/2	3/6	
FOR DELIVI						*/~ *!	

THERE have been no changes this week in the rediscount rates of the Federal Reserve banks. The following is the schedule of rates now in effect for the various classes of paper at the different Reserve banks:

DISCOUNT RATES OF FEDERAL RESERVE BANKS ON ALL CLASSES AND MATURITIES OF ELIGIBLE PAPER.

Federal Reserve Bank.	Rate in Effect on Dec. 30.	Previous Rate.	
Boston	314	Oct. 17 1931	236
New York	216	June 24 1932	3
Philadelphia	31/2	Oct. 22 1931	3
Cleveland	316	Oct. 24 1931	3
Richmond	31/4	Jan. 25 1932	4
Atlanta	31/2	Nov. 14 1931	3
Chicago	21/2	June 25 1932	336
St. Louis	316	Oct. 22 1931	236
Minneapolis	31/4	Sept. 12 1930	4
Kansas City	31/2	Oct. 23 1931	3
Dallas	31/2	Jan. 28 1932	4
San Francisco	31/2	Oct. 21 1931	236

STERLING exchange has tended slightly lower. Trading since just before Christmas has been largely confined to actual needs pending the turn of the year, hence the market is dull. Another reason for the inactivity is the great lack of commercial bills due to the shrinkage in international trade. The London market was closed from Saturday, Dec. 24 to Tuesday, Dec. 27, inclusive, and is also closed to-day. The range this week has been from 3.335% to 3.30 for bankers' sight bills, compared with a range of from 3.31 to 3.341/8 last week. The range for cable transfers has been from 3.3334 to 3.301/8, compared with a range of from 3.311/8 to 3.341/4 a week ago. There can be no decided change in the trend of sterling now for a few days at least. Last week when the rate for cable transfers ran up to 3.341/4 the market had evidence that the London authorities were active, operating to hold the rate down. According to the best informed London opinion, British industrial interests are opposed to a higher rate, while of course, all extreme fluctuations in either direction are harmful. Present ranges and the high of Wednesday a week ago, 3.341/4, compare with the

all-time low of 3.14½, quoted in New York on Tuesday, Nov. 29.

London looks for a period of firmness, in undertone at least, from now on until toward autumn. The present firmness which began just before the holidays is attributed in some measure to speculative buying for the rise, which was expected as a result of the Dec. 15 war debt payment to the United States Treasury. In the initial stages of the recovery from the low of 3.14½ the rise was welcomed as a sign of termination of a minor crisis. Then the speed of the upturn gave alarm and the Exchange Equalization Fund was brought into play. It now looks as if sterling may be held reasonably stable around 3.30 @3.33 for some time. London generally believes, and bankers on this side seem to share the same opinion, that from now on unless the Exchange Equalization Fund is used vigorously some rise in sterling is bound to follow as a seasonal matter after mid-January. Speculative interests have been counting on such an advance. It is pointed out that between January and March last year the pound rose more than 40 cents, which provoked strong protests from the industrial interests of Great Britain. At that time when the rate touched 3.831/2 the official view seemed to indicate a stand at around 3.50. It is now thought in well informed circles that a rate much higher than 3.33 will be unwelcome.

The close relation existing between the Union of South Africa and Great Britain lends especial interest to the abandonment of the gold standard by South Africa on Thursday, Dec. 29. Full reports of this important step are given in other columns. In passing, however, it may be noted that there is neither economic nor financial reason for this decision and it is largely due to political maneuvers. The par of the South African pound is \$4.8665. branch of the Royal Mint at Pretoria was authorized by the Union Act of 1919. A Royal proclamation of Dec. 14 1922, declared the Pretoria mint to be a branch of the Royal Mint of London for the purpose of minting British sovereigns and half-sovereigns. The coins bear on the reverse side "S-A" as a distinguishing mark. South Africa's export surplus is estimated at around £10,000,000. The report of the Reserve Bank of South Africa, as of Nov. 19, showed a strong position with gold coin and bullion at £7,498,000, against notes of £6,159,000, a ratio of cover in excess of 100%. The ratio of reserves to all liabilities stood at 63.8%, compared with 55.6% a year earlier.

Gold of course continues at a premium in the London open market and sold this week at around 123s, 11d. It is generally believed that the Bank of England will make no further efforts, for the time being at least, to build up its gold reserves from the open market supplies, but will trust more to the coming seasonal factors to support the pound. Money is in abundance in Lombard Street and present open market rates are attractive to idle short-term funds. Two months' bills are 1 3-16% to 1½%, three months' 1½%, four months' 1½% to 1 5-16%, six months' 1½%.

The Bank of England statement for the week ended Dec. 28, shows a decrease in gold holdings of £34,359, the total bullion standing at £120,593,672, which compares with £121,348,721 a year ago. Owing to an increase in circulation and to increases in deposits as well as to loss of gold shipped to the United States the Bank's reserve ratio is down to

16.82%. Last week the ratio was 18.14% and a year ago it was 18.45%. Two weeks ago it was 33.31%. This year's highest ratio was 43.66% on Feb. 24. The present ratio is the lowest of 1932 and also the lowest since Jan. 6 1926. On Dec. 29 1920, the reserve ratio fell to 7.25%, the low record of this century.

At the port of New York the gold movement for the week ended Dec. 28, as reported by the Federal Reserve Bank of New York, consisted of imports of \$39,057,000, of which \$24,808,000 came from England, \$9,032,000 from France, \$2,653,000 from Holland, \$1,393,000 from India, \$996,000 from Canada, \$114,000 from Peru, and \$61,000, chiefly from Latin-American countries. There were no gold exports. The Reserve bank reported an increase of \$885,000 in gold earmarked for foreign account. The Federal Reserve Bank also reported a loss in gold by a decrease in gold held abroad for the Federal Reserve Bank of \$22,912,000. In tabular form the gold movement at the port of New York for the week ended Dec. 28, as reported by the Federal Reserve Bank of New York, was as follows:

GOLD MOVEMENT AT NEW YORK, DEC. 22 DEC. 28, INCL.

Imports

\$24,808,000 from England

9,032,000 from France

2,653,000 from Holland

1,393,000 from India

996,000 from Canada

114,000 from Peru

61,000 chiefly from Latin
American countries

None

\$39,057,000 total

Net Change in Gold Earmarked for Foreign Account.
Increase \$885,000.
Loss through decrease in gold held earmarked abroad, \$22,912,000.

The above figures are for the week ended Wednesday evening. On Thursday \$5,545,700 in gold was received as additional for Wednesday, \$3,422,500 coming from France, \$1,223,800 from India and \$899,400 from England. There were no exports of the metal, but gold held earmarked for foreign account decreased \$100,000. Yesterday \$1,345,900 of gold was received. \$1,215,800 coming from Canada and \$130,100 from England. There were no exports of gold yesterday but gold held earmarked for foreign account increased \$135,000.

For the week ended Wednesday evening approximately \$468,000 of gold was received at San Francisco from China. Yesterday \$844,000 more of gold was received from China at San Francisco.

Canadian exchange continues at a severe discount although slightly less unfavorable to Montreal than last week. On Saturday the rate was nominal at $12\frac{1}{8}\%$ discount. On Monday, legal observance of Christmas, there was no market. On Tuesday, Montreal funds were at a discount of $11\frac{7}{8}\%$, on Wednesday at $11\frac{5}{8}\%$, on Thursday at 12%, and on Friday at $11\frac{3}{4}\%$ discount.

Referring to day-to-day rates, sterling exchange on Saturday last was largely nominal. London was closed. Bankers' sight was 3.32 11-16 @ 3.32\%; cable transfers 3.32\% @ 3.33. On Monday, legal celebration of Christmas, markets were closed. On Tuesday the market was lifeless. London was closed. The range was 3.33\% @ 3.33\% for cable transfers. On Wednesday the Holiday dullness continued. Bankers' sight was 3.32\% @ 3.33\% @ 3.33; cable transfers 3.32\% @ 3.33\% @ 3.31\% on Thursday the market was inactive and the pound easier. The range was 3.31\% @ 3.31\% for bankers' sight and 3.31\% @ 3.32 for cable transfers. On Friday the pound was still easier; the range

was 3.30 @ 3.31½ for bankers' sight and 3.30½ @ 3.31¼ for cable transfers. Closing quotations on Friday were 3.31 1-16 for demand and 3.31½ for cable transfers. Commercial sight bills finished at 3.30½; 60-day bills at 3.30 1-16; 90-day bills at 3.29 9-16; documents for payment (60 days) at 3.30 and seven-day grain bills at 3.30¾. Cotton and grain for payment closed at 3.30½.

XCHANGE on the Continental countries is EXCHANGE on the communication as quite lifeless, due to the year-end holidays. There is nothing essentially new in the situation as affecting any of the European countries. Early in January, however, due to seasonal influences these exchanges normally turn firmer. On the other hand under present somewhat abnormal conditions of international trade these favoring factors may prove less operative. French francs are easy and ruling below the export point for gold from Paris to New York. A gold movement from France to this side has been in prospect for some time. It has now finally begun. As noted above the Federal Reserve Bank reports the receipt of \$9,032,000 gold from France this week. Word has been received that \$9,000,000 is coming on the S. S. Bremen. Paris bankers seem to think that the movement may come to an end shortly. the other hand New York bankers believe that conditions favor an extended movement of the metal in this direction. Paris bankers, in some instances at least, look favorably on the gold export movement. The private banks have long been complaining of the plethora of credit supplies on the existing money market as a consequence of the abnormally high figure reached for the gold reserve of the Bank of France. The outward flow of gold could reach considerable proportions without affecting the position of the Bank of France or in any way threatening the solidity of the franc. For such a thing to happen something else than the present international balance against France would be necessary. The Bank of France statement for the week ended Dec. 23 shows a decrease of 148,364,459 francs in gold holdings, the total standing at 83,119,500,173 francs, compared with 68,481,174,225 francs a year ago and with 28,935,000,000 in June 1928 following the stabilization of the unit. The Bank's ratio stands at 77.72%. It was at record high a week earlier, 78.16%. year ago the ratio was 60.57%. Legal requirement

German marks are firm, but of course quotations are largely nominal as all foreign exchange transactions are under the control of the Reichsbank operating through governmental decrees. According to recent dispatches from Vienna economic circles are generally demanding a reduction in the rediscount rate of the Austrian National Bank from the present 6%. The ratio of reserve cover is 23%. Note circulation is at the lowest figure in many years, standing at 859,000,000 schillings, as against 1,104,779,000 schillings a year ago, and 997,161,000 in 1930.

The London check rate on Paris closed at 84.75 on Friday of this week, against 85.37 on Friday of last week. In New York sight bills on the French centre finished on Friday at 3.90¼, against 3.90¾ on Friday of last week; cable transfers at 3.90¾, against 3.90½, and commercial sight bills at 3.90¼, against 3.90. Antwerp belgas finished at 13.85 for bankers' sight bills and at 13.85½ for cable transfers, against 13.85 and 13.85½. Final quotations for Berlin marks were 23.80½ for bankers' sight bills and 23.81

for cable transfers, in comparison with $23.80\frac{1}{2}$ and 23.81. Italian lire closed at $5.11\frac{5}{8}$ for bankers' sight bills and at $5.12\frac{1}{8}$ for cable transfers, against $5.11\frac{1}{2}$ and 5.12. Austrian schillings closed at 14.08, against $14.10\frac{1}{2}$; exchange on Czechoslovakia at $2.96\frac{1}{4}$, against $2.96\frac{3}{8}$; on Bucharest at 0.60, against $0.60\frac{1}{4}$; on Poland at 11.20, against $11.24\frac{1}{2}$, and on Finland at $1.47\frac{1}{2}$, against $1.47\frac{1}{2}$. Greek exchange closed at $0.52\frac{3}{8}$ for bankers' sight bills and at $0.52\frac{5}{8}$ for cable transfers, against $0.53\frac{3}{4}$ and 0.54.

EXCHANGE on the countries neutral during the war is, of course, dull as a result of the in-between season. Only the most necessary transactions connected with year-end operations have taken place since before Christmas. No important developments or trends are expected until well after New Year's when the course of sterling will be the dominating factor. Swiss francs are easy, as they have been for several weeks past, but trading is largely nominal. The gold moving from Amsterdam to London and New York over the past few weeks represents private transactions and is hardly as yet related to the exchange position of the guilder. Dutch banking interests, it would seem, began to build up balances here and in London some weeks ago so as to be prepared for activity in both markets on further signs of business upturn. The opportunities for profitable employment of funds in Holland are extremely limited. The Scandinavian currencies follow closely every trend of sterling exchange with which they are affiliated. Spanish pesetas are steady as they have been for many months. At present, owing to the holiday interuptions, there is very little trading in pesetas.

Bankers' sight on Amsterdam finished on Friday at 40.18, against 40.16½ on Friday of last week; cable transfers at 40.18½, against 40.17, and commercial sight bills at 40.17½, against 40.12. Swiss francs closed at 19.24 for checks and at 19.24¼ for cable transfers, against 19.25½ and 19.25¾. Copenhagen checks finished at 17.14 and cable transfers at 17.15, against 17.29½ and 17.30. Checks on Sweden closed at 18.11 and cable transfers at 18.12, against 18.24½ and 18.25; while checks on Norway finished at 17.10 and cable transfers at 17.11, against 17.24½ and 17.25. Spanish pesetas closed at 8.16 for bankers' sight bills and at 8.16½ for cable transfers, against 8.15½ and 8.16.

EXCHANGE on the South American countries is entirely featureless. Under normal conditions the South American exchanges would be lifeless at this season as the Christmas and New Year holidays are always prolonged in the Latin countries. There has been no essential alteration in the foreign exchange situation of these countries since the Autumn of 1931. All are laboring under difficulties arising from the unsatisfactory condition of world trade and financial uncertainties, of course aggravated, more or less differently in each country, by political unrest and changes as well as by governmental control of foreign trade and exchange, and by the imposition of moratoriums.

Argentine paper pesos closed on Friday nominally at 25¾ for bankers' sight bills, against 25¾ on Friday of last week; cable transfers at 25.80, against 25.80. Brazilian milreis are nominally quoted 7.45 for bankers' sight bills and 7.50 for cable transfers, against 7.45 and 7.50. Chilean exchange is nominally

quoted $6\frac{1}{8}$, against $6\frac{1}{8}$. Peru is nominal at 18.00 against 18.00.

EXCHANGE on the Far Eastern countries is featured this week because of the ease and fluctuations in Japanese yen and the sharp drop in silver to record low which, of course, affected the Chinese units adversely. The market has been extremely dull however as trading in w York, Lonlargely interdon and all the Occidental centre rupted by the Christmas and New Year's holidays. As frequently pointed out, buying or selling exchange on China is practically a transaction in silver. On Tuesday silver was quoted in New York at the low of 245% cents a fine ounce. On Thursday the price broke to a new record low of 241/4 cents. Indian bazaars and China were sellers in London. Exchange on Bombay and Calcutta is dull and quotations follow closely the fluctuations in sterling to which the rupee is attached at the rate of 1s. 6d. per rupee. Indian foreign trade, contrary to the trend in all other countries, is keeping up in rather good shape, due to the exports of gold. Exports of goods are about normal, perhaps a little less than normal, but imports have increased so that the customs revenue is nearly three times that estimated by the finance department. This is due almost altogether to the heavy exports of gold since Great Britain went off the gold standard in September 1931. Had the rupee not been anchored to the pound at the fixed rate (one shilling and six pence per rupee) there would have been no premium on gold with respect to the rupee. The premium of course induced the exports of the metal from the ancient hoards of India. Over \$400,000,000 has been shipped out since September 1931. The yen is weak owing to Japan's many financial difficulties. The 64th session of the Japanese Diet convened on Saturday, Dec. 24 and then recessed until after the New Year's holidays, to reconvene on Jan. 21 to consider the budget. The fiscal year begins in April. Army and Navy costs have increased from 405,000,000 yen in 1930-31 to 821,-000,000. Expenditures for all purposes have risen from 1,600,000,000 yen to 2,239,000,000. Despite a prospective deficit of 897,000,000 yen, about \$190,-000,000, the Minister of Finance has declined to levy new taxes and proposes to depend upon borrowing. The most important item in Japan's export trade, silk, has fallen 70% in value in the last three years. Boycotts still continue to cut off profitable markets in China. The farm-mortgage problem is acute and in order to solve it one political party, the Seiyukai, is insisting on a four-fifths devaluation of the yen. The Proletarian Party demands a moratorium. The yen continues to hover close to the lowest levels ever quoted for the currency. It closed yesterday at 20 1/8 in dull trading. Par of the yen is 49.85.

Closing quotations for yen checks yesterday were $20\frac{5}{8}$, against $21\frac{3}{8}$ on Friday of last week. Hong Kong closed at $21\frac{1}{4}$ @ $21\frac{1}{2}$, against $21\frac{3}{8}$ @21 15-16; Shanghai at $27\frac{1}{4}$ @ $27\frac{3}{8}$, against $27\frac{1}{2}$ @27 11-16; Manila at $49\frac{3}{4}$, against $49\frac{3}{4}$; Singapore at $38\frac{5}{8}$, against $38\frac{5}{8}$; Bombay at 25 1-16, against 25 3-16, and Calcutta at 25 1-16, against 25 3-16.

PURSUANT to the requirements of Section 522 of the Tariff Act of 1922, the Federal Reserve Bank is now certifying daily to the Secretary of the Treasury the buying rate for cable transfers in the different countries of the world. We give below a record for the week just passed:

FOREIGN EXCHANGE RATES CERTIFIED BY FEDERAL RESERVE BANKS TO TREASURY UNDER TARIFF ACT OF 1922. DEC, 24 1932 TO DEC, 30 1932, INCLUSIVE.

a These are the gold holdings of the Bank of France as reported in the new form of statement. b Gold holdings of the Bank of Germany are exclusive of gold held abroad, the amount of which the present year is £2,021,750.

The Political and Economic Outlook Abroad.

One would have to be a good deal of an optimist to see in the world events of 1932 many signs of assured political or economic progress. The conservative German Institute for Business Research has, indeed, offered the encouraging opinion that the world crisis has been passed and that the movement from now on will be one of recovery, but it sees for 1933 only a year of slow emergence from the depres-None of the major problems with which governments and peoples were faced a year ago or which have developed since—domestic and international debts, unbalanced budgets, return to the gold standard, unemployment, disarmament—have been solved or even been carried very far toward solution. A survey of the general situation at the moment, accordingly, shows in the main a continuance of governmental activities on lines already laid down, but with the prospect that at one or two important points new influences, or old influences intensified, will before long begin to make themselves felt.

For one thing, it is already apparent that the international influence of the United States is to assume a new and perhaps an increased importance. Mr. Roosevelt's insistance that his Administration should

not be committed in advance regarding international issues has called a halt in Mr. Hoover's program of encouraging Europe to expect a general revision of the war debt agreements, and until after March 4 that issue, as far as the United States is concerned, will probably remain about where it is. The most that can be gathered from Mr. Roosevelt's utterances is that he appears to favor a fact-finding study of the debt question, and the institution of such an inquiry would suggest that he has an open mind on the question of revision. It is for the new Administration, accordingly, that Europe is waiting. There is no sign as yet of a disposition to abandon the united front which the debtor governments assumed at Lausanne, although there have been indications that Great Britain would like to dissociate itself, formally at least, from the expressed obligation of the Lausanne agreement. The new French Ministry of Paul-Boncour is hardly in a position to oppose the pronounced unwillingness of the French people to make any further debt payments save on their own terms. The European attitude may not at once change, but it is with Mr. Roosevelt, and not with Mr. Hoover, that Europe will have to deal.

The same is true of the disarmament question and the World Economic Conference. Norman H. Davis, head of the American delegation to the Disarmament Conference, is reported to have impressed upon Mr. Roosevelt the necessity of continuing without abatement the American pressure for substantial reduction and limitation of armaments, and to have urged the need of going ahead with preparations for the Economic Conference. We have more than once expressed the opinion that the hope of success for either of these undertakings is extremely slight. Not only is France unwilling to accept any disarmament program that is not accompanied by a joint guarantee of French security, but the formal concession already made to the German demand for arms equality has aroused a fear, especially in Eastern Europe, that a disarmament agreement which accorded equal treatment to Germany would strengthen the demand for wholesale revision of the peace treaties. As for the Economic Conference, it is hard to see what useful results can follow from a parley in which high protective tariffs, preferential duties and quota systems are unlikely to be discussed except as academic issues. Were it not for American official pressure, rather inexplicable save on the assumption that disarmament might be a good thing and participation in an international conference always a friendly gesture, disarmament, we think, would be dropped for the present as impracticable and the World Economic Conference would be indefinitely postponed. If either undertaking is proceeded with, it will be because the Roosevelt Administration desires it rather than because Europe is specially interested.

The United States, fortunately, is not a member of the League of Nations, but it has injected itself into the Manchurian controversy, and the Stimson doctrine of non-recognition of political or territorial settlements carried through by force has been seized upon by the League as making the United States virtually a League ally in dealing with Japan. Regarding Manchuria, the League is at the moment in contempt. Japan has snubbed the Committee of Nineteen to which the Lytton report and a possible reconciliation between Japan and China was referred, and the Committee has found itself powerless to act. Within the League, the incident has intensified the antagonism

between the small Powers, which have insisted that the League should act in accordance with the recommendations of the Lytton report, and the great Powers, especially Great Britain and France, which are anxious to avoid irritating Japan and dread a war that might involve China, Japan and Russia. If the political and legal advisers upon whom Mr. Roosevelt appears to rely can show him how to extricate the United States from connection with Manchuria and League policy, they will have rendered an important public service, for until the hands of the United States are free the Administration will continue to be involved in a dangerous controversy which is not primarily of American concern.

There are interesting indications that the center of political interest in Europe, aside from the questions of disarmament and war debts, is shifting from France to Germany and the States of the East, Southeast and South. The annual conference of the Little Entente which met at Belgrade on Dec. 18 had before it not only the issue of peace treaty revision, regarded as specially important because of strong agitation for revision in Bulgaria and Hungary, but also questions arising out of treaty relations between Italy and Rumania and strained political relations between Italy and Yugoslavia. For Eastern Europe, treaty revision involves complicated questions of territory and the rights of racial and religious minorities, but the agitation for revision has been strengthened by Germany's demand for equality in armament, and by the action of the League in pledging Austria to refrain from pressing for a customs union with Germany as a condition of the loan the French share of which has just been voted by the French Parliament. The alarm which was shown at Belgrade was intensified by the realization that the financial provisions of the peace treaties are no longer of consequence now that Germany has refused further reparations, and by the belief that Premier Mussolini and influential public men in England favored territorial revision. The Conference, as was to be expected, declared strongly against revision, but the spectre of disruption loomed in the request of Italy for the insertion in a renewed treaty of friendship with Rumania (the present treaty expires Jan. 15) of a guarantee of Rumanian neutrality in case Italy were attacked by a third Power. A further cause of anxiety has been afforded by the publication on Dec. 23 of the findings of a British group which lately visited Yugoslavia, and which reported a condition of general official espionage and "virtually unanimous opposition in the western provinces to the dictatorship of Belgrade." The report recommended joint pressure by Great Britain, France, Czechoslovakia and Rumania to secure radical changes in the Yugoslav Constitution, a suggestion of outside interference which seems likely to widen the breach between the Belgrade Government and its opponents.

The German Government, on the other hand, closes the year with a sweeping abolition of political and other restrictions, the grant of amnesty to thousands of political offenders, and a large program of unemployment relief. An emergency decree made public on Dec. 20 revoked various repressive measures of the von Papen Government relating to public meetings, censorship of the press, and the punishment of political offenses, and the grant of amnesty released some 15,000 persons, most of them National Socialists or Communists. The unemployment program, announced on Dec. 22, provides an initial credit of

500,000,000 marks, out of an eventual total of 2,700,000,000 marks, in aid of work for Germany's 5,600,000 unemployed. Of this first credit, 50,000-000 marks is to be advanced for housing repairs, supplementing a similar credit granted in September, the loan being limited to 20% of the cost of the repairs. The remainder is to go for public works such as streets, roads and bridges. It was announced that the work, all of which must be of an essential nature, is to be done through private enterprise, that human labor will be given preference over machines, and that foreign materials will be used only where German materials are not available. A forty-hour week and union wages are also decreed. All the work, moreover, must be completed in 1933, but the grants are repayable at various terms with interest varying according to the length of time for which the loan runs. Extensive grants have also been made for food and clothing for the unemployed.

In Italy and Great Britain the necessities of relief have also heavily mortgaged the financial future. Italy, which faces an estimated deficit of 3,087,000,-000 lire, or about \$163,000,000, for the fiscal year beginning July 1 1933, or more than twice the estimated deficit for the present fiscal year, plans to expend about \$130,000,000 for public works half of which, it is expected, will be completed by next spring, and to employ in the undertaking 300,000 of the nearly 1,000,000 now unemployed. The remaining half of the credit is to be used to electrify 2,730 miles of railway now operated by steam. Great Britain, in addition to organizing a National Council of Social Service to coordinate and extend various relief agencies and similar services, has voted an additional £19,000,000 for public relief and unemployment benefits, bringing the total for the year to upwards of £120,000,000.

It would be idle to see in such grants in aid, however necessary because of immediate distress, any thing more than temporary relief, of a very limited kind, to either workers or employers. Sooner or later the debt which unemployment relief has piled up, and the crushing burden of taxation which it represents, will have to be dealt with. Neither in Europe nor in this country has more than a beginning been made in the reduction of governmental costs which must be carried through if government itself is to survive. When Premier Azana told the Spanish Cortes on Dec. 23 that, with "an entire world" under arms, "we must keep not only a standing army of eight divisions but must create machinery that can be doubled on the day of general mobilization," he undoubtedly took a realistic view of the world situation, but by as much as Spain goes in for further armament, by so much it adds to the difficulty of keeping a balanced budget. The maintenance of peace may well occupy the attention of statesmen during the coming year, but the people who pay the taxes will not need to be told that one of the soundest contributions that could be made to world peace would be a thoroughgoing demobilization of governmental expenditure.

A New Year's Resolution.

There is one resolution everyone might adopt to his own great advantage and to the profit of society: From this hour I will be an individualist and rely upon myself for the accomplishment of all my purposes, extending to all others and receiving from them such voluntary non-coercive co-operation as common tastes, interests, and inclination of mind may require.

Individual courage, industry, and free association of effort built up this continent in a few generations to such an extent that nowhere else are material wealth, comfort, education, art, and culture so widely distributed. Now for more than a generation we have been departing more and more from the political and social ideals upon which our national life was based. We have imported from across the water false gods of governmental paternalism, socialism, and government control of industry-things foreign to the genius of a free, self-reliant democracy. Personal initiative and our prized liberties are menaced by bureaucracies, Federal, State and local, which we have ourselves created and fastened upon ourselves. The burdens of taxation grow continuously heavier, and as they increase the life-blood is drained from industry, with the result that unemployment threatens to become a huge, abiding curse. The New Year is a propitious time to retrace our steps and turn back to the principles of the founders.

The business depression is now lifting. The first signs of improvement became discernible around midsummer. There are still many frightfully bad spots and many maladjustments, but on the whole the trend is definitely upward and will gradually improve. Before 1933 comes to a close the business depression will have become a painful, if instructive, recollection. The era which is now at hand will have none of the hectic glamor of the decade ending in 1929, but will be a period of solid prosperity. But in order to effect a permanent recovery in our national life, we must withdraw from government, whether Federal, State, or local, many of the powers which have been all too blindly accorded, especially powers of control and regulation of business affairs. For business and industry have never prospered except in free association. The crimes of history are summed up in the phrase "abuse of power." It is a matter of universal experience that power, above all governmental power, is constantly abused. No plan of government, no system of society can reconcile authority and equity, political power and social justice. The ripest message of genius and intellect to the world to-day is that a high and worthy civilization can be cultivated only through the complete freedom of the individual.

At present at least about one out of every 12 or 14 persons is in government employ. In President Cleveland's time the ratio was about one in 150, and in Lincoln's day it was one in 300. Now, not content, we seek doles, Government assistance, and Government paternalistic control of every variety. The State, instead of being the guardian of the weak, the dispenser of justice, on close investigation proves to be the instrument by which strong, crafty and ambitious men further their own interests. glorification of the State as a kind of all-wise Providence has neither historic nor logical fundation. Our own farmers have been ruined by State aid and bureaucratic interference and suggestions. Crop loans and debt adjustments sponsored by Congressmen have only spurred the decline in prices. Our railroad systems, the first in the world, made the greatest and most efficient in all the world through the voluntary efforts of associated individuals, are now nearly crushed by the control of Government commissions. Political authority can only seize and control but can never initiate or manage successfully.

Efficient management proceeds only from genius, and genius flourishes only in an atmosphere of free individualism working through voluntary co-operation with others.

It is the socialist dogma that the State can be captured by the proletariat and used first to expropriate the capitalists and then to carry on all individual functions of society on collectivist principles. Such schemes are economically unsound and chimerical. With the gigantic European failure before our eyes, we should return at once to the fundamental principles of individual liberty and enterprise to which we owe our national existence. The pages of the press are to-day spread with the news from Moscow: The Soviet Five-Year Plan ends officially on Dec. 31, four years and three months after its inauguration. It has succeeded in some directions and failed in others. The conclusion of the plan coincides with an acute food shortage, widespread peasant discontent, abandonment of some industrial enterprises, currency inflation, and an increase of dictatorial political pressure. "Unemployment," we are told, "has been abolished, and all grown-up members of every family are at work. Their aggregate income recorded in rubles should make them well-to-do. Recorded in purchasing power, it loses its allure. Recorded in purchasing possibilities, it is even less, since shortage and total disappearance of various goods have turned money into a symbol at times." We shall hear more of this in a few months.

It is an age-old custom to make resolutions at this season. Let us begin with ourselves and our private interests, but resolve, too, that our governmental authorities shall be brought to a realization that the individual only is sacred. He must not be hampered in the expression of his nature through the exercise of his individual initiative on the materials with which he finds himself surrounded. Three principles should and do govern in the affairs of men. To Destiny we owe the past. Individual power, or the will of man, controls the future by acting upon the objects with which men are confronted by birth and the circumstances of the age in which they live. There is a Divine Providence governing the present from which a man's destiny and his power, or will, are both derived. Love and wisdom, or Providence, act powerfully to aid the one who applies his will truly and manfully upon his material surroundings to the enrichment of his nature. Where this power of the individual is thwarted, the people perish. Man needs no paternalism other than that of Providence. All our resolutions should be directed toward enhancing the conjunction of our wills with the munificence which springs from freedom.

Roads Forced to Prune Stocks of Materials and Supplies as Depression Continues.

The railroads of the United States had approximately 380 million dollars tied up in unapplied materials at the close of the year 1931. This figure represents the materials and supplies of all the railroads in the country with the exception of the switching and terminal companies, which only account for 2.9% of the total railway mileage. It is \$57,383,074 less than the quantity on hand at the close of 1930, and \$97,058,997 below the amount shown for 1929. Figures for the nine months ended Sept. 30 1932 indicate that stocks on hand at that time were 13% less than for the year 1931 and 30% below the volume of

the stocks shown for 1929, and there is left a balance which is less than at any time since 1916.

It will be seen from the table at the end of this article that the supply balance at the end of September 1932, although exceedingly low, was more than five times what it was 40 years ago, and higher than that reported for any year previous to 1916, in spite of the fact that the railroads are now bearing the severe brunt of the prolonged business depression.

Between 1890 and 1893 railway inventories show a gradual increase, but as a result of the panic which then ensued they tapered off sharply until 1896. Following 1897 a rapid increase was recorded each year down to and including 1913, with the possible exception of the years 1901 and 1905. During the years 1914 and 1915 the depletion of stocks of materials on hand was most marked, the decline in 1915 as compared with 1913 amounted to approximately 17%. Between 1915 and 1920 a meteoric advance took place; however, during the unsettled business conditions which immediately followed, the volume of supplies on hand at the end of 1922 had fallen off 27% as compared with that reported for 1920. For the five years 1922 to 1926, materials and supplies averaged approximately \$583,000,000.

The aggregate reduction of inventories reflects a continued trend downward since 1920. This trend downward is both absolute and relative. It represents a reduction of more than \$387,000,000 in the value of the materials carried since 1920, that is, up to the end of the year 1931, and also represents a noteworthy reduction in terms of railway business to be protected, as reflected by the amount of material carried in stock for each 1,000 car-miles.

Statistics received thus far for the first nine months of 1932 are apparently sufficiently complete to determine definitely the trend of purchases during this year. They showed reductions as compared with the purchases made in the corresponding months of 1931, amounting to 15%, and considered in the light of carloading trends and other business factors, they offer very little hope for a larger volume of purchases by the railways than were made in 1931, but they do suggest that the low point of railway purchasing of the present period may have been passed in 1930.

These reductions in purchases also reflect in part the economies resulting from greater efficiency of the railway plant (particularly noteworthy in the utilization of fuel) and substantial declines in material prices, but, for the most part, have resulted from the lower consumption of materials attendant upon business depression and the corresponding shrinkage in railway business. The loss of business which the railways have experienced from competing form of transportation has also been a factor.

It is expected that in spite of the long-drawn-out business recession, and the corresponding reduction in the use of supplies, that the volume of unapplied material may therefore be swelled, by reason of the exhaustion of the accumulations of materials contracted for when normal consumption prevailed.

The inventories as set out from 1890 to Sept. 30 1932 comprise the book values of materials and supplies filed with the Inter-State Commerce Commission by the Class I, II and III railroads under general balance sheet account 716, subject to the general exception that beginning with 1908, the returns for switching and terminal companies have been ex-

cluded, while before that year they were included where applicable.

They do not necessarily embrace certain quantities of unapplied materials belonging to the railroads which may be in the possession of contractors or specially bought and segregated for large construction projects carried on independently of railway operations; also comprising a financial, rather than physical statement, they may embrace book values of such material as scrap of retired equipment not having any value for operating purposes.

The different ways in which the various railways interpret the rules governing the preparation of these statistics also impair their value somewhat as an absolutely accurate and uniform measure of the volume of the material awaiting use on the railways, but comprising as they do the reports prepared by all the roads in obedience to a common rule and sworn to, they are the most authoritative statement of railway stores available.

Utopian Plans of Toilers.

Many thoughtful citizens have reached a stage where they are beginning to think of the possibility of some good coming out of the severe ordeal of the depression, looking upon a period of hard times as a crucible which tries men's souls, discards superfluous elements, and brings forth new and more useful products for the benefit of mankind.

By reason of this attitude a spontaneous movement is arising in Philadelphia which if encouraged will be apt to yield, it is thought, desirable results. Like New York City and other large communities, a substantial portion of the population of the Quaker City is employed in the needle and garment trades, being wholly dependent for employment upon consumers' demand for apparel. These workers have been among the worst sufferers during the past two years, and many of their number have endured privation silently rather than to resort to aid through charitable channels.

Discussing among themselves the possibility of freeing members of their families from the uncertainties of employment and the hardships of daily toil in sweatshops or in factories where the demand for increased individual output may be incessant, heads of families conceived the idea that it might be possible for a number of them to combine in the purchase of tracts of land which they could till and obtain a livelihood for themselves and the members of their families by work in the open with fresh air and sunshine.

From this nucleus the idea was expanded to a socialistic organization which would conduct cooperation for mutual benefit. They have laid their plans before an attorney, Bernard Cohn, who was raised upon a New Jersey farm and sympathizes with the people who have long been out of work and are anxious to earn a living for themselves and their dependents.

Among his friends Mr. Cohn has found sympathetic citizens who are willing to give the project of these earnest people financial support. He has accordingly applied for a charter for the "Pioneer American Agricultural Colony." Judge MacNeille, of Philadelphia, to whom the application was made, is in full sympathy with the project, and has suggested a number of practical changes in the provisions of the application which shortly will be acted upon.

It is desired to purchase 5,000 acres near the National Farm School, which has been conducted near Doylestown successfully for a number of years, and the students of the school have volunteered to give a portion of their time towards instructing the members of the colony how best to cultivate the soil and to select crops which will give the best results.

The products will not belong to the individual worker, but all grain, fruits, vegetables, eggs, butter and livestock will be turned in to a committee who will distribute supplies according to the needs and number of members of each family. Surplus above the requirements for new planting will be marketed by the committee to provide money for the purchase of things needed, to pay for improvements, and to make partial payments upon the cost of land.

Thus far 250 families with 1,200 members are anxious to enter upon the undertaking. Nine-tenths of the applicants are citizens of the United States. As the work progresses schools, churches and theatres will be built. "The plan," said Mr. Cohn, "as conceived by these people is not communistic but rather socialistic. Success of the Farm School leads us to believe that this new non-sectarian enterprise can be made equally beneficial and in a comparatively short time be made self-sustaining. It has been figured that the cost of food per week for the average family will not average more than four dollars.

"Pure food, sanitary conditions, healthful work out of doors, with fresh air, sunshine and pure water in abundance we feel sure will make a strong appeal to others as soon as practical operation demonstrates the feasibility of the plans.

"At the beginning the families will be housed in tents. The work of constructing buildings will be divided according to the abilities of the members, many of whom belong to the construction trades. It is the design that members of this community shall have the power of taxing themselves for such common purposes as police protection and maintenance of schools. It is anticipated that in times of depression the colonists will at least have sufficient food and comfortable homes, advantages which other farmers now enjoy while many city people are homeless."

World-Wide Efforts to Regulate Motor Transportation.

There is a great deal of discussion at the present time in regard to the regulation of motor transportation, and it certainly is interesting to see what several of the more important countries of the world are doing in regard to this matter. C. E. R. Sherrington, who is the Secretary of the Railway Research Service of the Institute of Transport in England, has collected some rather illuminating facts on the subject, and he deals with the situation, first from the standpoint of passenger services, and then goes on to consider the restrictions in the various

countries with regard to the transportation of freight by motor trucks.

At the outset he deprecates any loose usage of the terms co-operation and co-ordination, and suggests that correlation is a much more applicable term. He also dwells upon the necessity for ascertaining the total cost of any service, not only the amount paid by the consignee or consignor, but also the hidden costs such as, in the case of highway transportation, the cost of policing or track signaling. A transportation system to be of maximum social utility must be designed so as to deflect to each component whatever traffic that it carries most efficiently, having due regard to cost, speed and service.

Because of the complete transformation of the highways into arteries of commerce, that are used as a source of profit, the need for Government regulation has been brought about. In practically every country of the world that need has had to be met, and Mr. Sherrington has very ably summarized the ways in which different governments have tackled the problem.

PASSENGER SERVICES.

In France restrictions apply only to safety requirements, the eight-hour day, and the liability to maintain regular services, but there is a call for legislation to place highway and rail competition on a more equitable basis. In Germany, since November of last year, licenses have only been granted in the public interest after the viewpoints of the German railway, Chambers of Commerce, highway authorities, the Post Office and existing highway services have been considered. Since March the restrictions in Belgium have been very severe, each license being judged by its public utility and the most suitable operator is chosen by arbitration. There are also rigid regulations regarding safety and the servicable condition of vehicles employed, employee conditions, number of vehicles employed, rates and routes, while licenses are restricted to a period of 20 years. Unauthorized operators are liable to imprisonment.

In Italy each service has to be licensed by the Minister of Communications; competition with the State railways is not regarded with favor, but when obtained, a license carries a monopoly of the route concerned. Austria has a licensing system, but the railway and postal systems have the right to intimate within two months of any application that they will operate the service applied for. In Holland the provincial authorities who do the licensing have to take into consideration the existing highway and railway facilities. Hungary grants licenses only when it is proved that existing services will not suffer thereby and if there is a public need. In Switzerland most of the passenger highway services are operated by the Post Office, and as a consequence there is a high degree of correlation with the Federally-owned railways. Where private buses are licensed, it is on the condition that a proportion of the bus fare is handed over to the railway of the postal department with which the route competes.

In South Africa a law of 1930 requires all passenger services to be licensed, but they are permitted only when the requirements of the public demand them and provided that the social need is not met by existing services, the effect upon whose finances must be considered. Canadian regulations so far have not been as stringent as in some of the other British Dominions, but it is likely that further regulation of a more rigorous nature will be enacted early

next year. New Zealand has a new licensing act under which the two islands are divided into licensing areas, and where a license is refused the applicant has the right of appeal to a board of three appointed by the Governor-General. Railways and municipalities enjoy a preference in applications. The financial stability of the operator, public needs, fares, highway conditions and frequency of service have to be considered. The number of vehicles is limited to that in use in March 1931, and, in general, only one vehicle is allowed to operate per scheduled journey. Seasonal services are deprecated.

The Australian States have either passed or are considering laws under which licensing boards have to take into consideration suitability of route, standing of the applicant, fitness of the vehicle, condition of the highways, and the services of other forms of transport. In India little progress has been made,

but in Kenya regulation is quite strict.

With regard to the United States, Mr. Sherrington says that each individual State has its own laws, and it was rather difficult to summarize the situation there, but he mentioned one or two interesting things and noted that the number of rules with which a bus driver had to comply varied from 15 in Vermont to 66 in Virginia. With the exception of Delaware, virtually all States require an operator to obtain a certificate of convenience and necessity for public services to be offered by rail or highway. The American regulations have hinged largely upon the dimensions of the vehicles and the insurance policies which have to be taken out to cover passenger, property and third party risks. Mr. Sherrington points out that, on the whole, therefore, the regulation of passenger services does not differ greatly from that which has been in force in England since the 1930 Road Traffic Act became effective.

FREIGHT SERVICES.

With regard to the operation of the truck services Mr. Sherrington points out that their regulation is far more complex, owing to the variety of uses, such as local delivery in cities, the ancillary usage of large producing and shipping organizations, the contract carrier and the common carrier. In France, practically nothing has been done in the way of regulation, but he says that is not for lack of suggestion. In Scandinavian countries and Austria, licenses have to be secured for all regular services, with the result that most of the services tend to become irregular. In Hungary, all regular freight services, outside of municipal areas, must be licensed, and they will only be granted in such cases where existing transport undertakings will not suffer loss. The Minister of Commerce has also been empowered to design regulations imposing the same obligations upon the motor truck operator as apply to the State-owned and operated railways.

He says that Germany took a strong line in the emergency decree of a year ago which necessitates licenses being secured for all highway truck services which operate for profit, with routes exceeding 31 miles in length. Licenses are only granted on condition that the rates charged are in accordance with scales fixed by the German Minister of Transport. These scales are virtually the same as the standard less-than-carload rates of the German State Railway and the carload rates in the three higher classes of the German railway classification. Owing to the disorganized industrial conditions in that country, some difficulty has been found in enforcing this law.

Italy seems to have done little, but in view of the serious effect of highway competition on the railways some action is expected in the near future. In Yugoslavia licenses are required for regular services and new services are not permitted to interfere with the activities of existing operators. Insurance policies must be taken out to cover loss and damage to property. Switzerland and other European countries have endeavored to solve the problem by the alternative means of assisting the railway to become the main freight traffic agency itself.

Mr. Sherrington points out that highway competition in Continental European countries only became formidable in 1926-27, and that in Great Britain it was the reliance which the British railways placed upon home-produced fuel which primarily rendered them vulnerable in 1926 to the competition of a rival using imported fuel, when industrial troubles in the coal fields in England rendered the supply of

coal unreliable.

In Canada very little has been done, but the recent report of the Royal Commission has recommended much stricter regulation, with higher taxation of the heavier vehicles. South Africa requires that all public highway freight services must be licensed except those operating between railway freight stations, and licenses are not granted if transport facilities exist, thus virtually prohibiting competition with the Government railways. This, he says, has brought about a tendency for the motor truck operator to convert his service to an ancillary or private owner basis, and it is clear that any licensing system which neglects these phases will not bring about the desired degree of correlation.

In Victoria the railways have been granted the power to charge higher rates to shippers who do not send all their traffic by rail, where rail service is available—a principle which has been adopted more recently in Norway. The reason for this policy is that shippers have formed the habit of sending their high-class traffic, by trucks, and the lower classes, upon which very low developmental rates are charged, by rail. The New South Wales Transport Act aimed at limiting truck traffic to distances of 20 miles or to the nearest railway station. South Australia has also passed restrictive legislation. In New Zealand, truck services will, from next month, be under practically the same obligations as those which apply to passenger services, as already mentioned, the enforcement of the new regulations being partly due to the findings of the Slater Committee.

Argentina has a bill before Congress which will impose licensing on all motor truck services except in provincial and municipal areas, and the license will only be issued after due safeguard of existing means of transport; trucking concerns will practically become common carriers, with rate regulated

by the National Railway Board.

In the United States motor trucks operating on public highways are regulated and taxed in accordance with State laws. In the majority of the States, common carriers are required to obtain certificates of convenience and necessity, they must be adequately covered against claims, and must file rates and schedules with State Commissions.

By way of conclusion, Mr. Sherrington points out that the present financial condition of the railways throughout the world is not entirely, or even mainly, due to road competition. But that if international trade had been permitted to flow through the channels at one time considered as "normal," there would probably be enough traffic to maintain the financial stability of all concerns engaged in transportation.

Leadership of Militant Type Needed in Present Emergency, According to Alfred P. Sloan, Jr., of General Motors Corp.—In New Year's Statement Says Constructive Action Is of Vital Concern.

A "real leadership of a militant type" is needed badly "in this very great emergency," according to Alfred P. Sloan Jr., President of General Motors Corp., who, in a New Year's statement, states that "our incoming Administration has received a mandate from the people which should not only make it possible to recommend essential policies in accordance with fundamental principles, but . . . to demand that those policies be put into action." In full, the statement follows'

It is difficult, under any circumstances, to make any statement as to a forward business trend with any feeling of security that it will be justified by the facts. This is particularly true as we stand to-day looking forward into 1933. It seems to me that in every sense of the word we are at the cross-roads, and the position that we now take will not only have an important influence on the answer to our question, but will likewise have a tremendous influence on the answer to the same question as it may apply to the many years beyond.

Irrespective of how helpful such measures as have already been taken may be—and they have been helpful in the way of cushioning the shock of the economic readjustment through which we are passing—we must frankly admit that they have in fact been largely in the nature of palliatives. It does not seem to me that we have yet tackled our problem from a fundamental standpoint. Are we to continue that policy or are we to aggressively and courageously go forward and deal with our situation as it actually exists? It is hard to conceive how any substantial foundation can be built for a more effective national economy until we adjust ourselves in harmony with our present national position. A nation, like a business, can carry on through a certain state of its development with little regard for fundamental principles, but the point finally arrives in that development when those principles can no longer be disregarded. Upon their constructive interpretation depends the success of the whole enterprise. That is our position to-day as I see the picture.

In a broad sense we have done practically nothing with respect to the important question of governmental expenditures which are exacting an impossible burden on constructive enterprise. The budget of our National Government, as well as those of many of our other governmental units, are far from being balanced. We have done nothing with respect to the question of intergovernmental debts, tariffs and other international problems which have throttl

question of intergovernmental debts, tariffs and other international problems which have throttled the world's commerce. We must not fail to recognize that the purchasing power of large groups within our own midst, which for years has been out of adjustment with those of other groups, is vitally involved in this great question. We not only need, but we must have, the purchasing power of every individual to maintain our productive enterprises and to insure the employment of our labor. In many ways we are still resisting the adjustments essential to the bringing of our national economy into proper balance—an absolutely vital step before the next forward movement can take place.

movement can take place.

Our hope for the future rests upon these and many other factors. They must be courageously and effectively dealt with, not from the standpoint of provincial prejudice, local selfish interest and political expediency, but in harmony with the economic necessities of the case. That is why I feel

in harmony with the economic necessities of the case. That is why I feel we are to-day at the cross-roads.

On the constructive side it seems to me that there is a real and unusual opportunity for accomplishment. Our incoming administration has received a mandate from the people which should not only make it possible to recommend essential policies in accordance with fundamental principles, but what is of very great importance—to demand that those policies be put into action. Those policies should be formulated having in mind the interests of the great majority—the rule of the organized minority should no longer be tolerated. What we need to accomplish all this, and need badly in this very great emergency, is real leadership of a militant type. If that be forthcoming—and I certainly hope it will be—the nation should rally around and support that leadership from a patriotic standpoint and in the interests of all the people. The depression has lasted so long and has become so acute that constructive action now becomes of vital concern.

The Course of the Bond Market.

A rising bond market this week carried the averages up from the recent lows made last Friday and Saturday. Improved sentiment after a certain amount of "tax selling" was out of the way, or perhaps a technical reaction from several days of declining prices, might account for the better tone. The rise during Wednesday, Thursday and Friday was quite general throughout the domestic list. The volume of transactions increased considerably on the upward movement. The Aaa bond averages broke last week's record high for the year. High grade obligations and U.S. Governments continued in demand. The price index of 120 domestic bonds was 79.68 on Friday compared with 78.10 a week ago and 79.56 two weeks ago.

United States Government bonds forged ahead still further, making a new high since Sept., 1931. The demand for unquestionably safe investments continues as a factor in this movement, and there is, too, the fact that no immediate Government financing is in prospect. Short term issues maturing within six months have now moved up to a point where they offer a minus yield. That is, the interest received during the period of their life is less than the premium

which will have to be written off when these issues are repaid at par. Moody's index of long term Government bond prices stood at 102.99 on Friday, compared with 102.71 a

week ago and 102.05 two weeks ago.

Trading in railroad bonds was heavy in the past week, particularly in speculative issues, there being evidence of considerable switching from one bond to another for the purpose of establishing tax losses. As a whole, the movement in railroad bonds was favorable in that price advances greatly outnumbered declines. High grade bonds in the railroad list continued or exhibited strength, with Atchison Topeka & Santa Fe gen. 4s, 1995; Union Pacific 1st 4s, 1947; Pennsylvania cons. 4½s, 1960, and Norfolk & Western 1st 4s, 1996, within fractions of or at the highest prices recorded during 1932. Among the more speculative issues gains were recorded by New York Central ref. & imp. 41/2s, 2013, from 361/2 to 39; Southern Railway dev. & gen. 4s, 1956, from 15½ to 19½; Baltimore & Ohio ref. & gen. 5s, 1995, from 31½ to 36¼; Erie Railroad ref. & imp. 5s, 1967, from 21 to 271/2; Chicago Milwaukee St. Paul & Pacific mtge. 5s, 1975, from 141/2 to 19. The price movement for the more speculative railroad issues was possibly caused in part by the reasonably good railroad earnings reported for November, which were only moderately below those for the same month last year, and by the apparent realization that rumors regarding numerous and early railroad receiverships had been exaggerated. The reassuring statement to the effect that there would be no unexpected interest defaults on Jan. 1 1933, presumably also had an effect. The price index of 40 railroad bonds ended the week at 69.40, compared with 67.07 a week ago and 70.15 two weeks ago.

The divergent trends in the several classes of utility bonds so apparent in past weeks was continued in the last few days. High grade issues were in good demand and maintained a firm tone. Indexes for Aaa, Aa and A utility issues again made new highs for the year. Lower grade issues were irregular. A thin market in many issues was indicated by the wide spreads and few sales. On Friday the general tone of all utilities was good and many lower grade issues showed recoveries of some proportions. Brooklyn Man-The Interborough hattan Transit 6s, 1968, were firm. Rapid Transit 5s, 6s and 7s advanced five points or more, for no known reason. The utility bond index closed the week at 86.25, was 85.23 a week ago and 85.48 two weeks ago.

After indecisive movements in the industrial bond market early in the week a firmer tone with much broader and heavier year-end trading featured the list. This group followed other sections of the bond list in a general advance, and there were several strong features. Steels showed no rallying tendencies, some issues in fact declining. Oils gained little but were firm in the better class issues. Strong features included isolated situations like National Dairy 51/4s, 1948, which were up 3 points, and United Drug 5s, 1953, which rallied six points to 65; Wilson & Co. 6s, 1941, and other packing issues remained essentially unchanged. A $4\frac{1}{4}$ point climb by Cigar Stores Realty Holding $5\frac{1}{2}$ s, 1949, on reports of a strong position in the United Cigar mixup, was a Curb feature. The price index of 40 industrial bonds closed at 85.48 on Friday, compared with 84.35 a week ago and 84.60 two weeks ago.

The outstanding feature of the foreign bond market was pronounced strength in all classes of German bonds. New highs for the year were made, many issues doubling or tripling their low prices reached in June this year. The purchase of German dollar bonds has no doubt been stimulated by the ruling of the Reichbank to allow exporters to utilize part of their proceeds from sales of merchandise in this country to buy German bonds, as an incentive to exports. Danish and Norwegian issues gave evidence of strength during the week. South American bonds changed but fractionally, with the exception of Argentine issues, which rose several points. Australians remained relatively stationary and Japanese obligations continued their slow downward movement. Moody's average of yields on 40 foreign bonds stood at 10.28% on Friday, while a week ago it was 10.39% and two weeks ago, 10.42%.

The best municipal issues continued strong. Offerings of the week were in moderate amount, but were well taken. A small issue of Minnesota bonds was disposed of on about a 3.60% basis with a general offering. Prime municipal issues were offered on a 3.75% basis and less. Weaker situations still command little active interest. Detroit bonds continued to show weakness. Bids for Cleveland

issues were at lower levels.

Moody's computed bond prices and bond yield averages are shown in the tables below:

* Note.—These prices are computed from average yields on the basis of one "ideal" bond (4¾% coupon, maturing in 31 years) and do not purport to show either the average level or the average movement of actual price quotations. They merely serve to illustrate in a more comprehensive way the relative levels and the relative movement of yield averages, the latter being the truer picture of the bond market.

† The last complete list of bonds used in computing these indexes was published in the "Chronicle" on Oct. 1 1932, page 2228. For Moody's index of bond prices by months back to 1928, refer to the "Chronicle" of Feb. 6 1932, page 907.

Indications of Business Activity

THE STATE OF TRADE-COMMERCIAL EPITOME.

Friday Night, Dec. 30, 1932.

Retail trade reports from different parts of the United States have been of much the same sort as recently. evidence is cumulative that a fair holiday trade has been done, though evidently somewhat smaller than that of last year, and that in many cases the dollar return by reason of lowered prices is well below that of a year ago. On this point the testimony is still sufficiently convincing that it will be 20 to 25 per cent less. As usual, wholesale trade is quiet at this time of the year. Meanwhile it is an interesting fact that of late the trading in stocks has been increasing partly under the stimulus of an active and rising bond market. London, Paris and Berlin have all been firm, especially Berlin. The exhibit of car loadings in the United States has been in some respects encouraging. Some of the railroads show an increase in net earnings even if others show the reverse. If the stock and bond markets should continue to broaden under the influence of rising prices, it will naturally attract more attention and have a corresponding effect on business sentiment. In steel there is some demand from the automobile and tin plate industries and the output of automobiles is holding up well. The etimated output of 110,000 cars and trucks for October may very possibly be exceeded in January. The Ford company plans to offer a new Ford eight in January and to turn out not less than 20,000 cars in that month. The Chevrolet reports larger dealers' commitments on hand than at any time since April 1930.

Retail trade at Chicago finally brightened up a bit and some department stores did better than in the same week last year, but still it was confined largely to cheap articles of dress, accessories, hosiery, toys and a certain class of novelties with a slightly better demand for radios. Some wholesalers reported a better fill-in trade. Orders for cotton goods for January delivery were larger. But the fact was stressed that at both wholesale and retail the sales in December did not equal those of December last year either in quantity or dollar value. Larger railroad specifications and automobile orders have led to the starting up of steel mills in the Chicago area which had been closed since last summer. In St. Louis the expectations of a better holiday retail trade

were disappointed. The purchases too were mostly of the cheaper goods. Unemployment continues to be acute there. In Cleveland there was a slight increase in the retail trade and the output of steel mills was somewhat larger, one concern operating four shifts a day and another running at capacity in contrast with the dullness at most steel centers. Building operations fell off sharply. At Kansas City there was a brisk retail trade after a late start for the season but with prices so much below those of a year ago dollar values as a rule make a poor showing. In Minneapolis holiday trade was not so encouraging, being estimated at only about 60% of that of 1931 in dollar volume. Northwestern car loadings are stated at 17% below those of 1931. For the 48 weeks ending Dec. 3 they were 30% smaller than in the same time last year. In Boston the holiday sales were about as large as last year. Woolen and worsted mills were fairly busy and inventories of goods are reported to be low. In Philadelpha holiday trade was better than expected but the total was below that of a year ago.

Wheat has been firm without much change in price. It has been sustained by a good cash position and the very fact that prices are already so low. Corn has been relatively stronger than wheat while oats and rye have had little change of any consequence. Cotton has had quite a substantial advance as Southern offerings have decreased, hedge selling has slackened and trade buying has persisted. A very interesting condition has arisen in wheat and corn as well as in cotton to some extent. Primary offerings have declined to a point which indicates practically a seller's strike on the part of the farmer. This has been particularly true in the case of corn, but wheat and cotton are now beginning to feel its effects. It has been compared in some quarters to the "buyers' strike" of 1920-22 and has undoubtedly been instrumental recently in decreasing the quick supply of several farm commodities. The idea is encouraged by the belief that the Domestic Allotment Plan or some similar legislation, whose aim is to help agriculture, will soon be passed and the farmers' plight will be bettered almost immediately thereby. This belief may be fallacious, but at least it is one of the causes of a tighter cash grain and cotton market for the time being. Coffee has declined owing to the probability of another reduction in the coffee tax by Sao Paulo, this time of 67 cents a bag. Spot prices and cost and freight coffee quotations have dropped. Raw sugar has declined in a dull market. Hides have declined on the spot but futures have latterly rallied. In spite of the disappointing holiday trade, retail inventories are notoriously very low and sentiment is more cheerful. The psychology of American business is far different generally than it was at the end of 1930 and 1931.

Stocks on the 24th advanced a fraction on transactions of only 329,700 shares. Railroad, industrial and public utility bonds of the second grade also advanced after having declined for most of the week. Saturday's bond transactions were \$4,600,000 and a number of U.S. Government issues reached new highs on advances of 2-32 to 13-32 points. Sterling and francs declined slightly. Reports of railroad earnings for November as they were published, continued to show improvement, the latest instances being Erie, O. & W. and Wabash. On the 27th stocks were dull at an irregular decline within very narrow limits. The sales were little over 800,000 shares. Bonds were irregular but seven issues of U.S. Government bonds reached the highest prices of 1932. On the 28th stocks moved up one to two points in the largest trading in three months, 1,580,000 shares changing hands. Later came a reaction which left the closing prices irregularly lower but the net decline very slight. Bonds were active Not for four months has the bond trading, and higher. \$16,111,300, been as large as it was on Wednesday. Foreign bonds were conspicuously strong. German Government 5½s reached another new high and German municipal and corporation is ue; advanced one to four points. Argentine and Brazilian bonds were also noticeably strong. One issue of U.S. Government bonds reached a new high.

On the 29th stocks advanced 1 to 3 points on trading which again showed a wider reach and a larger total of 1,607,700 shares. The rise was led by bonds, especially German Government issues of which the 7s and $5\frac{1}{2}$ s reached new high levels. United States Government bonds were lower but domestic corporation issues were in general higher, the industrials alone lagging. The total sales of bonds were \$15,461,000, or well over \$30,000,000 in two days. The gains in stocks which were emphasized in the last hour were in the face of more or less tax selling. Commodities were in

general steady and cotton noticeably higher. Railroad traffic is making an unexpectedly good showing and apparently much of the buying of stocks has latterly been for investment. London and Paris were cheerful and Berlin was higher, especially for bonds.

Today security markets had a brisk rally in spite of the large amount of cash sales made for the purpose of registering tax losses. This selling was well absorbed and the best prices came in the last hour. The strength of such issues as New York Central, U. S. Steel common and Pfd, Auburn and other speculative favorites indicated short covering over the holiday. Commodities were generally higher with the exception of cotton. Farm equipment shares were strong on the prospect that the incoming administration will sponsor the Domestic Allotment plan. The weakness of tobacco stocks was attributed in part to the persistent rumors that severe price cuts in the more popular brands of cigarettes were pending. Sterling declined because of South Africa's departure from the gold standard and silver rallied after a three-day Year-end trade news took a more cheerful outlook for 1933 while deploring the admittedly disappointing Christmas season. Total sales while only two-thirds of Thursday's were still over the 1,000,000 share mark. Bonds provided a really encouraging session. With tax selling virtually out of the way, more favorable business is looked for next week and the speculative issues reflected this theory. German bonds were again strong as were Argentines and foreign bonds generally. U.S. governments were about the only exception to the rule of strength. Transactions were slightly over \$9,600,000.

Providence, R. I., reported that in spite of the recent curtailment of buying of textile equipment there, plants manufacturing such machinery are the only bright spot in the local metal trade. When cloth manufacturing in that district had its spurt in August and September there was at the same time a revival of activity in the manufacture of textile equipment, which has since been falling off steadily. With a revival of activity in the textile industry itself, however, it is believed that the need for equipment machinery will be such that a marked increase in activity will result from the deferred demand. Huntsville, Ala., wired that the Dallas Manufacturing Co. is giving its employees this week as a holiday vacation. Boston wired that a 15 per cent. increase in wages, effective Jan. 2 will be granted to more than 300 employees of Columbian Mills of Otis & Co., at Greenville, N. H., according to an announcement made in that town to-day. Workers accepted a 35 per cent. cut last August when it was feared operations at Greenville would cease entirely.

Chicago wired that the mid-winter "flyer" catalogue of Sears, Roebuck & Co., which has just been issued reflects slackening in the pace of price declines for manufactured goods and in some instances indicates that prices will have to be raised after the end of February, when the catalogue expires. The average reduction for all lines of merchandise shown in the book is 9.2% under the fall and winter general catalogue. The company states that this is the smallest average sales catalogue decrease under a preceding general catalogue shown in about three years.

Christmas Day in New York was the warmest in 39 years, with a maximum temperature of 56 degrees and a minimum of 46. A drizzling rain set in on Christmas Eve and continued until the next morning. Many ferries suspended service on account of the fog and other shipping was delayed. It was 46 to 56 in Boston, 44 to 46 in Chicago and 2 to 14 in Winnipeg.

After fair weather in New York on Monday, it rained all day on Tuesday, the 27th, as well as in the other middle Atlantic States, southern New England, the Middle and East Gulf States and the South Atlantic region. Atlanta had a rainfall of nearly $2\frac{1}{2}$ inches while quite heavy precipitation occurred in Philadelphia, Baltimore and Washington. The temperatures were New York, 38 to 46; Baltimore, 38 to 42; Boston, 32 to 44; Chicago, 30 to 42; Cleveland, 30 to 38; Detroit, 30 to 42; Omaha, 30 to 38; San Francisco, 40 to 48, and Winnipeg reported zero weather.

On the 28th the New York temperatures were 38 to 47 with a forecast of colder weather for the next day. Chicago had 32 to 38; Cleveland, 26 to 38; Detroit, 28 to 42; Milwaukee, 30 to 32; St. Paul-Minneapolis, 4 to 36; Kansas City, 28 to 40; Omaha, 24 to 32; Philadelphia, 40 to 46; St. Louis, 36 to 54; Winnipeg, 4 below to 20 above. For the second time in history the Rio Grande River was blocked by an ice jam and was threatening to change its course at San Marceal 185 miles north of El Paso.

On the 29th it was 34 to 50 in New York City with a light rainfall. Chicago had 34 to 40; St. Louis, 34 to 54; Cleveland, 32 to 52; Cincinnati, 20 to 38; Milwaukee, 32 to 46; Minneapolis, 20 to 30; Kansas City, 32 to 54; Philadelphia, 38 to 52; Detroit, 38 to 52; Boston, 34 to 46; Seattle, 38 to 44; Winnipeg, 14 below to 16 above zero.

To-day it rained with temperatures 41 to 51. Overnight Boston had 38 to 46; Pittsburgh, 36 to 54; Portland, Me., 32 to 44; Chicago, 40 to 46; Cincinnati, 38 to 42; Cleveland, 36 to 52; Detroit, 32 to 52; Milwaukee, 36 to 46; Savannah, 60 to 80; Kansas City, 32 to 54; Denver, 10 to 26; Los Angeles, 48 to 62; Portland, Ore., 42 to 52; San Francisco, 44 to 58. Montreal, 30 to 36, and Winnipeg, 2 to 30.

Business Prospects at Year-End Better than at Close of 1932 Says Guaranty Trust Company of New York—Prompt Recovery from World Depression Dependent on Political Action.

Business approaches the year-end with some encouraging features in the situation, but with the outlook for the early future more than usually clouded with uncertainty, states the Guaranty Trust Co. of New York in the issue of "The Guaranty Survey," its review of business and financial conditions in the United States and abroad, published Dec. 27. "Re-adjustment has proceeded swiftly throughout the year,

and the prospects are undoubtedly better than they were at the end of 1931," says "The Survey", which continues:

However, it has become increasingly clear that the likelihood of any reasonably prompt recovery from the world-wide depression depends largely on political action at home and abroad. War debts, trade barriers, monetary restoration, budget balancing, and political stability represent problems that have become more vital than ever to the world's economic welfare and that depend for their solution on the action of public officials.

Outlook Hinges on Political Factors.

Any attempt to appraise the significance of the present situation must, therefore, be predicated on certain assumptions regarding the policies to be pursued by the governments of the principal industrial nations. If the existing problems are handled with an adequate appreciation of the economic principles involved, it is reasonable to expect that the coming year will witness a continuation of the progress that was begun in the latter half of 1932. However, there must inevitably be a period of uncertainty and hesitation until decisive steps are taken to remove the politico-economic obstacles that now stand in the way of recovery, and until enough time has classed to give now stand in the way of recovery, and until enough time has elasped to give some indication whether the decisions reached represent adequate solutions.

Significance of War-Debt Default.

Significance of War-Debt Default.

The default by several nations on their war debt payments to the United States due on Dec. 15 cannot be regarded otherwise than as a blow to confidence and, consequently, as a setback to trade revival throughout the world. It is to be feared, moreover, that the default will tend to retard, rather than promote, the final solution of the debt problem. How serious the adverse effects may be will depend on the extent to which the American attitude in the face of this unfortunate development is tempered with a broad-minded appreciation of the debtor's point of view. The principal need of the moment is a settlement of the question that will end the present uncertainty, and the achievement of a satisfactory solution will require as much good will and mutual toleration as can be summoned to the aid of the negotiators.

Comparison of 1932 and 1931.

Comparison of 1932 and 1931.

Measured by almost any of the accepted standards of economic welfare, the year 1932, taken as a whole, was a period of deeper depression than 1931. The production and distribution of commodities were at lower levels; unemployment was greater; the earnings of business enterprises were smaller and losses larger, and commercial failures were more numerous. Prices in general continued to decline, although the downward trend was interrupted by a sharp advance during the third quarter of the year. Distress among the farming population was increased by the further drastic decline in prices of agricultural commodities.

A conspicuous and significant exception to the general trend must be

in prices of agricultural commodities.

A conspicuous and significant exception to the general trend must be noted in the case of bank failures, which, while very numerous, were less so than in the preceding year. This favorable comparison was made possible by the marked improvement in financial conditions that began in the summer. In four of the first seven months of 1932, bank suspension outnumbered those in the corresponding months of 1931; and the total for the current year through July was 22% above that a year earlier. In the following three months, failures reached 25% of the 1931 figures, with the result that the total for the first ten months of the year was equivalent to only about two-thirds of that for the similar period a year ago. It is likely that the figures for the closing weeks of the year will make an even more favorable showing, inasmuch as the latter part of 1931 was a period of deep financial distress, whereas the financial system in the last two months appears to have retained a large measure of the improvement recorded in the third quarter of the year. quarter of the year

have retained a large measure of the improvement recorded in the third quarter of the year.

The liquidation of bank credit proceeded rapidly through the first half of the year. Since the low point was reached in July, loans and investments have increased \$506,000,000. The gain undoubtedly indicates a marked improvement in the position of the banks, reflecting, as it does, a return of money formerly hoarded and a corresponding increase in bank deposits. It is important to note, however, that the money thus received by the banks has been employed not in extending short-term credit to business enterprises but in increasing the investments of the banks in securities. Loans have decreased since July by \$697,000,000, while investments have increased by \$1,203,000,000. The upward trend in bank credit, therefore, encouraging as it is in some respects, will be more significant as an indication of improved trade conditions when it reflects an expansion in commercial credit, rather than an increase in investments alone.

Another important respect in which 1932 compares favorably with 1931 is that the earlier year was one of almost uninterrupted recession and closed with the general level of trade at a new low point, while 1932 may be divided, roughly, into two parts, with the first half characterized by a continuation of the recession and the second by numerous indications of revival. As far as future possibilities are concerned, this contrast is probably more significant than a comparision of actual levels of production and distribution.

At the end of 1931, the downward movement was still definitely under way at present, it appears to have been checked.

Remaining Difficulties.

Remaining Difficulties.

The principal sources of unsettlement that remained were the American political campaign, the persistent parliamentary crisis in Germany, the strangulation of international trade by excessive tariffs and other barriers, monetary instability, the obvious fact that the one-year moratorium had been far from sufficient to bring about a solution of the war-debt problem, and the apparent necessity for further deflation in certain directions in this country in order to restore price equilibrium and stability in public finance. The American election removed one of these sources of uncertainty and at the same time brought assurance of an overwhelmingly party majority in Congress, with an end to the divided responsibility that had been held partly accountable for the lack of co-ordination in the formulation and execution of governmental policies.

Most of the other uncertainties remain, and it is universally agreed that concerted international action will be necessary to remove them. For the most part, they are mutually interrelated. The German political situation,

most of the other uncertainties remain, and it is universally agreed that concerted international action will be necessary to remove them. For the most part, they are mutually interrelated. The German political situation, for example, could be strengthened by international agreement on armaments and reparations, which, in turn, both depend upon and must help to determine any decision reached with respect to the war debts. The debt question is intimately related to that of trade barriers, as is that of monetary etabilization.

stabilization.

The urgency of these problems and the fact that each of them is dependent to a greater or less extent on the others explain the eagerness with which the world awaits the outcome of the international economic conference that is expected to meet early next year. Many international conferences have been held in recent years, but none with such a wealth of opportunities for direct benefit to the whole world. It is probably no exaggeration to say that the actions taken by the conference will become the chief influences hastening or retarding the recovery of the world from the economic collapse of the last three years. of the last three years.

Loading of Railroad Revenue Freight Continues Small.

Loading of revenue freight for the week ended on Dec. 17 totaled 516,796 cars, according to reports filed on Dec. 23 by the railroads with the car service division of the American Railway Association. This was a decrease of 4,420 cars under the preceding week and a reduction of 64,374 cars under the same week last year. It also was a reduction of 197,069 cars under the same week two years ago. Details are outlined as follows:

Miscellaneous freight loading for the week ended Dec. 17 totaled 148,382 cars, a decrease of 19,216 cars below the preceding week, 43,680 cars under the corresponding week in 1931 and 89,349 cars under the same week in

Coal loading totaled 144,758 cars, an increase of 25,343 cars above the

preceding week, and 24,939 cars above the corresponding week last year, but 16,745 cars below the same week in 1930.

Coke loading amounted to 6,671 cars, an increase of 1,607 cars above the preceding week, and 1,225 cars above the same week last year, but 1,821 cars under the same week two years ago.

Loading of merchandise less than carload lot freight totaled 160,112

rs, a decrease of 5,955 cars under the preceding week, 31,812 cars e corresponding week last year and 50,166 cars below the same

two years ago.

Livestock loading amounted to 17,173 cars, a decrease of 928 below prethe same week 3,960 cars under the same week last year and 5,574 cars below the same week two years ago. In the Western districts alone, loading of live stock for the week ended on Dec. 17 totaled 13,175, a decrease of 3,354 cars, compared with the same week last year.

Grain and grain products loading totaled 25,589 cars, 2,163 cars below

the preceding week, 2,823 cars below the corresponding week last year and 10,464 cars under the same week in 1930. In the Western districts alone, grain and grain products loading for the week ended on Dec. 17 totaled 15,736 cars, a decrease of 2,279 cars below the same week in 1931.

Forest products loading totaled 11,989 cars, a decrease of 3,397 cars below the preceding week, 6,162 cars under the same week in 1931 and 19,329 cars below the corresponding week two years ago.

Ore loading amounted to 2,122 cars, an increase of 289 cars above the week before, but 2,101 cars below the corresponding week last year and

3,621 cars under the same week in 1930.

All districts except the Pocahontas, which showed an increase, reported reductions in the total loading of all commodities compared with the same week in 1931, but all districts reported reductions compared with the same week in 1930.

Loading of revenue freight in 1932 compared with the two previous years follows:

	1932.	1931.	1930.
Four weeks in January	2,269,875	2,873,211	3,470,797
Four weeks in February	2,245,325	2.834.119	3,506,899
Four weeks in March	2,280,672	2,936,928	3,515,733
Five weeks in April	2,772,888	3,757,863	4,561,634
Four weeks in May	2.087.756	2,958,784	3,650,775
Four weeks in June	1.966.355	2,991,950	3,718,983
Five weeks in July	2,422,134	3,692,362	4,475,391
Four weeks in August	2,065,079	2,990,507	3,752,048
Four weeks in September	2.244,599	2,908,271	3,725,686
Five weeks in October	3,158,104	3.813.162	4.751.349
Four weeks in November	2,195,209	2,619,309	3,191,342
Week ended Dec. 3	547,461	636,366	787,072
Week ended Dec. 10	521,216	613,621	744.353
Week ended Dec. 17	516,796	581,170	713,865
Total	27,293,469	36,207,623	44,565,927

The foregoing, as noted, covers total loadings by the railroads of the United States for the week ended Dec. 17. In the table below we undertake to show also the loadings for the separate roads and systems. It should be understood, however, that in this case the figures are a week behind those of the general totals—that is, are for the week ended Dec. 10. During the latter period a total of 18 roads showed increases over the corresponding week last year, the most important of which were the Virginian Ry., the Wheeling & Lake Erie Ry., the New York Ontario & Western Ry. and the International-Great Northern RR.

Federal Reserve Board's Summary of Business Conditions-More Than Seasonal Decline in Industrial Activity-Falling Off Also in Employment.

In its monthly summary of business conditions in the United States, issued Dec. 24, the Federal Reserve Board states that "industrial activity declined in November by somewhat more than the usual seasonal amount." Board also states that "changes in factory employment and pay rolls, reported for the middle of the month, were largely seasonal in character." It further says that "prices in wholesale commodity markets were somewhat lower, on the average, in November than in October, and declined further during the first three weeks of December." The Board's summary continues:

Production and Employment.

Volume of industrial production, as measured by the Board's seasonally adjusted index, declined from 66% of the 1923-1925 average in October to 65% in November, compared with a low level of 58% in July. Output at woolen mills, silk mills, and shoe factories declined in November from the relatively high levels of the autumn, while cotton mills continued

Lumber production declined by considerably more than the usual seasonal amount. Steel production decreased during November and the first three weeks of December, while automobile output increased considerably in connection with the introduction of new models.

The number employed at factories declined somewhat from October to November, reflecting in large part developments of a seasonal character. Working forces in the woolen, silk, shee, and canning industries were reduced, while at car-building shops and at factories producing automobiles and agricultural implements there were increases in employment.

Construction contracts awarded up to Dec. 15, as reported by the F. W. Dodge Corp., indicate for the last three months of the year a decline from the third quarter of somewhat more than the usual seasonal amount, following a non-seasonal increase from the second to the third quarter.

Estimates of the Department of Agriculture, based on Dec. 1 reports, indicate a cotton crop of 12,727,000 bales, about 800,000 bales larger than the estimate a month earlier, but 4,400,000 bales smaller than last year's unusually large crop. Wheat, tobacco, flaxseed, and other leading cash crops are also considerably smaller than a year ago, while feed crops are substantially larger. Acreage of winter wheat planted this fall was slightly smaller than a year ago, and condition of the crop on Dec. 1 was unusually poor, according to the Department of Agriculture.

Distribution.

Distribution of commodities by rail decreased seasonally from October to November, while the dollar volume of department store sales, which ordinarily expands at this season, showed a decline.

Wholesale Prices.

During early November the general level of wholesale commodity prices advanced somewhat, reflecting chiefly increases in prices of domestic agricultural products; in the latter part of the month, however, prices of livestock, cotton, and grains declined considerably; and, during the first three weeks of December, further declines in livestock prices were reported. By the third week of December prices of textiles, copper, and silver, as well as of livestock, were substantially lower than in the middle of November, and the general average of wholesale prices was at a level

slightly below that prevailing before the advance that occurred last

Bank Credit.

During the four weeks ended Nov. 14 there was an addition of \$85,000,000 to the country's stock of monetary gold. The funds derived from this source were utilized in meeting an increase in the demand for currency, which was smaller than usual at this season, in further reducing by \$23,000,000 the indebtedness of member banks to the Reserve banks, and in increasing by \$25,000,000 the volume of member bank reserve halances.

and in increasing by \$25,000,000 the volume of member bank reserve balances.

On Dec. 15 there was a further increase of \$95,500,000 in the stock of monetary gold in connection with the current payment by Great Britain on the war debt. This amount of gold was earmarked in London for account of the Federal Reserve Bank of New York, and an equivalent credit was given by that Bank to the United States Treasury.

This transaction, together with other fiscal operations on Dec. 15, resulted in a temporary addition of \$100,000,000 to the reserves of member banks, which were subsequently reduced by Christmas currency demands, and an increase in Treasury deposits with the Reserve banks.

Loans and investments of reporting member banks declined by more than \$100,000,000 between Nov. 16 and Dec. 14, reflecting reductions in the banks' holdings of United States Government securities, and in loans other than security loans. Loans on securities increased, both at New York City and at other reporting member banks.

Money rates in the open market declined further, rates on 90-day bankers' acceptances declining from ½ of 1% to ¾ of 1%, and rates on prime commercial paper from a range of 1½% to 1¾% to a range of 1¼% to 1½%.

Business Outlook in California As Viewed by Wells Fargo Bank & Union Trust Co. of San Francisco— Seasonal Recovery Noted in Retail Trade—In-dustrial Employment Declined 8% from October to November.

"Rainfall in California for the season to date is far below normal, excepting in the extreme south," according to "The Business Outlook" of Dec. 20, published by the Wells Fargo Bank & Union Trust Co. of San Francisco. "In early December," says the publication, "snow fell over many parts of the State which rarely see snow. However, the total snowpack in the high Sierra on Dec. 15 was only about half of normal, and one-quarter as deep as at this time last year." We also quote the following from the "Outlook":

Recent freezing temperatures over the greater part of the State caused damage to citrus fruits and winter vegetables. Lemons and oranges still on the tree in the Sacramento Valley and north were severely demaged; this, however, affects only 70,000 boxes of lemons out of a total State crop of 6,500,000 boxes, and 58,000 boxes of oranges out of a total of 15,000,000 boxes. Celery, lettuce, cauliflower and artichokes are the vegetables most affected.

Trade.

In retail trade a recovery of about seasonal proportions has followed the full of midsummer. For the first 11 months of the year, dollar-volume sales of department stores recorded a 23% decrease as compared with 1931. Seasonal purchases, until recently, have been unfavorably influenced by unusually warm weather. Wholesale trade shows a 25% decrease for the first 10-month period, as compared with 1931.

Sales of 67,128 passenger automobiles during the first 11 months showed a decrease of 48% below the same period of 1931, but October sales were only 28% below those of October of last year.

November building permits in leading California cities, omitting permits for \$4,043,412 in preliminary structures for the San Francisco Golden Gate bridge project, totaled \$3,393,924 as against \$7,165,489 in November 1931. Permits for January to November totaled \$50,077,145 as against \$117,902,968 in the same period of 1931. Bank debits at 14 principal cities in the State from January to November showed a 29% decrease below 1931.

Labor*. Trade.

Labor.

Industrial employment in California during November declined 8% as against October, and 7.8% as compared with November 1931. According to reports of 1,257 factories summarized in the California Labor Market Bulletin, all classifications of industry reported declines excepting petroleum, explosives, chemicals, paints, paper products, textiles and "miscellaneous," all of which showed small increases. The only industries with more employees this November as compared with November 1931 were tanning, next polyment of the product o petroleum, canning and preserving, beverages, knit goods, men's clothing, and motion picture production. The total payroll in November was 22% less than last year, there being fewer employees, lower wages, and shorter working hours.

Continued progress in providing employment for additional workers is reported in the "spread-the-work" campaign carried on during the past four months. In San Francisco, about one-half of the city's firms are said to have adopted the "spread-the-work" idea.

Livestock.

Livestock.

Cattle in general are in "fair to good" condition. Pastures are only fair, rain and warm weather being needed to stimulate the growth of new grass. Although hay and other supplementary feeds for livestock are plentiful, few stockmen are said to be in a position to purchase, financial returns to livestock growers during the past two years having been greatly reduced. During the past year cattle prices have dropped 20% to 25%, and are now 55% below the peak of 1929. As a result of falling prices and lack of funds, only 170,000 feeder cattle have been brought here from other States for fattening during the 22 months ending Nov. 1, as compared with 300,000 imported in an average normal year.

Sheep in the main are said to be in good condition. The recent cold weather has affected lambs adversely, hence they will have to be given supplementary feed for some time. Prices of sheep dropped 12.5% in 1932, to a point 60% below the 1929 peak.

Conditions in Northwest Reviewed by Northwestern National Bank of Minneapolis—Large Decline Reported in Volume of Freight Movement— Department Store Trade Also Off.

The "Northwestern Bancorporation Review," published by the Northwestern National Bank of Minneapolis, of Dec. 20,

notes that the Northwest has sustained a greater decline from 1931 in the volume of freight movement than the United States at large, this being in greatest evidence in summer months when shipments of ore and lumber are seasonally at their high point. The "Review" also reports:

at their high point. The "Review" also reports:

In the 14 weeks ending Sept. 3, for example, Northwestern rail shipments of all revenue freight (Pacific Northwest included) were 41.4% less than in the corresponding weeks of 1931 as against a decline of 32.8% in all regions of the United States. With shipments of ore and forest products now practically completed for the season, Northwestern carloadings, four weeks ending Dec. 3, were 17.5% less than in 1931, whereas the national falling off was 15.1%. Taking the year to date, 49 weeks ending Dec. 3, freight movement in this territory is 30% less than a year ago, and in the country at large 25% less; if ore and forest products are eliminated from Northwestern totals the decline in this territory is reduced to 22%, or better than the national average.

Another broad index of activity is volume of electric power produced

Another broad index of activity is volume of electric power produced by public utility plants, and in this the Northwest, without qualification, comes nearer to the national record. Latest figures are for October, and results in that month indicate a Northwestern decline greater than in all States by but a fraction of 1%; for the full 10 months, up to Nov. 1, the decrease was 14.3% in the Northwest and 13.1% in the United States. The State of Montana, where utilization of electric power by copper interests is extensive, is responsible to a considerable degree for the relatively unique workers are still the states.

The State of Montana, where utilization of electric power by copper interests is extensive, is responsible to a considerable degree for the relatively unfavorable regional position; excluding Montana, the falling off in Northwestern production of electric energy, year to Nov. 1, was 9.5%, whereas in the whole United States it was 13.1%.

Holiday trade in the country at large is showing a drop in dollar amount from last year fairly comparable to recession in general business. On Dec. 16 the "Wall Street Journal" reported business transacted by department stores during the first half of December in several leading cities as follows: Declines in sales from a year ago in New York and Chicago, 30%; Philadelphia, 25 to 30%; Boston, about 25%; Detroit, 20 to 25%; San Francisco, 20%. A composite record of department store trade in several Northwestern cities (not sweepingly inclusive but sufficiently complete to give the trend) shows that the falling off from last year, dollar volume, during the first half of December was about 23%. The Northwestern record for miscellaneous retail stores (including department) transacting a typical holiday business indicates a decline slightly greater than that of department stores considered by themselves—about 24%. This falling off, first half of December, is greater than that reported a year ago, when a similar survey was made and a drop of 17%, 1931 as compared with 1930, was indicated. Rather odd to state, in view of much being heard concerning the trend of purchases to necessities, December turnover of retail merchants dealing principally in wearing apparel presents the least satisfactory showing of the Northwestern group; on the other hand, furniture and jewelry establishments are considerably above average. These variations, of course, may be offset by facts not apparent on the surface—for example, clearance sales at extra-special prices may be more prevalent in some groups than in others; also, in respect to apparel and jewelry, general decline in dollar volume may have been m

Measured in dollars, current volume of business transacted in this region is running a little behind the country at large in comparison with 1931. Check payments made through banks in 33 leading cities of 10 Northwestern Cheek payments made through banks in 33 leading cities of 10 Northwestern States, five weeks ending Dec. 7, were 29% less than in the same period last year; corresponding decline in 140 leading cities of the United States, New York not included, was 27%—including New York City, 31%. For the year to date, up to Dec. 7, the decline in business turnover measured in current valuations is precisely the same in this region as elsewhere, New York City not included—a falling off in dollar volume of 28.7% in 33 Northwestern cities and 28.7% in 140 large cities of all States. During the past month demand deposits of reporting city member banks of the Reserve System have increased to some extent but time deposits have fallen off in about the same amount: compared with two months ago. Reserve System have increased to some extent but time deposits have fallen off in about the same amount; compared with two months ago, there has been a substantial increase in demand, with time deposits holding at about the former level. In two months' time, total loans and investments have declined slightly (the falling off in loans being about offset by holdings of United States Government securities), reserves have increased, amounts held on deposit with correspondent banks have gained, and borrowings from Federal Reserve banks have declined. In the Minneapolis Reserve District there has been a small net gain in deposits of reporting city banks, October to December, a decline of about 5% in aggregate loans and investments, and a rather large relative gain in "due from banks."

Larger Than Usual Declines for November Reported in Industrial and Trade Activity in San Francisco Federal Reserve District-Employment Decreased About Seasonally, According to Isaac B. Newton.

"Declines in Twelfth (San Francisco) District industrial and trade activity during November were greater this year than has been customary during November of other recent years," said Isaac B. Newton, Chairman of the Board and Federal Reserve Agent of the Federal Reserve Bank of San Francisco, under date of Dec. 22 1932. According to Mr. Newton, "the condition of reporting city member banks improved somewhat during the month, although pressure continued evident in country areas. Demand for currency decreased, contrary to the seasonal tendency, during the second half of November and the first two weeks of December." Newton also said as follows:

Rainfall had approached the normal seasonal total in the Pacific North-Rainfall had approached the normal seasonal total in the Pacific Northwest in mid-December, but was less than normal in California and the Intermountain States at that time. Snowfall and unusually cold weather in California during early December damaged winter vegetables and citrus fruits, particularly in northern and central California, and retarded the growth of forage on ranges. Winter wheat was damaged considerably by the cold weather in the Pacific Northwest. Volume of crops marketed was seasonally smaller in November than in October, but approximated the movement in November 1931. Agricultural prices receded further in November and the first half of December.

Petroleum production in California changed little in the six-week period ending Dec. 17, remaining considerably in excess of proration schadules. Refinery runs to stills decreased slightly, and crude oil stocks continued

to rise. Output of lumber decreased more than seasonally from October to November. Some decline was recorded in cement production, after allowance for seasonal factors. The value of both engineering contracts awarded and building permits issued was considerably enlarged as a result of the letting of Golden Gate Bridge contracts. About the seasonal decreases in employment were reported. Few wage reductions were reported in Nevermber. in November.

Department store sales were markedly smaller in November than in October, although some increase is usually recorded between these months. Freight carloadings declined more, and automobile registrations less than seasonally. There was a decline in intercoastal traffic, following an advance

seasonally. There was a decline in intercoastal traffic, following an advance in the three preceding months.

Reserve bank credit employed in the Twelfth District decreased considerably in the five weeks ending Dec. 21, reflecting principally an inflow of funds from other parts of the United States and Treasury expenditures in excess of collections in the District. Reserve balances at the Federal Reserve Bank of San Francisco were further increased during this period as time deposits of member banks increased moderately. Both loans and investments of reporting member banks increased slightly from mid-November to Dec. 21 ber to Dec. 21.

Holiday Trade in Department Stores in New York Federal Reserve District Less During First 24 Days in December Than in Same Period Year Ago-Dollar Value of Sales During November Lower.

"Reports from the leading department stores in New York City and vicinity on the holiday trade during the first 24 days in December showed a decline of 22% in comparison with the same period in 1931," which is, according to the Federal Reserve Bank of New York, "a slightly smaller decline than was indicated by sales during the first half of the month. Assuming that this decrease will prevail for the entire month of December," continued the Bank, "the total dollar sales of the reporting stores in this district for the year 1932 will be about 21% below the level of 1931."
In its Jan. 1 "Monthly Review," the Bank also said:

In its Jan. 1 "Monthly Review," the Bank also said:

The total dollar value of sales of the reporting department stores in this district in November was 19% below a year ago, a slightly smaller decline than in October, but after making allowance for one more shopping day this year than in 1931, average daily sales showed a somewhat larger decline than in the two preceding months. On an average daily basis, department store business in New York City, Buffalo, Syracuse, Bridgeport, Newark, Hudson River Valley District and Westchester District compared less favorably with a year ago than in October. On the other hand, average daily sales of stores in Northern New York State, Southern New York State and the Capital District showed smaller declines than in a number of months. November sales of the reporting apparel stores decreased by about the same amount compared with a year ago as department store sales, and the decline in average daily sales was somewhat larger for the apparel stores also than in the past two months.

Department store stocks of merchandise on hand Nov. 30, at retail valuation, continued to show a substantial decrease from a year ago. Collections of accounts outstanding at the end of the previous month were about the same in Nov., 1932, as in 1931, in most localities.

Wholesale Trade During November 16% Below Year Ago-Smallest Reduction Reported in 1932 According to Federal Reserve Bank of New York.

"November sales of the reporting wholesale firms in the Second (New York) District averaged 16% below a year previous, the smallest reduction to be reported in 1932," according to the Federal Reserve Bank of New York in its Jan. 1 "Monthly Review," which also says:

Sales of silk goods, reported on a yardage basis by the Silk Association of America, increased over the previous year for the fourth consecutive month! and sales of stationery, men's clothing, jewelry and diamonds

were reduced less than in any other month for more than a year. Moreover, machine tool orders, reported by the National Machine Tool Builders
Association, and grocery and shoe sales showed the smallest declines in a
number of months. In addition, hardware, paper and cotton goods firms
reported somewhat smaller decreases in sales than in October. Drug concerns, on the other hand, showed a large year to year decline, compared
with only small decreases in the two previous months.

Stocks of merchandise on hand at the end of November continued to be
considerably below a year previous to all reporting lines except groceries
which for the second consecutive month showed only a small reduction
from a year previous.

The November ratio of collections to accounts outstanding averaged

The November ratio of collections to accounts outstanding averaged slightly higher than in 1931, as there were more lines reporting increases than there were reporting decreases from a year ago.

Decline of 10% Reported in Chain Store Sales During November As Compared With 1931 By New York Federal Reserve Bank.

The Federal Reserve Bank of New York, in its Jan. 1 "Monthly Review" of Credit and Business Conditions in the New York Federal Reserve District, said as follows

the New York Federal Reserve District, said as follows regarding chain store trade:

Total November saies of the reporting chain stores were only 10% less than in 1931, but after allowance is made for one more business day than in November, 1931, the year to year decline in average daily sales was slightly larger than in the two previous months. The reductions in average daily sales of the grocery, dry, shoe, and variety chains were the largest in several months. Ten cent stores, on the other hand, reported a considerably smaller decrease in sales than in October, and in the case of the candy chains sales compared more favorably with a year ago than in any month since July. month since July.

The change between the total number of stores operated this year and a year ago was so slight that sales per store of the reporting chains showed virtually the same percentage change as did their total sales.

Current Business Conditions, According to Statisticians of National Industrial Conference Board-Net Tendency in November Toward Maintenance of Gains Accruing in Recent Months.

Stating that "general business activity in November fell off by an approximately seasonal amount under the level the Conference of Statisticians in Industry in October, under the auspices of the National Industrial Conference Board, adds that "the net tendency during the month was toward the maintenance of gains accrued since the end of the summer." The Board, in its survey of current business conditions under date of Dec. 20, also had the following to say:

Productive activity on the whole showed an increase during the month. The automotive industry showed its first monthly increase in output since July. Building and engineering construction fell off slightly but not so much as is ordinarily the case at this time of the year. Steel ingot output per day of operation declined by less than a normal seasonal amount, while pig iron production actually increased by a small margin between October and November. Bituminous coal mined fell off by a slightly greater than seasonal amount. Anthracite shipments fell off during the month, but nevertheless showed slight improvement over shipments a year ago. Electric power produced declined slightly with losses in the industrial regions overcoming gains in other sections. Textile production showed an approximately seasonal gain during November.

a year ago. Electric power produced declined slightly with losses in the industrial regions overcoming gains in other sections. Textile production showed an approximately seasonal gain during November.

The distribution of commodities by rail freight declined by an approximately seasonal amount in November. Total carloadings, averaging 548,700 cars per week, were 13.4% under the average in October and at a level 16% under what they were in November 1931. Shipments of of merchandise and miscellaneous items averaged 354,800 cars per week and also declined 13.4% under the October level. These latter carloadings were at a level 19% under those of November a year ago.

Department store sales in dollar values in November were 20% below their level of November 1931, with sales per day of trading 23% below. Corrected for seasonal and for days, November trading declined below trading in October and reached a new low level for the depression. The volume of transactions continued to fall below expectations, and present indications for active Christmas purchasing are not assuring. The dollar value of five and ten-cent store sales declined by 9% in November as compared with October, registering at a level 10% below that of a year ago. The decline in retail prices in the past year accounts for a large share of the decline in dollar values.

Commercial failures reported by Dun's to total 2.073 in number, declined in November by 9% under the October total, while the seasonal decrease in number in recent years was but 2%. Aggregate liabilities of \$53,621,127 increased by 1.5%, while the increase in liabilities in recent years was 19%. The favorable November report follows close upon the easing of failures in number and extent in September and October. Prices of commodities at wholesale declined by roughly 1% in November as compared with October to a level 9% under the general level of November as compared with October to a level 9% under the general level of November 1931. The decline in November, the second successive monthly

nent in manufacturing industries showed an increase of more in November as compared with October, according to a pre-trimate. Hourly earnings fell off during the month as did liminary estimate the cost of living.

gether, the month of November saw a maintenance in general tive activity, due in large part to the year-end revival in the auto-industry, and a recession in distribution and trade. The gain mess during the fall months have been consolidated in recent weeks. Altogether.

Largest Loss in Many Months Noted in Wholesale Prices During Week Ended Dec. 24 by National Fertilizer Association.

Wholesale commodity prices declined more sharply during the latest week (Dec. 24) than for several months, according to the index of the National Fertilizer Association. index declined 12 points during the latest week ended Dec. 24, dropping from 59.3 to 58.1. The latest index number is 15 points below the low point shown during June. A month ago the index stood at 60.2. There has, therefore, been a decline of 21 points during the last month. A year ago the index stood at 65.1. (The three-year average, 1926-1928, equals 100.) The Association also noted the following under date of Dec. 27:

under date of Dec. 27:

Of the 14 groups listed in the index, six declined and eight showed no change during the latest week. The most heavily weighted groups declined sharply. Fuel, including petroleum and its products, foods, grains, feeds and livestock, textiles, miscellaneous commodities and fats and oils were the declining groups. None of the groups advanced.

During the latest week 32 commodities showed price losses, while 15 showed price gains. During the preceding week there were 32 declines and 21 advances. Two weeks ago there were 40 declines and only eight advances. Important commodities that declined during the latest week were petroleum, gasoline, coffee, calf skins, hides, butter, silk, cotton, cottonseed meal, eggs, raw sugar, pork, apples, corn, wheat, heavy hogs, and feed stuffs. In a few instances the price declines were rather large. This was particularly true of petroleum, hides, eggs, and butter. Advancing prices were shown for lard, linseed oil, wool, potatoes, cattle, rubber, tankage, rye and barley. The upturns in the advancing commodity prices were comparatively small.

Weekly Electric Production Declined During Week Ended Dec. 24 1932.

According to the National Electric Light Association, the production of electricity by the electric light and power industry of the United States for the week ended Dec 24 1932 was 1,554,473,000 kwh. No comparisons can be made with the corresponding week of last year because in 1931 the week included Christmas Day, while this year the holiday came a week later, the association states.

Arranged in tabular form, the output in kilowatt hours of the light and power companies for recent weeks and by months since the first of the year is as follows:

Weeks Ended.	1932.	1931.	1930.	1929.	1932 Under 1931.

Yots.—The monthly figures shown above are based on reports covering approxi-tely 92% of the electric light and power industry and the weekly figures are based about 70%.

"Annalist" Weekly Wholesale Price Index Fell to New Low Level During Week of Dec. 27—Monthly Average for December Also at Lowest Point.

A sharp decline carried the "Annalist" Weekly Index of Wholesale Commodity Prices down to a new low of 84.4 on Dec. 27 from 85.6 the week before, and 95.9 a year ago. Continuing, the "Annalist" said as follows:

The monthly average for December fell to 85.7 from 88.4 in November, a new post-war low that reflected the steady decline of the weekly figures. Most of the loss in the weekly index reflected the collapse of the petroleum price structure, but lower wheat, corn, cotton, butter and eggs also contributed.

Wholesale Prices for Week Ended Dec. 24 1932-Index of United States Department of Labor Lower.

The Bureau of Labor Statistics of the U.S. Department of Labor announces that its index number of wholesale prices for the week ended Dec. 24 stands at 62.5 as compared with 63.0 for the week ended Dec. 17 showing a de-

crease of approximately ¾ of 1%. The Bureau also said:
These index numbers are derived from price quotations of 784 commodities
weighted according to the importance of each commodity and based on
average prices for the year 1926 as 100.0.

The accompanying statement shows the index numbers of groups of
commodities for the weeks ended Nov. 26 and Dec. 3, 10, 17 and 24.

President Butler of Columbia University Holds Responsibility Rests Upon Universities to Find Way Out of Economic and Social Dilemmas-Poverty in Midst of Plenty Most Urgent of Solution-Proposes Study of Existing Price and Credit Sys -Criticizes Functioning of Elementary and Secondary Schools-Comments on Technocracy.

The fact that "the years through which we are passing have brought into new and unexampled prominence a series of difficult problems whose solution affects the happiness and satisfaction of the whole world" is commented upon by Dr. Nicholas Murray Butler, President of Columbia University, in his annual report to the trustees, made public on Dec. 26. "To find a way out of these economic and social dilemmas, with their serious and often distressing consequences, is a responsibility," says Dr. Butler, "which rests peculiarly on the universities of the world, and in high degree upon Columbia University." Dr. Butler points out that "no one of these problems is more urgent than that which is usually summed up in the phrase: 'Poverty in the midst of plenty." Dr. Butler observes that "in this regard our own time reveals a contrast truly ironic and of a kind and extent never before witnessed in the world." He continues: "This is the contrast between a technological and industrial development which offers for the first time in human history a universal standard of economic well-being and on the other hand an economic mechanism of exchange which seems to defeat, or at least to be unable to make good, that promise of satisfaction and prosperity." According to Dr. Butler, "the essential point is that two parts of our economic mechanism, the technique of production and the technique of exchange, have evolved, not in interdependence but in semiindependence each of the other, with the result that they do not function in harmony for the service of society." Dr. Butler refers to the fact that a group of engineers has urged "the desirability of an entirely new system of control which they term Technocracy." "Without accepting their inferences," he says, "the data which they are accumulating regarding the efficiency of modern production and its methods will have

to be taken into account in any serious study of this whole question." Dr. Butler suggests the formation of a group by Columbia which would be called upon "to examine into and to report upon the adequacy of the existing price and credit system to serve the needs of the twentieth-century community under the conditions which modern technological methods and their application to modern industry have created." Dr. Butler also, in his report, takes occasion to voice his views on the functioning of elementary and secondary schools. Before the university can do much more than it is now doing, these schools, Dr. Butler declares, "must bestir themselves really to educate the great mass of the populations and to leave off their dabbling in the muddy waters of the anti-philosophies and the pseudo-psychologies. The true task of the elementary and the secondary school is not to fuss with experimental psychologies at the cost of childhood's training and future usefulness, but to bring to bear all the resources of historic and well-tested civilization in simple and understandable form, to offer that body of ordered information that guidance and that kindly discipline which will really prepare youth for an independent, a selfcontrolled and a well-understood life." We quote more fully from the report as follows:

Scholarship and Public Service.

Each year the annual report records, even without completeness, not a few but literally scores of instances of distinguished and helpful public service rendered in various parts of the world by members of Columbia University. The accompanying report of the Dean of the Graduate Faculties enumerates a new and strikingly long list of examples of contacts which the University has established with the public life of the world during the year under review. The University's scholars carry their knowledge, their training, their insight, and their spirit of service across each one of the seven seas. Governments and public bodies everywhere and of every kind turn to these scholars for sympathetic study, for interpretation of difficult and perplexing economic and political conditions,, and for guidance in framing future public policies. In each one of these fortunate instances the triumph of scholarship is complete. No longer is it confined to the remote hilltop or the secluded valley, but everywhere it is made available in all its richness and understanding to satisfy the needs and to fulfill the aspirations of mankind. The university has come into its own. As one of the fundamental institutions of civilized man, it has now definitely established itself, not at all as any form or type of traditional school but as a society of scholars free and eager to conserve knowledge, to advance knowledge, and to interpret knowledge. The man who tries to do has learned how needful it is to turn for help and guidance to the man who really knows.

But the university cannot accomplish the impossible. On every head

But the university cannot accomplish the impossible. On every hand our democratic societies in various lands are calling upon the universities to give answer to the question: Why is it that democracies are not more intelligent, more competent, more abundant in understanding, and more high-minded? It is repeated again and again that the universities of the world should have made the Great War impossible, that they should have prevented many of the self-seeking and gain-seeking abuses which privilege and power have in so many cases engrafted upon popular government, and that they should have either made impossible the world-wide economic and financial depression or at least have greatly diminished its ill effects among men. Unfortunate as it may be, the university as a human institution and a human agency cannot achieve perfection, certainly not at a single bound across a few centuries. Ideas travel quickly enough in the upper and rarefied air of scholarship and highly trained minds, but they move with the sluggish slowness of a glacier over and among the great masses of population whose habits and whose prejudices are deeply ingrained and whose outlook on life is limited by the walls of their own gardens. Before the university can do much more than it is now doing, the elementary and the secondary school must bestir themselves really to educate the great mass of the populations and to leave off their dabbling in the muddy waters of the anti-philosophies and the pseudo-psychologies in which too many of these schools, in this land at least, are just now immersed. The true task of the elementary and the secondary school is not to fuss with experimental psychologies at the cost of childhood's training and future usefulness, but to bring to bear all the resources of historic and well-tested civilization in simple and understandable form, to offer that body of ordered information, that guidance, and that kindly discipline which will really prepare youth for an independent, a self-controlled, and a well-understood life But the university cannot accomplish the impossible. On every hand our democratic societies in various lands are calling upon the universities to give answer to the question: Why is it that democracies are not more

the answer to this question.

Perhaps the classic discussion of the seven liberal arts is that contained in the "English Historical Review" for July 1890. The liberal arts of the Middle Ages were grammar, rhetoric, logic, arithmetic, geometry, astronomy, and music. A liberal education was interpreted to be one which included a knowledge of these seven subjects, and all our modern thought regarding education has been colored by this definition and description. Any catalog of the liberal arts made in the twentieth century would be quite different from that which played so great a part in the intellectual life of the Middle Ages, but it would certainly include the substance of each one of the seven names upon the list which Paris and

Oxford and Cambridge knew so well in their earliest days. To it, of course, would now be added history, scientific method, and a knowledge of more spoken languages than one. Unhappily, the decline and fall of the ancient classics, instruments essential to any education that is truly liberal, have emptied many of the conventional subjects of study of a large part of their content, left them without known origin or understood growth, and thereby greatly lessened their own value as instruments of liberal training.

It is part of the public service of the university constantly to point to these facts and to the reasons for their existence, but the university alone cannot remedy them. It is the elementary and the secondary schools which touch immediately the lives and the minds of the great masses of the world's population. For the future of democracy itself it is of vital importance that those sources of power, of discipline, and of direction be kept pure and undefiled by false doctrine, heresy or schism.

New Opportunity for University Service.

New Opportunity for University Service.

The years through which we are passing have brought into new and unexampled prominence a series of difficult problems whose solution affects the happiness and satisfaction of the whole world. These problems demand with the utmost urgency study by the very best intelligence which our time can provide. They summon this University to a high task of interpretation and exposition on a scale that has perhaps never been reached. So rapid, so incessant, and so cumulative have been the changes going on in the economic, political and social structure of our modern civilization that they find us not only wholly unprepared to deal with the critical into the rapid, so incessant, and so cumulative have been the changes going on in the economic, political and social structure of our modern civilization that they find us not only wholly unprepared to deal with the grave emergencies which they so constantly present to us, but even unable clearly and fully to understand their essential character. To find a way out of these economic and social dilemmas, with their serious and often distressing consequences, is a responsibility which rests peculiarly on the universities of the world, and in high degree upon Columbia University. It is pathetic that with problems of this kind confronting and perplexing men, some of the great funds which have been established by private benefaction for the service of the public are literally wasting the sums at their disposal by scattering them in relatively small amounts over 50, over 100, different and usually unimportant fields of endeavor. These same sums, concentrated in large amounts on one, two or three of the commanding problems of our time, might well justify in the public mind any fortune, however great, which our economic and industrial system has made possible in past years. However this may be, the duty and the opportunity of this University are obvious.

usually unimportant fields of endeavor. These same sums, concentrated in large amounts on one, two or three of the commanding problems of our time, might well justify in the public mind any fortune, however great, which our economic and industrial system has made possible in past years. However this may be, the duty and the opportunity of this University are obvious.

No one of these problems is more urgent than that which is usually summed up in the phrase: "Poverty in the midst of plenty." In this regard our own time reveals a contrast truly ironic and of a kind and extent never before witnessed in the world. This is the contrast between a technological and industrial development which offers for the first time in human history a universal standard of economic well-being and on the other hand an economic mechanism of exchange which seems to defeat, or at least to be unable to make good, that promise of satisfaction and prosperity. The question as to the relation of the consumer's demand to productive capacity is one which has gained increasing attention in late years, particularly since the end of the Great War, and to-day it is paramount in the economic situation which confronts us on every hand. Overflowing barns and impoverished farmers, surplus of raw materials and idle plants, new triumphs of technological skill and new multitudes of unemployed workers, all these point to some fundamental failure of that plan which seeks to adjust demand with supply through the ordinary medium of prices. This is itself a technical problem, since on the one hand all the elements of productive efficiency are present and anxious to co-operate, while on the other hand the human need for the products of this co-operative efficiency is imperative and universal.

The nature of the problem will be better understood if one recalls the elementary fact that all exchange is mediated barter. By progressive stages, as society increased in complexity and in specialized activity, the world passed from what may be called a simple barter

of human interest.

The subjects to be attacked are not so much material for meticulous research of the traditional kind as for rigorous philosophic and economic analysis and for the wise and constructive formulation of policy. It would be an act worthy of Columbia University, and one with the greatest potentiality of public service, were it now possible to form a group, composed in part of members of the University staff and in part of others outside our ranks, to attack this problem without delay, in the confident

expectation that they would be able, in co-operation, to think this question through and to offer some firm and sound ground on which its solution could be built. The specific task to be entrusted to such a group, which in its conferences would naturally desire to establish fruitful contacts with leaders of finance and industry in this and other lands, would be to examine into and to report upon the adequacy of the existing price and credit system to serve the needs of the twentieth-century community under the conditions which modern technological methods and their application to modern industry have created. This may truly be said to be the tion to modern industry have created. This may truly be said to be the fundamental question before the world to-day. Columbia University, with its high prestige and its great and many-sided company of scholars, should be put in position to attack it without a moment's unnecessary delay. Material things can wait; men cannot, and sometimes will not.

George B. Cortelyou Reviews Electric Light and Power Industry in 1932—Generation of Electricity Estimated at 78,000,000,000 Kwh., Compared With 85,575,000,000 in Previous Year.

For the year 1932 the total generation of electricity is estimated at 78,000,000,000 kilowatt hours, as compared with a total generation of 85,575,000,000 kilowatt hours for the previous year, a decrease of 9%, according to George B. Cortelyou, President of the National Electric Light Association and President of the Consolidated Gas Co.

Total sales of electric current for residential purposes showed a gain of 3% for 1932 as compared with 1931, says Mr. Cortelyou, whose consumption of electricity for commercial lighting (retail) purposes showed a decrease of 4%; current for traction purposes, a decrease of 9%, and the use of industrial (wholesale) power, a decrease of 18% from 1931. Mr. Cortelyou added:

Total revenues from consumers of electricity are estimated at \$1,840,000,000 for 1932, a decrease of about \$135,000,000, or 7%, from the preceding year.

preceding year.

A further decline of 3% took place in 1932 in the average price of electricity for domestic use, or from 5.78c. per kilowatt hour to 5.60c. per kilowatt hour. At the same time, utilization of electricity by the average domestic consumer grew by 3%, or from 584 kilowatt hours at the end of 1931 to 600 kilowatt hours at the end of 1932. Thus, the net result was to give the consumer more service for the same amount of money. The total number of domestic customers decreased during the year by 250,000, a decrease of 1¼%.

With the falling off in gross revenues, there has not been a corresponding

tog give the consumer more service for the same amount of money. The total number of domestic customers decreased during the year by 250,000, a decrease of 14%.

With the falling off in gross revenues, there has not been a corresponding reduction in taxes, and it is estimated that taxes for 1932 will represent 11% of gross revenues as compared with 10.7% in 1931.

Several long-range power projects were carried through to completion in 1932. This resulted in bringing into service nearly 1,000,000 horsepower of additional generating equipment. Of this new capacity, 150,000 horsepower is hydro-electric plant and 850,000 horsepower is steam plant. This increase brings the total capacity in the electric light and power industry to approximately 46,400,000 horsepower. Prominent among these installations were 320,000 kilowatts (430,000 horsepower. Prominent among these installations were 320,000 kilowatts (430,000 horsepower and making it the largest power plant in the world, steam or hydro-electric. In the Middle West, a steam power installation with a capacity of 67,000 horsepower was completed by the Public Service Co. of Indiana, and a 13,000 horsepower hydro plant was built by the Central Power & Light Co. of Texas.

New developments were made in the field of mercury turbines. In New Jersey the Public Service Electric & Gas Co. began the construction of a plant with a turbo-generator to produce 20,000 kilowatts by means of mercury, and also to make steam which will generate 35,000 additional kilowatts in the usual steam turbine. At Schenectady, the General Electric Co. commenced the installation of the first outdoor steam plant. This plant also employs mercury. The electric output of the plan will be sold to the local electric Co. for industrial purposes.

Further extensions of transmission lines were made during the year, and two notable interconnections were undertaken. The first of these will the combined hydro-electric and steam power network of "Upstate" New York with the steam plant at Washington, D. C.

Fr

From the foregoing statement it is apparent that the electric industry is bearing its burdens resulting from the economic situation. Because such a large percentage of industry is electrified, the depressed condition of general business reacts upon the electrical industry and the course it will take during the year 1933 will follow closely that of business generally.

A. C. Ernst of Ernst & Ernst on Business Outlook-With Passing of 1932, Regarded as Most Critical Year of Depression Gives Encouragement-Hopes for Co-Operative Effort Between Business and Political Worlds.

Improvement in business psychology in 1933 despite continuation of severe difficulties is emphasized by A. C. Ernst, head of the accounting firm, Ernst & Ernst, in a year-end statement. Regulation of destructive cut-throat competition is cited as one of the principal needs in the coming year. Mr. Ernst says:

The panic spirit of a year ago is past. This has been replaced by an attitude of resignation to and acceptance of hard facts of the depression. The resignation is now being replaced by a new courage for the future and a fighting spirit in all walks of life. This should augur well for the future, for it indicates returning confidence. The year 1932 looks to me like the most critical year of the depression period, and a certain amount of encouragement may be gathered from the fact that it is past.

Regarding business results for 1932, Mr. Ernst states that "conditions will vary as to individual companies, but shrinkages in gross income of 20% to 50% will not be Looking forward to 1933 Mr. Ernst has the following to

It is apparent that there are many cloudy situations, but there are also some fundamental certainties. We must face the extraordinary adjustments resulting from the past three years of extreme deflation. Fixed charges, whether they be for debt service, taxes or the results of over-expansion must be dealt with on sound business principles. Debt installments must be refunded upon a conservative basis if payments can not be met.

The preparation of budgets for 1933 deserves the most serious thought

The preparation of budgets for 1933 deserves the most serious thought of executives. Budgets represent the first order of business now more than ever before. No organization which hopes to be successful should adopt a program for 1933 which does not calculate definitely for vastly improved results in all departments of the business.

For each corporation to set its own house in order is the prime requirement of the present time. This may involve further trimming, further contraction and further liquidation. This in itself is painful, but in the long run it is good. It is the normal course of events toward the tail end of every depression in our history. The first year or two always represent a period of hope and of resistance to the inevitable. Then comes a spirit of new determination, and we are now entering upon this period. It is not merely the forerunner of the dawn; it is largely the cause of the dawn.

More co-operation to regulate destructive competition within every industry is characterized as a major required development for 1933. As to this Mr. Ernst says:

development for 1933. As to this Mr. Ernst says:

Individual struggle and effort on the part of each business executive is essential, but it is not enough. Individualism means competition. Competition has its wholesome aspects, but when carried too far it is destructive of the whole business and social order. Competition has long passed the point at which its maximum benefits are achieved. It is now at the stage where it is eating up the institutions which are needed to produce the goods and services required for our population, to furnish the employment, to produce the profit which makes for incentive. It is the profit, also, which supplies the taxes which support the government.

Competition, therefore, has become an evil with which we must deal rationally, though tardily, as we have dealt with all other evils. My greatest hope for 1933 is that this will be done by a co-operative effort as between the business world and the political world. If this is done, there is no reason why we can not come out of the depression stronger and better organized than ever before.

organized than ever before.

Report of U. S. Tariff Commission on Chain Stores Smaller Chains Show Greater Proportion of Large Stores in Some Lines-Study of Sizes of Stores of Retail Chains.

The smaller chain store systems show larger proportions of large stores than do the larger chains in grocery, grocery and meat, men's and women's ready-to-wear, men's and women's shoes, and men's shoes. This is brought out in the Federal Trade Commission's latest report on its chain store investigation, and is based on figures for the latest year for which information is available. The report is entitled "Sizes of Stores of Retail Chains." It was sent to the Senate on Dec. 21. The following summary represents the tenth of a series of reports on chain store practices:

As an illustration of the smaller chains showing larger proportions of large stores than the larger chains, the Commission points out that in the grocery field such systems as Albrecht Grocery Co., Cloverdale Co., Continental Grocery Co., Ltd., Great Eastern Stores, Gristede Bros. Co., Larkin Co., Inc., Nicholson Thackray Co., and Safeway Stores, Inc., of California (Piggly Wiggly Southern Division), operating from 101 to 500 stores, show larger proportions of stores selling less than \$25,000 a year than do the smaller chains, and about the same proportion sell between \$25,000 and \$50,000 a year and \$50,000 a year.

These same systems show smaller proportions of larger stores with sales

These same systems show smaller proportions of larger stores with sales of \$50,000 a year and up.
Similarly, in the grocery and meat chains, none of the systems reporting in the 101 to 500 store groups (H. G. Hill Stores, Inc., Mutual Stores, Inc., Red Owl Stores, Inc., and Southern Grocery Co.) and none of those with 1,001 stores and up (Kroger Grocery & Baking Co., First National Stores, and American Stores) reported appreciable proportions of their establishment with annual sales of \$500,000 and up, although some such stores are found to be operated by each of the three smallest sizes of chains in the same line of business.

It is different in the chains handling dellar limit variety, drug and musical

same line of business.

It is different in the chains handling dollar-limit variety, drug and musical instruments. The larger chains appear to operate greater proportions of stores with large sales than do the smaller chains. Louis K. Liggett and Walgreen (each with between 101 and 500 stores) in the drug business, W. T. Grant, S. H. Kress Co. and McCrory Stores (101 to 500 stores), S. S. Kresge (501 to 1,000 stores) and F. W. Woolworth (more than 1,000 stores) in the dollar-limit variety business, appear to operate larger proportions of large stores than do their smaller competitors.

Stores with between \$25,000 and \$50,000 sales, and between \$50,000 and \$100,000 sales, account, for more than half of the total number of stores.

\$100,000 sales, account for more than half of the total number of stores

reported.

More stores with sales between \$10,000 and \$25,000 are found in con-

Among the different types of stores reported on, besides those mentioned, are the following: Women's accessories, hats and caps, dry goods, general merchandise, hardware, furniture, unlimited price variety, five-dollar-limit variety, and tobacco. The report contains 15 illustrative tables.

The full text of the Commission's letter of submittal to the Senate is as follows:

To the Senate of the United States:

The accompanying report on the sizes of stores in retail chains is submitted pursuant to Senate Resolution 224, 70th Congress, 1st Session, which directed the Commission to ascertain and report the advantages or disadvantages of chain-store distribution.

The importance of this study lies primarily in the consideration of the retail advantage of large and small chains, in the distribution of commodities. It has sometimes been asserted that the success of a chain is more or less dependent on the question of the size of its retail store units. If it be true,

as has been suggested, that the larger store units of retail chains are able to sell and distribute goods at a lower cost than the smaller units of the same or other chains, the proportions of such units operated have an important bearing on proposals for regulation and attempts to check the growth of chains by taxation or otherwise.

Nature and Scope of the Report.

In order to ascertain the relative importance of different sizes of stores In order to ascertain the relative importance of different sizes of stores, information for the years 1922, 1926, and 1928 concerning the number of stores and the aggregate net sales of stores in specified sales volume groups was requested by the Commission in its original chain-store schedule. The data tabulated by the Commission regarding this distribution of chain stores and sales by sales volume groups cover 949 chains reporting 21,026 stores and \$2,545,012,643 aggregate sales for 1928. Out of this number, 667 with 12,306 stores and \$1,828,446,932 sales reported for 1926 and 342 with 4,595 stores and \$673,918,445 sales for 1922. Stores which were in operation less than the entire 12 months in each specified year were not included.

Size of Store by Size of Chain.

Based on the figures for the latest year for which the information is available, the smaller chains show larger proportions of large stores than do the larger chains in grocery, grocery and meat, men's and women's ready-to-wear, men's and women's shoes, and men's shoes. In the grocery field, for example, Albrecht Grocery Co., Cloverdale Co., Continental Grocery Co., Ltd, Great Eastern Stores, Gristede Bros. Co., Larkin Co., Inc., Nicholson Thackray Co., and Safeway Stores, Inc., of California (Piggly Wiggly Southern Division), operating from 101 to 500 stores, show larger proportions of stores selling less than \$25,000 per annum than do the smaller chains and about the same proportions of stores selling between \$25,000 and \$50.000 yearly. On the other hand, they show smaller proportions of larger stores with sales of \$50,000 per annum and up. Similarly, in the grocery and meat chains, none of the chains reporting in the 101 to 500 store groups (H. G. Hill Stores, Inc., Mutual Stores, Inc., Red Owl Stores, Inc., and Southern Grocery Co.) and none of those with 1,001 stores and up (Kroger Grocery and Baking Co., First National Stores and Ameriand up (Kroger Grocery and Baking Co., First National Stores and American Stores) reported any appreciable proportions of their establishments with annual sales of \$500,000 and up, although some such stores are found in operat on by each of the three smallest sizes of chains in the same line of

business.

On the other hand, in dollar-limit variety, drug, and musical instruments, the larger chains appear to operate greater proportions of stores with large sales than do the smaller chains. Louis K. Liggett and Walgreen (each with between 101 and 500 stores) in the drug business, W. T. Grant, S. H. Kress Co. and McCrory Stores (101 to 500 stores), S. S. Kresge (501 to 1,000 stores) and F. W. Woolworth (over 1,000 stores) in the dollar-limit variety business appear to operate larger proportions of large stores than do their smaller competitors.

Most Important Store Sizes.

Most Important Store Sizes.

As stated, the largest number of stores for which a distribution by size of full-time stores is shown in any year is 21,026. More than one-third of these stores (7,353) in that year had an average sales volume of between \$25,000 and \$50,000 and more than one-quarter of them (5,758 stores), sales of between \$50,000 and \$100,000. Together, therefore, these two sizes of stores account for more than half of the total number of stores reported. From the standpoint of total sales volume, however, the \$25,000 -\$50,000 group accounts for only 270 millions of sales or a little over one-tenth of the total of \$2,545,000,000 reported by the 21,026 stores for the year in question. Between one-fourth and one-third (720 million) of the total sales were made by 163 establishments (chiefly department stores) reporting annual sales of over \$1,000,000 and slightly more than one-fifth (545 million) were made by stores which had an annual volume of between \$100,000 and \$250,000.

reporting annual sales of over \$1,000,000 and slightly more than one-fifth (545 million) were made by stores which had an annual volume of between \$100,000 and \$250,000.

Nearly one-half (48.3%) of the 21,026 stores sold less than \$50,000 per annum and a full three-quarters of them (75.7%) reported sales of less than \$100,000. Exactly 93% of them were below \$250,000. Over 13% of the total stores reported showed sales of less than \$25,000 per year.

More stores with sales between \$10,000 and \$25,000 are found in confectionery (28.7%) and millinery (35.5%) than in any other size group. In 12 other kinds of business, the \$25,000—\$50,000 stores are the outstanding group from the point of view of showing the largest number of stores belonging in any single store size group (grocery, 37.5%; grocery and meat, 50.2%; tobacco, 45.6%; \$5 limit variety, 37.5%; unlimited price variety, 42.9%; men's and women's ready-to-wear, 36.3%; women's accessories, 47.4%; hats and caps, 42.9%; men's shoes, 39.2%; dry goods, 48.2%; general merchandise, 34.1%, and hardware, 21.1%).

In the drug business (32.6%), \$1-limit variety (34.7%), men's ready-to-wear (29.2%), women's ready-to-wear (33.7%), women's shoes (37.3%), dry goods and apparel (54.5%), furniture (30.7%) and musical instruments (31.8%), the largest number of stores is found in the store size group reporting an annual sales volume of between \$100,000 and \$250,000. The only line in which the largest number of stores is reported in any store size group above \$250,000 is the department store business.

For most of the kinds of business studied, there is a tendency for the number of establishments to concentrate in or around the size of store for which the largest number of units is reported. As a result, over 50% of the total stores are found in the store sales volume group containing the highest proportion of stores combined with the next larger or smaller sales volume groups in 22 of the 26 kinds of chains.

Trend of Store Sizes.

The proportion of total stores included in the three smaller sales groups, with less than \$25,000 of annual sales per store, and also the proportion of total sales accounted for by these stores, apparently increased from 1922 to 1928 in six lines; tobacco, \$5 limit variety, hats and caps, millinery, 1922 to 1928 in six nies; topacco, \$5 limit variety, hats and caps, millinery, men's and women's shoes, and dry goods and apparel. In drug, unlimited price variety, \$1-limit variety, women's accessories, and hardware, the reverse is true. In grocery and meat, men's furnishings, and general merchandise chains, the proportion of total stores tends downward, and in women's ready-to-wear the proportion of total sales accounted for by the small stores tends upward. Both medium sized stores, selling between \$25,000 and \$250,000 per annum and their sales increased relatively in grocethe small stores tends upward. Both medium sized stores, selling between \$25,000 and \$250,000 per annum and their sales increased relatively in grocery, grocery and meat, unlimited price variety, women's ready-to-wear, and women's accessories, while the store proportion also increased for \$1-limit variety, men's furnishings, and hardware chains. Conversely, both stores of this size and their sales, decreased relatively in tobacco, \$5-limit variety, millinery, and furniture chains, while in hats and caps, men's and women's shoes, and dry goods and apparel a downward trend appears in the stores proportions. proportions.

There appears to be a downward trend from 1922 to 1928 both in the numerical importance of stores doing from \$250,000 to \$1,000,000 and over, and in their sales, in five kinds of business; grocery, grocery and meat, women's ready-to-wear, men's and women's ready-to-wear, and millinery. Only in furniture chains, for both stores and sales; in hardware chains, for stores; and in men's ready-to-wear chains, for sales, does there appear to be any tendency to an increase in the proportion of establishments belonging to this size group.

WM. E. HUMPHREY, Chairman.

Country's Foreign Trade in November-Imports and Exports.

The Bureau of Statistics of the Department of Commerce at Washington on Dec. 20 issued its statement on the foreign trade of the United States for November and the 11 months ended with November. The value of merchandise exported in November 1932 was estimated at \$139,000,000, as compared with \$193,540,000 in November 1931. imports of merchandise are provisionally computed at \$104,000,000 in November the present year, as against \$149,480,000 in November the previous year, leaving a favorable balance in the merchandise movement for the month of November of approximately \$35,000,000. Last year in November there was a favorable trade balance in the merchandise movement of \$44,060,000. Imports for the 11 months ended November 1932 have been \$1,225,199,-000, as against \$1,936,862,000 for the corresponding 11 months of 1931. The merchandise exports for the 11 months ended November 1932 have been \$1,481,379,000, against \$2,240,220,000, giving a favorable trade balance of \$256,-180,000 for the 11 months, against \$303,358,000 in the same period a year ago.

Gold imports totaled \$21,756,000 in November 1932 against \$94,430,000 in the corresponding month of the previous year, and for the 11 months ended November 1932 were \$262,443,000, as against \$809,507,000 in the same period a year ago. Gold exports in November were only \$12,000, against \$4,994,000 in November 1931. For the 11 months ended November 1932, the exports of the metal foot up \$809,507,000, against \$434,143,000 in the corresponding 11 months of 1931. Silver imports for the 11 months ended November 1932, have been \$18,447,000, as against \$25,448,000 in the 11 months ended November 1931, and silver exports were \$12,590,000, compared with \$24,-318,000.

Employment and Payrolls in Chicago Federal Reserve District During Period from Oct. 15 to Nov. 15 Increased Moderately-First Upward Movement of Employment in Eight Months.

"Moderate increases were recorded in both aggregate employment and payrolls of reporting Seventh (Chicago) District establishments for the period Oct. 15 to Nov. 15, according to the Dec. 31 "Business Conditions Report" o the Federal Reserve Bank of Chicago. "The gain in number employed," continued the "Report," "followed consecutive declines in the preceding eight months, which brought the total to a record low point on Oct. 15." We also quote from the "Report" as follows:

also quote from the "Report" as follows:

The trend in both items compared favorably with previous years, as November has shown a reduction in both employment and payrolls in each of the preceding three years.

Manufacturing industry, and in particular the automobile industry, established the trend of the totals. In comparison with a year ago, the total of the ten manufacturing groups showed the smallest recession since February of this year. Among individual groups, wide variations occurred. Increased activity at auto mobile plants and at railway car shops, both included in the vehicles group, offset the declines which took place in most of the other groups. The expansion in this group compares with smaller increases in both employment and wage payments for November 1931 and for employment only in 1930, while in November of most other years the trend has been downward. The chemicals group gained moderately in both number of men and their earnings, contrary to seasonal trend, and leather products increased employment fractionally but suffered a sharp contraction in wage payments. The remaining seven groups recorded

and leather products increased employment. The remaining seven groups recorded sharp contraction in wage payments. The remaining seven groups recorded losses in both items. Greatest reductions were noted in the stone-clay-glass, food, rubber, and textile groups.

Non-manufacturing aggregate showed little change during the period, as against slight declines in November 1931 and somewhat larger losses in 1930. Gains were shown in coal mining, in merchandising employment and in payrolls of the utilities group. Construction continued the ment, and in payrolls of the utilities group. losses of a month previous with a greater ti utilities employed somewhat fewer men. than seasonal decline, and the

Wholesale and Retail Trade Conditions in Chicago Federal Reserve District During November—De-clines of Smaller Than Usual Nature Reported in Wholesale Grocery, Dry Goods and Drug Trades Department Store Trade 6% Below Previous Month.

"Smaller than usual declines were recorded in November from the preceding month in the wholesale grocery, dry goods, and drug trades, while the recession in the hardware trade was about average for the period, and the gains shown in wholesale shoes and in electrical supply sales were contrary to trend for the period." The Federal Reserve Bank of Chicago, in noting this in its Dec. 31 "Business Conditions Report," also said:

Report," also said:

Grocery sales declined only 2% from the preceding month, dry goods sales were 7% smaller, drugs 2% less, and hardware sales decreased 16%, as against declines in the 1923-31 average for the month of 9, 15, 10½, and 17%, respectively. The expansion of 10% in the shoe trade and of 2½% in electrical supplies compared with average declines of 19½ and 10%. Furthermore, the spread between the current period and November last year was smaller in all groups except hardware than in the year-ago comparison for October and in the majority of lines was narrower than in many months, the decline in groceries totaling only 5½%. In the 11 months of 1932, grocery sales totaled 20% smaller than in the same period of 1931, hardware 26%, dry goods 31%, drugs 22%, shoes 39%, and electrical supplies 43% less. Stocks have failed to gain and so are well below the 1931 level. November price trends for commodities at wholesale were fairly steady to downward.

Department store trade in the Seventh District declined 6% in November from the preceding month, which compares with an 8% recession in the same period last year. Daily average sales were approximately the same as in October. In Detroit sales totaled only 3% less than a month previous, in Milwaukee they were 4% smaller, in Chicago 61% lower, in Indianapolis 14% less, while the total for stores in other cities showed a decline of 6%. The decrease of 21% from a year ago in the district total was slightly smaller than the 221% shown in a similar comparison for October; daily average sales were 24% below last November. Other comparisons with a year ago may be noted in the table. Stocks expanded 51% at the end of November over Oct. 31, which gain is somewhat more than seasonal and in contrast to a slight decline over the same period last year; stock turnover continued to be greater than in the corresponding month a year ago. Department store trade in the Seventh District declined 6% in November a year ago.

as a month previous.

as a month previous.

Most reporting groups of chain store trade had smaller sales in November than in the preceding month, grocery chains furnishing the one exception. As a result, aggregate sales of firms operating 2,594 stores in November dropped 5% from a month previous and were 12% smaller than in November 1931. In addition to grocery chains, other groups included were five-and-ten-cent stores, drugs, shoes, men's clothing, cigars, and musical instruments.

Holiday Depression in Lumber Industry.

The lumber mills of the country are in the period of holiday shutdowns and reported production was the lowest of the year during the week ended Dec. 24, according to telegraphic reports to the National Lumber Manufacturers Association from regional associations covering the operations of 805 leading softwood and hardwood mills. New business during the same week totaled 84,840,000 feet; the previous low, that of the week ended Dec. 10, was 102,556,000 feet as reported by 706 mills.

Production, 80.224,000 feet, was only 16% of capacity; new business was 17% of capacity. These figures compare with 17 and 22% respectively for the previous week.

for the previous week.

Softwood orders were 1% above the output of the week ended Dec. 24; nardwood orders were 52% above. All associations except Southern pine reported orders above or nearly equal to cut. Southern pine orders were 32% below production.

All regions showed material decline in new business as compared with corresponding week of last year. Southern pine and West Coast mills reported gain in production over last year's low output.

Stocks on hand at the mills on Dec. 24 were the equivalent of 75 days' average production of the reporting mills, compared with 107 days' average production on Dec. 26 1931.

production on Dec. 26 1931.

Forest products loadings during the week ended Dec. 17 were the lowest on record except for the week ended July 9 1932. They were only 29%

of the corresponding week of the first year of record, 1919, and 66% of similar week of 1931.

Lumber orders reported for the week ended Dec. 24 1932, by 441 soft-wood mills totaled 72,686,000 feet, or 1% above the production of the same mills. Shipments as reported for the same week were 77,414,000 feet, or 7% above production. Production was 72,245,000 feet. Reports from 382 hardwood mills give new business as 12,154,000 feet, or 52% above production. Shipments as reported for the same week were 12,214,000 feet, or 53% above production. Production was 7,979,000 feet.

Unfilled Orders.

Reports from 373 softwood mills give unfilled orders of 327,235,000 feet on Dec. 24 1932, or the equivalent of 9 days' production. The 346 identical softwood mills report unfilled orders as 321,369,000 feet on Dec. 24 1932, or the equivalent of 9 days' average production, as compared with 365,396,000 feet, or the equivalent of 11 days' average production on circles date a verset.

Identical Mill Reports.

Last week's production of 402 identical softwood mills was 69,613,000 feet, and a year ago it was 60,268,000 feet; shipments were respectively 74,887,000 feet and 83,805,000; and orders received 70,566,000 feet and 85,503,000. In the case of hardwoods, 202 identical mills reported production last week and a year ago 6,065,000 feet and 12,100,000; shipments 9,242,000 feet and 15,629,000; and orders 8,850,000 feet and 15,716,000 feet.

SOFTWOOD REPORTS.

Wesi Coast.

The West Coast Lumbermen's Association wired from Seattle the following new business, shipments and unfilled orders for 217 mills reporting for week ended Dec. 24:

NEW BUS	INESS.	UNSHIPPED	ORDERS.	. SHIPMENTS.		
	Feet.		Feet.		Feet.	
Domestic cargo		Domestic cargo		Coastwise and		
delivery	20,825,000	delivery	94,617,000	intercoastal _	19,678,000	
Export	13,338,000	Foreign	90,529,000	Export	14,360,000	
Rail	12,375,000	Rail	43.574.000	Rail	12,004,000	
Local	3,354,000			Local		
Total	49,892,000	Total.	228,721,000	Total	49.397,000	

Production for the week was 49,965,000 feet. Production was 19% and new business 19% of capacity, compared with 17% and 25% for the previous week.

Southern Pine.

The Southern Pine Association reported from New Orleans that for 103 mills reporting, snipments were 3% above production, and orders 32% pelow production and 34% pelow shipments. New business taken during the week amounted to 10.031,000 feet (previous week 14,200,000 at 95 the week amounted to 10,031,000 feet (previous week 14,200,000 at 95 mills); shipments 15,154,000 feet (previous week 14,328,000); and production 14,777,000 feet (previous week 18,453,000). Production was 24% and orders 16% of capacity, compared with 33% and 25% for the previous week. Orders on hand at the end of the week at 90 mills were 43,958,000 feet. The 90 identical mills reported an increase in production of 44%, and in new business a decrease of 10%, as compared with the same week a year ago.

Western Pine.

Western Pine.

The Western Pine Association reported from Portland, Oregon, that for 96 mills reporting, shipments were 57% above production, and orders 57% above production and less than 1% above shipments. New business taken during the week amounted to 11,335,000 feet (previous week 19,907,000 at 116 mills); snipments 11,338,000 feet, (previous week 19,736,000); and production 7,231,000 feet, (previous week 13,285,000). Production was 7% and orders 11% of capacity, compared with 11% and 17% for the previous week. Orders on hand at the end of the week at 96 mills were 75,277,000 feet. The 87 identical mills reported a decrease in production of 9%, and in new business a decrease of 43%. as compared with the same week a year ago.

Northern Pine.

The Northern Pine Manufacturers of Minneapolis, Minnesota, reported no production from 7 mills, shipments 1,309,000 feet and new business 1,140,000 feet. The same number of mills reported new business 16% less than for the same week last year.

Northern Hemlock

The Northern Hemlock and Hardwood Manufacturers Association, of Oshkosh, Wisconsin, reported production from 18 mills as 272,000 feet, shipments 216,000 and orders 288,000 feet. Orders were 3% of capacity compared with 2% the previous week. The 17 identical mills reported a decrease of 24% in production and a decrease of 11% in new business, compared with the same week a year ago.

Hardwood Reports

Hardwood Reports

The Hardwood Manufacturers Institute, of Memphis, Tennessee, reported production from 364 mills as 7,979,000 feet, shipments 11,426,000 and new business 11,505,000 Production was 13% and orders 19% of capacity, compared with 17% and 20% the previous week. The 185 identical mills reported production 48% less and new business 41% less than for the same week last year.

The Northern Hemlock and Hardwood Manufacturers Association, of Oshkosh, Wisconsin, reported no production from 15 mills; sh.pments 788,000 feet and orders 649,000 feet. Orders were 11% of capacity, compared with 7% the previous week. The 17 identical mills reported a decrease of 64% in orders, compared with the same week last year.

1932 Lumber Production Lowest in Over 60 Years.

Lumber production in 1932 will be less than 10,000,000,000 feet, lower than for more than 60 years, according to the National Lumber Manufacturers Association, basing this figure upon reports from the representative larger saw mills of the country which indicate a production drop of 42% as compared with 1931. The Association's statement continues:

United States Census figures for 1931, just released, give production of 16,522,643,000 feet, lowest in 50 years. Preliminary report of large mills last July comparing 1931 with 1930, showed a decline of 33.5% which was within 1% of the National Lumber Trade Barometer relation for the two years. Final figures for 1931 show decline of 36.6%, the loss in small mill production being greater than in the large mills. Doubtless this loss will be repeated in 1932.

The Census Bureau shows decrease of 1931

be repeated in 1932.

The Census Bureau shows decrease of 1931 lumber production as compared with 1929 of 55.2% and the value of the output at the mills of timber products and lumber in 1931 as only 35% of what it was in 1929. The 1931 total is \$441,587,203. Wage earners in 1931 in the industry averaged 53% fewer than in 1929 and wages paid suffered decline of 63%.

The year 1931 was the first in which Douglas fir production exceed The year 1931 was the first in which Douglas in production exceeded that of Southern pine. In 1930 six species each cut more than a billion feet; in 1931, only three—Douglas fir, 4,648,455,000 feet; Southern pine, 4,429,643,000 feet and Ponderosa pine, 1,822,460,000 feet. The decline in production in these three species as compared with 1930 was respectively 28%, 40% and 30%. Output in 1931 of the three other species, each of which produced more than a billion feet of lumber in 1930, fell to the following in 1931, heavyleds 1964,431,000 feet or 37%, below 1930, each 953,559,000 which produced more than a solution of the produced for than 1931; hemlock 960,431,000 feet or 37% below 1930; oak, 953,559,000 feet, 43% below 1931; white pine, 715,504,000 feet or 35% below the previous year. No more than 350,000,000 feet was produced of any other species in 1931.

washington and Oregon are still the leading States in lumber producton with output of 3,907,997,000 feet in Washington and 2,628,035,000 feet in Oregon. The output of five States, each of which produced more than a billion feet of lumber in 1930 was as follows in 1931: California, 957,740,000 feet; Louisiana, 949,232,000 feet; Mississippi, 863,221,000 feet; Alabama,

732.020.000 feet: Texas, 555.814,000 feet.

732,020,000 feet; fexas, 555,814,000 feet; Arkansas, 507,715,000 feet; North Carolina, 500.802,000 feet. States whose output was between 250,000,000 and 500,000,000 feet in 1931 were Georgia, Idaho, South Carolina, Wisconsin, Virginia, Tennessee and Michigan.

Mid-West Distribution of Automobiles During November Gained Over October Due to Introduction of New Models-Orders Booked by Furniture Manufacturers 36% Smaller as Compared With a Usual Seasonal Decline of Only 5%.

The Chicago Federal Reserve Bank states that "although total sales of reporting wholesale distributors in the Middle West recorded a gain in November over October, owing to the distribution of certain new models to dealers, the majority of firms had much smaller sales in the comparison, and sales by retail dealers were moderately smaller than a month previous." The Bank in its "Business Conditions Report" dated Dec. 31 also reported the following:

Dealers' stocks of new cars, affected by the receipt of new models, showed an expansion in the aggregate of more than 10% over the end of October, but only one-third of the firms reported a gain. The value of new cars sold on the deferred payment plan constituted 58% of all retail sales by dealers reporting the item, as against a ratio of 53% in October and 55% less a year ago.

The following was reported by the Bank regarding orders booked by furniture manufacturers:

booked by furniture manufacturers:

Seventh District furniture manufacturers reporting to this Bank booked 36% less orders in November than in the preceding month, the heavy decline, which compares with a seasonal recession of only 5%, being due to continued gains in bookings from July through September and only a small decline in October. Shipments, however, moved in accordance with seasonal trend, falling off 27%, and continued in excess of current orders, the differential increasing from 10% in October to approximately 25%. The volume of unfilled orders outstanding was, therefore, materially reduced during the month. Declines from a year ago were somewhat greater in orders and shipments than a month previous, amounting respectively to 42 and 33%. The ratio of operations to capacity moved down seven points, currently, comparing with 41% in October and 42% in November a year ago.

Mid-West Grain Groups Ask Inter-State Commerce Commission to Dismiss Hearing on Grain Freight

The Chicago Board of Trade announced on Dec. 29 that it had filed by mail with the Inter-State Commerce Commission at Washington a petition asking on behalf of twelve Mid-West organizations the dismissal of the Commission's investigation of grain freight rates. Associated Press dispatches from Chicago Dec. 29 further reported:

Agricultural interests have demanded reductions in transportation rates a grain, and the commission has been holding hearings on the matter since st February.

In addition to the Chicago Board of Trade the organizations asking disconnections to the commission of t

In addition to the Chicago Board of Trade the organizations asking dismissal of the investigation are Duluth, Minn., Board of Trade, Fort Worth, Tex., Board of Trade, Grain and Trust Exchange, of St. Louis; Milwaukee Grain and Stock Exchange; Minneapolis Traffic Association; Omaha Grain Exchange, St. Joseph, Mo., Grain Exchange, St. Paul Association of Commerce, Board of Trade of Kansas City, American Feed Manufactuers' Association and Quaker Oats Company.

The petition stated that the investigation into the rates had brought an unfavorable influence on business and resulted in lower grain prices. Similar hearings were held by the commission previously, the petition said, but when the commission ordered lower rates the United States Supreme Court held the procedure Illegal.

The petitioners pointed out that the Supreme Court enjoined the commission's earlier order from becoming effective chiefly because of changed conditions between 1928 and 1931. The depression has become more acute since the court's action, the petition said, and there would be even more

reason for the court to enjoin any order from the commission for rate reduc-

New Pontiac and De Soto Models Announced.

The new Pontiac straight eight line for 1933, which went on display Dec. 28 in all Pontiae showrooms, is priced at \$585 and up, f.o.b. factory. The cars are new in appearance and in mechanical design. Factory list prices are as follows:

Model—	1933 Eight.	1932 Six.	Decrease.
Roadster	- \$585	No model	
Two-door sedan	- 635	\$645	\$10
Standard coupe	- 635	635	
Sport coupe	670	715	45
Touring sedan	675	No model	
Four-door sedan	695	725	30
Convertible coupe	695	765	30 70

The new De Soto Six for 1933 was also formally introduced this week and ranges in price from \$695 to \$975. Prices on comparable, models are the same as previously with the exception of the standard four-door sedan which has been reduced \$10 to \$765. There are nine body styles in the new line, the standard business coupe listing at \$695; standard rumble seat coupe \$735; standard brougham \$695; standard four-door sedan \$765; custom coupe \$790; custom fivepassenger sedan \$835; custom convertible coupe \$845; custom convertible sedan \$975 and special brougham \$725.

President Carey of Chicago Board of Trade Lays Low Wheat Prices to Federal Farm Board and Tax on Future Sales.

Noting that wheat on Dec. 27 reached the lowest price at which May delivery has ever sold on the Chicago Board of Trade,—43¾ cents a bushel. Associated Press advices on that date from Chicago said

Grain experts reported this was little more than half the cost of produc-

tion.

Dealings in future deliveries of all grains were announced as having totaled only 5,700,000 bushels in Chicago on Saturday, a new low record, contrasting with a daily volume of 54,930,000 for the entire year of 1928. Peter B. Carey, President of the Chicago Board of Trade, said to-night "The market has been subjected to a gradual restriction of trade throughout the life of the Federal Farm Board. Records show also that our volume declined precipitately after the last Congress passed a prohibitive tax of 5 cents on every \$100 commodity future sale, a tax boot of 400%.

From the Chicago "Journal of Commerce" of Dec. 28 we take the following:

A new low price for May wheat was made yesterday when that contract sold at 43%c per bushel on the Chicago Board of Trade. It was the lowest price for the May future ever recorded on this exchange, and little more than same time, figures released by the Federal Grain Futures Administration substantiated the contention of the grain trade that light volume and low values go hand in hand. The Government Department announced that on last Saturday the total volume of trading in contracts for future delivery in all grains was 5,700,000 bushess on the Chicago Board of Trade. so a new low record in volume.

Montreal Grain Traders Oppose British Rule Denying Preference to American Routed Grain.

The New York "Herald Tribune" reports the following from Montreal Dec. 27:

There is no elation in the Montreal Corn Exchange because Americanrouted grain is not to get the British preference, although internationallyminded grain men will not say, for publication, what they think, because it
is the style to be patriotic right now.

Kenneth Ayer, President of the Montreal Corn Exchange, has issued the
negative statement that the British ruling, which forbids special tariff concession to any Canadian grain routed by United States ports, would probably help Canadian rail and steamship companies. He also stated "It
won't do us any harm."

won't do us any harm."

Those left in the trade after government intervention and the wheat pool has decimated the grain trading ranks declare they have had all they want of Government intervention and regulation. This new dictation they consider another unwarranted piece of government intervention.

The ruling was referred to in our issue of Dec. 24, page 4287.

Canadian Atlantic Ports Reported Aided by Grain Preference Ruling.

Canadian Press advices from Toronto Dec. 24 are taken as follows from the New York "Herald Tribune":

The ruling of the British Treasury Department that the six-cent preference

The ruling of the British Treasury Department that the six-cent preference on Canadian wheat will not be applied to shipments not directly consigned from Canada to a British port has turned a large volume of business to Canadian transportation lines and to Canadian Atlantic ports.

The decision comes as a blow to Buffalo elevator and shipping interests which handled about 45,000,000 bushels of Canadian wheat in the last season, a quantity constituting about 40% of the port's wheat business.

Hundreds of dock workers are already in employment at St. John and Halifax as a result of the ruling. In all probability also a larger portion of Canadian wheat exports will find their way out of the country in future by way of Vancouver. way of Vancouver.

way of Vancouver.

Canada is still marketing her wheat in large volume, despite the entry of Argentina and Australia into the world markets, and a welcome development of the week was the price recovery at Winnipeg of about two cents a bushel. Part of this recovery was due to the improvement in sterling to \$3.79% from \$3.77, but the marketing program also seems to be working better. The prediction is heard in Toronto financial circles that both wheat and sterling uch better levels shortly.

January Release of Brazi ian Coffee Held by Grain Stabilization Corporation-Bids to be Opened Jan. 4.

Bids for the fifth monthly sale of Brazilian coffee held by the Grain Stabilization Corporation will be opened at The allotment comprises 62,500 bags. It noon Jan. 4. will reduce the Corporation's holdings to 737,500 bags if it is all sold. The Corporation refused last month to accept less than 10 cents a pound, but it is noted in the "Times" of Dec. 29 that coffee now is available at about 91/2 cents.

Supply of Coffee in United States 519,186 Bags on Dec. 23 as Compared with 1,437,091 Bags Year Ago According to New York Coffee & Sugar Exchange.

The available supply of all kinds of coffee in the United States on Dec. 28 was 519,186 bags, an amount equivalent to approximately three weeks consumption, according to the statistics of the New York Coffee and Sugar Exchange. In announcing this on Dec. 29, the Exchange noted that this compares with 1,437,091 bags a year ago. Of the existing stocks here 252,282 bags are Brazils compared with 1,103,796 bags of Brazils a year ago. The stocks of "Mild" coffees are 266,614 bags compared with 333,295 bags a year ago. It is added that these statistics do not include 800,-000 bags of coffee held by the Grain Stabilization Corporation for distribution at the rate of 62,500 bags a month.

United States Shipping Board Approves Coffee Rate Accord-Eight Other Agreements for Co-operative Handling of Freight Ratified.

The arrangement of the New York & Porto Rico steamship Co. with the Luckenbach Steamship Co. covering through shipments of green coffee from Dominican Republic to United States Pacific Coast ports, with transshipment at New York, received Shipping Board approval on Dec. 29, along with eight other agreements for the co-operative handling of freight. Transfer costs at New York are to be divided between the two lines. According to a Washington dispatch Dec. 29 to the New York "Journal of Commerce" which said in part:

Other important arrangements covering commodity shipments were the agreements of the New York & Porto Rico Steamship Co. with American-Hawaiian Line on canned goods from San Juan and other Puerto Rican ports to United States Pacific Coast ports, and the Bull Insular Line with American-Hawaiian on cocoa beans from Dominican Republic to West Coast ports of the United States. Both agreements provide for transshipment at New York.

Insurgent Sugar-Cane Growers of Cuba Form New Organization to Oppose Chadbourne Plan.

In Associated Press advices from Havana, Dec. 27 it was stated that, headed by Walfredo Rodriguez Blanca, recently resigned as a member of the Cuban National Sugar Institute and the Sugar Export Corporation, insurgent cane growers of Cuba on Dec. 27 were laying plans for concerted attack on the Chadbourne plan. The dispatch, as given in the New York "Times," continued:

They blame Thomas L. Chadbourne's scheme to regulate world sugar production in an effort to better prices for the misery in rural Cuba and their own economic predicament.

By-laws for the new organization were drawn up at a meeting yesterday and turned over to the government to be approved. The election of officers and the working out of details of organization will come in the next few days, Senor Rodriguez Blanca said.

To obtain support for the movement, the organizers issued invitations to industrial, commercial and agricultural groups to join.

Sugar Stabilization Bonds.

In its issue of Dec. 21 the "Wall Street Journal" carried the following item from Havana:

The amount of Sugar Stabilization 5½% sinking fund bonds offered and accepted in New York was \$1,394,840 at prices ranging from 78¼ to 80, at a cost of \$1,114,119 and interest.

The amount offered and accepted in Havana aggregated \$207,280, at prices ranging from 75 to 80, at a cost of \$163,537 and interest. Average price of amount accepted in both instances was 79,74795.

Decline in Puerto Rican Sugar Crop.

Associated Press advices from San Juan, Puerto Rico, Dec. 28 stated:

The Sugar Producers' Association to-day announced a 1933 crop estimate of 816,295 short tons, as compared with actual production of 992,432 tons The statement said the hurricane of last September had reduced the crop by 101,600 tons

Dutch East Indies Votes Single Sugar Seller.

The following from Amsterdam is from the "Wall Street Journal" of Dec. 27:

The House of Representatives of the Dutch East Indies has voted a ne program for establishment of a single sugar seller with considerable amen ments to the original proposal.

Colorado Beet Growers Get \$1,850,000 Holly Sugar Corporation-Total for Season is \$5,500,000.

Under date of Dec. 14 Associated Press accounts from Colorado Springs were published in the Denver "Rocky Mountain News':

The Holly Sugar Coporation will pay \$1,850,000 to sugar beet growers-morrow, making \$5,500,000 paid for beets this season, offices here to-morrow, making announced to-day.

Freight expenditures, including that on beets, sugar and other materials, amount to \$2,500,000, and purchases of materials and supplies total several million dollars more, it was announced.

Netherland Temporary Import Duty and Sugar Excise Tax Increases Effective.

The Netherland bill temporarily imposing a surtax of three-tenths on certain import duties and increasing certain other import duties, as well as the excise tax on domestic sugar, has been passed by both houses of parliament, it is stated in a cablegram received in the Department of Commerce from Assistant Commercial Attache Paul S. Guinn, The Hague. The Department on Dec. 28 further announced:

Import Duty Surtax.

Import Duty Surtax.

The surtax of three-tenths of import duties, which is understood to have become retroactively effective on Sept. 29 1932, and which is to remain in effect until Dec. 31 1933, applies only to specified products of kinds not produced in the Netherlands, most of which were dutiable at 10% ad valorem (now 13%), and among which are; Petroleum and liquid products thereof; barometers; certain optical goods; phonograph and similar records; projection apparatus (including cinematographic), typewriters, calculating machines; tobacco in roils or leaves, uncut and unrolled tobacco stems; watches, chronometers, and certain parts of these; salmon and sardines, in cans containing not over 1,200 grams; various dried and fresh fruits, nuts, and spices (except apples, pears, grapes, hazelnuts and fresh fruits, nuts, and spices (except apples, pears, grapes, hazelnuts and walnuts); and oatmeal.

Import Duty Imposted on Tractors and Certain Automotive Parts

The above measure imposes a duty of 15% ad valorem on internal combustion engines weighing not over 200 kilos per liter of effective cylinder capacity (if for use in the propulsion of vehicles), automoi.ile chassis frames, motorcycle frames, and tractors, all formerly duty free. This duty, which is also understood to be retroactively effective as of Sept. 29 1932, is to remain in effect until Dec. 31 1933, and is to become 12% ad valorem thereafter. Other duties on automotive products remain unchanged.

Domestic Sugar Excise Tax and Import Duties on Sugar and Goods Containing

Sugar Temporarily Increased.

The excise tax on domestic sugar is increased by one-fifth, and specific import duties on imported sugar and goods containing sugar are correspondingly increased, during the year 1933, by the same measure. This increase applies to all sugar stocks, exceeding 500 kilos, on hand in the Netherlands on Jan. 1 1933.

Annual Review of New York Coffee and Sugar Exchange -Year of "Devastatingly Low" Sugar Prices-Chadbourne Plan Fails of Success-Falling Off in Coffee Consumption-Production of Coffee in Excess of World Requirements.

According to H. H. Pike, Jr., President of the New York Coffee and Sugar Exchange, "the year 1932 will long be remembered by the coffee and sugar trades as a year of devastatingly low sugar prices, hurricane, revolution, blockades and the phenomenon of a Government deliberately destroying millions of bags of its chief export commodity. Mr. Pike also says:

It would seem that both man and nature combined in a program of destruction, which would have staggered predepression imagination. The ability of the coffee and sugar trades to weather such a succession of impacts speaks worlds for tenacity and endurance. This is the one enging feature of the year.

In his review Mr. Pike alludes to the Chadbourne sugar restriction plan, as to which he says:

restriction plan, as to which he says:

The Chadbourne Plan, the most comprehensive and ambitious scheme for international control of sugar which has ever been tried, continued on its course. Obviously, success did not attend it. Whether it would be successful had it controlled all sugars instead of only a part of those offered in the world market is a question. Inasmuch as it did not control any of the world's tariff protected home industries it so far has failed to right the situation. Statistically, the world is better off through heavy curtailments in certain international producing countries, but that improvement has been negatived by those unaffected by the Plan.

Combined with this, the falling off of the world's consumption has had a serious effect. After 109 years of continuous increase in consumption, averaging nearly 5% per annum, the year 1932 has become the third successive year in which consumption has decreased.

In his review Mr. Pike also has the following to say:

In his review Mr. Pike also has the following to say:

With regard to the situation in the coffee market, the year 1930-31 saw a record consumption of 25.147.175 bags. This year we have seen a falling off of about 6% to 23.728,003 bags for the crop year ended June 30 1932, since which time consumption apparently has been falling off but n a leser degree. World production for the similar crop years has increased from 24.797,400 bags in 1930-31 to 34.390,100 bags, which large increase, however, does not establish a record as the total production two years ago was even larger.

Generally speaking that for Santos coffees this year has been a rising

years ago was even larger.

Generally speaking, that for Santos coffees this year has been a rising one; while the market for Milds has been a declining market. These opposite tendencies are probably accounted for by the additional taxation pur on the Brazilian product, while the decline in Milds is due to the fact that the Mild producing countries are liquidating their crops as made and are not carrying over any appreciable surplus from one crop to the other. Brazil has continued her policy of applying a part of the taxation raised on coffee to the destruction of surplus stocks. This destruction has not continued at quite as high a rate as anticipated, but during the last 16

months some 11,000,000 bags have been burned or dumped at sea as compared with the program of 1,000,000 bags a month. The falling off is due in part to the dislocation of shipments during the revolution and the consequent falling off in tax collections.

The novelty of this destruction of a commodity—an entirely new program in the world's economic history—must be followed by everybody, whether engaged in the coffee business or otherwise, with exceeding interest. This might have been interest enough but the coffee world is a glutton for excitement.

whether engaged in the coffee business or otherwise, with exceeding Interest. This might have been interest enough but the coffee world is a glutton for excitement.

During the months of July. August and September a revolution occurred in Brazil which for more than 90 days compietely closed the port of Santos and tightened the market situation to such a degree that prices advanced about 50%, followed by a similar but sharper decline upon cessation of hostilities. During this period of revolution-inflated prices, the Farm Board sold the first quota of its 1,050,000 bags of Santos coffee, which it had arranged a year previously to exchange with the Brazillan Government for the Farm Board wheat. Naturally, the first sale was very successful and at a very profitable price to the Farm Board. Succeeding sales are being made according to the original agreement monthly of 62,500 bags. Like any other Government intervention in the ordinary course of marketing a product, the trade finds this Government coffee overhanging the market somewhat of an impediment to the smooth course of business. Perhaps the most interesting new development in the situation is the agitation is to enable Brazil to compete better with other coffees.

The principal difficulty in the distribution of coffee seems to be—first, a normal difficulty that coffee crops vary tremendously from year to year, and second, the immediate difficulty that world production has reached a point where it is in excess of world requirements.

Should there be a lessening of the restrictions in Brazil, such action would tend to normalize the distribution of coffee and would undoubtedly lead to a larger business in coffee on the New York Coffee and Sugar Exchange and give that agency the opportunity to carry through its machinery a larger share of the burden of the world's excess supply.

The sugar market has gone to new depths of despair. During the depression years of 1930 and 1931 a low on Cubas c. & f. of 1.03 was established. During the year restriction, certain suga

Annual Review of New York Cocoa Exchange-Volume of Trading in 1931 Almost Equaled World Production of Cocoa During Year.

In his annual review and forecast Howard T. McKee, President of the N. Y. Cocoa Exchange, states that the year 1932 opened on the Exchange with supply and demand fairly well balanced and the outlook very favorable providing there was any betterment at all in general business. "Cocoa," he notes, "was then selling at 4 cents a pound. As the year comes to a close we find the situation not very different from what it was at the start of the year. Cocoa is now selling at $3\frac{7}{8}$ cents a pound." Mr. McKee adds:

is now selling at 3% cents a pound." Mr. McKee adds:

The balance between supply and demand has not changed materially although there has been a small decline in consumption and a correspondingly small increase in production. World stocks of cocoa at the end of the 1931-32 crop year (Oct. 1 1932) were about 60,000 tons compared with about 44,000 tons on Oct. 1 1931.

The past year saw a bull movement start late in the summer when the economic picture appeared to be clearing somewhat. In September spot cocoa sold at 5.10 cents a pound.

The volume of business transacted on the Exchange was very satisfactory. Trading volume this year almost equals the entire world production of cocoa for the year of about 500,000 tons. The volume for 1932 is better than 1931 or 1930 and is only a few thousand tons under the record volume of 1929.

1932 is better than 1931 or 1930 and is only a few thousand tons under the record volume of 1929.

It can accurately be stated that the world cocoa trade used the Exchange to facilitate the marketing of the world's production. Merchants in Europe bought actual cocoa in West Africa and then hedged themselves by selling futures on the N. Y. Cocoa Exchange. When they disposed of their cocoa they covered their hedges on the Exchange. A fair volume of actual cocoa never came to this country but it was bought and sold on the N. Y. Cocoa Exchange. Such examples illustrate the manner in which the Exchange acts as an invaluable adjunct in the orderly marketing of the world's cocoa production.

Cotton Trade Review and Outlook by President Dowdell of New York Cotton Exchange-Restoration of Foreign Buying Power Prime Requisite for Permanent Recovery of Cotton Growing Industry

Looks for Such Revision of War Debts as Will Permit Reopening of Channels of International Trade.

In the view of William S. Dowdell, President of the New York Cotton Exchange, the most encouraging fact, from the standpoint of the cotton trade outlook for the coming year, is that the war debt problem has at last reached a crisis. The entire debt question is to be reviewed without delay. "If such review is thoroughgoing and frank," says Mr. Dowdell, "it will disclose the momentous and tragic part played by foreign government obligations in strangling our export trade and intensifying the world depression. This is clearly the first step to such revision of the debts as will permit a reopening of the channels of international trade. A restoration of foreign buying power is the prime

essential, the prerequisite, for a permanent recovery of the cotton-growing industry of this country." Mr. Dowdell, in his "Cotton Trade Review and Outlook" goes on to say:

in his "Cotton Trade Review and Outlook" goes on to say:

It has been truly said that, in the last analysis, this depression wascaused by a lack of understanding of, and a lack of respect for, economic
laws. The United States is so largely self-contained from the standpoint
of trade, and it was so long in the position of debtor to the rest of the world,
that our people have largely falled to realize how economic laws apply tointernational trade and particularly to the foreign trade of a creditor
nation. But it has been gradually driven home upon us that we cannot,
all at the same time, retain a large export trade, cut off import trade, and
collect foreign debts. We cannot follow the slogan of Buy American and
at the same time Self Foreign and Collect Foreign.

American cotton growers have been among the chief sufferers from the
fallure of this country to apply this elementary principle. Over 10 million
people in the United States are directly dependent on the growing and
manufacture of cotton, and over half of our annual cotton crop is normally
sold abroad. Europe is our best foreign cutomer. But Europe consumed
only 4,822,000 bales of American cotton last season compared with an
average of 6,570,000 in the five seasons ending with 1929-30. And last
season American cotton sold so far below usual relationships with Indian
and other foreign growths that under normal conditions Europe would
have been expected to consume far more of our staple than average, probably 7,000,000 or 8,000,000 bales. This restriction of buying by Europe
has been a most important factor contributing to the decline in the price
of American cotton this past year to the lowest level on record

have been expected to consume far more of our staple than average, probably 7,000,000 or 8,000,000 bales. This restriction of buying by Europehas been a most important factor contributing to the decline in the price of American cotton this past year to the lowest level on record.

Restricted buying by Europe did not have its full effect on the price of American cotton this year, drastic though the decline was, since it was offset in large measure by phenomenal buying by the Orient, i. e., by Japan, China and India. But this heavy Oriental buying must be regarded largely as of a temporary character. It resulted chiefly from the short crops in India and China, and anticipatory buying accompanying the rise in prices in yen and taels, consequent on the depreciation of those currencies. A substantial part of the Oriental buying was doubtless the result of a permanent expansion of cotton spinning in the Orient, much of it at the expense of European yarn and cloth trade, but this is of doubtful benefit to the American cotton trade, since Oriental mills readily change over from American to Indian or Chinese cotton when those growths are cheaper.

It is not to be assumed that the contraction of export trade has restricted the demand for only that portion of the domestic crop which is regularly sold abroad. To the extent that reduced exports of other agricultural commodities and of industrial products have resulted in low prices, unemployment and stagnation of industries in this country, the domestic demand for cotton has been curtailed. Domestic consumption of American cotton fell from a pre-depression five-year average of 6,457,000 bales to only 4,744,000 bales last season. Low prices failed to have the usual effect of expanding consumption. Industrial workers without work, manufacturers with idle plants, and farmers selling wheat for 30 cents a bushel were not interested in the fact that cotton prices were the lowest in over a century.

The financial status of foreign countries affects the American cotton trade

bushel were not interested in the fact that cotton prices were the lowest in over a century.

The financial status of foreign countries affects the American cotton trade not simply from the demand side, but from the supply side as well. When England went off gold, the Indian rupee and the Egyptian tallarl, the currencies of two of the most important cotton-growing countries, dropped in dollar value with the pound sterling. The currencies of practically all other countries growing cotton in volume are likewise depreciated—the Shanghai tael, the Brazilian milreis, the Peruvian sol, the Argentine peso and the Mexican peso. Cotton prices in the depreciated currencies are relatively higher by an amount which counterbalances the depreciation. While cotton is now selling in this country at about 40% below the level of two years ago, it is selling from 15 to 30% higher for different varieties in India. The ultimate effect of such increased prices abroad will doubtless be increased production in foreign countries, entailing increased competition with American cotton.

It is not necessary to go further to see that the welfare of the American cotton grower is inescapably linked with international trade realtions and foreign currency values. The crying need of the American cotton trade is

cotton grower is inescapably linked with international trade realtions and foreign currency values. The crying need of the American cotton trade is a larger demand for and an increased consumption of American cotton, particularly in foreign countries—only in that way can the present excessive stocks be liquidated and prices restored to a remunerative basis. From the standpoint of the American cotton grower, it is imperative that the debt problem be approached and solved with that in view.

Less Than Seasonal Decline in Production of Texas Cotton Mills in November.

Production at Texas cotton mills made less than the usual seasonal decline during November, with total output of 4,047,000 yards, according to reports submitted direct to the University of Texas Bureau of Business Research by 21 Texas cotton mills. The Bureau on Dec. 27 said:

This total is 2.6% under that for October, although the usual seasona decline from October to November amounts to 5%. Bales of cotton used totaled 4,704,, as against 4,738 in October, a decline of only 0.7%, instead of the usual 2.6% drop from October to November. Shipments dwindled as compared with October and also November last year, amounting to only 2,670,000 yards. Unfilled orders, though 19% under those at the close of October, were still well above the 5,000,000 mark and were 24% greater than those reported at the close of November a year ago.

Decline in World Consumption of American Cotton During November.

World consumption of American cotton during November totaled approximately 1,159,000 bales compared with 1,168,000 (revised) in October, 1,022,000 in November last year and 929,000 in November two years ago, according to the New York Cotton Exchange Service. During the four months from Aug. 1 to Nov. 30 world consumption totaled about 4,473,000 bales, against 4,018,000 in the corresponding months last season and 3.555,000 two seasons corresponding months last season and 3,555,000 two seasons

ago, says the Exchange Service, which on Dec. 27 also stated:
The decline in total consumption of 0.8% from October to November
this year compares with an average decline of 2.3% in the seven years
from 1925 to 1931 inclusive. However, this should not be construed as
indicating, necessarily, that world consumption declined less than seasonally
from October to November, since the number of working days in October
this year was less than usual, while the number in November was more

than usual. It may be calculated roughly that the daily rate of world consumption declined from October to November this year by about 2%, whereas in the past seven years on an average it has increased about 3%. On this basis it would appear that the world consumption rate, in its decline from October to November, moved contrary to the seasonal trend.

Compulsory Cut in Cotton Acreage Urged at Governors' Conference Held at Memphis—Conference Also Asks Federal Loans For Distressed Farmers.

A compulsory cotton acreage reduction patterned on the law passed last year by Texas, Arkansas and Mississippi, which lapsed because of the provision that other cotton growing States must do likewise, was urged upon all the States of the South by the Governors' conference on cotton control at Memphis, Tenn. on Dec. 29. Memphis advices Dec. 29 to the New York "Journal of Commerce" reporting this pointed out that the Texas, Mississippi and Arkansas laws, which died, all contemplated an acreage reduction of 50%. The account also said:

The resolution finally adopted to night places the responsibility for getting such a law passed in at least three fourths of the cotton States this ear upon the shoulders of Governor Conner of Mississippi, who is urged he is unable to do so, soon to call another conference of Governors to

put the matter over.

The conference thus ended with the Governors ignoring the reco tions of their own steering committee, which nao urged either the allotment plan of Dr. Tait Butler or the "cotton holiday in 1934." It also ignored half a dozen other plans presented during the day, including excise tax bounty schemes, price fixing by law, export debentures and allotment of only the domestic consumption.

Regarding the conference the dispatch in the paper quoted also had the following to say:

The conference also urged the States to memorialize Congress and the President "as a matter of immediate relief for the distressed farmers of the nation promptly to provide Federal loans to the owners of occupied farms for the purpose of paying taxes for at least two years on such farms in cases where the farm owners are unable to obtain money for such tax purposes from other sources."

Six States Favor Plan.

Six States Favor Plan.

The majority report of the conference, which was attended by only two Governors in person, Gov. Sennett Conner of Mississippi and Gov. Ibra Blackwood of South Carolina, received the votes of the representatives of Mississippi, Louisiana, Alabama, Texas, Oklahoma and South Carolina. Tom Linder and Herman de la Perriere, the Georgia representatives, dissented from the majority report and stuck to the last to tne plea for a "cotton holiday" in 1934, urging that the South produce no cotton at all in that year in order to get a reasonable price for the 1933 crop.

The Arkansas delegation, headed by Charles T. Coleman, also dissented and read a minority report, urging abolition of the Federal Farm Board, restriction of seed loans and condemning attempts to regulate acreage by law.

by law.

Both of these minority reports were rejected by the Governors' conference and then State Senator Carroll Nance of South Carolina made a scathing attack on the majority report, declaring it offered no solution, and only would add to the existing 13,000,000 bale carryover.

Hits Loan Proposal.

He bitterling assailed the proposal to memorialize Congress to provide

"You talk about reducing cotton production and then ask Congress to lend us money to grow more cotton," he shouted. "I can't ee anything to it, and I want to record my vote against the whole out iness."

From the Memphis dispatch, Dec. 29, to the New York

"Times," we take the following:

The majority report received the votes of Governors Conner of Mississippi and Blackwood of South Carolina and representatives of the Governors of Louisiana, Alabama, Texas, Oklahoma and South Carolina...

The report was drafted after a day devoted to hearing plans to raise the price of cotton ranging from the "holiday" to allotment excise tax bounty projects.

bounty projects.

At the outset, Governor Conner opposed any plan "passing the buck" to the Federal Government, insisting that the responsibility be placed upon the Southern Governors and warning the assemblage of planters and agricultural experts that without the support of the Governors no plan would have "a ghost of a chance for success." Petroleum and Its Products-East Texas Curb Brings

Sharp Reduction in Crude Output-Railroad Commission Urges Support of Rulings to Maintain Industry on Firmer Basis.

The ban on crude production in East Texas, running from December until Jan. 1, has already resulted in a drop of approximately 300,000 barrels a day in the country's output. Coupled with the enforcement of this complete shut-down is a statement from the Texas Railroad Commission urging all operators to observe all its rulings "for the good of the industry."

As the petroleum industry sees the end of 1932, it looks back on a series of events which builded steadily throughout the first 11 months, and then came to an abrupt stop and sudden decline in the twelfth month. The drastic cut in crude prices early in December resulted from the efforts of a group to force prices up beyond what was generally considered a normal level.

The major companies protested against this step by refusing to meet the higher postings, and as refined prices failed to show any signs of maintaining a firm basis, the larger companies took the initiative in cutting crude prices lower than they had been before the Oct. 15 advance.

Coupled with this action came reverses to the enforcement of the production rulings in Texas. The Supreme Court ruled against the use of State militia in enforcing rulings, and Governor Sterling was forced to withdraw his troops from the field. Then various court rulings provided injunctions against the State Commission's regulations, and production again threatened to run unhindered, to the great detriment of the industry of the entire country. The State Railroad Commission then took the drastic step of completely shutting down all wells in East Texas for a 15-day period. This had an immediate beneficial effect, and it is hoped throughout the industry that during this period of non-productivity the producers will be able to arrive at a uniform and orderly means of so curtailing output that the price structure will not be further endangered, and might instead start on an upward trend which will return the crude price basis to a higher level.

The Commission on Thursday of this week, in a general statement, pointed out that the regulation of East Texas output has stabilized the industry to a marked degree, and deplored the action of State and Federal courts in suspending orders of the Commission by injunction. The Commission further stated that consideration of pipe line regulations and rates will be postponed, subject to call, so that the companies affected may prepare data to be presented on this subject.

No further price changes were posted in the various fields during the week, with the exception of a new basis for purchasing announced by the H. F. Wilcox Oil & Gas Co., Tulsa, to be effective in the State of Oklahoma and in the Gray County area of Panhandle field, northwest Texas, as of Jan. 1 1933. The Wilcox statement follows: price of crude oil will be based upon the daily low quotations for U. S. motor gasoline below 57 octane as shown by the Chicago "Journal of Commerce." For each one-eighth of one cent so quoted in this publication for such gasoline we will pay 21/2 cents per barrel for oil having the gravity of 40 and above. All oil having the gravity of below 40 will be paid for at the rate of two cents less for each lesser degree." By this method Wilcox will be paying 60 cents a barrel for above 40 oil, and two cents less a degree down to 36 cents for below 29 gravity. Officials of the company declare this new procedure of establishing a price "the scientific way of purchasing crude oil, based on what they can sell its derivitives for."

REFINED PRODUCTS—COLONIAL BEACON REDUCES BULK GASOLINE PRICES—IMPROVEMENT NOTED IN FUEL OIL SALES—CHICAGO MARKETS WEAK.

Bringing their price schedule into line with those of other major companies, Colonial Beacon Oil Co., New York and New England marketing subsidiary of Standard of New Jersey, on Wednesday posted a reduction of 1/4c. a gallon in tank car gasoline, making the new price 61/4c. at New York, Boston and Providence, and 834c. at Portland, Me.

The gasoline market here has been easy this week, with jobbers marking time on new business. It is reported that some bulk sales were made at 51/2c. for below 65 octane, and at 6c. for above 65 octane. Some little distress selling of above 65 octane at 53/4c. was noted, but not in volume sufficient to influence the general market.

Chicago reports the bulk gasoline market there as very soft, despite the beneficial affects of the East Texas shut down. Jobbing activity has come practically to a stand-still, forcing "distress" holders to offer the lower grade stocks as cheap as 21/2c. a gallon, as against ruling prices of 23/4-3c. No definite trend of improvement is expected in that market until after the turn of the year.

Locally the fuel oil situation has shown some development, with the demand serving to maintain present prices on a firm level. Both industrial and domestic heating oils are moving in good volume. Marine oils also show continued steadiness, with grade C bunker fuel oil strong and fairly active at 75c. a barrel, and Diesel at \$1.65, both quotations for bulk shipments, at refinery.

Demand for kerosene has followed a routine schedule, with the price now firmly established at 51/2c. a gallon for 41-43 water white, in bulk at refineries. Consumption statisties have shown that for the first ten months of 1932 a 6% increase was affected, and this has served to strengthen the general market tone.

Price changes follow:

Dec. 28. Colonial Beacon Oil Co. posts ¼c. reduction in gasoline tank car prices, new prices being as follows: 6¼c. a gallon at New York, Boston, and Providence; 8¾c. a gallon at Portland, Me.

Oil Restriction Upheld in Colorado-Federal Court Rules Proration Agreements Not a Violation of Trade Restraint Laws.

From the "Wall Street Journal" of Dec. 27 we take the following from Denver:

The legality of restricting oil production and drilling operations under proration agreements was upheld in the Federal District Court at Roswell by the jury in a directed verdict by Judge Colin Neblett in the case of Hobbs (N. M.) Townsite Co. against Midwest Refining Co. (now Stano lind Oil & Gas Co.). The Townsite company, owning a royalty interest in lease upon which Midwest drilled a well early in 1931, sued for \$14,936 damages for royalties it would have received if the well had been produced at capacity and oil marketed, and \$25,000 damages for drainage of lease by other wells. other wells

The case was important as the issues apply to practically all fields operated under proration agreements, the court holding, in effect, that proration agreements are not in violation of Federal laws prohibiting restraint

Major Oil Concerns Win Price War at St. Louis-Independent Gasoline Stations Cut to 25 from 113.

The following is from the New York "Herald Tribune" of Dec. 28:

Oil marketing interests in the St. Louis area have virtually ceased hostilities in the price war waged by them for the last three months, according to Associated Press dispatches. Major oil companies are apparently

of the 113 independent oil stations operating in St. Louis city in September only about 25 still are doing business as independents, according to the news agency. Many of the stations have closed altogether, others announce "temporary suspension" and others have signed up to handle products of the large companies.

Current prices on gasoline in St. Louis are 10 cents a gallon for third trade all cents for ordinary grade and 14 cents for high test at a certifice.

grade, 11 cents for ordinary grade and 14 cents for high test at service stations, including the 4-cent State tax. During the price-cutting period many companies made a practice of giving substantial premiums to customers in connection with purchases of motor fuel and lubricants.

Daily Crude Oil Output Off 34,400 Barrels During Week Ended Dec. 24 1932-Gasoline Stocks Again Increased.

The daily average crude oil production in the United States fell off 34,400 barrels during the week ended Dec. 24 1932, the daily average rate for that period being 2,025,700 barrels, compared with 2,060,100 barrels a day in the preceding week, 2,292,900 barrels daily in the corresponding period last year and an average of 2,084,300 barrels per day during the four weeks ended Dec. 24 1932.

Stocks of motor fuel at all points increased from 49,935,000 barrels at Dec. 17 last to 51,070,000 barrels at Dec. 24, or an increase of 100,000 barrels during the week.

Reports received during the week ended Dec. 24 1932 from refining companies controlling 91.6% of the 3,856,300 barrel estimated daily potential refining capacity of the United States indicate that 2,085,000 barrels of crude oil daily were run to the stills operated by those companies. and that they had in storage at refineries at the end of the week 33,695,000 barrels of gasoline and 128,370,000 barrels of gas and fuel oil. Gasoline at bulk terminals amounted to 11,735,000 barrels and 1,120,000 barrels were in waterborne transit in or between districts. Cracked gasoline production by companies owning 95.4% of the potential charging capacity of all cracking units averaged 397,000 barrels daily during the week.

The report for the week ended Dec. 24 1932 follows in detail:

b Estimated to permit comparison with A. P. I. Economics reports, which is of Bureau of Mines basis. c Includes 33,695,000 barrels at refineries, 11,735,000 at bulk terminals, 1,120,000 barrels in transit, and 4,520,000 barrels of other motor fuel stocks.

Humble Pipe Line Co. to Buy $20\,\%$ of East Texas Storage Oil.

The following from Houston (Texas) Dec. 30 is from the New York "Sun":

The Humble Oil & Refining Co. to-day announced that beginning to-morrow it will purchase 20% of all East Texas crude oil in storage with the Humble Pipe Line Co. The announcement was made at about the time that the Texas Railroad Commission, sitting at Austin, made public figures showing that takings of East Texas oil during the first quarter of the new

showing that takings of East Texas oil during the first quarter of the new year would fall below recent purchases.

The oil will be purchased for the account of producers and royalty owners. The price will be 75c. a barrel. For that portion of oil so purchased the Humble also will pay 10c. a barrel gathering charge heretofore assessed by the Humble Pipe Line Co.

Nominations to purchase crude oil received by the Texas Railroad Commission amount to 304,123 barrels a day of East Texas oil for January, 305,732 barrels for February and 306,326 barrels for March, compared with the Commission's last daily allowable of 310,000 barrels a day.

Nominations for the entire State call for 829,557 barrels a day for January, 833,609 barrels for February and 834,838 barrels for March, compared with nominations made in November of 1,044,000 barrels a day for each of those months and a daily allowable fixed by the Railroad Commission of 789,745 barrels a day.

Earnings of Texas Oil Pipe Line Companies Three Times Larger Than Permitted by Law.

Ernest O. Thompson, a member of the Texas Railroad Commission, in releasing a report compiled by the Commission, stated at Amarillo, Texas, on Dec. 26 that net earnings of oil pipe line companies in Texas in 1931 averaged 29.67%, or about three times the return allowed by law. An adjustment of the rates, he said, would be taken up by the Commission at its meeting in Austin on Dec. 28. Associated Press advices from Amarillo in stating this also said:

The report, covering 37 companies, was made up by the Commission from statistics gathered by its auditors and appraisal engineers in the last three months. Figures of capitalization and earnings, for the most part, Mr. Thompson said, had been furnished by the companies, the Commission allowing 4% for depreciation. Of the 36 companies reporting, 10 showed net earnings greater than 40%; 15, greater than 25%; 30, above 10%, and six, below 10%.

For 1930, with 18 companies reporting, the average rate of net earnings was shown to have been 27 34%, or approximately 2% less than 1921.

was shown to have been 27.34%, or approximately 2% less than 1931.

Mr. Thompson said the Commission would act to fix rates which "would come within the law" to provide net earnings which would not exceed 10%, "The figures," he said, "in some instances are sensational and almost unbelievable. The intent of the law is to allow for 8% net earnings."

According to the Commission's information, rate reductions running high as 68% on 1931 income and 76% on 1930 figures will be necessary rnings down to 8%

The Gulf Coast Pipeline Co. had the highest earnings for both years.

Texas Oil Buyers Give Quarter Needs-Specifications in Excess of Recent Output-Humble Storage Is Large.

Under date of Dec. 29 the New York "Journal of Commerce" reported the following from Austin, Texas:

Purchasers' nominations for takings of crude oil in Texas, announced to-day at the hearings before the State Railroad Commission preliminary to the posting of new proration orders under the market demand law, showed that 827,557 barrels daily will be needed in January, 833,609 barrels daily in February and 834,838 barrels daily in March.

This compares with an average flow of 789,100 barrels daily in Texas for the week ended Dec. 24. The production for that week was sharply lower than previously because the East Texas field is closed for an estimate of bottom hole well pressure. Output is expected to be lower still for the current week.

Humble Oil Position.

Humble Oil Position.

In the course of the hearings to-day, W. S. Farish. President of the Humble Oil & Refining Co., stated that his company would require 217,000 barrels of oil daily for the first three months of 1933, and would buy 65,000 barrels of the total daily under contracts. East Texas will supply 43,500 barrels daily, West Texas 65,600 barrels daily, the Gulf Coast 33,800 barrels daily, and Reagan County 30,000 barrels daily, while the rest of the oil will be taken from different areas.

Mr. Parish stated that the company has about 14,000,000 barrels of oil in storage and has 7,000,000 barrels of empty storage in Texas. He said the company would make connections with 300 more wells in East Texas if the oil could be sold, but added that the Humble company is now buying all the oil it can sell. It owns 900 wells in East Texas and is

now buying all the oil it can sell. It owns 900 wells in East Texas and is drilling 25 mor

Indicating that purchasers' nominations for the first three months of 1933 on Texas oil production were being filed on Dec. 28 during a hearing by the Texas Railroad Commission on fixing new field allowables for the entire State, including an order to permit reopening of the giant East Texas field, shut down to gauge bottomhole pressures, the Austin advices, Dec. 28, to the same paper said, in part:

vices, Dec. 28, to the same paper said, in part:

The shutdown, effective to Jan. 1 at 7 a.m., was modified by the Commission to allow transportation of legally produced oil out of storage. . . .

President W. S. Farish of the Humble company was on the stand and cross examined about a statement that his company would continue ratable takings, "assuming the Commission will issue a valid and reasonable order."

Chairman Terrell read a statement, signed by all members of the Commission, containing a frank arraignment of Federal and State court injunction attacks on enforcement. Mr. Terrell read:

"We know of no calamity that could befall our State more disastrously than the failure of our courts to enforce our orders of proration and to destroy them by the route of injunction or by restraining writs without the opportunity of a fair and public hearing. Either, by our State courts or Federal, is in no way conducive to good government. It is unfair, unwise, non democratic, and was never intended by those great patriots who so wisely founded our Government and established our judiciary in both State and nation."

Mr. Farish testified that his company has about 14,000,000 barrels of oil in storage in Texas now and about 7,000,000 barrels of empty storage; his company, with 900 wells in East Texas, is drilling 25 more; and with something over 100 at Conroe, is drilling about 20 more, he said.

Texas Injunction Bans Shutting Down of West Panhandle Gas Field.

The following from Fort Worth, Texas, Dec. 28, is from the New York "Journal of Commerce":

A three-judge Federal Court at Austin to-day issued an injunction restraining the Texas Railroad Commission from shutting down the West Panhandle gas field.

Plaintiffs were Texoma Natural Gas Co. and Cities Service Gas Co., both of which supply Middle Western and Eastern markets with Texas

natural gas.

The court, presided over by Circuit Judge Joseph C. Hutchison, said in its opinion that the shutdown order was an attempt to force Texoma and Cities Service to share its markets with others who had no outlet. The opinion recited that the Commission had acted in a confiscatory manner nd that it had "run into the ground" the idea of public nece

Oklahoma Oil Field Produces 73,516 Barrels Daily.

From Tulsa, Okla., the New York "Journal of Commerce" reported the following under date of Dec. 23:

The Oklahoma City field has a "potential" of 4,531,347 barrels a day, the Corporation Commission stated to-day, from its 948 wells, but it is making but 73,516 a day now, and pipe lines have indicated they want but 74,333 a day in January, but the Commission is yet to fix January al-

To-day the Commission received nominations on a base of what the four producing areas in the capital field could do and the pipe lines asked for 48,171 a day from Wilcox, 25,161 a day from Simpson Sand, 126 a day from Fault Line Zone and 875 a day from Arbuckle Lime, or the Discovery Horizon. The Champlin Refining Co. and the H. F. Wilcox Oil & Gas Co. admitted they want to run more oil, but don't want to pay posted

Quiet Week in Copper, Lead and Tin-Zinc Sales Larger-Silver Declines.

With the exception of a little improvement in the demand for zinc, the market for non-ferrous metals passed through a rather dull period in the week ended Dec. 28, says "Metal and Mineral Markets" in its issue of Dec. 29. Both buyers and sellers seemed more than willing to have the year pass out of existence with as little notice as possible. Some in the industry had hoped for higher prices for inventory purposes, but, under the circumstances, most operators were pleased that they were able to maintain prices at current levels. Copper wavered a little abroad, but continued fairly steady in the domestic market. Lead was unchanged. Zinc held well until some favored business came along for which sellers were willing to name special terms. Tin was featureless. Silver attracted attention in that the price fell to 24% cents per ounce, an all-time low. The following comes from the same publication:

Copper Holds at 5 Cents.

There was some inquiry for copper for shipment over the second and third quarters of 1933, out bids at around 5½ cents on far off material failed to interest sellers. Prompt and near by copper was almost neglected in the domestic market, and the meager business placed was at the un changed basis of 5 cents per pound, delivered Connecticut. The reason that producers are not anxious to take on forward material at current prices is quite evident—further curtailment in production is being considered.

Foreign business in copper was restricted chiefly because of the holidays. European consumers bought a fair tonnage of copper on the days open to trading. The undertone was a shade easier, prices ranging from 4.975 cents to 5.10 cents, c.i.f. usual ports. Traders look for the British tariff dis cussions to be resumed after the turn of the year, and the feeling is strong that some kind of an agreement among foreign producers is in prospect. The International Nickel Co. is to increase operations in the near future, according to advices from Canada, so that the company will be in a position to maintain adequate stocks of refined metal abroad. The proposed British preference tariff is not responsible for the action of Inco.

Stocks of copper in British official warehouses on Dec. 15 totaled 36, 38 tons, against 36,050 tons a month previous.

The deliveries of copper for consumption during 1932 in the several countries outside of the United States and Canada, computed according to the conventional formula of production, plus imports minus exports, plus or minus changes in stocks so far as published, are summarized by the American Bureau of Metal Statistics, in metric tons, as follows:

	Average per Month.	No. of Months Reported.	Average Last 3 Months.
Great Britain	10,230	11	11,090
France	7.098	9	6,368

x Conjectural.

Average monthly consumption of copper in the countries named during 1931 was 59,658 metric tons; in 1930 the monthly total was 67,041 metric tons, the statistics of the Bureau show.

Lead Unchanged.

The holiday season, rather than any real business activity, seemed to prevail in the lead market last week. Sales volume totaled only several hundred tons. Prices, however, were maintained at recently existing levels—that is, at 3c., New York, the contract settling basis of the American Smelting & Refining Co., and 2.87½c., St. Louis. The bulk of what business was booked originated with corroders, chiefly battery manufacturers.

Leading producers, although apparently not viewing the current status heading producers, atnough apparently not viewing the current status of national affairs with unalloyed satisfaction, intimated that they look for an improved demand for the metal soon after the first of the year. This favorable element in the outlook for the near future gains support from the low total of sales of virgin lead for January shipment, which now stands at about 7,100 tons. Sales for December shipment total about 19,900 tons, or about 6,300 tons below the monthly average for the preceding eleven

Zinc Sales Improve.

Demand for zinc was not what might be termed active, but the fact that some large consumers are showing more interest in this commodity was regarded as a favorable development. Most of the moderate tonnage that changed hands during the week was sold on Tuesday, and prices realized on that day showed a range of 3.09 to 3.125c., St. Louis, for Prime Western. The low on that day applied against some favored business. Yesterday, all sellers again quoted 3.125c.

The International Zinc Cartel is expected to complete within a few days its curtailment plan for the first half of next year. The Belgian producers have been holding out for a larger quota. Production of zinc abroad, under the revised plan, will probably show a moderate increase over the existing rate of operations. Stocks abroad are still tending downward. Demand for zinc was not what might be termed active, but the fact

Tin Inactive.

Tin Inactive.

The recent inactivity of the domestic tin market continued through the last week, business being limited to a few small sized lots of Chinese metal. Prices, although exhibiting a slightly downward trend, were only nominal. Statistics issued by the International Tin Committee during the week show that shipments in September, October and November were above the allotment total by 45.365, and 201 tons, respectively. This condition resulted chiefly from excessive exports on the part of Bolivia and Malaya. It is understood, however, that in succeeding months Bolivia will lower its shipments to a compensating degree, and that liquidation of stocks by a leading operator in Malaya has now been completed.

Chinese 99% tin, prompt shipment, closed as follows: Dec. 22, 21.75c.; Ded. 23, 21.70c.; Dec. 24, 21.65c.; Dec. 26, holiday; Dec. 27, 21.60c.; Dec. 28, 21.65c.

Steel Output Declines Only 1%, Bettering Year-End Hopes-Prices Remain Unchanged.

The steel industry is ending a disastrous year with better production than was expected, says the "Iron Age" of Dec. 29. Although some rolling mills are shut down for the entire

holiday period, the steel-making rate has declined only to 13% of the country's capacity from 14% last week, and is slightly above the low point of the depression, reached in the holiday week last July, adds the "Age." Raw steel output is sustained chiefly by the automobile industry's requirements and advance rollings of tin plate, continues the "Age," which further reports as follows:

In districts where automobile steels are the principal products there has been no suspension except that occasioned by the week-end holidays. A Detroit steel plant is running five of its six open-hearth furnaces, one being idle for repairs, and at Cleveland the current rate is 26%, the same as last week. The Pittsburgh district, however, is not above 12%, while production in the Valleys has declined to about 10%. The eastern Pennsylvania district is also down to about 10%. Chicago district output has not gained from its extremely low point of last week, but orders there have increased moderately, indicating a somewhat better operation in the first

increased moderately, indicating a somewhat better operation in the first week of January.

Steel mills will start out the new year with no important backlog tonnages and with very indefinite prospects, but there is naturally an expectation that business will improve moderately after the year-end pause. A few orders have filtered in for January shipment and billing. At Chicago there was a sudden spurt in orders from the railroads for track supplies that are needed immediately, recent cold weather and snow having made track repairs necessary. In no other particular, however, has railroad buying shown signs of betterment, although the settlement of the wage controversy with the unions removes one of the obstacles to the carrying out of 1933 maintenance and equipment programs, restricted though they may be. Another objective of the carriers is the continuance of emergency freight surcharges after March 31. Hearings on this subject are to be begun this week. begun this week.

begun this week.

An increase in automobile output in January over the 110,000 cars estimated as this month's output is now farily certain. Ford's schedule for next month is said to be 20,000. Chevrolet's production, which is the largest in the industry, will be expanded somewhat next month because the schedule of assemblies set for December has not been quite attained. Ford's recent orders for sheets have given work to some mills that would otherwise have little to do. One bar mill unit worked through the Christmas holidays to rush shipments to an automobile manufacturer. Further steel purchases by some of the automobile companies will be made within a week or two, as schedules of production have been set for the next six weeks.

a week or two, as schedules of production have been set for the next six weeks.

Tin plate contracting, usually an important feature of steel trade at this time of year is still backward, though a few large contracts have been closed. Some belated specifications for January shipment have been received. Tin plate mills are operating this week at 25% to 30%, with betterment next month reasonably certain.

Building construction, as represented by structural steel lettings of only 11,250 tons, with inquiries for 3,900 tons, is seasonally dull. Normally the trend of structural steel awards is upward in the early months of a year, but the outlook for 1933 is dimmed by the dearth of private construction and uncertainty with respect to Federal projects under economy influences at Washington. The formal contract for 60,000 tons of steel for the bridge to be built over the Mississippi River at New Orleans probably will be placed this week.

The year ends with virtually no further price changes on finished steel, pig iron or scrap. Foundry coke has eased off 25 cents a ton. Although open market quotations on finished steel are unchanged, signs of weakness are cropping up here and there. Reinforcing bars have been sold at mill quotations ranging from 1.30 cents to 1.40 cents, Cleveland, for use in that city. Full finished sheets have been sold at concessions, and prices on galvanized material have been shaded in the South and Southwest. The \$2 a ton advance on No. 24 gauge annealed sheets, scheduled to go into effect on first-quarter contracts, has not been established, as consumers are apparently of the opinion that higher prices cannot be put into effect at this time, and hence they are delaying in making commitments. Competition for structural steel business in Chicago has brought quotations on fabricated material almost to the level of the open market prices on shapes, while in the East the plate market is still subject to wide variations in prices.

The "Iron Age" composite prices are unchanged at 1.948 cents a pound

tions in prices.

The "Iron Age" composite prices are unchanged at 1.948 cents a pound for finished steel, \$13.56 a gross ton for pig iron and \$6.92 a gross ton for heavy melting scrap.

Severely as steel production has been pruned back over the holidays, to about 12% in the week ended Dec. 24 and possibly to a point lower in the week ended Dec. 31, it is not believed that the average daily rate for December will decline to the level of the all time low of August, stated

"Steel" of Cleveland in its issue of Dec. 26 1932. "Steel"

Shutdowns scheduled for Dec. 23 to 27 were the most sweeping in the history of the industry, but the fear that they would carry through the week will not be realized, inasmuch as automotive releases, especially for sheets and strip, will restore some capacity Dec. 27 that was expected

sheets and strip, will restore some capacity Dec. 27 that was expected to stay down.

As usual, consumers have permitted their inventories to run down, and while many have signed contracts for the first quarter, they have not specified. Producers, however, expect that with the turn of the year specifying will be resumed, and they look to January to bring some measure of improvement.

Structural steel awards approach the year-end with the second highest total for any week this year—70,513 tons—due largerly to the placing of the steel for the Federal-aid Belt Line RR. bridge at New Orleans. On Wednesday the American Bridge Co. is scheduled to receive a formal order for 20,000 tons for the main span, and the McClintic-Marshall Corp. 40,000 tons for approaches. The 3,020 tons for a viaduct at Newark, N. J., has been closed by the Phoenix Bridge Co.

Revival of the New York Central RR. St. John's Park terminal warehouse in New York brings 20,000 tons of structural material up for bids Dec. 27. Inquiry for sheet piling is broader at New York, while bids are in on 5,690 tons for a sea wall at Seattle. Public work is going ahead faster in the Pacific Northwest. Buffalo understands that the Reconstruction Finance Corporation views more favorably the Grand Island Bridge project, requiring over 12,000 tons.

In the distribution of steel sheets for bodies for new models, Ford has included a Chicago mill. Excepting Plymouth and Bulck, first of the large-scale producers to start, automobile manufacturers are maintaining high rates of assembly on new models, and December output will approximate the 111,141 units of July. For January the outlook is equally good.

Many railroads are generous buyers of rivets, indicating an early start on car repair programs. Many roads also are in the market for miscellaneous steel requirements for the first quarter, usually 2,500 tons or under. The Santa Fe, which has just distributed 26,484 tons of rails, is inquiring for about 3,000 tons of fastenings. With the rail wage matter settled until

removed.

Bids are in at Seattle on 5.800 tons of cast iron pipe, while Chicago will lay 5.000 ton as a result of Reconstruction Finance Corporation assistance.

Of finished steel products, sheets are the most active, due to automotive releases, and strip second. Because tin plate is so firmly held on the new basis of \$4.25, consumers are under no incentive to commit.

An exception to easy demand for pig iron is the situation at Chicago, where the decline in December shipments is less than anticipated and an upturn is expected in January. An inquiry for basic iron at Pittsburgh probably will lead to an order for 5,000 tons. Foundry and domestic coke is moving well, and the inventories of some ovens have been reduced

Scrap is in no demand and prices are nominal, leaving "Steel's" composite of steelworks scrap unchanged at \$6.29. Concrete billet bars are being stabilized. Ferrosilicon has been reduced \$3 per ton, to \$74.50, with corresponding adjustments in silicon and chrome briquets and allied products. But these do not affect that iron and steel composite of "Steel," which holds at \$28.91, or the finished steel index at \$46.70.

Steel ingot production for the week ended Monday (Dec. 26), is estimated at $12\frac{1}{2}\%$, according to the "Wall Street Journal" of Dec. 28. This compares with a shade over $14\frac{1}{2}\%$ in the preceding week and $15\frac{1}{2}\%$ two weeks ago. The "Journal" adds:

The decline is due to the holiday shut-downs. Some of the mills reopened

The decline is due to the holiday shut-downs. Some of the mills reopened Tuesday morning, but several probably will remain closed during the whole week. As a result it is probable that the rate this week will be about the same as in the previous seven days.

U. S. Steel is credited with a rate of slightly below 12%, against 15% in the week before and 15½% two weeks ago. Leading independents are at about 13%, compared with 14½% a week ago and 15½% two weeks ago. One reason for the higher rate among independents is the fact that some of these companies have been kept going to supply the demands from the automotive industry.

In the Christmas holiday week a year ago the average for the industry went down nearly 4% to a little above 20%. U. S. Steel was off 3% to 22% and independents 4½% to 18½%. In the like week of 1930 the industry ran at 24%, a drop of more than 10%, U. S. Steel declined 11% to 30%, and independents were off 10% to 20%. In the 1929 week the average was between 39% and 40%, a reduction of a shade over 13%. U. S. Steel showed a loss of 14% to 50%, and independents were down 13% to 30%. Reductions in the Christmas week of 1928 ranged from 22% to 28%, and the various companies were operating between 55% and 60% of capacity

Foundry Operations in Philadelphia Federal Reserve District During November as Reported by University of Pennsylvania-Larger Production of Gray Iron and Steel Castings Noted During Month.

The production of gray iron and steel castings during November was larger than in the previous month according to reports from foundries in the Philadelphia Federal Reserve District compiled by the Industrial Research Department of the University of Pennsylvania. Even the slight increase of 2% in the output of gray iron castings is significant because there is usually a decline in November. The experience of this year was probably caused by the delayed appearance of the seasonal factors usually found in October. The output of steel castings was more than twice as much as in October but the prospects are that this increased activity of November will not continue although nearly all of the steel foundries had at least a slight increase in production. The compilation of the University also said:

Shipments of steel castings also doubled those of October, but deliveries of iron castings declined 5%. The average prices per pound of both iron and steel castings were less than those of a month ago and a year ago. The decline in the average price of steel castings was so severe that the price of steel castings was below that of iron castings. The tonnage of orders unfilled at the close of November showed an increase over those of last month in the

it

steel foundries but declined in the iron foundries. The steel plants reported declines in the amount of raw stocks on hand while the iron foundries had a decrease only in the tonnage of coke in stock, other raw materials remaining about the same as last month.

Gray Iron Foundries.

Gray Iron Foundries.

The output of gray iron castings in 31 foundries during November was 2% more than in October. This increase is of special interest since production in the corresponding months of 1931 declined slightly and in the same period of the other years since 1926 decreased from seven to nearly 20%. Considering the fact, however, that in October of this year there was a decline in output instead of the usual seasonal increase, it seems probably that at least part of this month's activity can be attributed to the delayed operation of those seasonal factors.

An increase of 13% in the tonnage of castings produced for further manufacture within plants operating a machine shop in conjunction with their foundry caused the increase in total output. The volume of castings produced for jobbing work was practically the same in October and November.

Foundries located in Philadelphia had a general increase in activity with only two plants reporting a decrease in production. In spite of the increases the total output of the Philadelphia foundries was less than in September. The plants operating outside of Philadelphia but within this Federal Reserve District had a decline in activity which brought their output down almost to the low point of last June and July. Only four of these foundries had an increase in production.

Shipments of iron castings during November were 5% less in tonnage and 11% less in value than in the previous month. The average price per pound for the castings delivered was less than that of a month ago and a year ago.

At the end of November the volume of unfilled orders on hand was 9% less than at the beginning of the month and their value was nearly 13% less. The tonnage of pig iron and scrap on hand at the close of the month was approximately the same as a month ago, but the amount of coke in stock was less.

Malleable Iron Foundries.

Malleable Iron Foundries.

The production of malleable iron castings in four foundries during November was 28% less than in October. In spite of this severe decline, activity was at a higher level than in September. When the unusual increase in October is omitted, there appears to be a persistent monthly increase from the low point of last July.

STEEL FOUNDRIES

SIEEM FO	No. of	1	Per Cent. Change From Oct. 1932.	Per Cent. Change From Nov. 1931.

Coke	6	225	-10.9	-34.6

The tonnage of steel castings produced in eight foundries in November was wice as large as the output in October. Although the major part of this acrease was caused by unusual conditions which will not hold in December. nearly all of the plants had at least a slight increase in activity. The increased production was in castings for jobbing work which was 133.8% more than in October. There was a decline of 6% in the tonnage of castings used in further manufacture. Very little of this type of work is done by the steel foundries.

Shipments of steel castings increased 136.8% in tonnage but only 73.0% in value. The average price per pound, which was below that of iron castings, was largely caused by an increase in the amount of castings sold at the low

In spite of the increased output and the increased shipments, there was a In spite of the increased output and the increased shipments, there was a slight increase of 3% in the tonnage of unfilled orders on hand at the end of the month in comparison with the volume of orders unfilled at the beginning of November. This is the first time since last July that there has been any increase in the tonnage of unfilled orders. The total value of the unfilled orders, however, declined 1.5%. All raw stocks on hand were less than those of a month ago and a year ago.

Sharp Gain Reported in Weekly Bituminous Coal and Anthracite Production—November Output Higher Than in Corresponding Period in 1931.

According to the United States Bureau of Mines, Department of Commerce, estimated production of bituminous coal amounted to 7,800,000 net tons during the week ended Dec. 17 1932, as against 6,828,000 tons in the preceding week and 7,056,000 tons in the corresponding period last year, while anthracite output amounted to 1,237,000 net tons as

while anthracite output amounted to 1,237,000 net tons as compared with 936,000 tons during the week ended Dec. 10 1932 and 894,000 tons during the week ended Dec. 19 1931.

Production during the month of November 1932 was estimated at 30,632,000 net tons of bituminous coal and 4,271,000 tons of anthracite as compared with 30,110,000 tons of bituminous coal and 4,149,000 tons of anthracite in November 1931 and 32,677,000 tons of bituminous coal and 5,234,000 tons of anthracite in October 1932.

During the calendar year to Dec. 17 1932 there were produced, according to estimates, 292,058,000 net tons of bituminous coal and 47,006,000 tons of anthracite as against 366,445,000 tons of bituminous coal and 58,061,000 tons of anthracite during the calendar year to Dec. 19 1931. The

anthracite during the calendar year to Dec. 19 1931. Bureau's statement follows:

Production of bituminous coal increased sharply in the week ended Dec. 17 1932, reaching a total that has been exceeded but three times in the present year. The total output is estimated at 7,800,000 net tons, a gain of 972,000 tons, or 14.2% over the preceding week. This is also well above the figure for the corresponding week in 1931, when production amounted to 7,005,000 tons. the figure for the to 7,056,000 tons.

The total production of Pennsylvania anthracite during the week ended Dec. 17 1932 is estimated at 1,237,000 net tons. This, too, shows a large increase—301,000 tons, or 32.2%—over the preceding week, and exceeds the output in the corresponding week of 1931 by approximately 38%.

Beehive coke production during the week of Dec. 17 1932 is estimated at 19,700 net tons.

Current Events and Discussions

The Week with the Federal Reserve Banks.

The daily average volume of Federal Reserve bank credit outstanding during the week ending Dec. 28, as reported by the Federal Reserve banks, was \$2,189,000,000, a decrease of \$3,000,000 compared with the preceding week and an increase of \$170,000,000 compared with the corresponding week in 1931. After noting these facts, the Federal Reserve Board proceeds as follows:

On Dec. 28 total reserve bank credit amounted to \$2,168,000,000, a ecrease of \$12,000,000 for the week. This decrease corresponds with a

decrease of \$43,000,000 in money in circulation and an increase of \$17,000,-000 in monetary gold stock, offset in part by an increase of \$36,000,000 in member bank reserve balances and a decrease of \$12,000,000 in Treasury currency adjusted

in member bank reserve balances and a decrease of \$12,000,000 in Treasury currency, adjusted.

Holdings of discounted bills increased \$5,000,000 at the Federal Reserve Bank of Atlanta, and declined \$4,000,000 at New York and \$3,000,000 at all Federal Reserve banks. The System's holdings of bills bought in open market and of United States Government bonds show little change for the week, while holdings of United States Treasury notes increased \$9,000,000 and those of Treasury certificates and bills decreased by the

Beginning with the statement of May 28 1930, the text accompanying the weekly condition statement of the Federal

Reserve banks was changed to show the amount of Reserve bank credit outstanding and certain other items not included in the condition statement, such as monetary gold stocks and money in circulation. The Federal Reserve Board's explanation of the changes, together with the definition of the different items, was published in the May 31 1930 issue of the "Chronicle," on page 3797.

The statement in full for the week ended Dec. 28, in comparison with the preceding week and with the corresponding date last year, will be found on subsequent pages, namely, 4518 and 4519

Returns of Member Banks in New York City and Chicago-Brokers' Loans.

Beginning with the returns for June 1927, the Federal Reserve Board also commenced to give out the figures of the member banks in New York City, as well as those in Chicago, on Thursday, simultaneously with the figures for the Reserve banks themselves, and for the same week, instead of waiting until the following Monday, before which time the statistics covering the entire body of reporting member banks in the different cities included cannot be got ready.

Below is the statement for the New York City member banks and that for the Chicago member banks, for the current week, as thus issued in advance of the full statement of the member banks, which latter will not be available until the coming Monday. The New York City statement, of course, also includes the brokers' loans of reporting member banks. The grand aggregate of brokers' loans the present week shows decrease of \$1,000,000, the total of these loans on Dec. 28 1932 standing at \$394,000,000, as compared with \$331,000,000 on July 27 1932, the low record for all time since these loans have been first compiled in 1917. Loans "for own account" remain unchanged at \$379,000,000, and loans "for account of out-of-town banks" remain unchanged at \$12,000,000 while loans "for account of others" decreased from \$4,000,000 to \$3,000,000.

Complete Returns of the Member Banks of the Federal Reserve System for the Preceding Week.

As explained above, the statements for the New York and Chicago member banks are now given out on Thursday, simultaneously with the figures for the Reserve banks themselves and covering the same week, instead of being held until the following Monday, before which time the statistics covering the entire body of reporting member banks in 101 cities cannot be got ready.

In the following will be found the comments of the Federal Reserve Board respecting the returns of the entire body of reporting member banks of the Federal Reserve System for the week ended with the close of business on Dec. 21:

The Federal Reserve Board's condition statement of reporting member banks in leading cities on Dec. 21 shows increases for the week of \$35,000,000 in loans and investments, \$13,000,000 in net demand deposits, \$78.000,000 in government deposits and \$22,000,000 in reserve balances with Federal Reserve banks, and decreases of \$12,000,000 in time deposits and \$15,000,000 in borrowings from Federal Reserve banks.

Loans on securities declined \$9,000,000 at all reporting banks, while "all other" loans increased \$53,000,000 in the New York district and \$28,000,000 at all reporting banks, and declined \$9,000,000 in the Chicago district

district.
Following the Treasury's quarterly financial operations, holdings of United States government securities increased \$12,000,000 in the Philadelphia district, \$10,000,000 in the Boston district, \$9,000,000 in the San Francisco district and \$27,000,000 at all reporting banks, and declined \$18,000,000 in the New York district and \$10,000,000 in the Chicago district. Holdings of other bonds, stocks and securities declined \$32,000,000 in the New York district and \$29,000,000 at all reporting banks.

Borrowings of weekly reporting member banks from Federal Reserve banks aggregated \$64,000,000 on Dec. 21, the principal change for the week being a decrease of \$7,000,000 at the Federal Reserve Bank of San Francisco.

A summary of the principal assets and liabilities of weekly reporting ember banks, together with changes during the week and the year ending ec. 21 1932. follows:

South Africa Abandons Gold Standard-Banks Cease Quotations-Reserve Bank Relieved from Responsibility of Redeeming Notes in Gold.

The South African Government was reported on Dec. 29 as definitely off the gold standard. This followed emergency measures taken during the week to maintain the gold standard, action having been taken to prevent the export of gold or its purchase with a view to hoarding. As to the developments on Dec. 29 we quote the following message on that date to the New York "Times" from Cape Town (South Africa):

The South African Government was definitely off the gold standard to-day. Its efforts to keep the currency on gold parity externally failed and after a day of chaotic movements in overseas business the banks

and after a day of chaotic movements in overseas business the banks canceled all exchange rates. Even the post office refused to-day to sell small money orders for abroad.

The Government is greatly blamed for the situation and it is being freely said that the only thing remaining for Premier J. B. M. Hertzog is a prompt resignation. Politically local opinion is sadly disappointed with the speech made by Tielman J. Roos at Johannesburg last night. Mr. Roos alone has a chance of forcing the Government out if it refuses to resign but until he does so his prospects of reaching a working arrangement with General Jan Christian Smuts, leader of the South African party, are misty.

Havenga Blames Roos.

N. C. Havenga, Minister of Finance, in a speech at Pretoria this afternoon

N. C. Havenga, Minister of Finance, in a speech at Pretoria this afternoon declared that despite 12 months of agitation by General Smuts the present Government had been able to protect the stability of its currency until the appearance of Mr. Roos's devaluation manifesto and the expectation that his step would place the advocates of devaluation in office in the early future. That increased the attraction for speculation, he said.

He estimated that between £2,000,000 and £3.000,000 [\$9.570,000 and \$14,355,000 at par] had left the country in three days and had the run continued the banks would have been forced to close yesterday and other financial institutions would have been shaken. The only way to prevent a major disaster, he said, was to release the Reserve Bank from its liability to redeem notes in gold, ipso facto detaching the currency from the gold standard.

The Government took the same step Great Britain did no Sept. 21 last year," he went on. "Throughout the controversy the Government adhered to the principle of the Macmillan report that for a country situated like the Union the voluntary abandonment of gold, and the consequent depreciation, was an act no Government could take with credit or honor. Like Britain the Government's hands have been forced by uncontrollable circumstances, but unlike Britain the crisis in South Africa has been produced by its own records by politicings. by its own people encouraged by politicians.

Not on Bullion Standard.

"South Africa is not on the bullion standard. Neither specie nor bullion is obtainable at any bank. Nor is South Africa on the gold exchange standard because the Government had taken no steps to regulate exchange transactions nor used its powers to control gold output or influence exchange

rates.

"The Chamber of Mines is free to dispose of its output to the best advantage of the producers. The banks have a free hand in fixing exchange rates which the Government has no present intention of influencing in any respect, leaving them to find their own levei in trade conditions. The future course of the country's financial policy will have to be deait with by Parliament on the next month."

Yesterday (Dec. 30) Associated Press cablegrams from Cape Town stated:

Commercial banks to-day opened South Africa's "nongold standard" exchange dealings with the quotation 91 pounds (South African) per 100 pounds (British sterling).

Dealings showed much hesitation, some houses considering the rate too high to bring money to South Africa from London.

This was the first question since South Africa was afficient and the standard of the south Africa was the first question since South Africa was to first question since South Africa was to first question since South Africa was a first question since South Africa was to first question si

This was the first quotation since South Africa went off the gold standard and obviously was a feeler for the value of South African pounds.

London Associated Press advices yesterday Dec. 30, said: The exchange market quoted 90 South African pounds per 100 British pounds to-day, compared with 69 pounds 12 shillings and sixpense in South African currency to 100 British pounds last Wednesday.

A week ago (Dec. 23) a wireless message from Cape Town to the "Times" had the following to say regarding the action taken on that date by the Government to curb the flight of

With money pouring out of this country in millions and the banks refusing to-day to sell more than £1,000 in exchange to any individual, a rumor was current to-day that South Africa would go off the gold standard Monday. At any rate there are sure to be more drastic restrictions soon.

Members of the Cabinet are hurrying to Pretoria for a meeting Monday to consider the situation created by the action of Judge Tielman Roos in reentering politics with the aim of forming a coalition n inistry. In this connection a rumor is current that the government will not resign, as is predicted in some circles, but will continue in office after dropping the gold standard, to which South Africa has clung throughout the depression

Stating that the decision of the Government to retain the gold standard and to stop the export of gold from the Union was reached at a special session of Premier Hertzog's Cabinet on Dec. 27, Associated Press advices on that date from Pretoria (South Africa) to the New York "Herald Tribune"

Following the flight of more than £1,000,000 because of the unlimited sale of currency across the exchange recently, the Cabinet resolved to withdraw soverigns from circulation and prevent the export of hoarded gold.

draw soverigns from circulation and prevent the export of hoarded gold.

In an official statement given out to-night, the Treasury Department relieved the Reserve Bank of responsibility in redeeming notes in gold and deciared that banks must make exchange quotations on this basis.

The statement added that as a consequence of the uncertain political
situation there has been an abnormal scale, with the result that abnormally
large purchase on the exchange and withdrawals of gold for hoarding. These
are likely to continue on an abnormal scale, with the result that credit and
the banking position, which is sound, will be greatly endangered, the statement continued. ent continued.

Note Redemption Suspended.

The government was advised that in order to avoid a crisis it was essential that immediate steps be taken to protect the country's gold and exchange resources. In the circumstances, the Government agreed to relieve the Reserve Bank of obligation in redeeming notes in gold and the section of the currency and banking act applicable to such a measure accordingly was sus-

pended.

The action of the Cabinet looking towards prevention of circulation of sovereigns was taken under powers given in the financial emergency regulations of 1931. These also were invoked to relieve the Reserve Bank of

sponsibility.

Earlier, Premier Hertzog declared that abandonment of the gold standard would depreciate gold to its commodity value and would harm the country without benefiting the mines.

Meanwhile the political situation arising from the financial contingency became more serious because of the increasing influence of the Labor party and the avowed intention of Judge Tielman Roos, former Minister of Justice, to form a new coalition party whose principal objective is devaluation of the South African power. of the South African pound.

It was learned that the present government will face Parliament and declare opposition to Judge Roos.

In a cablegram Dec. 27 from Pretoria to the New York "Times" it was stated that "Although the Government protests its adherence to the gold standard, the effect of these regulations is much the same as if it had been aban-The "Times" cablegram also said in part:

The export of gold by South African banks will be controlled, gold sover-eigns will be withdrawn from circulation and exchange quotations must be made by banks on this basis.

Gold Purchases Abnormal.

The official statement says that because of the political situation there have been abnormal purchases of foreign exchange and withdrawals of gold coin for hoarding. These purchases and withdrawais are likely to continue

coin for hoarding. These purchases and withdrawals are likely to continue, it says, on an abnormal scale with the result that credit and the banking position, which is sound, would be greatly endangered.

"It has been represented to the government," the statement proceeds, "that in order to avoid a crises it is essential that immediate steps be taken to protect the country's gold and exchange resources. The government in the circumstances agreed to relieve the Reserve Bank of its obligation under the currency and banking act of redeeming notes in gold. The section of the act applicable is suspended."

Prime Minister Herzog and his chief lieutenant, Finance Minister Havenbaye decided to remain on the gold standard and fight against the crisis.

Frime Minister Hertzog and his chief lieutenant, Finance Minister Havenga have decided to remain on the gold standard and fight against the crisis created by the demands of Judge Tielman Roos, former Nationalist leader, for a devaluation of the South African pound.

The Christmas holidays have opportunely stemmed speculation and the withdrawals of gold from banks for hoarding or export, which began to develop last week. While declaring adherence to the gold standard, the

Government may adopt a gold bullion standard under an emergency act which authorizes the withdrawal of sovereigns from circulation.

In the "Times" advices from Cape Town Dec. 28 it was

Restrict Exchange Purchases.

The apparent results of yesterday's action are chaotic. The banks to-day restricted purchases of exchange to £50 per individual unless special sanction for a larger purchase has been given by their head offices. The exchange rates with sterling quoted by the Reserve Bank to-day were the same as yesterday, and inquiries from local banks about exchange possibilities are referred to Pretoria.

Thus all overseas business is almost at a standstill and would-be purchas of sterling are being branded as "speculators," however legitimate their n for sterling may be.

Governor Postmus and Treasury officials seem convinced that the Reserve Bank can fix and maintain the exchange rate of South African currency abroad, although the South African pound is no longer convertible.

Their critics maintain that this is impossible and that the South African pound will be valued abroad irrespective of what the Reserve Bank may do here, according to what gold-standard countries are prepared to pay for it from day to day.

from day to day.

General opinion is that the government's attempt to end exchange speculation will fall to deter the speculators while damming up legitimate business.

The following is from the same cablegram:

The South African Government, in relieving the Reserve Bank from responsibility for redeeming notes in gold, has attempted to get off the gold standard internally and be on it externally.

As to whether it will succeed in either or both of these courses there is a great division of opinion, some experts saying that it is impossible and others

that it is undesirable.

The fact remains that by placing the country on a "regulated gold basis" by suspending the convertibility of the South African pound and severely restricting exchange facilities the government has thrown the markets into the greatest confusion.

Johannes Postmus, Governor of the Reserve Bank, is determined to keep South African currency on a gold parity by paying externally in gold. He can compel the gold mines to sell their whole output, amounting to £500,000 [about \$2,392,500] worth weekly, to the bank, which would meet all South Africa's normal exchange requirements, but the question is whether he would not invite international bear operations in South African currency with disastrous results.

Mr. Postmus is a strong believer in the gold standard and a skentic con-

Mr. Postmus is a strong believer in the gold standard and a skeptic concerning the ability of sterling to maintain its position relative to gold.

From a London cablegram Dec. 27 to the New York "Journal of Commerce" the following is taken:

Effects of Action.

For South Africa to quit the gold standard altogether and to prohibit the export of newly mined gold would mean the practical halting of activity in the open gold market here. Approximately one-half of the new gold comes from the Cape and is sold in London. At the present time, because of the high price of gold, most of it goes into central banking reserves and little into industrial uses.

In addition to exports of new gold it is estimated that desired the desired that desired the second control of the property of new gold it is estimated that desired the desired that desired the second control of the property of new gold it is estimated that desired the second control of the property of the gold standard altogether and to prohibit the export of the gold standard altogether and to prohibit the export of the gold standard altogether and to prohibit the export of the gold standard altogether and to prohibit the export of the gold standard altogether and to prohibit the export of the gold standard altogether and to prohibit the gold standard altogether and to prohibit the export of the gold standard altogether and to prohibit the gold standard altogether and to prohibit the gold standard altogether and to prohibit the gold standard altogether and the gold standard alto

In addition to exports of new gold it is estimated that during the pa In addition to exports of new gold it is estimated that during the past few months South Africa lost about £20,000,000 gold. This was a flight of capital largely to London. It is to prevent the movement of domestic funds to foreign countries that restrictions on exports are being considered. The movement recently was accelerated in fear of absolute abandonment of the gold standard or restrictions on gold shipments.

Complete abandonment of the gold standard by South Africa and the halting of shipments of newly mined gold would have far reaching effects. The gold is paid for in sterling and resold for gold currencies. If these transactions are ended a further fall in sterling would be likely. It is felt that this will mean a rise in internal prices and in wage scales here.

that this will mean a rise in internal prices and in wage scales here.

Dispatches from South Africa to-day indicated that a preliminary decision ad been made to adhere to the gold standard. During the past few days, is said, around £1,000,000 South African currency was taken out of circles to the said. culation and shipped to London.

Currency Not Quoted.

Foreign exchange experts yesterday had no late information as to the extend to which gold shipments from South Africa would be restricted. Because of the uncertainty as to whether the gold standard would be maintained there were no quotations on the currency. Quotations last week were 4.83½. The South African pound had the same gold value as the British pound.

Johannesburg (South Africa) advices Dec. 28 to the New York "Times" said:

The Chamber of Mines has informed Minister of Finance Havenga that the Reserve Bank has refused to honor its notes in gold and has thereby abrogated the agreement between the chamber and the bank, leaving the chamber free to sell its gold output to the highest bidder.

This accentuates the difficulty of the Union's remaining on gold, and it

is contended that the Union is now actually off gold.

It is understood that the government is considering devaluation and will submit the necessary legislation at the approaching session of Parliament.

American Investments in South Africa.

On Dec. 27 Associated Press accounts from Washington stated:

Americans at the end of 1929 had investments of approximately \$40,000,000 in the Union of South Africa and this amount is believed to have been

The Department of Commerce, in disclosing the figures to-day, said that except for this investment Americans did not hold any commercial obligations of the Union of South Africa and that the country had not sold any of its own securities in the United States.

In 1931 the United States exported \$28,305,910 worth of goods to the Union of South Africa, a degreese of \$10,000,000 compared with the pre-

Union of South Africa, a decrease of \$10,000,000 compared with the preceding year. It imported \$4,403,952 from the union, a decrease of \$1,500,-000 under the preceding year.

The Federal Reserve Board in its December bulletin reported that South Africa held \$55,000,000 in gold, an amount which had varied little since

1931

The board reported that a large part of the gold purchased by France and other nations on the London market in recent months had come from South Africa and that shipments from South Africa continued to be disposed of in the London market in large volume.

Stock of Money in the Country.

The Treasury Department at Washington has issued the customary monthly statement showing the stock of money in the country and the amount in circulation after deducting the moneys held in the United States Treasury and by Federal Reserve banks and agents. It is important to note that, beginning with the statement of Dec. 31 1927, several very important changes have been made. They are as follows: (1) The statement is dated for the end of the month instead of for the first of the month; (2) gold held by Federal Reserve banks under earmark for foreign account is now excluded, and gold held abroad for Federal Reserve banks is now included; and (3) minor coin (nickels and cents) has been added. On this basis the figures this time, which are for Nov. 30 1932, show that the money in circulation at that date (including, of course, what is held inbank vaults of member banks of the Federal Reserve System) was \$5,647,569,816, as against \$5,627,581,274 on Oct. 31 1932 and \$5,536,142,677 on Nov. 30 1931, and comparing with \$5,698,214,612 on Oct. 31 1920. Just before the outbreak of the World War, that is on June 30 1914, the total was only \$3,459,434,174. The following is the full statement:

f The money in circulation includes any paper currency held outside the continental limits of the United States.

Note.—Gold certificates are secured dollar for dollar by gold held in the Treasury for their redemption; silver certificates are secured dollar for dollar by standard silver dollars held in the Treasury for their redemption; United States notes are secured by a gold reserve of \$15.6,039,088 held in the Treasury. This reserve fund may also be used for the redemption of Treasury notes of 1890, which are also secured dollar for dollar by standard silver dollars held in the Treasury; these notes are being cancelled and retired on receipt. Federal Reserve notes are obligations of the United States and a first lien on all the assets of the issuing Federal Reserve bank. Federal Reserve notes are secured by the deposit with Federal Reserve agents of a like amount of gold or of gold and such discounted or purchased paper as is eligible under the terms of the Federal Reserve Act, or, until March 3 1933, of direct obligations of the United States if so authorized by a majority vote of the Federal Reserve Board. Federal Reserve of the United States for rederal Reserve notes in actual circulation. Lawful money has been deposited with the Treasurer of the United States for retirement of all outstanding Federal Reserve bank notes. National bank notes are secured by United States for their retirement. A 5% fund is also maintained in lawful money with the Treasurer of the United States for the redemption of National bank notes secured by Government bonds.

Use of Silver in War Debt Payments Urged by Senator Hayden-Proposes Acceptance by United States of 100,000,000 Ounces from Great Britain.

Acceptance of silver in payment of a part of the British debt as a prelude to a wider and more permanent monetary use of the white metal was urged by Senator Hayden of Arizona, inan address broadcast from Washington on Dec. 26 over a Nation-wide network of the National Broadcasting Co.

We quote from a Washington dispatch to the New York "Times," which further quoted the Senator as follows:

Contending that the demonstization of silver had reduced the purchasing power of many peoples, particularly those of the Far East, and that anything done to raise the price of silver would improve foreign trade and be reflected in improved commodity prices at home, Senator Hayden declared that Great Britain, "which started silver on the downward path, and India, which sold silver down to half its former price, should lead the way back to recovery."

y back to recovery." Let the United States, Great Britain and India," h

"Let the United States, Great Britain and India," he said, "make their inter-governmental debts a reason for the transfer of 200,000,000 ounces of silver to show that powerful governments still have use for that metal. Let the self-governing dominions of the British Empire join in a greater utilization of silver as money. When the world economic conference meets there will then be no groping about for a plan. A plan will be made."

Senator Hayden recalled that both the Democratic and Republican National platforms pledged American co-operation in an international effort to restore the use of silver as money, and added:

"The quickest and most effective international co-operation that the American Government can extend toward the rehabilitation of silver is to accept 100,000,000 ounces of silver in full settlement of \$100,000,000 due from great Britain, upon two conditions: First, that the British Government acquire an equal number of ounces of silver to restore its coinage to its former silver content. Second, that satisfactory assurances be obtained from the British Government for India that no silver owned by it will be sold except to other governments for coinage purposes.

tained from the British Government for India that no silver owned by it will be sold except to other governments for coinage purposes.

"This transaction will take off the market 200,000,000 ounces of silver and utilize the same for coinage. Certainly there should be some favorable effect on the price of silver if an amount equivalent to a whole year's world production is thus legitimately disposed of and the fear of future governmental dumping by Great Britain and India is ended."

This, he admitted, would mean "a mild inflation," but he contended that "the United States could now absorb over a billion dollars of silver into its monetary system and still have less silver in proportion to gold than we had in 1900."

The New Years "Horseld Tribuse?" reported Separter Hays

The New York "Herald Tribune" reported Senator Hayden as saying:

The British Government for India owes a debt to Great Britain arising out of the World War that now amounts to 16.721,000 pounds, which is \$\$1,422,000 at par of exchange. If that debt could be paid in silver it would be possible not only to relieve the British taxpayers of any expense in meeting a \$100,000,000 payment to the United States, but also to restore the British silver coinage to its former fineness without cost to them. Two inter-governmental debts would be settled by the use of the same silver.

Senator Wheeler Urges 16 to 1 Silver to Fight Depression-Sees Chaos in United States Should Congress

Complete collapse of the Nation's financial setup, followed by a more severe shakeup of the political institutions "than anyone has ever dared think of," was predicted on Dec. 28 by Senator Burton K. Wheeler (Dem.) of Montana, unless Congress acts immediately to restore commodity prices and care for the unemployed. The foregoing is from a Washington dispatch to the New York "Journal of Commerce," which continued:

Speaking over a Nation-wide radio hook-up, Senator Wheeler said that the United States has reached the crossroads, and the country is con-fronted with the choice of either solving our financial and economic prob-lems in the near future or facing chaos.

Tells of Hungar Marchers.

"The few hundred hunger marchers who came to Washington to lay their grievances before Congress," he said, "will be but an advance guard of many thousands who will come, unless speedy relief is found for the 11,000,000 unemployed in this country, and some provision made to save the farmers from land banks and mortgage companies which are now foreclosing on their farms and taking possession of them at bargain prices. "The bankrupt farmers and the millions of unemployed men who are tramping our streets looking in vain for work, as well as many business and professional men, have lost faith in our financial and political leaders. Not only that, but they are growing impatient and bitter."

Take Stand for Silver.

Take Stand for Silver.

Senator Wheeler said that there are several ways in which the country could be lifted out of the depression in a very short time. It could either

abandon the gold standard or revaluate the gold dollar and re-establish silver. He said that he was "wholeheartedly in favor of the latter as being the most conservative and at the same time the most effective method."

He has already introduced a bill in the Senate providing for the remonetization of silver at the ratio of 16 to 1, which, he asserted, would quadruple the purchasing power of untold millions of people throughout the world and at the same time quadruple the value of their money if passed.

Dr. Julius Klein, Assistant Secretary of Commerce on World Economic Conference—Sees Close Connection Between Satisfactory Adjustment of War Debt Situation and Outcome of Conference.

In a recent discussion of the world economic conference Dr. Julius Klein, Assistant Secretary of Commerce said that "since the whole question of trade revival is so intimately connected with that of public as well as private indebtedness between nations, it is evident that there will be a close connection between a satisfactory adjustment of the war debt situation and the success or failure of the world economic conference. This connection was acknowledged by Secretary Stimson, in his recent note to the British government," said Dr. Klein, who continued:

Stimson, in his recent note to the British government," said Dr. Klein, who continued:

Debt payments. said our Secretary of State. "have a very definite relationship to the problem of recovery." He declared, accordingly, that he welcomed the British suggestion "of close examination between the United States and Great Britain of the whole subject in preparation for the International Economic Conference, for I believe that there are important avenues of mutual advantage which should be thoroughly explored."

Let us note well, it is proposed that the question of war debts be examined in preparation for the Economic Conference. If it is possible to settle this question, once and for all, in a manner that may be acceptable to the debtor nations while at the same time protecting to the full the interests of the American people, a great step toward world recovery will have been taken and it would be assured in advance that the conference would meet with real success. I hope that this may be the case, yet we must recognize that it is by no means certain that this knotty problem can be disposed of before next summer. We can be certain, however, that every available effort of the United States Government during the rest of this present administration and under the incoming one will be devoted toward solving this question to the best interests of the American people.

It is to be earnestly hoped that progress will be made at the coming conference to obtain international monetary stability. You do not have to be actively engaged in the export trade to appreciate the difficulties involved in doing any sort of business with nations with fluctuating currencies. In order to deal in world markets with any sense of security, one must be able to rely upon a certain standard of currency values. In fact, the matter of monetary policies has a very direct bearing upon world price levels. It is obvious that the reasonable stability of currencies—the assurance of a firm "yard stick"—is essential to a durable price structure, to make t

imposed foreign exchange restrictions that have impeded the free flow of gold across their borders.

Undoubtedly, a majority of the representatives at the conference—and it is to be literally a world conference, too—will agree in principle that a general return to the gold standard is desirable. There is, of course, room for honest differences of opinion among competent financial experts as to the proper time for a country to return to that standard. One school of thought may be that prices will not rise until the gold standard is restored; another may have powerful arguments to show that a nation can not go back to a gold basis until prices have risen. Certainly, the question is involved with many others—as is, in fact, every point that is likely to be on the agenda of the meeting.

Intimately connected with the question of international debts and with that of currency stabilization is a third major field for exploration by the Economic Conference—the lowering of existing trade barriers. Here, too, the delegates will have need for all the tact and ingenuity at their disposal if they are going to agree upon any constructive recommendations. Sometimes it is hard enough for nations to decide themselves as to what sort of tariff policy best suits their needs. Even in this country, it seems to me that tariff discussions in the course of our own national family parties are not invariably conducive to the most perfect harmony of views. But when a nation has made up its mind about a tariff, it is not particularly anxious to accept the suggestions of its neighbors as to how it should be modified.

Dr. Klein's remarks, as above, were contained in a radio address delivered over the coast-to-coast network of the Columbia Broadcasting System, from Washington, D. C., Sunday, Dec. 18.

Premier Bennett Says Canada Will Pay Her Debts-Prime Minister of Dominion Honored by Canadian Club at London Dinner.

Prime Minister R. B. Bennett of Canada was a guest of the Canada Club in London on Dec. 16 at a dinner that was attended by Stanley Baldwin, Lord President of the Council; Viscount Hailsham, War Secretary; Sir John Gilmour, Home Secretary; J. H. Thomas, Dominions Secretary, who went to the Imperial Conference at Ottawa, and many other members of the Government. A cablegram from London to the New York "Times" also said:

Prime Minister MacDonald was prevented by a cold from attending. Among other distinguished absentees were Neville Chamberlain, Chancellor of the Exchequer; Walter Runciman, President of the Board of Trade, and Sir Philip Cunliffe-Lister, Colonial Secretary.

Mr. Bennett was joudly cheered when he declared that no advances Britain ever made for the development of Canada would fail to be honored as they fall due.

"I shall return to my task Wednesday," he said, "with more courage than I ever had, with more determination that Canada shall do its part in maintaining the prestige and greatness of our common empire.

"I don't blame England for going off the gold standard. Britain didn't go off gold. She could not keep on it. It is a matter of some satisfaction that the metal behind Canada's currency issue was greater this year than last by something over 1%."

Mr. Thomas said the bankers present "should take a tip from the horse's mouth that Canada is not going off the gold standard just yet."

Mr. Thomas said the bankers present "should take a tip from the mouth that Canada is not going off the gold standard just yet."

"However great the difficulties the Government of Canada might yide," he continued, "we can multiply them here a hundredfold. live and thrive on them. Baldwin gains weight by them."

Prime Minister Bennett returned from London on the Majestic of the White Star Line, which reached New York Dec. 28. He was silent as to his mission abroad.

Scottish Members of Parliament Propose Curbs on Foreign Shipping—Urge Limiting the Coastal Trade of Vessels from Countries That Have Restrictions.

Under date of Dec. 26 a London cablegram to the New York "Times" said:

Proposals amounting to reprisal against foreign countries that restrict the operation of British shipping are being pressed on the Government by Scottish Members of Parliament in whose territory hundred sof ships

by Scottish Members of Parliament in whose territory hundred sof ships are tied up.

Captain H. J. Moss, a Lanarkshire Commoner, said to-day the aim was that the same restrictions operating against British shipping in other countries be imposed by the Government on foreign shipping and ports of call should be designated. Certain foreign Governments, he said, insist that British ships shall land cargoes only in certain ports and not convey cargoes from port to port. Britain, however, allows foreign ships to land cargoes in one British port, then loan for another, to the disadvantage of British coastal lines

Great Britain Notifies New Zealand She Will Not Qualify Moratorium Offer Made at Time of Hoover Suspension of War Debt Payments.

The following (Canadian Press) from Wellington, N. Z., Dec. 23, is from the New York "Times":

Dec. 23, is from the New York "Times":

New Zealand's voluntary offer to resume payments on its war debt to the United Kingdom was met to-day with a statement from the British Government that it would not withdraw or qualify its offer of suspension made to New Zealand and other dominions which owe her war debt accounts at the time of the general Hoover moratorium.

This decision has no effect on Canada, which was able to carry on in the war without incurring any indebtedness to the United Kingdom. But New Zealand and Australia particularly, and other portions of the empire to a lesser extent, still owe the United Kingdom on war debt account.

New Zealand's offer to resume payments to the United Kingdom came only four days after Great Britain had met her payment to the United States.

Talks Between Premier Paul-Boncour of France and Ambassador Edge Termed General in Washington -United States to Insist on Payment of War Debt Instalment Before Review.

Nothing that requires immediate action by the U.S. Government developed in the debt conversations on Dec. 23 between Joseph Paul-Boncour, the French Premier, and Ambassador Edge, it was said at the State Department at Washington on Dec. 24, it was indicated in a Washington dispatch (Dec. 24) to the New York "Times," from which we also quote:

The official discussion in Paris, according to what was learned to-day, concerned possible inducements for France to pay the debt instalment of \$19,261,432, which was due on Dec. 15, but no definite progress was made. Officials again made clear that the door for French payment would be left open, but that unless the instalment was received from Paris, President

er did not intend to accept any overtures for negotiations as to debt

Hoover did not intend to accept any overtures for negotiations as to debt revision with France.

The conversation between the French Premier and the United States Ambassador was described as general in the extreme. M. Paul-Boncour, it was suggested, evidently wants to prepare himself for an appearance before his Parliament soon after Christmas and is taking steps to get in touch with various phases of the debt problem through conversations with Ambassador Edge.

A reference to the talk between Premier Paul-Boncour and Ambassador Edge appeared in our issue of Dec. 21, page 4308.

We also quote from the New York "Journal of Commerce"

the following from Washington Dec. 27:

The Administration maintains there has been no change in the country's debt policy since the exchange of telegrams between President Hoover and President-elect Roosevelt. Failure of the Hoover-Roosevelt negotiations to reach a joint debt plan has deferred any effective action until after March 4. It is stressed that as regards France's debt, nothing can be done until that country meets the defaulted payment.

At the same time it was learned that the State Department has not instructed Ambassador Walter E. Edge to reply to the views expressed to him last week in Paris by Premier Paul-Boncour.

Reply Not Required.

Officials held that the report of Ambassador Edge did not require a formal answer, but that it doubtless would be acknowledged and a restatement made of the position of this Government that the Dec. 15 payment should precede new negotiations.

Officials of the Hoover Administration, it appeared to-day, have not yet

been informed as to the outcome of conversations between Norman H.

Davis and President-elect Roosevelt at Albany and are anticipating early
return here of Mr. Davis in order that they may be enlightened with regard
to Mr. Roosevelt's position on the debt question.

Secretary of State Stimson revealed that he expects to talk again with
Mr. Davis about economic affairs before the experts meet at Geneva to
arrange the agenda for the world economic conference.

With the European economic situation having been placed before Governor Roosevelt, in a milder form, by Mr. Davis, Washington officials indicated a desire to await the reaction of the President-elect before advancing any further ideas concerning procedure on war debts.

Former Premier Herriot of France Regrets War Debt Default by France.

Former Premier Herriot, expressing regret at the recent vote of the Chamber of Deputies to defer the French war debt payment to the United States, asserted in a speech at Lyons, France, on Dec. 24, that he would "continue the Associated Press advices further reported: fight.'

He explained the fall of his Cabinet in an address to the Radical Socialist Federation of the Rhone, of which he is President, and said he could have remained Premier but for his "conscience." "There is only one kind of honesty—to pay when one owes," he asserted.

Referring to the Mellon-Berenger accord, M. Herriot maintained that "it is a great sorrow to the Republic of France that for the first time she disregarded her signature." "I am afraid the consequences may be grave,"

disregarded her signature." "I am afraid the consequences may be grave," he added, asking:
"Would France, too, adopt the theory of 'a scrap of paper'?"
Recalling the aid of the United States during the last two years of the

war, M. Herriot said:
"It must not be forg

war, M. Herriot said:

'It must not be forgotten that 75,000 Americans fell on top of our soil.

Where would we now find such aid if we should need it? I am astonished that some opponents of payment to America did not consider this."

M. Herriot went on to say that it was a mistake to think that debt adjustment was going to be obtained while one American President "was without power and another had not yet been invested."

He protested against the risk of "compromising our good relations with America for 480,000,000 francs, while those who voted against payment would wantonly give 300.000,000 francs to Hungary and 2,000,000,000 francs to refloat some weak banks."

From converient advisors from Paris Dog 24 to the New

From copyright advices from Paris Dec. 24 to the New York "Herald Tribune" we take the following:

York "Herald Tribune' we take the following:

"It was not I who fell; it was the Chamber of Deputies." With these
words Edouard Herriot, while a guest at a luncheon of the Anglo-American
Press Association on Wednesday, described the Chamber vote which overthrew his government the week before and rendered impossible the payment
on the date due of France's December debt installment.

"I believe France's first duty was to pay." Herriot continued. "I have
not changed and I will not change." With an appreciative twinkle, the
man who is still determined to fight for restitution of France's signature
cited one of the thousands of messages of congratulation which for days
have been pouring in upon him for the rare courage of his defeat. A message
from a French woman read: "Your fall is greater than Niagara's."

Return to Power Expected.

Return to Power Expected.

This incident gives some measure perhaps of the increased stature and mounting moral and international influence as well as domestic which has come to Herriot within ten days because he refused to compromise upon what he was convinced was a moral principle.

Former Premier Herriot's close associates know, as he does himself, that in the present Chamber his return to the Premiership before many months is inevitable and essential, for in the Chamber's Left majority Herriot stands as one unquestioned leader—more so to-day than ever. The ex-Premier's associates say significantly that when the moment comes, when Herriot's return is indispensable, he will again make his first condition of the re-acceptance of the Premiership that the Government pay her December debt installment to the United States, and that he will make that payment his first project before the Chamber.

French Favor Study of War Debts by Experts-Believe Solution Would Be Advanced by Survey by Non-Political Agents.

According to Associated Press cablegrams from Paris Dec. 24, authoritative French opinion continued to favor an examination of the American debt question by experts as the most feasible and practicable way of approaching the matter. The cablegram, as given in the New York "Times" went on to say:

Dispatches from America indicating that President Hoover was disposed to take no pronounced initiative served to confirm the view previously held by many highly placed Frenchmen that no final solution of the debts could be hoped for until the Roosevelt Administration assumed the responsibilities of office.

Still, the belief is held that the problem can be advanced toward solution by Franco-American experts tackling it from the standpoint of practical economics, thus removing much that the French now believe obscures and complicates the question. The impression prevailed that if Washington could agree to this kind of study France would welcome it.

Says Call Was for Data.

An official French spokesman said that Premier Joseph Paul-Boncour's surprise visit yesterday to the United States Embassy would be more exactly understood if it were interpreted as a "visit for information." Ambassador Walter E. Edge will not return the call until he has heard from Washington and is able to give the Premier general debt information. The question as to when and under what circumstances M. Paul-Boncour could ask the Chamber of Deputies to amend its action and vote to pay the United States without further delay is regarded as delicate. There is a considerable opinion that this should be done before Mr. Roosevelt become President. Apparently the matter will be allowed to drift pending developments in conversations between Washington and Paris.

Jurists now seem agreed that the Chamber's ratification of the Mellon-Berenger accord carried with it governmental authority to pay the December interest without special sanction from Parliament. This situation, however, was changed by M. Herriot's asking the Chamber's approval.

M. Paul-Boncour, who is both Premier and Foreign Minister, moved into the Foreign Office on the Quai d'Orsay to-day, selecting as his living quarters, the newspaper "Le Matin" said, the famous royal suite on the second floor. Hitherto this has been reserved for crowned heads and chiefs of State on official visits in France. The suite was occupied by Queen Marie and the late King Ferdinand of Rumania, President Masaryk of Caechoslovakia and King George and Queen Mary of Great Britain.

The Premier's office will be just above the old one and is richly hung with tapestries, valued at \$480,000.

\$198,000,000 in Bonds Voted by French Chamber of Deputies to Meet Minister Cheron's Request for Funds Until New Budget Is Passed.

Under date of Dec. 27 the New York "Times" reported the following from Paris:

The Finance Minister, Henry Cheron, stoutly refusing to accept a sou less than a 5.000.000,000 francs (about \$198.000,000) emission of treasury bonds which he needs to help him through the first months of the new year until the budget is passed, with necessary measures of economy, to-day easily obtained the confidence of the Chamber of Deputies, the nearest vote being 348 to 235.

He obtained also necessary permission to open provisional credits for lanuary and authorization to collect taxes and public revenues.

vote being 348 to 235.

He obtained also necessary permission to open provisional credits for January and authorization to collect taxes and public revenues.

At the end of January he will need to ask at least another month's extension, but he refused to do so now on the ground that the Chamber, feeling it had time on hand, would show its usual dilitoriness in passing the budget. For the future, the Finance Minister promised, in various speeches during the Chamber discussion, that he would temporarily suspend employing new civil servants and would drop those uselessly employed. In addition he promised to be extremely severe in pursuing tax dodgers.

"There are some frauds," he declared, while the whole Chamber applauded, "that I certainly am going to put an end to."

The French railroads, which had asked permission to make a 2,000,000,000 franc bond issue (about \$98,000,000) were restricted by Chamber vote to 1,300,000,000. During 1933, M. Cheron said, they would have to raise 6,000,000,000 francs.

Associated Press accounts from Porion 1.

Associated Press accounts from Paris on Dec. 27 stated:
The Government got two votes of confidence from the Chamber of
Deputies to-day during debate on provisional credits for January.
The Government asked power to issue 5,000,000,000 francs in Treasury
bonds if necessary. On a motion to reduce the amount to 2,000,000,000 the
Government won by a vote of 400 to 190. On another motion to cut the
amount to 4,000,000,000 francs the vote was 349 to 235.
Subsequently the Chamber voted approval of the Government's provisional credit project by 524 to 53. The total of provisional credits for
next month thus approved is 5,150,000,000 francs.

\$752,732,000 Decline in French Funds Cited-Finance Minister Would Issue Treasury Bonds Up to \$195,000,000 Until Budget Is Voted.

Wireless advices as follows from Paris Dec. 23 are taken from the New York "Times":

In place of the 19,000,000,000 francs (\$761,000,000) which had accumulated in the French Treasury during his last tenure of office (1928-29), Finance Minister Henry Cheron to-day informed the Chamber of Deputies' finance committee he had found only 212,000,000 francs (\$8,268,000) when he reassumed possession of the office in the Rue de Rivoli.

he reassumed possession of the office in the Rue de Rivoli.

By recovering some outstanding loans and issuing Treasury bonds for 1,700,000,000 francs, which he is authorized to do, he would be able to make the year-end payments, he said. But he said he must have permission to issue Treasury bonds up to 5,000,000,000 francs during the first months of the year if he was to be able to survive the period during which the budget must be voted. That amount is the same as Raymond Poincare asked and obtained in August 1926.

For the future M. Cheron declared his firm intention of presenting a really balanced budget by the middle of next month and of pressing with all his force for its passage. He considered, he said, that his personal honor was engaged in the restoration of the finances of the country. The committee approved, in general the Minister's proposals, which will be discussed next week in the Chamber.

1932 Dividends for Bank of France Cut to New Record Low

From its Paris bureau the "Wall Street Journal" reported the following in its Dec. 27 issue:

Bank of France has declared a dividend for the second half of 1932 of

This is the same as was paid in the first six months and makes a total of 200 francs for the year, compared with 385 francs in 1931 and 620 francs in 1930. The dividend for 1932 is the smallest declared in the history of the

Since the Franco-Prussian War, the smallest dividend declared by the Bank of France was 95 francs, equivalent to 475 modern francs. to that war, the smallest disbursement was 60 francs in 1814, or the equivalent to 300 modern francs.

Ivar Kreuger's French Bank Cuts Capital.

Paris advices to the "Wall Street Journal" of Dec. 29 stated:

Banque de Suede et de Paris, Ivar Kreuger's French bank, has decided to reduce its capital to 25,000,000 francs from 100,000,000 francs by reducing the par value of its shares to 125 francs from 500 francs.

French Banks Lend to Belgium.

In the "Wall Street Journal" of Dec. 29 it was stated that Belgium has sold one-year treasury bills to French banks to cover year-end maturities. Amount involved is 500,000,-000 French francs of 41/2% bills, which were sold at 961/2%.

Participation by France in International Loan to Austria Approved by French Chamber of Deputies and Senate-Grants \$13,650,000 Aid Pledged at Lausanne.

The French Chamber of Deputies approved on Dec. 29 participation by France in the international loan promised to Austria by the Lausanne protocal of July 15 last. The Finance Committee of the Chamber on Dec. 27 signified its approval of the proposed advance to Austria, which likewise has the approval of the League of Nations. Yesterday (Dec. 30) the Senate approved the Government's stand by a vote of 144 to 68. According to Associated Press advices from Paris yesterday a decree of cloture then was read in the Senate and Chamber of Deputies and parliament adjourned. Regarding the action of the Chamber of wireless message from Paris, Dec. 29, to the New York "Times" said:

In what seemed to many a spirit of contradiction and to others a perfectly logical step continuing a creative policy, the Chamber of Deputies, which had refused two weeks ago to pay \$19,000,000 to the United States, consented today by a vote of 352 to 188 to the flotation by Austria of a loan of 350,000,000 francs [\$13,650,000] in France in fulfillment of a promise given at Lausanne.

promise given at Lausanne.

Those who found a contradiction between the two actions were those like Louis Marin who had been most firmly opposed to payment of the debt to the United States. It would be monstrous, said M. Marin, within a few days of having refused to pay the United States to grant this favor to a former enemy country which would profit only the banks and be of no real use to Austria. Former Finance Minister Pierre-Etienne Flandin developed the same theme, insisting especially that this loan would serve only to refloat the Creditanstalt and thaw out some credits of other countries. in Austria.

He regarded the whole operation as another "concession" by France without an counterpart and advocated a different policy. Instead of throwing good money after bad, he said, why should not France take over the Austrian customs and the tobacco monopoly in repayment of arrears on the 1922 lears?

Herriot Makes Reply

The acuteness of the division of opinion and policy between the two sides of the Chamber in such international matters was shown when ex-Premier Edouard Herriot replied in the afternoon. His answer to M. Flandin was that only last year he who was now defending the so-called interests of the French investor had loaned 454,000,000 francs to Hungary without authorization of Parliament and through the intermediary of a private bank private bank.

When M. Flandin interrupted the former Premier's statement that France could not seize the Austrian customs and tobacco revenue, M. Herriot replied:
"Even if we could, how could we treat this Central European country like Turkey and China in other times?"

There are only two remedies for the Austrian situation, he said; either Austria must be incorporated into Germany or maintained as an independent unit in Europe organized under the protection of the League of Nations. Again M. Flandin interrupted to protest it was only new foreign credits that had permitted Austria to pay the interest on past loans.

Likens Situation to Reich's

Likens Situation to Retch's

This reasoning could also have been applied to Germany in the past,
M. Herriot replied. She had paid reparations by borrowing. The alternative, he said, was to tell Austria that an economic union with Germany was the only good solution. If anything real was to be done for the reconstruction of Central Europe a beginning must be made with Austria, he added.

Premier Joseph Paul-Boncour, confident of his majority and of Socialist support, but convinced of the need to protect waverers who might be reproached in their constituencies with having given French money away, attached to the vote a question of confidence. Like M. Herriot, he saw no contradiction between this loan and the refusal to pay the American debt. They were separate questions. The Chember had refused to pay the United States. Would it also refuse to help Austria and permit that unfortunate country to be exposed to all kinds of temptations? Both Austria's independence and the whole reconstruction policy of the League were involved. Tomorrow the Senate will debate the question.

From Paris, Dec. 27, Associated Press advices stated:

From Paris, Dec. 27, Associated Press advices stated: The war debt question for the moment has entered a diplomatic lull but it doubtless will be raised again tomorrow and Thursday when the Chamber of Deputies will debate the issue of French participation in a reconstruction loan to Austria.

At the Lausanne conference last July, the powers decided to lend Austria 300,000,000 schillings. There has been some criticism of the government's lending money to Austria when it has just refused to pay the December war debt interest of \$19,261,432 to the United States. In the opinion of the radical socialist newspaper "L'Oeuvre." "It is hardly logical, having refused to pay the debt, to consent to the loan."

Because of this connection, spinsted debate is expected in the Chamber.

because of this opposition, animated debate is expected in the Chamber.

The Finance Committee of the Chamber voted 10 to 5 in favor of the loan; with many abstentions.

Austrian Note Issue Low-Present Circulation \$34,000,000 Below That of a Year Ago.

From Vienna advices, Dec. 23, to New York "Times" stated: Note circulation of the Austrian national bank has reached the lowest figure in many years, standing now at 859,000,000 schillings, as against 1,104,779,000 at the same date in 1931 and 997,161,000 in 1930.

The ratio of reserve cover amounts to 23%. Economic circles are generally demanding reduction of the bank's 6% interest rate.

Communique of Hungarian Government on State Loan of Kingdom of Hungary 1924

Speyer & Co. are advised that the following Communique of the Hungarian Government was published on December 20th in London by the League Loans Committee:

In connection with the notice which the Trustees of the above-named Loan are issuing to-day, the Hungarian Government recalls the attention of the Bondholders to the communique published on the 4th August last. The Government fully maintains the attitude which it then stated towards this Loan, and, in spite of the exchange difficulties in Hungary having increased, will continue to use every endeavor to carry out the programme therein partined. therein outlined

Mercurbank Cuts Stock—Par Value to Be Reduced-Holders Get 50% Subscription Right.

From the "Wall Street Journal" of yesterday (Dec. 30) we take the following:

A reduction in the capital of Mercurbank, Vienna, is under way, to be accomplished by a reduction of the par value of its shares from 20 schillings to 10 schillings each. Outstanding stock c.rtificates should be presented for stamping at Hallgarten & Co. after January 3 1933.

The bank also advises that subscription rights, expiring December 31 1932, have been given to shareholders entitling them to purchase 500,000 shares

of additional stock of 10 schillings par value each, at a price of 12 schillings a share, in the ratio of one new share for each two present shares held. At current quotations these subscription rights have no present market value.

Financial Berlin Opposed to Demand of Dr. Hugenberg for Cut in Interest on Bonds.

From Berlin advices Dec. 23 to the New York "Times reported:

The German financial press critizes severely the demand of Hugenberg, the German Nationalist party leader, for reduction of interest on German foreign bonds to 1½%. The "Vossische Zeitung" declares that neither the Government, nor the Reichsbank, nor industry, supports the Hugenberg idea. The "Boersen Courier" writes that profits of municipal public

utilities must be unconditionally appropriated for prior service of these debts.

The net profits from this source have been 760,000,000 marks, whereas the service of the home and foreign municipal debt requires only 600,000,000. German dollar bonds were predominantly firm on this week's Berlin market. though with some declines. The recent considerable advance in Wall Street is ascribed here to international buying, due to the improved German political situation, but not to buying for German account, which has recently here small

Dr. Hugenberg's views were indicated in our issue of Dec. 24, page 4309.

City of Heidelberg (Germany) Seeks Reduction in Interest Rate on Dollar Loan and Postponement of July Payment.

A cablegram, Dec. 27 from Heidelberg to the New York "Times" stated:

The City of Heidelberg is negotiating for a reduction in interest

7% dollar loan and postponement of the amortization instalment of 70,000 marks [about \$16,800], due July 1 1933.

The financial status of the city, which, like all German municipalities, is burdened with heavy dole payments, would be considerably improved if the interest rate could be scaled down below 5%, it is said. The total payment due July 1 amounts to 270,000 marks [about \$64,800]. The sinking fund payment due in January will be raid nunctually it is announced. fund payment due in January will be paid punctually, it is announced.

German Cities Accept Bonds from Debtors-Cologne Reported Opposing Creditor's Request to Adopt Practice Due to Income Loss.

Copyright advices Dec. 14 from Berlin to the New York "Herald Tribune" said:

Beginning with Koenigsburg and followed by Magdeburg and Essen, German cities unable otherwise to reduce their indebtedness in treasury bonds through normal repayment at maturity have developed the procedure of disposing of such bonds by accepting them in fulfillment of obligations owing to the municipality.

The practice has acquired a certain significance since it is known that Colorne one of the two biggest insolvent communal debtors up to now.

Cologne, one of the two biggest insolvent communal debtors up to now

Cologne, one of the two biggest insolvent communal debtors up to now, has been considering extending to its creditors the same privileges, at the instance of the creditors themselves.

Representatives of Cologne have stated, in opposition to the wishes expressed by the creditors' protective body, that they have serious objections to following such a course, which, they assert, would represent a preferential treatment of certain of their creditors. In particular would this be the case, according to the Cologne spokesman, were another aspect of the proposals to be adopted, namely, extending the privilege only to those bondholders who have been holding their securities since before a certain predetermined date, a form of favoritism would certainly be introduced.

On the other hand, were strict consistency to be observed and the opportunity of such realization to be extended to all bondholders, regardless of length of possession, the city's finances would be exposed to such loss of income that the proposal must be declared out of the question.

This objection by the city's representatives refers particularly to that

This objection by the city's representatives refers particularly to that portion of the proposal which foresees the possibility of paying taxes with the treasury certificates.

In the City of Koenigsburg, where the practice has been in effect since the latter part of last summer, the outstanding bonds are accepted at 90% of par in payment on mortgage obligations to the city. The possibility of tax payment in this fashion represents another and an additional step.

Oldest Member of German Reichstag Resigns-Gen. Litzmann Will Be Succeeded by Wilhelm Krueger.

On Dec. 28 Associated Press accounts from Berlin said:

General Karl Litzmann, the oldest member of the Reichstag, resigned to-day to permit appointment of Wilhelm Krueger as his successor. The General, who is 82, was elected to the House by the National Socialist party to insure the choice of a Nazi as temporary Chairman of the Reichstag opening. By custom, the oldest member is elected to that post. In the last Reichstag, it went to Clara Zetkin, a Communist. General Litzmann remains a member of the Prussian Diet.

Germany Finances Soviet Russian Trade Bills by Consortiums.

Financing of Soviet trade bills in Germany is done by means of banking consortiums, says a report to the Commerce Department from the Berlin office. The Department on Dec. 27 added:

The consortiums are formed from time to time with the object of discounting a definite amount of Soviet bills guaranteed by the German Government.

Government.

The last "Consortium Russland X" formed last summer offered facilities for discounting of Soviet bills to the amount of 110,000,000 marks. This contingent was exhausted sometime ago and a new "Consortium Russland XI" is now in the course of formation.

In view, however, of the reduced volume of Soviet orders now being placed in Germany and the fact that many banks are reported overloaded with Soviet bills, the amount available for rediscount with the new Consortium will be reduced to 50,000,000 marks. Nevertheless, this will permit a good many industrial corporations to offer the banks Soviet bills now "frozen" in their portfolios. (Mark equals about 24 cents, U.S.)

Berlin City Electric Redeems \$105,000 Bonds.

The following is from the New York "Sun" of last night

Dillon, Read & Co., as fiscal agents for Berlin City Electric Co., announce that \$105,000, principal amount of the company's 30-year 6½% sinking fund debentures, due Feb. 1 1959, have been drawn for redemption at par in New York Feb. 1 out of money to be paid for sinking fund. At the option of holders principal and interest may be collected in London, Amsterdam, Zurich, Basle or Stockholm in the currencies of the respective countries at the exchange rate prevailing on the date of presentation.

Increase in Unemployment in Germany-Re-employment Premiums of Papen Plans.

The United States Department of Commerce, in the review of conditions abroad under date of Dec. 25 has the

review of conditions abroad under date of Dec. 25 has the following to say in part regarding Germany:

Unemployment increased from 5,109,000 on Oct. 31 to 5,265,000 on Nov. 30, due chiefly to the usual seasonal cessation of outdoor work, while other activities remained practically unaffected. There was a tendency on the part of manufacturers rather to extend working time rather than re-employ new men. This interpretation of current unemployment statistics is confirmed by a marked increase in employers' and employees' contributions to the various social insurance service during the last two months, the first time since the financial crisis of 1931. This is considered as an indicator of higher payrolls in industry, since these contributions are levied in proportion to wages paid. While the "re-employment premiums" of the Papen plan do not seem to have attained their objective, since little use has been made of the fund (700,000,000 marks to provide a premium of 100 marks for each additional man employed per quarter after Oct. 1 1932), another feature of this plan has proved a thorough success and has offered a powerful incentive to increase employment in the building trade and affiliated industries. The appropriation of 50,000,000 marks for the refund to landlords of 20% of amounts they spend on house repairs is practically exhausted. This means that total contracts to the amount of 250,000,000 marks will be awarded to the building trade within a relatively short time. The expansion of industrial production during the past few months has thus far been financed mainly from liquid reserves, as the demand for credit did not show any increase recently. Bills discounted by the Reichsbank declined from 2,857,000,000 from liquid reserves, as the demand for credit did not show any increase recently. Bills discounted by the Reichsbank declined from 2,857,000,000 marks on Oct. 31 to 2,731,000,000 marks on Nov. 30 1932, while the note circulation declined by 88,892,000 marks to 3,631,157,000 marks.

Collapse of Unemployment Insurance in Germany Report By National Industrial Conference Board.

Unemployment insurance in Germany has completely collapsed as a system of mass unemployment relief, according to a report completed and soon to be published by the National Industrial Conference Board. The report is the result of a three-months investigation and survey made in Germany during the past summer by a member of the Conference Board's staff of experts. The Board states Conference Board's staff of experts. The Board states that after six years of unremitting effort on the part of Germany's leaders to make a success of their carefully planned unemployment insurance scheme, its complete breakdown comes at a time when similar plans for com-batting the effects of unemployment are being advocated widely in this country. The Conference Board, therefore, feels that its report on Germany's plan, presenting as it does all the salient facts, will be of value to the American public and to legislators in passing upon the various plans now under consideration. Some of the more important features of the report were made public on Dec. 24.

During the first three-and-one-half years of its existence, October 1927 to March 1931, states the report, the German unemployment insurance fund showed a total excess of expenditure over income of \$364.9 million. This deficit was made up by loans from the Federal Government, which will never be repaid. In 1931, the drain on the financial resources of the Federal Government became unbearable, and the Government requested the directors of the insurance fund to balance its accounts by any measures that they

found necessasy.

Notwithstanding the drastic measures of economy adopted in 1931 and 1932, states the report, the collapse of the unemployment insurance plan came in June of this year, thus practically ending the greatest experiment in social insurance that the world has seen. The reason for this collapse is found in the fact that depressional unemployment is not an actuarial risk and that unemployment insurance cannot be placed on a sound financial basis. The Board further says:

placed on a sound financial basis. The Board further says: In theory, the cost of unemployment insurance in Germany was to be borne by contributions of workers and employers to the unemployment insurance fund. When the law was adopted in 1927, it was estimated that 3% of the standard wage, 1½% paid by the employers and 1½% by the workers, would be adequate to cover the cost of unemployment insurance. This estimate, however, proved to be incorrect. The contributions were raised from 3% in 1927 to 3.5% in December 1929, to 4.5% in July 1930 and to 6.5% in October 1931. At the same time, while the rates of contributions were being increased, the rates of benefit and the duration of benefit periods were being decreased. In this manner the unemployment insurance fund succeeded in eliminating the large deficits which it incurred in the years 1927 to 1931, but it was able to balance its accounts only by throwing an enormous majority of the unemployed out of the unemployment scheme at the expense of the public treasury.

According to the Board, in January 1928, the number

According to the Board, in January 1928, the number of unemployed workers was 1,896,000. Of this total, 1,333,-

000, or 70%, received unemployment insurance benefits. In October 1932, out of the total of 5,109,000 unemployed workers, only 582,000, or 11%, were taken care of by the unemployment insurance fund. In other words, by October 1932, unemployment insurance became a relatively insignificant factor in unemployment relief. In that month 22% of all unemployed workers received emergency relief, fourfifths of which is paid by the Federal Government and onefifth by the communes; 42% received welfare relief, paid entirely by the communes, and 25% received no relief of any kind. The Board likewise reports:

Germany's experience with unemployment insurance shows conclusively that no insurance system can be devised to take care of depressional unemployment and that the cost of this unemployment falls largely on the State. There is no reason to believe that the experience of the United States would be different. If unemployment insurance is kept on a sound financial basis—that is, if the amount of expenditure is not allowed to expend the income from contributions—the amount of relief will be inadequate. financial basis—that is, if the amount of expenditure is not allowed to exceed the income from contributions—the amount of relief will be inadequate to provide for more than a small proportion of the unemployed and for a very short time or the burden of contribution will be economically unsupportable. In either event the major part of the cost will fall on the State. That being the case, the best informed opinion in Germany advocates the establishment of a system that will be based on the following principles:

cates the establishment of the principles:

(1) Unemployment is not an insurable risk.

(2) Unemployment relief should be paid by the nation as a whole.

(3) Relief should be given not as a legal right but only to persons who are in need and in proportion to the degree of that need.

Report on Swiss Trade and Industry in 1931 Published by Swiss Federation of Commerce and Industry.

The "Swiss Federation of Commerce and Industry" announces the publication of its annual report on Swiss trade and industry during the year 1931. The abundance of economic facts and figures will enable the foreign reader to obtain an insight into Swiss economic conditions. As formerly, the general part of the report contains a succinct statement about certain important questions concerning prices, credit, currency, commercial policy and the crisis. There is also incorporated a statistical part containing all the more important dates bearing on the different fields of Swiss economic conditions such as population, agriculture, water power, factories, labor questions, cost of living, banking, foreign trade, finance and taxation.

The most important part of the volume is devoted to special reports in the individual branches of trade and industry, on traffic, insurance and banking, on production and distribution of electric energy and on technical and commercial education. There are this year again new chapters concerning some industries which have so far not been dealt with. The report, of some 270 pages, appears in a French and in a German edition, and may be obtained at the price of 8 Swiss francs (plus postage) from the Secretariat of the Swiss Federation of Commerce and Industry, Zurich, Boersenstrasse 17.

Russia Offers Canada Oil for 100,000 Cattle-\$7,000,000 Deal Awaits Premier Bennett's Return-Rail Material May Be Bartered.

Under date of Dec. 27 Canadian Press accounts from Ottawa to the New York "Herald Tribune" said:

Ottawa to the New York "Herald Tribune" said:

A gigantic barter scheme, by which 100,000 head of Canadian dairy cattle would be traded to Soviet Russia for their equivalent value in Russian oil, awaits a final decision by Prime Minister Richard B. Bennett when he returns from England this week, it was revealed to-day. The sum involved, according to the Toronto "Star," is \$7,000,000. The Russian authorities already have approved the plan, this newspaper adds.

Although official confirmation of the progress already made is being withheld, Robert Weir, Minister of Agriculture, admitted to-day that he had been working for several weeks on the project and had hones that it would

on working for several weeks on the project and had hopes that it would of benefit to the farmers of Canada.

New York Negotiations Held.

New York Negotiations Held.

The actual negotiations, it is understood from other sources, are being conducted between a company which is in course of organization in Winnipeg and the Soviet authorities. Much of the negotiations have been conducted in New York, but a representative of the company recently visited Russia to get first-hand information as to the situation there.

Russia is sorely in need of cows to provide milk and milk products for her population. The Soviet Government is anxious to trade oil for cows. With the exceptions of some small imports from the Island of Trinidad, all the crude oil now brought into Canada comes from outside the British Empire.

Empire.

Canada has a great number of dairy heifers and young cows of good grade

Canada has a great number of dairy heifers and young cows of good grade breedings. Russia also would buy 5% pure breds, which, of course, bring much higher prices. This would not interfere with the live cattle trade to the British Isles. The United Kingdom trade has been beef cattle, mostly finished steers, whereas, the Russian trade would be mostly dairy heifers, cows and bulls. There would be some demand for cows of beef

Oil To Be Split on This Side.

Under the proposed arrangement the Canadian company would assume ownership of the oil shipments as soon as they leave the Black Sea ports and the Soviet would assume ownership of the cattle at the Canadian ports. Considerable details, it is understood, have to be worked out. The prices to be paid would be as high as those prevailing in the Canadian livestock

The Winnipeg company is arranging with a leading Canadian oil company to take over the oil as it arrives in Canadian ports, to be split into gasoline, fuel oil and other commodities.

Canadian dairy cattle rank very high in world competition, and in addi-on are accustomed to a climate similar to that of Russia.

From Montreal Dec. 26 Associated Press advices said:

The "Gazette" to-morrow will say that Canadian railroad material may be shipped in large quantities to Russia in 1933 in exchange for Soviet oil, providing the Canadian Government will permit the continued importation of oil and the negotiation of commercial agreements between manufacturers in the Dominion and Soviet authorities.

tion of oil and the negotiation of commercial agreements between manufacturers in the Dominion and Soviet authorities.

"Some 40,000 tons of Soviet oil was brought to Montreal during the past season in four Danish tankers, which loaded the petroleum at Batoum in the Black Sea," the newspaper will say. "Payment was made by barter, quantities of goods from the Aluminum Co. of Canada, Ltd., at Arvida, being shipped to Russia in exchange.

"The Canadian importers of oil and exporters of aluminum completed the transaction between themselves, though it is understood that a high price was placed on the aluminum and a low figure on the oil, considerable profit according to this country. If this business is allowed to continue, it is maintained that no objections should be made to an extension of the barter plan."

America Reported as Likely to Lose Through Diversion of Canadian Purchases of Foreign Oil.

Any diversion of Canadian purchases of foreign petroleum from their present channels would be largely at the expense of the United States, it was said in some Government circles on Dec. 27 in connection with the agreement reported to have been reached between Prime Minister Bennett and Soviet representatives under which Canadian producers of railway materials would barter with Russia in exchange for petroleum products. A Washington dispatch Dec. 27 to

petroleum products. A Washington dispatch Dec. 27 to the New York "Times" went on to say:

Officials were generally cautious in their interpretations of the reported agreement in the absence of any official information, but they pointed out that the United States last year exported to Canada \$29,786,179 worth of crude and refined petroleum products.

It was believed likely that even if such an agreement has been concluded between the two countries, Canadian consumers would not long be satisfied with the Russian product because of its inferior quality as compared with the American

British Will Buy More Soviet Wood-Importers and Two Russian Export Units Draft Contract for 1933—Canada Assails Plan As Violating Spirit of Ottawa Agreement.

From London a wireless message Dec. 29 to the New York "Times" said:

York "Times" Said:

A new agreement for the bulk supply of Russian timber to Great Britain during 1933 is virtually complete. Negotiations have been in progress for some time between Timber Distributors, Ltd., a company formed to underwrite the present year's supplies, and the Soviet exporting organizations, Exportless and the White Sea Timber Trust.

It is understood a provision has been made for supplies in the coming year totaling 395,000 to 430,000 standards. The maximum quantity in the 1932 contract was 450,000 standards, and the approximate cost, according to figures published last March, was £4,500,000 (about \$14,940,000 at the current exchange) freight paid.

Timber Distributors, Ltd., which represents about 90% of the British

O00 at the current exchange) freight paid.

Timber Distributors, Ltd., which represents about 90% of the British importers of Russian softwoods, is said to have made substantial profits for its shareholders under that contract, which, it is asserted, enabled timber to be marketed at steady prices.

There is an ad valorem duty of 10% against Russian timber. The problem of Russian timber aroused considerable controversy at the Ottawa conference, and under the pact between the Canadian and United Kingdom Governments, London agreed to guarantee to Canada the maintenance of any preference granted to Canadian lumber.

Canadian Company Bartered Shoes for Turkeys.

Employees of a large Canadian shoe company were provided with turkeys for Christmas dinners considerably below the prevailing market price under a barter plan whereby the company exchanged the shoes it manufactures for the turkeys, according to a report to the Commerce Department from Trade Commissioner L. A. France, Toronto. The Department on Dec. 22 said that recently officials of the company evolved a plan to exchange its own products for turkeys which would be made available at a low price to approximately 200 employees of the shoe company.

New Turkish Quotas to Permit Bargaining-Economy Minister Has Power to Reward Countries That Make Compensating Purchases.

From the New York "Times" we take the following from Istanbul, Dec. 10 (by mail):

Turkish import quotas for the first three months of 1933, while generally as restrictive than former quotas from the Turkish viewpoint, place acreased restrictions on imports from a number of countries, including the United States.

A new feature, putting certain articles on a compensation basis, is believed likely to bring protests from many nations, on the ground that the resulting restrictions and prohibitions violate the most-favored-nation clauses in existing conventions.

casting conventions.

The new quotas are more restrictive for such United States exports as attomobile spare parts, batteries, radios, and motion-picture films. Another ature of the new quota law is the addition of all minerals, except coal. he list already includes wool, mohair, attar of roses, rugs, lumber and -ties

There is also a new list of articles of which importation will not be pro-hibited, but which must be approved by the ministers of finance, economy and agriculture before orders are placed. The widely discretionary powers

vested in the Minister of Economy make it possible for him to allot the entire quota for any given article to any one country as compensation for its purchases in Turkey.

Greek Funds Held Up—British Refuse to Release Money Until 30% Is Paid to United States.

From the New York "Times" we take the following from Athens, Dec. 24 (Associated Press):

The British Minister informed the Greek Government to-day that unless it pays 30% to the United States on the \$12,000,000 American loan of 1929 Great Britain cannot allow the International Commission of Financial Control to hand the Greek Government surpluses of earmarked revenues now in the Commission's possession.

Control to hand the Greek Government surpluses of Carmar and now in the Commission's possession.

The Greek Premier stated that, before deciding, he would await the United States Government's reply to his proposal for arbitration on the nature of the 1929 loan. Meanwhile the 30% is being kept earmarked. The American answer to the Greek note on the 1929 loan was received this afternoon. It pointed out that Greece must pay the 30% without any reservations. The Greek reply will be sent after the holidays.

Poland to Pay Instalment to Dillon, Read on 1924 Loan.

Associated Press advices from Warsaw (Poland) Dec. 30

The Polish Government has arranged with Dillon, Read & Co. to repay ,490,000 due Jan. 1, in six monthly instalments against the 1924 loan of \$45,000,000.

of \$45,000,000.

This agreement gave rise to reports abroad that Poland was preparing to pay the December war debt instalment but the Government denied this, explaining that negotiations for settlement of that obligation will continue when the new Polish Minister reaches Washington.

Fines Imposed on American Owned Packing Houses in Argentina for Refusing to Open Books for Govern ment Inspection.

A cablegram from Buenos Aires Dec. 27 to the New York "Times" said:

Three packing houses owned by Americans were among seven which to-day paid fines of 5,000 pesos each for refusals to permit the Government to inspect their books. They paid under protest and will appeal to the Supreme Court, arguing that the meat control law is unconstitutional.

Reference to the Government order appeared in our issue of Nov. 5, page 3072.

Locusts Ruin Crops in Argentina-Farmers Appeal to Government.

A cablegram from Formosa, Argentina, Dec. 26 to the Chicago "Tribune" said:

The advance of a dense swarm of locusts, estimated to be 350 miles long and five miles wide, down the banks of the Barmej River has caused a panic of desperation among the farmers. The insects are completely cleaning up the cotton, maize and tobacco crops, despite frantic efforts to stem

the living avalanche of destruction.

Available supplies of arsenic dust and other locust-killing products are exhausted, and the farmers have directed a desperate appeal to authorities

Germany Imposes Penalty Duties on Argentine Corn, Tallow, &c.

A German Government decree effective Jan. 10 1933, subjects imports of maize, premier just and other tallow, and animal casings from Argentina, to the rates of the German super-tariff, according to a cablegram from Commercial Attache H. Lawrence Groves, Berlin. The Department of Commerce in announcing this on Dec. 23 said:

It is stated that the action was taken because Argentina had not extended to Germany the concessions granted to Chile by the modus vivendi concluded between Argentina and Chile on Nov. 12 1932.

(The German super-tariff consists of a category of special maximum duties which the Government is authorized to impose by decree, either wholly or in part, on imports from non-treaty countries, or from countries discriminating against German goods. On the products mentioned above, the rates of the super-tariff are many times higher than the regular import

Germany Increases Import Duty on Hoop Staves-Present Import Duties on Hogs, Meat, and Sugar Indefinitely Prolonged.

On Dec. 21 an announcement by the Department of Commerce at Washington said:

Effective Dec. 22 1932, the German import duties on hoop staves (tariff item 85) have been increased from 1.25 and 6 reichsmarks to 1.60 and 8.00 reichsmarks per 100 kilos, respectively, according to a cablegram to the Department of Commerce from Commercial Attache H. Lawrence Groves,

At the same time, the present import duties on live hogs and fre prepared frozen meats which were originally put into effect on May 10 1931, and on refined sugar, effective since March 29 1930, all of which were to expire on Dec. 31 1932, have been indefinitely prolonged.

French Wheat Credits Voted - Deputies Approve 300,000,000 Francs for Farm Loans.

A credit of 300,000,000 francs to be used as loans for wheat farmers has been approved by the Chamber of Deputies, according to United Press advices from Paris to to the Wall Street "Journal" of Dec. 28, which also said: "The credit also will enable the national wheat office to support the wheat market."

Chinese Import Duty on Leaf Tobacco Modified.

Under date of Dec. 27 the Department of Commerce at Washington said:

The Chinese Minister of Finance has issued an order combining two leaf tobacco classifications with a resultant single duty of four customs gold units (of \$0.40 each) per picul (of 133 1 3 pounds) for leaf tobacco of a value not exceeding 105 gold units per picul, according to a radiogram received in the Department of Commerce from Commercial Attache Julean Arnold,

Shanghai.

Previously leaf tobacco, valued at not exceeding 35 gold units per picul had been dutiable at 2.90 gold units per picul; leaf tobacco valued over 35 gold units but not exceeding 105 gold units per picul had been subject to a duty of 6.90 gold units per picul. The duty on leaf tobacco valued over duty of 6.90 gold units per picul. The duty on leaf tobacco valued over 105 gold units per picul continues unchanged at 14 gold units per picul.

Wage Cut by Southern Railway in Argentina.

Buenos Aires (Argentina) Associated Press advices report that the Southern Ry. announced on Dec. 24 an 8% wage reduction, effective Jan. 1, despite a decision by the railway unions that the cuts are unacceptable. The road also announced it was reducing personnel.

Argentina Cuts Floating Debt by \$83,000,000 During 1932.

Under date of Dec. 24 United Press advices from Buenos Aires said:

A reduction of 382,000,000 pesos (\$95,550,000) in the country's floating debt plus 19,900 pesos (\$4,975) paid to State railways has been effected since 1931, the Finance Ministry has announced.

On Nov. 3 the floating debt totaled 885,600,000 pesos (\$221,400,000)

compared to 1,267,800,000 pesos (\$316,950,000) on the same date last year. The Ministry estimated that the debt would be increased by 50,000,000 pesos (\$12,500,000) by Jan. 1 1933, because of the current budget

Province of Buenos Aires (Argentina) Gets Debt Extension-Arranges With British and French to Stop Sinking Fund Payments for Three Years.

In a Buenos Aires cablegram it is made known that the Province of Buenos Aires announced on Dec. 23 a debt arrangement with British and French bankers by which it will save 27,000,000 pesos (\$6,939,000) annually for three years. The plan has not been yet accepted by New York bankers. The cablegram went on to say:

According to the arrangement, the Province will suspend sinking fund payments for three years and pay interest at the par rate of exchange, giving promissory notes for the difference between par and the official rate on the day the interest is paid. When the sinking fund payments are resumed at the end of three years they will go first toward taking up the promissory notes covering the difference in exchange in interest payments. The Provincial Minister of Finance declares that the scheme merely means prolonging the debt for a few years. He expressed hope that eventually the New York bankers will accept.

The Legislature of Mendoza Province authorized the Governor to negotiate with American bankers for more favorable terms on the 1927 loan of 20,000,000 pesos, diverting the amount saved to salaries and administrative

20,000,000 pesos, diverting the amount saved to salaries and administrative

The Governor's message to the Legislature charges grave irregularities in connection with the loan, not only among legislators when the law was enacted but also among State authorities who placed the loan with bankers. The law authorizing the negotiations states that they are not to be taken as ratification of the loan contracts.

Bolivia Decree Authorizes Seizure of Gold-To Take \$1,551,000 from Banks and Mines for Foreign

The New York "Times" reported the following from La Paz, Bolivia, Dec. 23:

President Salamanca has signed a decree providing for the expropriation to foreign money and gold belonging to the three main banking institutions in Bolivia. The decree is issend under the constitutional provision for drastic action when required by a public necessity.

The money and gold will be used to purchase foreign products needed by Bolivia. The decree sets a quota of \$792,000 for the Central Bank, \$198,000 for the National Bank and \$165,000 for the Mercantile Bank. Mining nterests also must provide foreign money up to \$396,000 through taxes on shipments.

The banks and mines will be reimbursed by bills issued by the Central

The banks and mines will be reimbursed by bills issued by the Central Bank at exchange rates fixed by the bank. The decree follows conferences between bankers and government officials.

State Department at Washington Asked by Former Senator Owen to Inquire into Condition of Colombian Departments and Municipalities with Defaulted Bonds.

A request for a public report on the condition of Columbian departments and municipalities with defaulted bonds was made to Secretary of State Stimson at Washington, on Dec. 27, by former Senator Robert L. Owen (Dem., Okla.), who urged an adjustment to protect United States holders of Colombian internal securities. According to Associated Press accounts from Washington, the former Senator Owen refers back to a Colombian decree of September 1931 establishing the Exchange Control Commission in Colombia, an emergency measure of President Olaya to stop the flow of

the national gold reserve from the country. The Associated Press adds:

While interest payment on the national indebtedness was not affected, service on bond issues of departments and municipalities totaling about \$100,000,000, all held by United States investors, came under the regulatory control of the Commission.

Interest default on these bonds began in December 1931, when the municipal authorities of Medallin was applied to sain paraliaries of the Commission.

Interest default on these bonds began in December 1931, when the municipal authorities of Medellin were unable to gain permission of the Commission to remit payment of interest due on the city's securities. Since that time all issues of this category have been in default, despite the fact that charges are being met on national debentures.

Senator Owen's complaint has its origin in the Control Commission's concession to individual debtors, who have been allowed to export a monthly total of \$150,000 for payment of debts abroad and to pay up to 50% of indebtedness in defaulted bonds at Colombian banks.

Colombian national bonds have been bought through banks in New York by private debtors. These, it was said, are accepted at face value by United States creditors.

In his letter to Secretary Stimson Mr. Owen said:

May I not request that you cause a report to be made of the present condition of the Departments and municipalities of the Republic of Colombia which are now in default to American bondholders and a record of which is in the Department? If not, I shall immediately send you a copy of defaults

It is very important to have a thorough knowledge of the resources, revenues and expenditures being made by the departments and municipalities in default, so as to lay proper foundation for an adjustment of this matter. For that reason there should be a thorough investigation by the Department

of these conditions and of the reasons why there is default.

Permit me to urge upon your attention the importance of having this information fully obtained—so that the American bondholders may be advised and so that a foundation may be laid for an adjustment of this matter a consciling as possible as the control of the matter as speedily as possible.

President Machado of Cuba Accepts \$1,835,000 Advance From Oil Companies.

Havana advices, Dec. 27 to the New York "Times" said: President Machado to-day signed a decree legalizing the \$1,835,000 advance made by the Standard, Mexican Shell and Sinclair oil companies for payment of foreign obligations due Dec. 31. The companies will obtain repayment by charging taxes and import duties against the advance.

With the loan of \$3,100,000 recently made by the Chase National Bank and approximately \$500,000 in United States currency purchased by the Cuban Treasury with gold and revenues now available it is expected Cuba will be able to pay \$8,106,250 amortization and interest on public works bonds which must be met Dec. 31.

It is understood treasury officials have been forced to divert revenues from many departments into the public works funds to accumulate sufficient money to meet the heavy exterior obligations.

Earlier advices in the matter (Associated Press) from Havana, Dec. 2 stated:

Newspapers to-day said that representatives of three oil companies operating in Cuba had agreed in principle with the Treasury Department for the anticipation of taxes on gasoline imports to enable the government to receive \$5,000,000 this month to apply on the \$8,250,000 due the Chase National Bank Dec. 31.

The newspapers differed as to how the anticipation was to be effected, some suggesting the oil companies might advance the money to the Treasury against taxes on 1933 imports, while others believed gasoline supplies for 1933 might be brought in this month.

Cuban Bonds for Salaries.

From the "Wall Street Journal" of Dec. 24 we take the following from Havana:

The Secretary of the Treasury is studying projects for issuance of bonds or certificates of internal debt in order to pay salaries due public employees. He will not state what interest would be paid on the issue, but they would be retired by yearly drawings of \$500,000 to be included in the budget. The Secretary reterated that there will not be any issue or coining of new money.

Cuban House Passes An Eight-Hour Law-Wage-Cutting Penalized.

Under date of Dec. 14 the New York "Times" reported the following from Havana:

An eight-hour law for all employees of commercial establishments in Cuba has been approved by the House of Representatives. President Machado is said to favor the measure.

The bill provides that commercial firms shall open for business at 8 a.m., close from 12 until 2 p. m. for lunch hour and remain open from 2 until 6 p. m. This does not include pharmacies, barber shops, hotels, cafes and public amusements. public amusements.

public amusements.

The law also provides that employees of cafes, hotels, bars and cabarets shall work only eight hours, instead of 14 to 16 hours a day as at present. Corner grocery stores, known in Cuba as "bodegas," which sell both groceries and liquor, will be permitted to open at 7 a. m. and close at 7 p. m.

Commercial houses must have written contracts with employees duly legalized and stamped, and penalties are provided for reduction of wages owing to shortened hours of labor.

Survey of Situation Respecting Latin American Bonds-Expectation of Resumption of Dollar Loans in United States.

Fred Lavis, President of the Latin American Bondholders' Association, has the following to say respecting Latin American bonds:

A year ago at this time external dollar bonds of the Latin American Republics seemed to be drifting towards a morass of moratorium and default. Almost every coupon date brought a new default and there seemed no way to stem the tide. Hearings before the Senate Finance Committee were spreading headlines across the newspapers. There was much agitation, but only sporadic and unrelated efforts towards constructive action.

Salvador Committee Formed.

On March 18 1932 the first definite steps were taken towards constructive On March 18 1932 the first definite steps were taken towards constructive action with organization of a protective committee for bondholders of the Republic of El Salvador. This was the first protective committee formed for the express purpose of inviting the deposit of defaulted Latin American bonds. Events followed rapidly. A second committee was formed on the same situation, the two committees joined forces, a representative of the Republic came to New York to negotiate and an agreement was signed with him the latter part of July, or approximately four months after the first announcement of the committee.

Remittances from El Salvador for the benefit of bondholders under the agreement commenced as of Aug. 1 1932, and the committee recently announced that the Jan. 1 1933 coupon on the first lien bonds would be paid in full, with satisfactory scrip arrangements for the second and third lien

in full, with satisfactory scrip arrangements for the second and third lien bonds. The temporary arrangement affects in no wise the permanent loan contract, but makes only temporary concessions to meet temporary conditions, not to exceed a period of thirty months.

New Committees Organized.

New Committees Organized.

The success of the Salvador committee was followed by the announcement of Peruvian committees and Colombian committees, with other committees in the process of organization.

There are thus to-day definite constructive forces at work under the direction of competent auspices, looking toward temporary readjustment of many of these external dollar bonds of the Latin American Republics, and it now seems certain that a large part of the investment which a year ago seemed irremediably lost may be salvaged.

To close observers the Latin American bond picture to-day presents an aspect as different from that of a year ago as day from night. There is still a long way to travel, but it may be said at this time that the arrows are pointing along the right road.

The cycle may be expected to run its complete course. Too many ollars were loaned in Latin America in too short a time by the American vestors; the bubble broke and for a time it looked as if most of the dollars had been lost; constructive forces during 1932 have ben at work devising the best program for recovery, and to-day the more sanguine look forward to the actual resumption of Latin American dollar loans in this country. All this has been accomplished within a period of time so short as to seem utterly impossible—a brief twelve months—and in the midst of the worldwide depression.

Institute of International Finance Advises Acceptance of Costa Rica Funding Plan.

The Institute of International Finance, conducted by the Investment Bankers' Association of America in co-operation with New York University, on Dec. 28 issued a special bulletin which advises holders of defaulted Costa Rica bonds to accept the funding plan of that Government as the best solution possible under existing conditions.

The Costa Rica plan of payment, which was offered to bondholders prior to actual default on the bonds, called for the surrender of coupons in exchange for funding bonds, the coupons to remain unpaid and alive until the Government may be in receipt of funds making payment possible.

"The fact that the plan was offered to the bondholders prior to the occurrence of actual default on their bonds," stated the bulletin, prepared by Dr. John T. Madden, Director of the Institute and Dean of the New York University School of Commerce, Accounts and Finance, and Dr. Marcus Nadler, Assistant Director of the Institute, "would seem to indicate the desire of the present Government to do the best it can for bondholders under existing conditions." bulletin further says:

The funding plan provides that coupons surrendered in exchange for funding bonds are not to be deemed paid but are to remain alive until funds are received sufficient to pay such coupons in order that the funding bonds may benefit equally and ratably from payments made on the coupons maturing during the period of suspension.

The plan further provides a means of obtaining payment of interest on arrears of interest and of realizing in cash at least a part of such arrears immediately in the event that the bondholder shall elect to sell the funding bonds which he receives under the plan. Therefore the Institute feels that the acceptance by the bondholders of the funding plan appears advisable.

The bulletin explained the cause of the financial difficulty of the Republic of Costa Rica was the failure to scale governmental expenditures to falling revenues. It says:

mental expenditures to falling revenues. It says.

As a result of the decreased purchasing power of the Costa Rican people, governmental revenues, which are derived chiefly from import duties and from the monopoly of alcohol and liquors, declined substantially. As Government expenditures were not reduced as rapidly as revenues declined during 1931, the Government was forced to borrow funds from the banks in Costa Rica practically every month throughout the year in order to pay salaries and other necessary administrative expenses. Finally, in in costa kica practically every month throughout the year in order to pay salaries and other necessary administrative expenses. Finally, in January 1932, when it became apparent that the banks were in danger of becoming overloaded with promissory notes of the Government, Congress authorized the payment of arrears of salaries by means of a new issue of unsecured paper currency and the liquidation of certain credits against the Treasury by means of internal bonds.

Analyzing the predicament in which the present Government of the Republic of Costa Rica found itself, the bulletin explained:

The present Government, which took office in May 1932, felt that it had no choice but to suspend temporarily external debt payments. The Government promptly prepared a law, which was passed by Congress in August, providing for the funding of interest due during a period of three and one-half years on its principal outstanding external dollar and sterling bonds and for the resumption of full service payments on such bonds thereafter.

Among other things, the law provides that during this period the Republic is to continue to include in its annual budgets the amounts

necessary to pay in full the service charges on its external bonds and is to devote those amounts exclusively to the retirement of floating indebtedness incurred prior to Dec. 31 1932.

Although the external funded debt will be increased by the issuance of funding bonds to the extent of approximately three and one-fourth million dollars, or by about 17%, the retirement of an equal amount of floating debt as a result of the above-mentioned provision would leave the total debt position of the country substantially unchanged. Furthermore, to the extent that Costa Rican banks may be placed in a more liquid position by the repayment of their loans to the Government, the internal financial situation should be strengtheed. by the repayment of their loan situation should be strengtheed.

Recurring to the chief sources of governmental revenues, the bulletin says:

The principal revenues are import and export duties and the tax on liquor, which, combined, normally represent an aggregate of approximately 75% of total revenues. Import duties usually represent about 50% of total revenues. During recent years, however, due to the decline in imports, revenue from this source has steadily decreased, amounting to \$3,087,536 in 1931 as compared with \$4,537,250 in 1928, \$4,800,378 in 1929, and \$3,144,831 in 1930. Customs receipts in 1930 were \$2,164,662, or 24% less than the estimated receipts for that year. Collections during the current year are about 10% less than the estimates.

The Government also owns and operates the Pacific Railway, gross revenue from which is included among the general revenues of the Government.

The total public debt of Costa Rica as of Dec. 31 1931 is listed in the bulletin as "\$25,455,809, of which \$18,601,523, or 77%, represented external debt and \$6,854,286, or 23%, represented internal debt. The total debt has increased by \$5,698,863, or by about 29%, from the end of 1927 to the end of 1931."

From the New York "Times" of Dec. 29 we take the fol-

Accepted by a Majority

The American dollar bonds, aggregating \$7,284,000, which are included in the funding plan, consist of the remaining bonds of the issue of \$8,000,000 marketed here in December 1926 by a syndicate headed by J. & W. Seligman & Co. The issue is due on Nov. 1 1951. Holders of \$4,813,500, or about 67%, have already accepted the funding offer. It is understood that funding offers with respect to interest due on July 1 1933 to 1936 on the 5% sterling bonds of 1911 and to the interest due on March 1 1933 to 1936 on the 7½% Pacific Railway dollar bonds of 1927 will be announced It is understood also that the interest due on Jan. 1 on the sterling bonds will be paid out of a reserve fund.

Chinese Have Balanced Budget First Time in 21 Years Finance Minister States.

For the first time in 21 years the National Government has succeeded in balancing its budget, despite world-wide depression, decline in silver exchange, Sino-Japanese dispute, flood relief operations and anti-bandit campaigns in the interior, states the Finance Minister in his annual report brought up to Dec. 15 of this year, according to a radiogram to the Commerce Department from Commercial Attache Julean Arnold, Shanghai. The Department in reporting this on Dec. 23 added:

Other notable achievements of the Nationalist Government, the Minister's report pointed out, were the developments of a consolidated internal revenue system, the conversion of the domestic debt, and reduction of military expenditures, saving some 100,000 yuan in each case.

military expenditures, saving some 100,000 yuan in each case. Significant also are the advances made in a more effective and productive administration of the salt tax, and in the abolition of internal taxes on trade except the interport duties, these latter at present being temporarily continued because of the urgent need for revenue.

That an end has been put to borrowing for current operating expenses to the belief of the Finance Minister, a practice which had been followed since the beginning of the Republic. Because of the improved conditions in the national finances, states Mr. Soong, there has been a continuous rise in the quotations of domestic bonds and Chinese credit abroad has been considerably, enhanced. considerably enhanced.

considerably enhanced.

Regarding obligations other than budget expenses, considerable progress is being made in making up arrears on interest and principal of defaulted payments on loans secured by the salt revenues. In this category are the Hukwang railway bonds. Further progress in making up arrears is anticipated. As for other outstanding railway obligations in arrears, the Tientsin-Pukow Ry's, revenues are now sufficient to partially meet arrears. Earnings of the Peiping-Hankow and Peiping-Suiyuan railways are not sufficient to provide for back payments on their outstanding overdue obligations.

Foreign Concerns Are Pressing Manchukuo Government for Settlement of Claims Incurred by Former Regime in Manchuria.

From Changehun, Manchuria, Nov. 26, the New York "Times" published the following special correspondence in its issue of Dec. 25:

Foreign concerns have been pressing the Manchukuo Government for settlement of claims incurred by the former regime in Manchuria. Although several small claims have been liquidated by the new government, the bulk of the debt, amounting to more than 10,000,000 Mexican dollars, remains unpaid.

remains unpaid.

A committee for the liquidation of claims will be appointed by the State Council of the Manchukuo Government for the purpose of considering the obligations left by the old regime and of recommending a basis of payment. The greater part of the claims are held by Japanese interests. German concerns are also strongly represented and United States business interests have a small stake in the unpaid debt.

A considerable portion of the claims is owing for machinery and supplies ordered for the huge arsenal at Mukden. Much of the material ordered had been shipped to Mukden, at great expense, before the outbreak of Chino-Japanese hostilities, but has never been delivered. Inasmuch as the arsenal—except for one department—has been closed down, the new

Government contends that it has no use for the goods ordered by the previous regime.

Bank of Japan Shifts Representatives in New York and Europe.

The following from Los Angeles Dec. 27 (United Press) is from the New York "Herald Tribune":

Seven representatives of the Bank of Japan were in Los Angeles to-day, en route to New York and European capitals, where they will take over new posts as branch officers. Klyoka Shirane goes to Paris, H.Yad zue to London, S. Kubota and I. Ihara to New York, H. Kanog to Berlin and C. Fukushima and K. Ajchi to London.

Plea for Dismissal of Suit Against New York Stock Exchange Denied-Pirnie, Simons & Co., Inc., Win Point in Action for Damages on "Package Trusts" Ruling.

A motion by Richard Whitney, President of the New York Stock Exchange, and forty Governors of the Exchange, asking Federal Judge John C. Knox to dismiss a suit by Pirnie, Simons & Co., Inc., against the Exchange for \$21,-000,000 damages under the Sherman and Clayton Anti-Trust laws, and for an injunction, was denied on Dec. 20, said the New York "Herald Tribune" of Dec. 21, from which we quote:

which we quote:

Federal Judge Knox's decision holds Mr. Whitney and Governors personally responsible for their actions in their official capacities. The suit was the outcome of rules adopted by the Stock Exchange prohibiting members in the distribution of so-called "package trusts" unless they met certain requirements of the Exchange.

Pirnie, Simons & Co. in their suit alleged that the prohibition was accomplished by a rule requiring the inclusion of not less that a prescribed number of shares in each individual block or package. The plaintiff, through David L. Podell, its attorney, set forth that it had sustained and would continue to sustain great damage as a result of this rule, which the plaintiff alleged to be an act of unfair competition aimed at the plaintiff.

In their motion asking for the dismissal of the suit and for an injunction the defendants moved on two grounds: First, on the theory that in adopting the rule they were performing their proper function as members of the

the rule they were performing their proper function as members of the governing committee in good faith and for the best interests of the Exchange; second, that a person having a grievance against an unincorporated association might sue its officers as such or the members of its governing body individually, but might not seek relief by suing both.

Items bearing on the action appeared in our issue of Sept. 24, pages 2082-2083.

Depreciation Data Given by Reo Motor Car Co. in Listing Application to New York Stock Exchange.

From the New York "Journal of Commerce" of Dec. 29 we take the following:

Further progress in the efforts of the New York Stock Exchange to secure complete publicity for holders of listed securities was indicated in a listing application of the Reo Motor Car Co., approved yesterday. As an integral part of the application to have listed 2,000,000 shares of the company's

new \$5 par stock, there was submitted a completely detailed statement of fixed assets and the depreciation rates therefor, together with the amounts charged under the several schedules.

The company plans to write down its fixed assets \$4,479,766 and to set up a reserve of \$405,545 from the \$9,000,000 to be freed for capital surplus by the reduction of the stock from \$10 to \$5 par. Reo sales for nine months were 5.805 units, against 13.837 for the year 1021 were 5,805 units, against 13,837 for the year 1931.

Year Book of New York Stock Exchange—609 Firm Members Oct. 1 1932, Compared With 642 on Oct. 1 1931-List of Those Holding Membership for Longest Period Includes Name of J. P. Morgan.

The 1931-1932 edition of the New York Stock Exchange Year Book, containing statistical and historical data and other information concerning the activities of the Stock Exchange, was made available on Nov. 29. The new edition, which is printed for the information of officers, members and employees of the Exchange, contains practically all of the information included in previous editions, with the statistics and other material brought up to date. The announcement issued by the Exchange says:

nouncement issued by the Exchange says:

Statistics of the Stock Exchange Building, membership sales, interest rates, brokers' loans, number of shares listed, market value of listed stocks and bonds, and volume of trading are among the tables included in the Year Book, together with lists of the officers and committees of the Exchange, number of committee meetings held, and other general information. A chronology of the Stock Exchange, from its organization in 1792, is a feature of the publication.

The only high record made during the past year was in the number of quotations furnished to members by the Quotation Department, 71,402, on Sept. 13. During the entire month of September a total of nearly 1,200,000 quotations was given out over the direct wire service to members.

A list of the 25 members of the Exchange who have held their memberships for the longest period of time includes, for the first time, the name of J. Pierpont Morgan, who was admitted to membership on April 25 1895. William D. Wadsworth continues to head the list of members in point of seniority, having been elected to membership on May 3 1869. Henry G. S. Noble, a former President of the Exchange, is No. 5 on the list, and John D. Rockefeller (Sr.) No. 6.

Illustrations of different parts of the machinery of the Exchange and an unusual photograph of the floor of the Stock Exchange during an active market session, taken from an educational picture produced by the Exchange, are included.

As to the further information contained in the Year Book, the Exchange states:

the Exchange states:

As of Oct. 1 there were 1,375 members of the Exchange, compared with 1,354 a year ago, but only 609 firms, compared with 642 on Oct. 1 1931.

Branch offices of member firms also declined in number during the past year, the present number being 1,178 as compared with 1,492 on Oct. 1 1931 and 1,658 on Jan. 1 1930. The distribution of these branch offices as of Oct. 1, according to tables contained in the Year Book, was in 348 separate cities in 44 States and territories and in six foreign countries.

There were 2,328 employees of the Stock Exchange and its affiliated companies as of Oct. 1. Bernard Smith, veteran superintendent of the Stock Exchange Building, retains the distinction of being the oldest active Stock Exchange employee, not only in age, but in years of service. He is 76 years old, and has been continuously employed by the Exchange for more than 58 years.

From the Year Book we take the following:

NEW YORK STOCK EXCHANGE MEMBERSHIP.

(As of Oct. 1 1932.)		
Number of members in New York	1,285 90	
Total number of members of Exchange Number of firms in New York Number of firms out of town	521 88	1,375
Total number of Stock Exchange firms Number of member partners New York firms in New York Number of non member partners New York firms in New York	800 1,618	609
Total partners in New York	89 316 687	2,418
Total partners out of town		1,092
Total partners Stock Exchange firms		3,510

The following compilation, comparing the number of members and the mber of firms in New York City and out of town, over the period since 180, shows the constant growth in the number of out-of-town members of firms. The figures are as of Jan. 1 of each year:

Year.	New Yor	New York City.		Town.	Tota	Total.	
rear.	Members.	Firms.	Members.	Firms.	Members.	Firms.	
1880	1.084	358	16	16	1,100	374	
1890	1.030	377	70	60	1,100	437	
1900	975	421	125	100	1,100	521	
1910	1.004	489	96	92	1,100	581	
1920	979	447	121	116	1,100	563	
1925	968	423	132	128	1,100	551	
1926	968	456	132	131	1,100	587	
1927	970	466	130	127	1,100	593

New York Stock Exchange Imposes More Stringent Regulations Governing Speculative Accounts of Employees of Stock Exchange and Those Employed by Members-New Rules Also Affect Gratuities by Members to Employees of Newspapers or Those Publishing News Service.

The Governing Committee of the New York Stock Exchange, at a special meeting on Nov. 30, approved several amendments to the "Rules Adopted by the Governing Committee Pursuant to the Constitution." One of these consists of a new paragraph added to Section 3 of Chapter XIV of the Rules, as follows:

No member of the Exchange or firm registered thereon or partner thereof shall, directly or indirectly, give any compensation or gratuity for services rendered or to be rendered or for any other purpose to any employee of a rendered or to be rendered or for any other purpose to any employee of a bank, trust company, insurance company, or of any corporation, association, firm or individual engaged in the business of publishing any newspaper, news service or statistics or information in regard to securities, or engaged in the business of dealing, either as broker or as principal, in stocks, bonds, or other securities in any form, bills of exchange, acceptances or other forms of commercial paper, without first obtaining the written consent of the employer to the giving of such compensation or gratuity and filing written notice of such consent with the Committee of Arrangements.

With reference to the above the New York "Times" of Dec. 1 said:

The foregoing is believed to have been adopted in response to agitation that arose from the hearings before the Senate Banking and Currency Committee in Washington last spring.

The same paper notes:

Members were forbidden also by the revised rules to carry accounts for any employee of the Exchange or its subsidiaries without first obtaining the written consent of his employer. They were forbidden, also, to carry an account for any employee of a bank, insurance company or other organization dealing in securities without obtaining the employer's consent.

The adoption of these rulings by the Governing Committee on Nov. 30 was announced, as follows, by the Exchange:

Section 7 of Chapter XII of the Rules was amended to read as follows:

Sec. 7. (a) No member of the Exchange or firm registered thereon or partner thereof shall take or carry an account or make a transaction in which an employee of the Exchange, or of any corporation of which the Exchange owns a majority of the capital stock, or of a member of the Exchange, or of a firm registered thereon, is directly or indirectly interested, unless the written consent of the employer has first been obtained.

(b) No member of the Exchange or firm registered thereon or part need shall take or carry a speculative account or make a speculat ransaction in which an employee of a bank, trust company, insurance cany, or of any corporation, association, firm or individual engaged he business of dealing, either as broker or as principal, in stocks, box or other securities in any form, bills of exchange, acceptances, or other forms of commercial paper, is directly or indirectly interested, unless the written consent of the employer has first been obtained.

Section 8 of Chapter XII of the Rules was amended to read as follows:

Sec. 8. No member of the Exchange, or firm registered thereon or partner thereof shall make any transaction in securities with or for any clerk entitled to access to the floor of the Exchange, whether said clerk be his own employee or an employee of a fellow member, either for the account of said clerk or for the account of any other person, without first obtaining the written consent of the Committee of Arrangements. No such clerk shall make any such transaction until this consent has been granted.

New York Stock Exchange to Have Railroads Issue Reports 15 Days Before Annual Meetings.

The following is from the New York "Times" of Nov. 23:

The New York Stock Exchange is taking steps to have railroads comply with the rule that companies issue annual reports 15 days before their annual meetings. Because their accountings are regulated by the Inter-State Commerce Commission, the carriers had more leeway in this respect

State Commerce Commission, the carriers had more leeway in this respect than have other companies.

The Exchange does not contemplate any general canvass of railroad managements to have them change the time of issuance of their reports, but, instead, will call the regulation to their attention when they apply for listings of new securities. Many roads already report in compliance with the regulation. The Baltimore & Ohio, which is not under the Exchange's regulation as to time of annual reports, held its annual meeting on Monday, many months after its annual report was issued.

Among the roads not now subject to the 15-day ruling are the Delaware Lackawanna & Western, Erie, St. Louis-San Francisco, New York Central, Atchison Topeka & Santa Fe, St. Louis Southwestern, and Southern Pacific. Until June, when it was acquired by the Southern Pacific, the St. Louis Southwestern was under the agreement. Among the roads that conform with the agreement are the Great Northern, Atlantic Coast Line and Louisville & Nashville.

Federal Stamp Tax Ruling on Transfers of Stock in Merger-Ruling Given in Prairie Pipe Line Co. Announcement by New York Stock Exchange.

On Nov. 24 the New York Stock Exchange has made public a copy of a letter from the Department of Internal Revenue to a trust company in this city in which it is indicated that where shares of stock are exchangeable for other shares in a different company, and no facilities exist for transfer of the original shares, taxes must be paid on the basis of the number of shares and their par value, of the stock into which the shares in question are exchangeable. We quote from the New York "Journal of Commerce," which also observed:

The stocks to which the letter referred are those of the Prairie Oil & Gas Co., the Prairie Pipe Line Co., and the Consolidated Oil Corp. The Prairie issues are of \$25 and the Consolidated stock is of no par, making the tax different, but since the Prairie transfer offices were closed on the sale of the company's assets to the Consolidated company for Consolidated stock, taxes must be paid on the number of Consolidated shares into which the Prairie stock is exchangeable.

The announcement by the Stock Exchange follows:

NEW YORK STOCK EXCHANGE. Office of the Secretary.

Nov. 23 1932.

To the Members:

To the Members:

The Exchange is advised of the following letter, dated Nov. 16 1932, from R. M. Estes, Deputy Commissioner of Internal Revenue, forwarded to a trust company, copy of which was delivered to this office:

"Receipt is acknowledged of your letter of Aug. 31 1932, wherein you request to be advised in regard to the stamp tax incurred on the transfer of the stock of the Prairie Pipe Line Co. and the Prairie Oil & Gas Co.

"It is stated that the stock of the Prairie Pipe Line Co. and the Prairie oil & Gas Co. has been since 1928 listed on the New York Stock Exchange, and that such stock is of the par value of \$25 per share. During the month of March 1932 both of these companies sold and transferred all of their assets to Consolidated Oil Corp. in consideration of shares of stock in that company issued to and in the name of stockholders of the two selling companies. This transfer was accomplished March 25 1932, and the transfer offices of the two selling companies permanently closed as of that date. The stock of Consolidated Oil Corp. is without par value, and, according to the contract of sale between the two Prairie companies and Consolidated Oil Corp. the only right which holders of outstanding stock of either of the Prairie companies has subsequent to March 25 1932 is the right to have their stock exchanged for a pro rata number of shares of Consolidated Oil Corp. stock. There is no way in which the shares of either of the Prairie companies, as such, can be transferred to the name of a purchaser thereof and new Prairie certificates issued therefor.

"You state that the question has arisen as to what amount of stock transfer stamps should be affixed to the certificates of Prairie stock which are transferred subsequent to March 25 1932 and offered by the purchasers in exchange for shares of Consolidated Oil Corp.

"From the above statement of facts it is clear that after March 25 1932 stock of the Prairie Pipe Line Co. and the Prairie Oil & Gas Co. really represents stock of these two companies is equ

ASHBEL GREEN, Secretary.

Amendments to By-Laws of New York Produce Exchange—One Would Permit Use of Capital Funds to Retire Memberships.

Four amendments to the by-laws of the New York Produce Exchange, approved by the Board of Managers and submitted to the members of the Exchange for ratification at a vote by ballot on Dec. 20, were approved by a large majority vote. The announcement by the Exchange says:

The first amendment creates a special transfer fee of \$100 instead of

(1) Where a member desiring to become an associate member acquires an associate membership certificate, and simultaneously with his application for associate membership thereon submits his resignation as a member, without surrendering his certificate of membership; and
(2) Where an associate member desiring to become a member acquires an associate member acquires an acquires an acquires an acquire an associate member acquires an acquire a

without surrendering his certificate of membership; and

(2) Where an associate member desiring to become a member acquires a membership certificate, and simultaneously with his application for membership thereon submits his resignation as an associate member, without surrendering his certificate of associate membership.

For all other transfers the fee remains as formerly, \$300.

The second amendment gives the Board of Managers power to use capital funds for the purchase and retirement of memberships, while formerly the authority to use funds for that purpose was limited to surplus funds.

The third amendment states that when a broker who is a member of the Exchange discloses information as to actual or prospective sellers or buyers, it shall be deemed unjust and inequitable dealing for the member receiving such information to use same to negotiate directly and thereby interfere with the earning or payment of a commission to the broker, and that any member guilty of such inequitable dealing, in addition to penaltice prescribed by the Board of Managers, shall be liable to the broker for the commission involved.

The fourth amendment removes from the hy-laws a supplication of the member which one half of the supplication as the supplier of the commission involved.

The fourth amendment removes from the by-laws a provision under which one-half of the surplus income in the Exchange general account was

voted to gratuity purp

Members of the four New York commodity exchanges involved in the proposed merger into one large exchange expressed approval of the plan at meetings held last week.

New York Hide Exchange members met on Dec. 23 after the close of the market and, informally, voted unanimously in favor of the merger. Members of the National Metal Exchange met Dec. 22, the National Raw Silk Exchange Dec. 21, and the Rubber Exchange of New York on Dec. 20, and were practically unanimous for the plan. It was announced that the Board of Governors of the four exchanges would meet later to decide upon the dates at which the formal vote will be taken by the members of each exchange on the merger. These meetings probably will be held around the first of February of next year, in order that foreign members of the exchanges may have ample time to send in proxies. The announcement, Dec. 23, also said:

proxies. The announcement, Dec. 23, also said:

After the members of all the exchanges vote their approval of the plan, the next step will be the mechanical consolidation into a single operating unit on one floor. Tentative plans, already under way, insure the speedy accomplishment of this, once the merger has been officially approved.

The proposed name of the consolidated exchange is Commodities Exchange, Inc., and its combined membership will be around 1,000. There will be four trading rings at which futures in six commodities will be purchased and sold—rubber, silk and hides at three rings, respectively, and silver, copper and tin at the fourth ring.

Numerous requests for memberships in the Exchange, in the event that the merger is approved, have already been filed by Stock Exchange and commodity brokerage houses, which are not members of any of the four exchanges involved in the consolidation, it was stated at yesterday's meeting of the Hide Exchange.

The proposed merger was referred to in our issue of

The proposed merger was referred to in our issue of Dec. 17, page 4148.

Trading on New York Curb Exchange in 1932-Year's Operations in Stocks Smallest Since 1923-Curb Market Proved Ability to Cope with Unfavorable News-Bond Department Better Balanced Than Ever Before.

"The New York Curb Exchange has put the year 1932 behind it with few regrets whatever of it having passed," says the "Annual Review" of the Curb Exchange, which states that "the period was another, since 1929, in which great anxiety prevailed over the existing unfavorable economic situation and it was but natural that the mental uncertainties and business inertia should have its resultant effect upon stock market operation." The "Review" coneffect upon stock market operation."

tinues:

Yet, bad as financial and business conditions were, and notwithstanding the making of many new low prices for stocks and bonds, the technical position of the curb market last year exhibited a degree of stability on the decline which contrasted noticeably with the abrupt and drastic movements accompanying the hectic dealings in the three years preceding. While not entirely shock proof, it met adversity with courage, confronting, as it did, additional bank failures, real estate and municipal defaults, weakness in commodity prices, further reductions in wages, continued severe unemployment and persistent hoarding of money. Added to these unfavorable factors was the traditional hesitancy attending upon the outcome of a presidential election and an uncertain foreign debt situation. In short, the curb market proved its ability in 1932 to contend with unfavorable news in better fashion than during any period of the depression and by so doing solidified its technical position to respond to an expected improvement in economic conditions which the whole Nation is striving to bring about in the year ahead.

Evidence of the inactivity which prevailed in stock markets generally during 1932 may be gathered from the volume of dealings on the Curb

Exchange that year. Total transactions approximated 56,000,000 shares as against more than 110,000,000 shares in 1931 and an absolute peak level of over 476,000,000 shares in 1929. In fact, last year's operations in stocks were the smallest since 1923 when they totalled approximately 51,000,000 shares. When the curb market moved indoors in 1921, transactions amounted to 15,500,000 shares in round numbers. The smaller total had nothing to do with the number of issues traded in as they totaled 2,200 issues or practically unchanged from the previous year. The months this year in which dealings assumed normal proportions were August and September, when dealings in stocks ranged over 10,000,000 and 8,000,000 shares respectively.

shares respectively.

It was in these two months—August and September— that bond dealings also showed large totals. Had the summer ratio been maintained, the Curb Exchange would have set up a new record in bond transactions and although dealings may not reach the high total of \$981,297,000 made in 1931—the absolute record—operations in this department this year should exceed the previous record made in 1930 when \$863,541,000 were dealt in,

exceed the previous record made in 1930 when \$863,541,000 were dealt in, thereby being the second best year the Curb Exchange has ever experienced. From January to the end of August, total transactions this year were running ahead of those of the high record year of 1931, but since have dropped off. However, during the month of August this year, the heaviest monthly trading in bonds ever to be experienced on the Exchange occurred when \$147,339,000 worth were dealt in. And on Aug. 23 1932, \$9.715,000 changed hands, which was the record for a single session since the Exchange became an indoor institution.

There are 826 domestic and foreign bonds admitted to trading privileges, a new high record and representing an increase of about 50 bonds over

a new high record and representing an increase of about 50 bonds over the previous year. Taking the bond department by and large, it is better balanced than ever before, what with dealings in individual obligations being heavier and covering a variety of issues prominent in the investment field, whereas a few years ago the aggregate daily total was more or less boistered by a handful of bonds.

boistered by a handful of bonds.

The largest bond trading for any one day in the history of the Exchange occurred on Aug. 23 1932 when \$9,715,000 worth changed hands. The largest day in 1931 was on May 12 when \$6,028,000 were dealt in and the smallest day, May 23, when \$1,970,000 sold. The daily average dealings in bonds approximated slightly more than \$2,300,000. The month of August with \$147,339,000 had the largest monthly volume. Domestic bonds admitted to trading privileges in 1932 numbered 760 against 559 in 1931 and 433 for the same period in 1930. Foreign bonds numbered 68 against 70 in 1931 and 95 in 1930. When the curb market moved indoors in 1921 it had 84 domestic and 29 foreign issues. Bond listings had a par value of \$9,750,000,000, as against \$7,118,884,000 for the corresponding period a year ago, of which approximately \$8,525,000,000 were domestic and \$1,233,468,000 were foreign. The 1932 figures established a new high record. high record.

and \$1,233.468,000 were foreign. The 1932 figures established a new high record.

The heavy shrinkage in the price of securities and in corporate earning power naturally caused a reduction of dividend rates and the passing of some dividends. However, considering such adverse conditions, the number of dividend-paying stocks on the Curb Exchange held up very well, there being 1,226 dividend-paying issues out of a total of 2,201 stocks admitted to trading privileges. At the end of 1931, the total of dividend payers was 1,488 issues. Demand for collateral loans at the money post was in small volume as a result of the trading inactivity. Low rates for call and time money in the outside market also operated against the post, which charges a slightly higher differential. Since it opened in April 1930, approximately \$110.000.000 has been loaned to date.

The Curb Exchange has approximately 130 issues of foreign origin on its trading list and these stocks, in common with the business in domestic securities, were only moderately active. They are in the form of certificates of deposit issued by American banking institutions. The facilities offered by the Curb Exchange for dealings in foreign capital issues is an important development both for American capital and for international finance and it is worthy to record that the experience in handling such business on the floor of the Curb Exchange and its special technique and machinery provided for periodic settlement through its clearing corporation has proved highly important in the development of international stock market operations.

The price of memberships on the Exchange has fluctuated on the down

cet operations.

market operations.

The price of memberships on the Exchange has fluctuated on the down side. At the beginning of 1931, they were selling at \$40,000 but by June 1, a low level of \$16.500 was established. As a result of the increased trading activity which developed during August, the price of seats rose to \$55,000 on Sept. 2, which level proved to be the high for the year. At the end of 1932, seats were quoted around \$30,000. Since the Curb Exchange came indoors in 1921, seats have fluctuated in price from a low of \$3,750 to a high of \$254,000 made in 1929.

Gurnett & Co. Failure-Firm's Composition Offer Confirmed by Federal Judge James A. Lowell.

Further referring to the affairs of the failed brokerage firm of Gurnett & Co. (mail office in New York and branches in Boston and other places in New England), the suspension of which from the New York Stock Exchange on Jan. 5 last was noted in our issue of Jan. 9, page 227, a composition offer of 50% in cash and 50% in notes to creditors of the firm was confirmed by Federal Judge James A. Lowell on Dec. 20, according to a Boston dispatch by the Associated Press on that date, which furthermore said:

Our last previous reference to the firm's affairs appeared in the "Chronicle" of Nov. 19 last, page 3454.

Trends of Bond Markets As Viewed by Halsey, Stuart & Co.-Volume of Bonds in 11 Months of 1932 Approximately \$1,543,000,000 About 43% of Volume of Same Period in 1931—Large Reserves of Liquid Capital May Eventually Seek More Profitable Employment.

Discussing "Present Trends in the Bond Market," T. E. Hough, Vice-President of Halsey, Stuart & Co., says that "in view of the low volume of bond financing during the past year it might be assumed that a substantial volume of

offerings could be expected in the near future," but, it is added, "such a conclusion does not seem altogether warranted. The firm's review of the bond market goes on to say:

There does not appear to be any immediate heavy financing in sight for industrial expansion with many plants operating at very small percentages of their capacities. The utilities, moreover, do not appear in need of new capital in any such amounts as characterized their development during the

capital in any such amounts as characterized their development during the past three decades. Refunding of existing loans, of course, awaits a return of confidence and an upturn in the market.

So far as demand is concerned, the large reserves of liquid capital now lying idle, or put to work at starvation wages, may eventually be expected to grow restless and seek more profitable employment. Banks, for example, can hardly be expected to retain so large a part of their funds in cash, low interest-bearing Government securities, and commercial paper. Institutional, corporate and individual investors should likewise eventually tire of maintaining themselves in an excessively liquid condition. These liquid resources should grow increasingly restless once the atmosphere has become cleared of the disturbing factors which have caused such widespread lack of confidence with its resultant struggle for liquidity.

When that time comes, it appears likely that high-grade, so-called "giltedge" bonds will first feel the stimulus, and that gradually the demand should seep down and improve the position of other sound but less widely known issues. For despite the unusual conditions prevailing throughout the year and the fact that some bonds encountered difficulties, bonds as a class clearly demonstrated their strength and suitability for conservative

clearly demonstrated their strength and suitability for conservative

In part, the review also says:

A struggle for liquidity and continued deflation in commodity and security values, even greater than in 1931 and not confined to the United States alone but world-wide, were the basic factors dominating the bond market of 1932.

market of 1932.

At bottom, this struggle for liquidity was a natural consequence of wide-spread lack of confidence so strong at times as to approach panic proportions. The public mind was swayed by vague fears for the future. Although such lack of confidence probably cannot be justified, it can easily be understood when one considers the events and conditions that engendered it.

In part, it arose from the uncertainties attending the possibilities of unwise Congressional action early in the year, the agitation for cash payment of the bonus, the drain upon our gold reserves and the ungrounded fears expressed in some quarters that we might be forced off the gold standard, the economic hesitation attending an unusually strenuous Presidential campaign, and finally the uncertainty surrounding the war debt situation. Confidence is the very foundation of our system of money and credit, and its disappearance set in motion a succession of forces which simply accentuated the existing difficulties and created still greater lack of confidence.

Bond Demand Restricted by Struggle for Liquidity.

Bond Demand Restricted by Struggle for Liquidity.

The struggle for liquidity was reflected in the panicky hoarding of money, and even gold, to an estimated amount of \$1,600,000,000 at the peak of the crisis last June. This meant a restriction of credit from five to 10 times as great, since one dollar in currency is usually credited with supporting from five to 10 dollars in credit. The mad scramble to convert a vast aggregate of assets into a relatively small amount of cash available could only be done at an enormous sacrifice in values. Consequently prices declined, which caused still less confidence and aggravated the entire situation situation.

clined, which caused still less confidence and aggravated the entire situation.

The increased momentum of the hoarding movement was arrested by a nation-wide educational campaign coupled with the offering of 2% "baby bonds" by the United States Treasury to satisfy the public demand for unquestioned safety. Although the reported \$28,000,000 subscribed for these "baby bonds" may seem small as compared with the total volume of hoarding, the amount was encouragingly large since decidedly less emphasis was placed upon their sale than upon halting the hoarding movement.

Closely allied to the hoarding mania were the runs made upon banks. Banks were forced to keep a large part of their assets highly liquid in order to meet the possibility of unreasoning demands from depositors. This demand for liquidity on the part of banks quite naturally set in motion other forces which depressed the spiral of deflation down through still lower levels. Security portfolios were liquidated to provide cash or short-term United States Government obligations. In much of 1932, banks were practically out of the market so far as most corporate bonds were concerned. Insurance companies, which usually absorb substantial amounts of bonds, also practically withdrew from the bond market in 1932, since they were required to divert a large part of their current funds into policy loans. It seems altogether reasonable to assume that when the abnormal demands subside for policy loans and surrender of policies against cash values, the demand for bonds by insurance companies should make itself felt upon the market.

Bonds were also bought in smaller amounts by corporations for reserve

Bonds were also bought in smaller amounts by corporations for res

purposes. Here, too, the aim was to keep surplus funds as liquid as possible in order to provide working capital in the event of business revival, or for any contingencies or foreseeable demands that might arise.

In short, the usual sources of demand for bonds—individual investors, insurance companies, banks and corporations—were primarily concerned with keeping themselves liquid. Liberal rates of return upon less marketable securities generally failed to attract investors.

Low Money Rates and Good Demand for Governments.

Low Money Rates and Good Demand for Governments.

This situation was reflected in very low money rates throughout the year. The volume of prime commercial paper was restricted in view of the small amount of business being done, and with a heavy demand for such paper generally, and more particularly by the Federal Reserve banks until the Glass-Steagall Act eased the situation, the rate of return on such investments reached ridiculously low and virtually artificial levels.

Although this credit situation would ordinarily have provided a solid foundation for a rise in the general bond market, it influenced only such "ultrahigh-grade" issues as very strong bonds of operating public utilities with no early maturing debt and with earnings covering interest charges by wide margins, some of the strong underlying raffroad bonds, certain industrial issues fortified by exceedingly large cash and liquid reserves, and high-grade municipal obligations.

The struggle for liquidity, of course, was partly responsible for the ease with which the United States Treasury could do its large volume of financing throughout the year. The open market and easy money policies of the Federal Reserve banks also lifted some of the weight from the market not only on Treasury issues but also on high-grade corporate and municipal bonds as well.

The demand factors just outlined explain in large measure the large

not only on Treasury issues but also on high-grade corporate and municipal bonds as well.

The demand factors just outlined explain in large measure the low volume of corporate and municipal offerings throughout the year as contrasted with the large volume of new financing by the Treasury.

During the first 11 months of 1932 new Treasury financing aggregated over three billion dollars. This colossal figure does not include funds

raised for retiring maturing debt, but represents additional capital needed for meeting fiscal deficits and the requirements of the Reconstruction Finance Corporation. It was about twice the volume of all other bond financing done during the same period, more than five times the volume of corporate bonds offered, and over four times the volume of municipal financing.

Offerings 43% of 1931 Volume.

Offerings 43% of 1931 Volume.

The total volume of all bonds other than Treasury issues offered during the first 11 months of 1932 was approximately \$1,543,000,000, which is about 43% of the volume during the corresponding period of 1931 and compares with a reported total of \$3,672,000,000 for the full year 1931 and an average of about \$5,795,000,000 for the five preceding calendar years.

The volume of municipal bonds offered during 1932 compares more favorably with the preceding year. The total for the first 11 months of the year was reported as \$723,000,000, or about 60% of the corresponding period in 1931. The 1932 total does not include advances made by the Reconstruction Finance Corporation. The total volume of municipal offerings during 1931 was approximately \$1,250,000,000, and the five-year average \$1,418,000,000.

The municipal market was stimulated somewhat since last March by higher surtax rates on incomes. Adverse factors included the low rate of tax

The municipal market was stimulated somewhat since last March by higher surtax rates on incomes. Adverse factors included the low rate of tax collections and excessive Governmental expenditures in some localities. Buyers of municipal bonds were more than usually inclined to scrutinize closely the rate of tax collections and cost of government in appraising value. The widespread demand for economy in government should eventually improve the position of many municipalities, and it is a move in the right direction, but much still remains to be done in substantially decreasing the cost of government, stimulating tax collections, and easing the tax burden. Corporate bond offerings during the first 11 months of 1932 amounted to only about \$596,000,000, and of this total approximately \$297,000,000 represented refunding of existing indebtedness. The 1932 volume of corporate bonds was only about 27% of the previous year and 17% of the average volume for the five previous years.

Public utility bonds accounted for almost 90% of all the corporate bonds offered during the year. The 11 months' total was reported as \$529,000,000, of which approximately \$267,000,000 represented new capital. The 1932 volume of public utility senior financing was about 43% of the volume in 1931 and 38% of the average during the five-year period 1927-31.

the volume in 1931 and 38% of the average during the five-year period 1927-31.

By and large, the record of the public utility operating companies during the past three years has been such as to merit them the confidence of conservative investors. Earnings were more stable than in most other major industries. Kilowatt hour consumption, for example, has been only about 10% under 1931. More widespread recognition among investors of the strength and stability of well managed utility properties accounts in part for the large proportion of utility bonds offered during the year as compared with any other corporate classification, and the relatively better market performance of this class of securities.

Railroad bonds were offered in 1932 in about 9% of the 1931 volume and 7% of the 1927-31 five-year average. The total for 11 months was reported as \$46,000,000, of which only about \$13,000,000 represented new capital. Many railroads, however, were aided by the Reconstruction Finance Corporation, and also by the Railroad Credit Corporation, which handled the revenues derived from the moderate increase in freight rates permitted by the Inter-State Commerce Commission.

Th volume of new industrial bonds in 1932 almost declined to the vanishing point, running less than 2% of the 1931 volume. Real estate bonds offered during the year were only about 6% of the previous year's volume, and less than 2% of the 1927-31 average. There were no foreign corporate or Government issues with the exception of Canadian Government issues aggregating about \$66,000,000 during the first 11 months.

The struggle for liquidity not only curtailed the demand and supply of new offerings, but also seriously affected many issues which had previously been distributed. With net earnings reduced to very low levels, and in some cases disappearing entirely, an unusually large number of companies encountered difficulties in their efforts to meet payments on interest and principal as they fell due. Usual sources of credit, including banks and investors,

for the securities of such companies

for the securities of such companies.

Most corporations quite rightfully depend in part upon credit to finance their fixed investments and current operations, and when such credit was denied them they not infrequently found it necessary to default. The repercussions from these defaults simply added to the existing difficulties and intensified the struggle for liquidity. Such defaults, it should be added, do not reflect upon the merits of bonds as a class, nor do they necessarily indicate that the issue that encounters difficulties was not inherently sound and a good investment at the time it was originally offered. In many cases they were simply the consequence of a depression the depth and duration of which nobody could foresee. which nobody could foresee.

Dawes Bank Retiring Loan of \$86,000,000-Interest Charges It is Said Have Been Promptly Met By Central Republic Bank & Trust of Chicago and \$18,000,000 of Principal Returned.

The following (United Press) from Chicago, yesterday (Dec. 30) is from the New York "World-Telegram":

The Central Republic Bank & Trust Co., known as the Dawes Bank, because of the association of Brigadier General Charles G. Dawes, is repaying the Reconstruction Finance Corporation loan of \$86,000,000 as liquidation progresses, it was learned to-day.

The Bank has met all interest charges and in addition has retired "between \$15,000,000 and \$18,000,000" of the principal, so far.

The money was loaned by the R. F. C., of which Dawes was formerly Chairman, to help the Bank meet a crisis. This done, the officers, decided to wind up the institution's affairs and liquidate. Dawes now is head of the City National Bank, organized since then.

Jerome J. Hanauer Retires from Kuhn, Loeb & Co.-Elisha Walker and Hugh Knowlton New Partners.

Hugh Knowlton, formerly a Vice-President of the International Acceptance Bank, on Jan. 1 will become a member of the banking firm of Kuhn, Loeb & Co., it was announced on Dec. 29. The announcement (says the New York "Journal of Commerce") gives official confirmation to the admission into the firm of Elisha Walker and the resignation of Jerome J. Hanauer.

The statement reads as follows:

Kuhn, Loeb & Co. announce that on Jan. 1 1933, Elisha Walker and Hugh Knowlton will be admitted to partnership in the firm.

At the end of this year, Jerome J. Hanauer will retire as general partner. He will continue to make his offices with the firm.

The "Journal of Commerce" also said:

Mr. Knowlton graduated from Harvard Law School in 1921, after which he practiced law in New York City with the firm of Appleton, Butler & Rice, now Appleton, Rice & Perrin, of which he became a partner in 1924. In 1926 he left that firm to become Vice-President of the International Acceptance Bank, formed in 1921 by Paul M. Warburg, and later Vice-President of the International Manhattan Co., the securities affiliate of the Manhattan Co. group. During this period he was also Vice-President and director of the American & Continental Corp., and a director of Union American Investing Corp. and Canadian International Light & Power Investments, Ltd.

From the New York "Times" of yesterday (Dec. 30) we quote:

The retirement of Mr. Hanauer, one of the senior partners of the banking house, leaves Felix M. Warburg and Otto H. Kahn as its oldest members from the point of view of service. Mr. Hanauer entered the firm in 1912, and Mr. Warburg and Mr. Kahn in 1897.

Rumors that Mr. Kahn planned to retire from the firm were again

Rumors that Mr. Kahn planned to retire from the firm were again vehemently denied yesterday. It was said he intended to sail soon for a vacation in Europe and that it was expected that he would be back at his desk in a month or two in the best of health.

Mr. Walker's banking career dates from 1904, when he entered the employ of William Salomon & Co., subsequently becoming a partner in 1909. In 1920, when the firm was merged with Blair & Co., Inc., he became President and Chairman of the board. In 1929, when Blair & Co., Inc., became an integral part of the Bancamerica-Blair Corp., the security affiliate of the then Bank of America, Mr. Walker headed the corporation. Later he headed the Transamerica Corp., which controlled the bank, and remained in that post until control of Transamerica was regained by its founder, A. P. Giannini.

Members of the firm, in the order of their admission, are as follows: Felix M. Warburg, Otto H. Kahn, George W. Bovenizer, Lewis L. Strauss, Sir William Wiseman, John M. Schiff, Gilbert W. Kahn, Frederick M. Warburg, Benjamin J. Buttenwieser, Elisha Walker and Hugh Knowiton.

The proposed year-end changes were referred to in these

The proposed year-end changes were referred to in these columns Nov. 19, page 3440.

Governor-elect Lehman of New York to Quit Bank Connection.

In its issue of last night (Dec. 30) the New York "Sun" said:

Governor-elect Herbert H. Lehman will terminate a 24-year connection with the banking firm of Lehman Brothers on Jan. 1 as he takes over the Governorship. He became a member of the firm in 1908 and at present holds a special partnership which he took over when he became Lieutenant-Governor in 1929. Prior to that he had been a general partner. He resigned from a number of directors' boards when he took office.

The Lehman firm was founded by his nucles and his father. Mayor

The Lehman firm was founded by his uncles and his father, Mayer Lehman, in 1852. Prior to joining the organization, Mr. Lehman was Vice-President and Treasurer of the J. Spencer Turner Co., textile manufacturers. He never was a director of the Lehman Corp., an offshoot of Lehman Brothers, since he was in public office when it was incorporated

Mr. Lehman served as a member of the committee appointed in 1913 to revise the banking laws of the State. Under his Chairmanship, a finance, budget and revenue committee appointed by Mayor Walker surveyed the city's finances from 1926 to 1928. In 1926 he managed Alfred E. Smith's

American Banks and Industrial Corporations Would Greatly Benefit by Closer Contacts with British Markets, According to Rudolph Guenther.

The suggestion that American banks and industrial corporations can greatly benefit by closer contact with British markets is made by Rudolph Guenther, Chairman of the Board of Albert Frank-Guenther Law, Inc., one of the country's largest advertising agencies. "There is a vast opportunity for our American financial and industrial enterprises to obtain the investment support of Britishers," Mr. Guenther said. "This thought has been impressed upon me in various interviews which I have had in London banking and publishing circles. England knows relatively little concerning our American investments, and even in the boom years the list of American securities in which the British investors took an active interest was limited to a comparative few of our leading corporations. It is largely up to us in America to see that this interest is created, and, of course, one of the ways in which this can best be done is by truly informative advertising in Great Britain." Guenther further observes:

Guenther further observes:

"The growth of New York as a leading world financial center has been extraordinarily rapid, but we are still lacking in the vast experience possessed by the much older nation. Great advantage could be gained by a combination of the modern American spirit of progress with the traditional British conservatism and stability in times of crisis. I believe that if there were a larger British interest in American securities, the influence of this in our own markets would be of great value as a stabilizing factor. "During the past few years the British attitude toward world conditions, based on the perspective given by the lessons of the past, has proved its accuracy unmistakably.

"I have observed this accuracy of British perspective as regards world conditions and their causes with much interest. For example, many knowing British corporations and investors were getting out of American securities before most Americans were fully cognizant of what was happening in 1929.

"The more foresighted of British investors are showing a revival of interest in a few of our leading investment issues. This interest is limited as yet, but it is capable of further stimulation if the attraction of many of our present high yielding securities can be properly put before the British investing public. In Great Britain, now, money is cheap and there is an undoubted shortage of sound investments offering really attractive yields.

"We can learn and profit by closer contact with the British market; particularly can we broaden our markets and thus make progress towards eliminating the violent and extreme movements which have characterized our securities markets in the past."

New York Bank Stock Prices Rose 14% During 1932.

New York City bank stocks, on the average, are now 14% higher than on Jan. 2 1932, according to Hornblower & Weeks, who, in a review of the bank stock market of 1932,

state:

Between Jan. 2 and March 9 there was an advancing bank stock market. The "American Banker" index for 17 stocks moved up from 38.6 to 45.6—a gain of 18.1%; in the same period the Dow-Jones averages moved up 14%. The "run" on the United States by certain European countries then started, and between March and June our monetary gold stock declined from \$4,390 millions to \$3,919 millions. Coincident with this "run" on our gold supply there was an abrupt decline in the market. Between March 9 and the all-time record low of May 31 there was a drop of 47.5% in the bank stock averages; the low for the industrials was on July 7 when the averages were down 53% from March levels.

Beginning July 6, there was recovery in the bank stock market, and between that date and Sept. 7 the "American Banker" averages had advanced exactly 100%. An intermediate decline then set in, caused largely by the war debts uncertainty, and there was a loss of 27% of the advance. On Dec. 19 the bank stock averages were approximately 73% above the July lows, 3.6% below the March high, and about 14% above the prices of Jan. 2 1932. Nothing would seem to be more certain than that the advance which was beginning to get under way last spring, and was interrupted by the financial panic, will be resumed now that the period of banking uncertainty is over.

ertainty is over.

uncertainty is over.

Important bankers, the firm points out, believe that the middle of June will prove to have been the historic date of the end of the great Bear Market of the 1930's. The "run" on the United States was met by the New York banks, which bore the brunt of the attack, and in June it was broken. In July the return flow of gold had begun and has continued, with varying intensity, since then until to-day our monetary gold stock is back where it was before the outflow started. The outward flow last spring caused the greatest financial panic in our history; bank stock prices fell to all-time lows; the importance of the return flow should not therefore be minimized. If the New York banking structure proved itself impregnable last spring, it is doubly so now. The credit structure is proportionately strengthened and greater confidence has developed.

Representative McFadden Deposed as Secretary of the House Delegation of Republican Members— Banned from Meetings—Action Due to Attacks on President Hoover.

Representative McFadden, of Pennsylvania, was read out of the Republican Party on Dec. 21, so far as that procedure is within the power of his fellow Republican members from his home State (Pennsylvania). We quote from the Phila-delphia "Public Ledger," which in a Washington account Dec. 21 also said:

Meeting behind closed doors this morning, the Pennsylvania Republican delegation determined to exclude Representative McFadden from their future meetings and to refuse to recognize him as a Republican in such matters as Committee assignments and party here.

This action was taken because Representative McFadden Dec. 13, introduced a resolution to impeach President Hoover, and was rebuked when the

House voted immediately and overwhelmingly to lay his resolution on the

House voted immediately and overwhelmingly to lay his resolution on the table.

By the action of his Pennsylvania colleagues to-day, Representative McFadden faces the loss of his position as ranking minority member of the powerful Committee on Banking and Currency, of which he was Chairman during the period of Republican control of the House.

By declaring that he is not a Republican, the Pennsylvania delegation will refuse to put forward his claims to party Committee assignments when they are being made at the outset of the next session. Such assignments are seldom made without the approval of the member's own delegation. In addition to stripping him of this influential post, which entitles him to membership on conference committees considering banking legislation, the ban put upon him to-day will prevent the delegation from recommending him for any other Committee assignments.

Before reading Representative McFadden out of the party the delegation deposed him as its Secretary, a post he has held for several years. His resignation had been demanded by the delegation the day he offered his impeachment resolution, but the demand had not been compiled with. To-day the delegation, by unanimous vote, declared the office of Secretary vacant and elected Representative Swick of the 26th District to fill it.

The disciplinary measure resorted to in declaring Representative McFadden no longer a member of the Republican Party is the most drastic action

The disciplinary measure resorted to in declaring Representative McFadden no longer a member of the Republican Party is the most drastic action within the power of the delegation. No further step could be taken short of a motion in the House calling for censure or expulsion.

First Step Since 1924.

First Step Since 1924.

Depriving a member of his party status is a procedure rarely resorted to. The last notable instance was in 1924, when Senator Brookhart of Iowa, and the late Senators La Follette, of Wisconsin, and Ladd, of North Dakota, were deprived of thier Committee assignments by Senate Republicans. Brookhart, Ladd and La Follette had refused to support the Coolidge-Dawes ticket in the campaign of that year and La Follette had headed a third party ticket in opposition.

The exigencies of a dwindling Republican majority in the Senate later resulted in restoring those Senators to their party status, but in the case of Representative McFadden no such contingency is in prospect. The Republicans are in such a hopeless minority in the next Congress that it will make no difference from a party standpoint whether he is included or not. Consequently, it is regarded as unlikely that the Republican organization in the House would feel impelied to seek a change in the decree of the delegation to-day. egation to-day.

It is understood the action of the Pennsylvania delegation to-day unanimous. Representative McFadden did not attend the meetialthough notified that it would be held.

Directors of Federal Reserve Bank of St. Louis Announce Election of Branch Directors.

According to announcement Dec. 22 of John S. Wood, Chairman of the Board of the Federal Reserve Bank of St. Louis, the directors of the parent bank have elected the following branch directors to succeed those appointed by it whose terms expire at the end of this year:

For Louisville Branch—Wm. R. Cobb, Louisville, Ky., for three years, and John T. Moore, Louisville, for one year.

For Memphis Branch—Willis Pope, Columbus, Miss., for three years, and W. H. Glasgow, Memphis, for one year.

For Little Rock Branch—Stuart Wilson, Texarkana, Ark., for three years, and A. F. Balley, Little Rock, for one year.

The Federal Reserve Board has appointed the following branch directors to succeed its appointees whose terms expire at the end of this year:

For Louisville Branch—W. R. Cole, Louisville, Ky., For Memphis Branch—Wm. Orgill, Memphis, Tenn. For Little Rock Branch—G. H. Campbell, Little Rock, Ark. Each was appointed for a three-year term.

The Board of Directors of each branch consists of seven members, four of whom are appointed by the Federal Reserve Bank in St. Louis, and three by the Federal Reserve Board in Washington. The Managing Director is elected annually, while the other six directors serve for terms of three years each.

Federal Reserve Board's Review of Banking Conditions—Recent Price Movements—Loss of Income of Industries Reflected in Price Declines and Decrease in Activity.

Recent price movements are dealt with in the December number of the Federal Reserve Bulletin incident to the Board review of banking conditions. In surveying price fluctuations the Board states that "loss of income as between different industries has reflected in varying degrees the decline in prices and the decrease in the volume of activity." The Board notes that "in agriculture the price decline has been the major cause of loss of income, while in the ralroad industry . . . the drastic decrease in the volume of operations has been the most important factor." The Board's review for the month follows:

Current Banking Developments.

Current Banking Developments.

During November there was a continued growth in the stock of monetary gold, which at the end of the month totaled \$4,340,000,000, showing an increase of \$430,000,000 from the low point in the middle of last June. Changes in currency demand have been in relatively small volume and seasonal in character. Funds arising from accessions to the gold supply were utilized in part in meeting the seasonal demand for currency, and in part in a further reduction of member bank indebtedness to the Reserve banks. There was also a further growth of member bank reserve balances and the excess reserves of member banks fluctuated around the \$500,000,000 level. There was no change in Federal Reserve Bank holdings of United States Government securities. Loans and investments of reporting member banks in New York City continued to increase, while at reporting banks outside New York City there were declines both in loans and investments. Money rates in the open market declined further in November or early December, the rate on bankers' acceptances being reduced to the lowest level on record. to the lowest level on record.

Recent Price Movements.

In October there was a further recession in wholesale commodity prices, and in November the general level of prices fluctuated at about the low levels of early summer, approximately one-third below the average level of 1923-29. Price advances in July and August, as well as the subsequent decline, reflected largely movements in the prices of farm products, foods, textles, hides, and leather products. Prices of metals and metal products, building materials, chemicals and drugs, and fuel and lighting showed relatively little change, while prices of house furnishings declined throughout the period.

Reviewing the course of commodity prices at wholesaie during the first 10 months of 1932 as a whole, it appears that declines during the current year have been smaller than in either of the two preceding years. This is illustrated by the chart (this we omit—Ed.) which compares recent changes in the monthly index of wholesale commodity prices computed by the Bureau of Labor Statistics with those that occurred during each of the three preceding years. The sharp price decline after September 1929 was in marked contrast to the relatively smaller fluctuations which characterized the preceding six years, and the latest year, 1932, has also witnessed relatively less change in the price level. The greater part of the price decline of the last decade, therefore, was concentrated in the two years 1930 and 1931. years 1930 and 1931.

Price Declines by Groups of Commodities.

Price Declines by Groups of Commodities.

All the major groups of commodities distinguished in the classification of the Bureau of Labor Statistics have shared in the price decline of recent years, but there has been little uniformity in the extent of the decline. This is shown in the table, which compares the average level of the Bureau of Labor Statistics index during the first 10 months of 1932 with its average for 1929, and also shows the extent to which prices of the different major groups of commodities which compose the index have shared in the general decline. The table brings out the fact that prices of commodities which enter the fuel and lighting group have declined since 1929 by less than one-sixth, whereas prices of commodities in the farm-products group have declined by more than one-half. Prices of commodities in the three groups of foods, textiles, and hides and leather products have also declined more than the general average, while prices of commodities in the other five groups—metals and metal products, house furnishings, chemicals and

scellaneous products, and building materials—have shown smaller declines than the general average.

WHOLESALE COMMODITY PRICES (1926=100).

	Average of Year 1929.	Average of 10 Mos. 1932.	Percentage Change.
Fuel and lighting	83.0	70.3	-15.3
Metals and metal products	100.5	80.4	20.0
House furnishing goods	94.3	75.3	-20.1
Chemicals and drugs	94.2	74.0	-21.4
Miscellaneous	82.6	64.6	-21.8
Building materials	95.4	71.7	-24.8
All commodities	95.3	65.3	-31.5
Hides and leather products	109.1	73.7	-32.4
Textiles	90.4	56.4	-37.6
Foods	99.9	61.4	-38.5
Farm products	104.9	48.8	53.5

There have been large differences in price changes, furthermore, between individual commodities within the major groups. In the farm-products group the average level has declined by over 50%, while prices of cotton and many other commodities have declined by greater amounts. In the fuel and lighting group, on the other hand, the average level of the group as a whole has declined less than for other groups, and prices of coal, coke, electricity, and gas have shown an even smaller change than the group as a whole. The greater part of the price movement in this group has reflected wide movements in the prices of products of the petroleum industry. industry.

Prices of Raw Materials and of Finished Goods.

Prices of Raw Materials and of Finished Goods.

Price declines, especially when they are characterized by wide variations between different commodities and classes of commodities, are reflected in large changes in the competitive position of different industries and in the income or purchasing power of different classes of the community. The marked weakness in prices of farm products and most other raw materials, which has characterized the price situation since the beginning of the depression, has been reflected directly in a sharp reduction in the income of producers of these commodities and in the purchasing power of these producers in world markets. ers in world markets

these producers in world markets.

Declines in prices of finished products have followed the decline in prices of raw materials in some industries, thus exerting an influence toward sustaining the market for these commodities by making them available to consumers at lower prices. The degree to which prices of finished products have declined has depended in part on market conditions and in part on the extent to which the cost of raw materials has entered into the cost of the finished product, as compared with labor, overhead, and other costs.

In general, wholesale prices of finished products have fluctuated less widely than prices of the raw materials from which they are made. This relationship is illustrated on the chart which compares, for four different widely than prices of the raw materials from which they are made. This relationship is illustrated on the chart which compares, for four different groups of commodities, changes in the prices of raw materials with changes in the prices of finished products produced mainly or largely from these materials. The four groups are selected foods, textiles, leather, and iron and steel products. In each case the comparison is made in terms of index numbers with the average for 1929 as 100. The chart shows that changes in prices of foods, textiles, and leather products, which have been relatively large, have all accompanied even greater changes in the prices of the raw materials from which they are manufactured. In the case of the selected foods, comparing October 1932 with the average for 1929, there has been a decline of about 42% in the prices of the finished products as compared with a decline of 60% in raw foodstuffs. Textile products have declined about 37%, as compared with a decline of 64% in the price of raw textile materials, and in the case of leather products the corresponding declines have been 27% and 56%, respectively. The only raw material whose price is shown in the iron and steel group is scrap steel, since coke and iron ore, the other important raw materials entering into the production of iron and steel products, are not purchased extensively in the market, being produced largely by the manufacturers of iron and steel products themselves. Prices of finished iron and steel products included in the index have declined by about 16% since 1929, while steel scrap, which is ordinarily subject to wide fluctuations, has declined by about 60%.

Price Decline in Relation to Income.

Price Decline in Relation to Income.

scrap, which is ordinarily subject to wide fluctuations, has declined by about 60%.

Price Decline in Relation to Income.

Loss of income as between different industries has reflected in varying degrees the decline in prices and the decrease in the volume of activity. In agriculture the price decline has been the major cause of loss of income, while in the railroad industry, for example, the drastic decrease in the volume of operations has been the most important factor. It is not possible, on the basis of existing information, to present a comprehensive analysis of changes in incomes of different classes of the community. The left-hand section o the chart [this we omit—Ed.] however, compares changes in gross income of three of our largest industries—construction, agriculture, and railroads; while the right-hand section compares changes in the aggregate payrolls of wage earners in the production of two classes of manufactures—durable goods and non durable goods. The figures relate to the period 1928-32 and are on an annual basis, with 1929 taken as 100. The chart shows that declines in income since 1929 for these groups have ranged from 47 to 76%. The decline in gross income of railroads, amounting to 50%, has reflected a decrease in the volume of freight carried rather than changes in rates. The decline in the gross income of agriculture, on the other hand, amounting to 56%, has reflected almost wholly price recessions, the aggregate physical volume of agricultural output having shown little change over the period. In the case of the construction industry, gross income, as measured by changes in contracts awarded as compiled by the F. W. Dodge Corp., has declined by 76% since 1929. This decline reflects in some part lower construction costs but is predominantly due to the present inactive state of building.

Decrease in income of wage earners since 1929 has been as severe in many manufacturing industries in which changes in the price of the product have been small as in industries in which price readjustment h

Summary.

Wholesale prices in the first 10 months of 1932 have been relatively more stable at the low level to which they had declined during the preceding two years. The general average of wholesale prices at the present time is about one-third below the average of 1923-29, but the extent of

decline varies considerably for different groups of commodities and for different commodities in the groups. In general, prices of finished products have declined less than prices of raw materials.

Loss of income by persons connected with the different industries has been due to a varying extent to declines in prices and to recession in activity. In agriculture, for example, the loss of income has been due almost entirely to the decline in prices of farm products, while in the construction industry, among others, reduced activity has been a more important cause of reduction of income than the decline in prices.

Insurance on Time Deposits in Federal Reserve Member Banks Advocated by Senator Vandenberg.

Legislation to regulate and insure "time deposits" in banks in the Federal Reserve System is advocated by Senator Arthur H. Vandenberg (Rep.) of Michigan, as a means of preventing hoarding, creating confidence and relaxing credit. In a statement issued on Dec. 26, Senator Vandenberg declared he is "irrevocably opposed to a general Federal guaranty of bank deposits." The Senator proposed to create a gigantic fund for the protection of time deposits and to distinguish from demand deposits. Associated Press accounts from Washington on Dec. 26 also said:

counts from Washington on Dec. 26 also said:

The Michigan Senator would define time deposits as those turned over to a bank for at least 90 days and insure them up to 75% through a Federal "time deposit insurance fund."

"Such a system, if practicable, would end 95% of the threat of 'runs,'" he said. "By properly classifying 'time deposits' it would make an enormous but unestimated further contribution to the loans ble resources of the banks. By creating a new measure of security it would invite \$1,000,000,000 out of hoarding. There are countless other profound advantages."

Mr. Vandenberg said a Federal guarantee of bank deposits would "reduce all banking to a dead level where reckless bankers could bid for confidence on a parity with sound bankers," and asserted the mass of individual deposits is in savings and certificates.

"It is in this group that mass hysteria generates the 'runs' which may wreck perfectly solvent institutions," he added. "It is here that mass tragedy occurs, with attendant social as well as economic wrench, when banks close."

Under the Vandenberg proposal the fund would be created by an appro-

banks close." Under the Vandenberg proposal the fund would be created by an appropriation of \$125,000,000 from the Treasury; the addition of one-fourth of the annual surplus of the Federal Reserve system, and an annual tax of one-eighth of 1% on all time deposits in member banks.

Senator Vandenberg's statement is taken as follows from

the "United States Daily": I favor the earliest possible adoption of the pending Glass bill, properly safeguarded, and its corrective principles as applied to certain phases of

safeguarded, and its corrective plants.

Thereafter, another fundamental problem remains for attention; Namely the conslusive safeguarding of time deposits. Related to this problem is the need to protect banking itself against so-called "time deposits" which are, in fact, "demand deposits."

Claimed to Prevent Hoarding.

As a successful answer to this joint problem would do more to prevent hoarding, and to create confidence, and to relax credit than any other possible contribution to our banking structure.

I have introduced a tentative measure which addresses this purpose. I claim nothing for it except that it may show the way to a practical philosophy of action which avoids the demonstrated vice of a general bank deposit guaranty law and yet achieves a sound, stabilizing purpose. In other words, I offer a text for argument and a formula which invites improvement.

ment.

I am irrevocably opposed to a general Federal guaranty of bank deposits. It would reduce all banking to a dead level where reckless bankers could bid for confidence on a parity with sound bankers, and the resultant mortality would be charged either to the survivors or to the Treasury of the United States. Various States have tried this scheme to their costly

Need for Protection.

Need for Protection.

But the need for more conclusive deposit protection persists and I raise the question whether it can not be met without any such infirmity.

The mass of individual deposits is in savings and certificates. It is in this group that mass hysteria generates the "runs" which may wreck perfectly solvent institutions. It is here that mass tragedy occurs, with attendant social as well as economic wrench, when banks close. These are the so called "time deposits." If "time deposits" are safeguarded, the balance of the banking problem will take care of itself.

So I propose a study of a "time deposit insurance fund" in the Federal Reserve system which will reimburse 75% of any "time deposit" in a closed member bank within 90 days after closing, and which will be continuously financed by an annual tax of one eighth of 1% on all "time deposits."

Defines "Time Deposit."

Defines "Time Deposit."

Meanwhile, I would define a "time deposit" as one which is under con tract to remain, without privilege of waiver, on deposit for at least 90 days or perhaps six months. Much of to day's frozen credit is due to the fact that "time deposits" are misnomers. They are all actually "demand deposits." Therefore the bank has no dependable deposits at all and it must be ready to meet a demand for all of its deposits. To this anomaly may be traced much of our present credit inliquidity.

So I propose to stabilize the "time deposits" for the banker, and then for the depositor. Yet we have avoided the fundamental vice of a general guaranty; first, by leaving the bank responsible for all of its real "demand deposits" and for the final 25% of its "time deposits"; second, by putting the depositor himself upon notice, in respect to this final 25%, to choose his bank wisely. It is my belief that such a system, if practicable, would end 95% of the threat of "runs." It is my further belief that unwarranted "runs," or the existence of their possibility, has closed more banks needlessly than any other factor, and that it is the chief element in tightening bank credits and bank loans to an unsufferable degree.

Solvency Question.

Solvency Question.

Upon such a premise the key question arises—is it practicable? Can such a "fund" be dependably solvent over the years?

Total deposits of member banks in the Federal Reserve System suspended from November, 1914, to June, 1932, were \$1,800,000,000. According to the report of the Comptroller of the Currency, the "time deposits" should not exceed 42% of the total. This means a loss of \$750,000,000 in "time deposits" in 17½ years. If we insured 75% of this sum, our gross hazard would have been approximately \$560,000,000. I am advised that the

average recovery on liquidation has been 55%, which would be \$410,000,000 n the case before us. Thus we should have had a final net loss of \$150,000,000 in 17½ years, or an average of less than \$9,000,000 a year. Offsetting this loss, an annual tax of one eighth of 1% on all "time deposits" in member banks would yield in the neighborhood of \$14,000,000 a year. This takes no account of an increase in "time deposits" and a decrease in losses which would result from an insurance regime. Furthermore, if the fund be capitalized, as is proposed for the Liquidation Corporation in the pending Glass bill, and if one fourth of the annual surplus of the Federal Reserve System be paid into the fund from year to year, the annual fund income would exceed \$22,000,000 a year, which is nearly 2½ times the average annual loss. Stated differently, the fund would have received during these 17½ years \$385,000,000 with which to meet a loss of \$150,000,000. Not even the losses since June, 1932, would drive the fund into m the losses since June, 1932, would drive the fund into

Would Add to Resources.

Would Add to Resources.

This would indicate that insurance can be made actuarily sound. It would be sold, at higher premium, to banks not in the Federal System. It would eliminate the need for 75% of the requirement for Government bonds as collateral for the redeposit of postal savings. This 75% release alone would add \$650,000,000 at once to the liquid banking resources of the country. By properly classifying "time deposits" it would make an enormous but unestimated further contribution to the loanable resources of the banks. By creating a new measure of security it would invite \$1,000,000,000 out of hoarding. There are countless other profound

Advantages.

I have submitted the proposal to the Committee on Banking and Currency with no pride of opinion and with no notion that it is conclusive, either in its terms or in its supporting mathematics but with a feeling that it points a new possibility of profound advantage which need not be shunned on the basis of our proven sad experience with general deposit guaranty

House Ways and Means Committee to Pass on Sales Tax Next Week.

Despite the reported opposition of President-elect Roosevelt to a general sales tax, Chairman Collier said yesterday (Dec. 30) he would give the House Ways and Means Committee an opportunity to pass on it next Wednesday. Associated Press advices from Washington yesterday also said:

The Mississippi Democrat told newspaper men that he was going to give the group "full opportunity to consider all proposed taxes, including the manufacturers' sales taxes," when it undertakes to formulate legislation designed to balance the budget.

The specific sales tax bill to be considered is that proposed by Representative McLeod, Republican of Michigan, providing a 1%% levy on manufactured products, exclusive of necessities of life.

Mr. Collier personally is opposed to the sales tax. He said he doubted

whether it would have much chance of being reported to the House.

Other Proposals.

In addition, Mr. Collier said, a system of stamp taxes estimated to raise about \$75,000,000 annually is to be considered, along with a 1% gross income levy on individuals and corporations, proposed by Representative Griffin, Democrat of New York.

An increase in the tobacco tax as recommended last year by the Treasury but rejected by the Committee, also is to be considered.

Charles R. Crisp Resigns As Member of United States Tariff Commission-Action Follows Failure of Senate to Confirm Nomination.

After 30 years in public office, Charles R. Crisp of Georgia, on Dec. 22, submitted to President Hoover his resgination as a member of the Tariff Commission. He said he would become a "special attorney here for the Savannah Sugar Corp. and some of their associates." From Associated Press accounts from Washington on Dec. 22, we take the following:

"Since the Senate has decided it is not going to confirm me and several others, I have had some attractive offers," Mr. Crisp told newspapermen.

"I decided I ought to take this."

He referred to the Senate's action in holding up confirmation of appointments made by President Hoover. If not confirmed, the nomination would expire March 4, and the appointments would be placed in the hands of the incoming President, Franklin D. Rooseveit.

Mr. Crisp was named to the Tariff Commission after he had resigned his seat in Congress to run against Governor Richard B. Russell Jr., of Georgia, for the Democratic Senatorial nomination. He was defeated and has served as a Tariff Commissioner since Oct. 7.

Indicating that he had not fared well financially by his long service in public office, Mr. Crisp said he had "decided to go out and try to make a living" in private employment.

In the House, Mr. Crisp was an influential member of the Ways and Means Committee and was acting Chairman during the framing of the last tax bill. His father before him was a distinguished member of the House, serving as Speaker.

Mr. Crisp said his resignation was made effective Dec. 30, adding that he was "going home to Americus, Ga., to pass Christmas with the grand-babies."

Federal Tax Refunds for 1932 Total \$80,583,504-Largest Sum, \$2,906,297, Paid to United Fruit-Osage Indians Got \$395,000.

Tax refunds, for the fiscal year 1932, as reported by the Treasury Department at Washington to the Committee on Expenditures in the Executive Departments of the House of Representatives, which made them public on Dec. 28, totaled \$80,583,504, including \$19,063,730 in interest. The figure compared with \$69,476,930, of which \$17,311,567 was interest, in the fiscal year 1931, according to Washington accounts Dec. 28 to the New York "Times," from which the following is also taken:

The 1932 aggregate, however, was considerably below the totals for ther recent years, during which especial efforts had been made by the

nment to settle old cases, some of which dated back to the World early post war periods, when the excess profits taxes on business were still in force

The record for refunds was in 1929, when the total reached \$190,164,359, of which \$40,905,057 was in interest. The Government under the law is compelled to pay interest over the period cases are pending. It is for this reason that the Treasury has made every effort to get old cases settled, and, so far as is possible, to place its consideration of income tax claims on

The refunds made public to-day brought the total since 1922, when the law providing for publicity became effective, to \$1,351,850,026, of which \$249,876,213 was interest.

Largely on Income Taxes.

Income tax refunds play the major part in the refunds and represented \$72.112,874 of the 1932 total, \$63,127,955 in 1931 \$118,203,000 in 1930 then total refunds

(when total refunds were \$126,836,333), and \$165,363,000 in 1929.

The low mark in refunds was for the year 1922, when the total was \$49,500,000. During the period from 1922 to 1927, the Treasury was required to report all refunds, but this proved an arduous task because of the many very small settlements. The law was then amended so that only refunds over \$500 were required in the reports to Congress. . . .

More Re-Auditing in 1932.

The Internal Revenue Bureau stated that during the fiscal year 131,795 tax returns were re audited, as compared with 73,475 for 1931.

This increase, the Bureau said, was attributable to court decisions which

affected a large number of taxpayers, collectively, including the Osage Indians, members of the Five Civilized Tribes, taxpayers residing in States having community property laws, insurance companies and railroads.

More than 30,000 returns, the Bureau said, were involved in the Indian cases alone and more than 15,000 in connection with community property

Officials also called att ention to the fact that, while \$80,583,504 in refunds were made to all classes of taxpayers, additional assessments during the fiscal year 1932, practically all of which, it was believed, would be collected, totaled \$332,363,707, or more than four times the total of

Mills in New Jersey.
Other refunds over \$1,000,000 were to National Aniline & Chemical Co.,
New York, \$1,455,693; Reading Co., Pennsylvania, \$1,288,130; United
States Cartridge Co. of Massachusetts, with offices at 111 Broadway, New
York, \$1,221,096.

The United States Steel Corp. got a refund of \$6,606. The Aluminum of America, owned by the Mellon interests, received \$91,495 and the eneral Motors Corp. \$91,728. The Interborough Rapid Transit Co. received \$32,449.

The Sinclair Oil & Gas Co. of Tulsa received \$192,913, the Sinclair Oil & Refining Co. \$30,806, the Sinclair Gulf Corp. \$1,837, and the Sinclair Navigation Co. \$1,384.

The New York "Evening Post" (in Associated Press advices from Washington Dec. 29 indicating that the largest refund [\$1,455,693] for a corporation doing business in the State went to the National Aniline & Chemical Corp. of New York City), added:

The Union Pacific RR., taxable within the New York District by virtue of business there, received the next largest amount, \$569,949.

A credit of \$462,778 was ordered for the Equitable Trust, of which the Chase National Bank became the successor.

The Diamond Match Co. was granted a \$334,456 refund; the American

Radiator Co., \$257,901.
One of New York City's transit systems, the Interborough, was allowed

Senate and House Adopt Conference Report on Bill Granting Independence to Philippines in Ten Years.

On Dec. 29 the House of Representatives, by a vote of 171 to 16, approved the conference report on the bill granting independence to the Philippine Islands in 10 years. The report was adopted by the U.S. Senate on Dec. 22 without a roll call. In reporting the House action on Dec. 29, a dispatch on that date to the New York "Times" said in part:

Final action on the bill, as far as Congress is concerned, marks the end of a fight for freedom which began soon after the islands were ceded by Spain in 1898 and which was revitalized with the passage of the organic act in

dent Hoover must now decide what he wished to do with the measure

President Hoover must now decide what he wished to do with the measure, which is expected to reach his desk tomorrow, but to remain untouched until the Executive returns from his Florida fishing trip.

Although Congress has approved the plan for independence, full freedom for the Islands cannot be accomplished until after the Filipinos themselves have decided that they wish to establish a separate government. This would be followed by a ten-year probationary period during which the Islands would be self-governing, subject to certain administrative, financial and commercial restrictions.

Action on the conference report was concluded by the House in one hour, a spite of pleas for more time by opponents of the bill. Representative

in spite of pleas for more time by opponents of the bill. Representative Hare of North Carolina, chairman of the Insular Committee, moved the previous question on the report and all amendments, thereby shutting off any chance of alterations.

Vote Is Applauded.

Applause rang out when the vote was taken, and the Philippine commissioners both expressed fervent thanks in speeches.

Only five speeches were made in the debate, one of these an explanation

would "bring more woes to this world than any one can now conceive."

The 10-year period is a compromise between the bill passed by the Senate on Dec. 17, granting independence in 12 years, and the Hare bill, passed by the House on April 4 1932, providing for independence in eight years. Associated Press advices from Washington Dec. 22 said:

Both Senate and House groups receded on important points of difference under the proposed compromis

The higher House quotas of duty-free imports of sugar and coconut oil from the Islands were accepted.

The House provision putting the Islands on an immigration quota basis

The House provision putting the Islands on an immigration quota basis of 50 a year also was accepted in place of the Senate amendment barring all immigration by placing the Filipinos in the same category as Japanese, Chinese and persons from India.

However, a new provision was inserted to apply Asiatic exclusion to the Islands after the 10-year transition period preceding complete independence. The House group also accepted the important Senate amendment denying independence until the Philippine Legislature approves the bill passed by the American Congress.

Another important Senate amendment approved was that allowing the Islands to levy export taxes the last five years of the transition period to help pay off the Island's bonded indebtedness.

Two other Senate amendments agreed upon would permit the United States to retain in perpetuity all military and naval reservations in the Islands and request the President to negotiate treaties with foreign governments for the "perpetual neutralization" of the Islands when independence is achieved.

The House import quotas accepted include \$50,000 long tons of sugar, including \$00,000 tons of raw. The Senate had lowered these to 615,000 tons, including 585,000 tons of raw.

Two hundred thousand long tons of coconut oil would be allowed to come

in duty free as against 150,000 in the Senate bill.

Differences between the Senate and House over when and under what conditions the Philippine Islands should be freed were handed over on Dec. 19 to a conference committee for settlement

From the "Times" Washington dispatch Dec. 22 we quote: As was reported unofficially yesterday, the conference report and its accompanying compromise bill contained the more liberal provisions of the House measure regarding Philippine produce that may be imported free of tariffs during the ten-year trial period. The conferees rejected Senate amendments cutting by about 25% the quotas set by the House.

Immigration Limit Set.

Under the compromise bill the Philippines, prior to actual achievement of independence, which will place them wholly outside American tariff walls, may send to the United States annually free of duty 850,000 long tons of sugar, 200,000 long tons of cocoanut oil and 3,000,000 pounds of cordage and similar fibers.

On the other hand, the islands will have two strictures on them, in addition to those of a political nature, both of which were introduced in the form of Senate amendments.

of Senate amendments.

The first of these, proposed by Senator Johnson, will limit emigration of Filipinos to the United States and its Territories during the trial period of fifty per year, except that the Secretary of the Interior may permit larger infiltration of Filipinos into Hawaii, according to the need for labor there.

The second requirement is that, from the sixth to the tenth year, inclusive,

of the trial period the Philippine Government must assess an export tax on products sent to the United States, beginning with 5% of the normal American tariff in the sixth year and increasing by 5% each succeeding year until a maximum of 25% is assessed in the tenth year.

Islands to Vote on Constitution.

If approved by the President, the act must be accepted by the Philippine Legislature, which will have the option either of rejecting the whole proposition or of proceeding with steps incident to framing a Constitution.

The Philippine Constitution must be drafted either by the Philippine Legislature or a special constitutional convention called within one year. The Constitution must provide for substantially the same powers being held by the United States during the trial period as this country now exercised in the islands. ed in the islands.

cised in the islands.

Adviting the Constitution by the Constitution of the independence law, this Constitution must be submitted to the President for approval and, if so approved, must be iald before the Philippine people for a popular vote within four months after the President has approved the Constitution.

Adoption of the Constitution by the Filipinos would mark the actual beginning of the ten-year trial period. Thereafter, the United States would rule in the islands for ten years through a high commissioner instead of a Governor-General.

Should the popular vote go against the Constitution, the present scheme of government would be continued. If approved, the Governor-General would be required to call a general election for the choosing of a Filipino

The Philippine independence bill was passed on Dec. 17 by the Senate without a roll call, after the opponents of the proposed plebiscite at the end of the trial period had won their point and stricken it from the measure.

York "Herald Tribune" in a Washington dispatch Dec. 17, reporting this action by the Senate also said in part:

Veto Is Predicted.

While the bill as it was put through is nominally the Hawes-Outting measure, it is much changed from that plan as it came from the Territories Committee. That plan proposed independence in about 18 years, provided the Filipinos, after a 15-year trial period, voted for independence. As the bill now stands, the Islands will be alienated in 12 years without opportunity to vote on independence except at the time they adopt their constitution.

Features of Bill As Passed

Before the end of the session it is believed both Houses will agree to a conference report and pass a bill, but that President Hoover will veto it. Senator Charles L. McNary, Assistant Republican leader of the Senate, indicated to-night that he expects a veto. It is pointed out that both Henry L. Stimson, Secretary of State, and Patrick J. Hurley, Secretary of War, are opposed to the House and Senate bills.

Senator Hiram Bingham, Republican of Connecticut, Chairman of the Committee on Territories, also has made it known that he expects a veto. In such case the whole Philippine question would be thrown into the Roosevelt administration for an indefinite period.

Exports Rates Increased.

Exports Rates Increased.

The essential feature of the Senate bill, as it went through to-day, has relation to the fact that after a period of seven years there will begin and continue for five years a series of "step-ups" in export rates on products now sent to the United States free of duty. The bills also contained limitations on the amount of the importations to the United States of free products. In the case of sugar this is 615,000 long tons a year, and in the case of cocoanut oil, 150,000 tons.

The bill includes the following features:

Provision for a convention to frame a constitution for the Philippines, to meet within a year after enactment of the bill.

Certain requirements as to the constitution, which must contemplate a republican form of government.

Gives the United States the right to coaling and naval stations.

Requires the Philippine Government to assume the debts of the Philippine Islands, its provinces, cities, municipalities and instrumentalities.

Provides, in the period before complete independence, for a United States High Commissioner, to be appointed by the President, and to represent this Government in its relations with the proposed Commonwealth of the Philippine Islands. Also provides for a resident commissioner to the United States from the Philippines.

In addition to limitations on free importations of the products of the Islands into the United States in the trial period, limits are imposed on immigration. . . .

Plebiscite Plan Changed.

Plebiscite Plan Changed.

Progress on the Philippine bill was advanced to-day when the Senate agreed on an amendment by Senator James F. Byrnes (Dem.), of South Carolina, virtually doing away with the pleniscite plan proposed by the advocates of the Hawes-Cutting bill.

The Byrnes plan provided in effect that the election of the adoption of a constitution should be a plebiscite. Its purpose is to have the Filipinos say, when they act on the proposed new constitution, whether they want independence. Under the Hawes-Cutting plan a plebiscite was to have been held at the end of the trial period of 12 years.

By reason of the presentation of the Byrnes plan and its adoption the one-man filibuster, begun yesterday by Senator Huey P. Long (Dem.), of Louisiana, was dropped. Senator Joseph T. Robinson, of Arkansas, a Democratic leader, spoke for the Byrnes amendment. Senator William F. Borah, insurgent Republican, of Idaho, also advocated it. Senator Bingham criticized the plan, declaring that, while it was called a "compromise" between the views of those who wanted no plebiscite at all and those who wanted a plebiscite at the end of the trial period, it was really no compromise at all. He said it was practically the same thing Senator Byrnes proposed yesterday when he was defeated in trying to knock out the plebiscite at the end of the trial period.

Senator Robert M. La Follette, insurgent Republican, of Wisconsin, vigorously denounced the Byrnes amendment. He declared that it was worse than no plebiscite at all and that the effect would be to force Filipinos who wanted independence to accept any sort of constitution that might be put up to them for fear rejection of the constitution would mean rejection of independence.

In spite of objections, however, the amendment was adopted 44 to 29.

After adopting the Byrnes plan the Senate turned to other aspects of the bill.

Motion to Recommit Lost, 54 to 19.

Motion to Recommit Lost, 54 to 19.

Senator Arthur H. Vandenberg (Rep.), of Michigan, in a speech, strongly urged his substitute for the Hawes-Cutting measure. He dwelt on the danger to the United States, in view of conditions in the Islands and the Orient, in having this nation over a long term of years bear responsibility for the Philippines while exercising but the shadow of sovereignty.

The Senate, however, turned a deaf ear to the plea of the Michigan Senator and defeated a motion which he made to recommit the bill, by 54

Senator L. J. Dickinson (Rep.), of Iowa, then stirred up a long controversy by seeking to have duties imposed on pearl buttons and like products from the Philippines. He contended they were harmful to the industry in his State and elsewhere. His proposition led to sharp debate, in which Senator Willam H. King (Dem.), of Utah, denounced the imposition of tariffs on the products of a subject people. In the end, after parliamentary wrangling, Senator Dickinson's amendment was voted down, and he was defeated in attempts to effect additional restrictions on cocoanut oil and sugar imports. He sought to cut the free imports of these products still further than they are in the bill by a scale of year by year roducts still further than they are in the bill by a scale of year by year

products still further than they are in the bill by a scale of year by year reductions.

Senator Pat Harrison (Dem.), of Mississippi, stirred up a tariff debate with Senator Samuel M. Shortridge (Rep.), of California, by criticizing the action of "this dying Administration" in approving a series of tariff increases recommended by the Tariff Commission and disapproving reductions. Senator Shortridge took occasion to say a few things in reply on the subject of duties on long staple cotton, for which he said he and Senator Harrison "fought as brothers." Senator Shortridge pointed out that New England manufacturers recently had demanded reduction of that the duty, which is 7 cents a pound, but the Tariff Commission denied their which is 7 cents a pound, but the Tariff Commission denied their

Senator Huey Long (Dem.), of Louisiana, remarked that "where your treasure is, there your heart shall be also" and that this was as true of the Senator from Mississippi on long staple cotton as it was of himself in regard to sugar from Louisiana.

Neely Objects to Wasting Time.

Senator M. M. Neely (Dem.), of West Virginia, in an impassioned speech, took the Senate to task severely for wasting time on the Philippine

bill when between 12,000,000 and 20,000,000 persons were "faced with not merely destitution, but utter starvation." He declared for Government not merely destitution, but utter starvation." He declared for Government aid to the cold and starving and said if the Government "continued to fiddle a little while longer" while millions went cold and hungry, it would not be a matter of much importance what this Government did or the Philippines,

He expressed hope the Senate would rush the Philippine bill to a conclusion and take up unemployment next week. In an exchange with Senator Edward P. Costigan, insurgent Republican, of Colorado, he indorsed the La Follette-Costigan bill to give employment through public works.

The Hawes-Cutting bill, which was reported out of Committee at the last session, and put over at that time until the December session was taken up by the Senate on Dec. 8. During the 9-day consideration of the bill (to Dec. 17) in that body freedom for the Philippine Islands from American jurisdiction in eight years and without a plebiscite was tentatively made a part of the independence legilsation by the Senate, Dec. 14, as new efforts were made to reach an under-

standing on other phases of the independence code.

The "United States Daily" of Dec. 15 in reporting this, also said:

also said:

By a record vote of 40 to 38, the Senate adopted an amendment by Senator Broussard (Dem.), of Louisiana, fixing the expiration of American authority for the end of the eight years, but moves were made at once to overthrow the action thus taken. The Senate continued to debate until it recessed whether it would reconsider the Proussard amendment. Prior to the vote on the amendment which, in effect, restores the provision enacted in this respect by the House, there were expressions from several Senators that the shorter time would not permit the Philippine Government to pay its outstanding bonded debts. The Broussard plan affords insufficient protection to holders of Philippine securities, most of whom, it was declared, are Americans, it was suggested.

Before the Senate voted, it considered and rejected an amendment by Senator Dickinson (Rep.), of Iowa, to fix the time for expiration of American control at five years. The vote against this proposal was 37 to 38.

Modified Proposal.

Modified Proposal.

In the meantime, a modified time limit proposal had been offered by Senator Cutting (Rep.), of New Mexico, one of the sponsors of the legislation, which reduced the transition period from 15 to 12 years. It also would provide for a plebiscite within one year after the transition period, and provide for withdrawal of this country from the Island within one year thereafter by delegating authority to the President.

The motion to reconsider the Broussard amendment was offered by Senator Bulow (Dem.), of South Dakota, after such a motion by Senator Robinson (Dem.), of Arkansas, Minority Leader, had been ruled out of order by the presiding officer, since the Arkansas Senator had voted against adoption of the amendment.

The adoption of the Hare bill by the House on April 4, last, by a vote of 306 to 47 was noted in our issue of April 9, page 2645.

Philippine Legislature Approves Conference Report of United States Congress Granting Independence to Islands-Legislature, Won by Plebiscite Plan, Cables Plea for Presidential Approval-Philippine Body Had Previously Demanded Immediate Independence.

According to a copyright cablegram from Manila to the New York "Herald Tribune" the Philippine Legislature, sitting as an Independence Commission, after meeting twice on Dec. 29, acceded to the petition of the independence mission at Washington to urge Presidential approval of the compromise bill adopted by the Senate a week ago [and the House on Dec. 29], granting freedom to the Islands after 10 years. The "Herald Tribune" cablegram went on to say:

Manuel Quezon, President of the insular Senate, concurred in the resolu-tion, which was adopted at the session this evening, but the Commission saved his face by recording approval of his early stand against the mission's

action.

The Commission to-night cabled to Sergio Osmena and Manuel Roxas, Speaker of the insular House of Representatives, who are the leaders of the mission at Washington. saying;

"The Independence Commission believes that the presiding officers of the Legislature acted properly in refusing to recommend Presidential approval of the measure regarding the Philippines, pending final action by the House of Representatives. The Commission also believes it is its duty to declare the bill recommended by the conference committees of Congress to be not in full accord with the statements and instructions by the Legislature or the Commission.

Commission.

"The Commission would be willing, however, that the President should sign the bill for the purpose of giving the Legislature or the Filipino people an opportunity to express their opinion on the bill, if it is approved. The Commission believes this will facilitate approval of the measure, while reserving to the Legislature full liberty of action to accept or reject it when it is submitted for its consideration after the mission has been heard."

Following the passage of the bill Dec. 27 by the United States Senate, Associated Press advices from Manila Dec. 18 stated:

Passage by the United States Senate of the Hawes-Cutting Philippine Independence bill, news of which reached here to-day, caused even less stir in Manila than did approval by the House last April of the Hare independce bill.

ence hill.

Only one Sunday paper which carried the announcement employed large headlines. The bill has been under a fire of unfavorable comment here since the Senate began consideration of it.

Senator Manuel Quezon, President of the insular Senate, left for the mountain resort of Baguio, high in the hills, early to day, and could not be reached for comment.

mountain for comment.

Meeting here as the Independence Commission, the Philippine legislators yesterday demanded "Immediate independence or nothing." Senor Quezon had organized the gathering. It adopted a resolution supporting his protess

against the limitations on immigration and imports from the Philippines which are provided in amendments to the Hawes-Cutting bull.

From the "Times" we take the following (Associated Press) from Manila Dec. 26:

Manuel Quezon, President of the Philippine Senate, in a statement to-day discouraged the plan of the Philippine Independence Mission at Washington that Filipinos unite and ask President Hoover to sign the pending compromise bill giving the Islands their independence after a 10-year period. Senator Quezon, however, called nearby legislators to meet Thursday [Dec. 28] as an independence commission to consider the proposal.

"Why should we be asked, before knowing the details and provisions of the bill and before knowing the stand of the mission at Washington, knowing as we do the measure positively does not correspond to the ideas of the Filipino people, to urge the President to sign it?" Senator Quezon asked. "To do so would place ourselves on record as having endorsed the bill when we cannot foresee whether or not our people will accept it.

"If, however, we could send a cablegram to the President in which we could state clearly our interventions in favor of the bill—if this is decided by the Commission—and this would not be considered by any means an Manuel Quezon, President of the Philippine Senate, in a statement to-day

by the Commission—and this would not be considered by any means an acceptance of the bill, I personally would have no objection to such action."

Senator Quezon has told supporters he particularly objected to Presidential powers over the Islands retained by the measure and the proposed retention by the United States of military and naval bases. He was quoted as saying that should the United States retain these factors a situation similar to that in Haiti and Nicaragua might result.

From Manila Dec. 29 Associated Press accounts said:

The pending Philippine independence bill was branded as a "joke" to-day by Manuel Quezon, President of the Senate, in a stromy 4-hour session of Island legsilators meeting as the Independence Commission. Senator Quezon, who previously had declined to comment on the Congressional compromise measure, declared the bill would provide a "fictitious independence."

"If my opposition to the bill causes a division of the Nacionalista party." he said, "let there be a division."

New York Trust Co-Views Independence of Philippines As Probability Meaning Abolution of Free Trade Between Two Countries.

In dependence for the Philippines would probably mean the abolition of the free trade now prevailing between the two countries and would undoubtedly reduce our commerce, according to "The Index" published by the New York Trust Co., which states that "trade with other Oriental nations would be expected to suffer through the loss of direct commercial and political interests in the Far East." According According to "The Index" while American trade with the Far East shared the general decline during the current year, "of the total of \$1,015,748,699 in imports for the three-quarters, this country purchased \$273,335,104 in goods from the Far East, as compared with \$287,812,256 from Europe. same period, total exports amounted to \$1,188,920,041, of which the Far East accounted for \$239,549,148, as compared with \$564,623,225 for Europe. It is notable that during the year 1931, for which complete statistics are available, the shrinkage in our Far Eastern trade was proportionately less than that in our total foreign trade." "The Index" adds:

The importance of Far Eastern markets for American cotton producers was further emphasized last year, when Japan, China and India, together, bought 2,760,000 bales of American raw cotton or double the amount purchased in 1930. The Department of Commerce estimates that Amprivate long-term investments in Asia and Oceania, exclusive of suc vestments in missionary and educational institutions, amounted in 1931 to no less than \$1,456,000 000.

It seems reasonable to expect, the article concludes, "that improvement in world conditions will be accompanied by renewed progress in the conomic expansion so conspicuously characterizing the Pacific area in recent years."

Farm Relief Bill Ready by Jan. 6—House Agricultural Committee Adopts Pre-War Price Instead of Tariff as Basis of Bounty-Secretary Hyde Presses Substitute Plan to Have the Government Retire Acre-

The domestic allotment program for farm relief, second of the major measures which President-elect Roosevelt wishes to have enacted at this session to avert a special session, will be completed by the House Agriculture Committee for intro-

be completed by the House Agriculture Committee for introduction by Jan. 6, said a dispatch from Washington Dec. 28 to the New York "Times" which likewise stated:

The committee, of which Representative Jones of Texas is chairman, has been working during the holidays.

While the draft of the bill has not been made, the principles have been agreed upon by the dominant members of the committee in consultation with representatives of the farm organizations.

The original plan of using the tariff duty as a basis of reckoning the allowance to be added to the price of that share of farm commodities sold on the domestic market has been abandoned in favor of the pre-war price parity system.

Under the original plan, wheat sold on the domestic market would receive a bounty of 42 cents, the tariff duty. Under the pre-war price parity plan the county would be the difference between prevailing price and the pre-war price level.

Holas Bases to be Too High. Some Republicans, led by Representative Hope of Kansas, are opposed to making pre-war prices the index and would fix the basis of parity at a lower level. If the pre-war-price level index is adopted, Representative Hope contends, the price of farm products would be raised higher than the price of other commodities and manufactured goods, and the bill would fall by its own weight.

by its own weight.

The new farm-relief program, which is said to enjoy the favor of Mr. Roosevelt, utilizes the principle of control of individual production, with a bonus only to those who join in the plan. It is estimated the consumer, who ultimately would pay the bonus, would contribute about \$750,000,000 a year to the stabilization of farm prices. The price of bread probably would be raised a cent a loaf and that of manufactured products, of which cotton that the besite appraerably would be increased.

is the basis, apparently would be increased.

The bill now being framed proposes that the domestic allotment plan shall be in operation one year, with authority for the President to continue it another year by proclamation.

Hyde Would Retire Acreage.

Hyde Would Retire Acreage.

Secretary Hyde has advanced at alternate program which has the reduction of acreage as its sole alm. A fund of \$150,000,000 to \$200,000,000 would be created with which the government would lease lands now producing surplus crops and remove them from cultivation.

"With this fund at its disposal," Mr. Hyde said, "enough land could be leased by the government to bring about a balanced production. The plan is direct, positive, and reaches the real disease, and is not a bandage on a symptom. The effect on farm commodity prices would be felt the instant the commodity markets knew that a part of the land now producing the surpluses is to be taken out of cultivation."

Mr. Hyde said that he favored a levy of about 8 cents a bushel on wheat to carry out the land-leasing program.

The government would take a ten-year lease of marginal lands to be removed from production, with an option to purchase. This would fit into a general land-utilization program, whereby the government eventually would take over much of the poor land now being used for raising crops and plant it to trees or convert it into public parks.

"There are several objections to this plan," Mr. Hyde admitted, "but it is defensible in the present emergency, as it would permit a holding off the markets until the surpluses now depressing prices were consumed."

The farm allotment bill was referred to in our issue of Dec. 24, page 4321.

Fear of Philippine Independence Affects Mining Stock -Shares of Mine Concern that Pay 50% Dividends Sold Under Market Quotation.

According to a wireless message Dec. 29 from Manila to the New York "Times" the first evidence of economic troubles expected to be the result of independence of the Philippines was offered on that day when stockholders began unloading Benguet Consolidated mining stock at 50 centavos below the quotation, fearing the effects of independence. The cablegram continued:

The Philippine "Herald," radical Nationalist newspaper, announced the sale of a block of 2,00 shares below the market price, calling the transaction the first such in the history of the mining company and admitting openly that it was caused by fear of independence.

Benguet has just paid a 50% dividend and is regarded as the best mining

value in the Islands.

With reference thereto a Washington account Dec. 29 to the "Timess" said:

Dispatches recounting the sale of Philippine mining shares at less than their market value were interpreted here by responsible officials, who declined to be quoted until the situation becomes clearer, as bearing out the fears of

economists concerning independence.

They saw in those transactions the first evidence that independence might lead to a "flight from the peso."

Georgia Textile Interests Oppose Farm Allotment Plan

The Cotton Manufacturers' Association of Georgia has sent letters to Georgia's Congressional delegation expressing opposition to the domestic allotment plan of farm relief, according to Atlanta, Ga., advices Dec. 26 to the New York "Journal of Commerce," which reports that the letter said in part:

We have been properly authorized to advise you that the more than 200

We have been properly authorized to advise you that the more than 200 Georgia cotton textile mill executives represented by our association are vigorously opposed to the proposed domestic allotment plan of farm relief because we believe that this plan will discriminate against the farmers of the Southeast in favor of the farmers of the Southwest.

It will produce a large net loss in income to the States of the Southeast to the great gain of the States of the Southwest. It will increase the cost of some of the necessities of life for the great mass of the consuming public whose buying power is already at a low ebp. It will react to the detriment of the cotton textile mills of the Southeast and the approximately 250,000 worker employed therein. rker employed therein.

It will decrease the use of cotton and place it at a great disadvantage with competitive fibers and will create another large army of governmental bureaus and employes to be supported by the already overburdened taxpayers of the nation.

Belief was expressed that the legislation is "unfair to the cotton farmers of the Southeast because they are not responsible for the great overproduction of cotton."

Criticism of Federal Home Loan Board and Reconstruction Finance Corporation in House-Representatives Howard and Garber Demand Report on Latter's Loans for First Five Months—Interest Rate Criticised—Representative La Guardia Pre-sents Measure to Lower Federal Return Figure by 29%.

Criticism of the Reconstruction Finance Corporation and the Home Loan Bank Board figured in the House proceedings on Dec. 27, with Representative La Guardia of New York, Representative Garber of Oklahoma and Representative Howard of Nebraska leading the attack. The New

York "Times," reporting from Washington on that day,

Mr. Howard introduced a resolution calling on the Finance Corporation to submit to the House a report of the loans made in the first five months of its existence, from February to June, inclusive.

Sabotage of the law and deliberate frustration of the intent of Congress were ascribed to the directors of the Home Loan Bank Board by Mr. La Guardia, who spoke in explanation of a resolution he introduced to-day lowering the interest rate on all Government obligations by 29%. He asserted that economic recovery was being delayed by failure to lower interest rates.

The Reconstruction Finance Corporation, he maintained, had adopted a policy of currying favor in financial circles by continuing high interest rates, although every new enterprise should have the benefit of low rates to "usher in the new era when capital will not put such a burden on industry."

"Every refinancing proposition, every loan made in the midst of this depression, based upon lower wages and lower commodity prices, still maintains an unreasonable and unconscionable high rate of interest," he continued. "There is nothing sacred or permanent about a 6% interest rate or an 8% interest rate. Present interest rates were artificially created at a time when entirely different agricultural and industrial conditions or interest."

Attacks R. F. C. Policy.

"The policy of the Reconstruction Finance Corporation has been to maintain high rates of interest, as they frankly and boastfully stated, in order not to make their institution attractive.

"When railroads and banks and financial institutions holding securities are in need of finances to meet current interest or principal on outstanding securities or must go under, here is an opportunity for the Reconstruction Finance Corporation to use its tremendous power and compel a refinancing of these securities on a 3% basis.

"Instead, we find the usual high and impossible rate of interest maintained.

"The folly of the present policy is that present interest rates cannot be maintained. Railroads, industry, agriculture or even the Government itself cannot continue to bear and pay existing high interest rates. The lowering of interest for the present down to 3% per annum is only one of the first and necessary changes in the economic readjustment which inevitably must be brought about."

Mr. La Guardie stated that he was a superior of the first and the control of the cont

Mr. La Guardia stated that he and Representative McKeown of Oklahoma had written an amendment to the bankruptcy law which would be intro-

Mr. La Grande Mr

Assails Home Loan Banks.

"We come now to the Home Loan Banks, and I say the administration of that law has been cruel, and that the intent of Congress has been absolutely disregarded. When the Home Loan Bank bill was before this House it was stated that it was the greatest piece of legislation that had ever been passed by the American Congress at any time, for it was believed that we were providing relief to save the home of the little American home

it was stated that it was the greatest piece of regislation that and the been passed by the American Congress at any time, for it was believed that we were providing relief to save the home of the little American home owner.

"Now, lest I be misunderstood as criticizing the directors of the Home Loan Bank by innuendo, I am going to save them that trouble. I say that the Board and the Home Loan Banks are purposely sabotaging this law in order to continue the usurious rates of building and loan associations and banks that exact usurious rates of interest. The Home Loan Banks to date have not benefited the home owner."

Mr. La Guardia then read correspondence between George L. Bliss, Executive Vice-President of the Federal Home Loan Bank of Newark, and Representative Wolverton of New Jersey, in which, he said, the Home Loan Bank official admitted that "no direct loans have as yet been made by this bank." The letter was dated Dec. 21 1932, Mr. La Guardia said.

Representative Cavicchia of New Jersey asked Mr. La Guardia if he knew that most of the people threatened with loss of their homes were behind with their taxes and interest payments, and whether Mr. La Guardia would have the Home Loan Bank take those risks and become the owner of the property. Mr. La Guardia replied:

"I would have the Home Loan Bank carry out the intent of Congress by making a direct loan at a low rate of interest. We only asked for 2% return on the \$125,000,000 that we gave to the Home Loan Bank. We want them to make a direct loan to that man at a low rate of interest in order to save that man his home. He can pay his taxes.

"The gentleman from New Jersey, Mr. Fort, is the last man in the United States who should have been appointed to that position, because he specialized in Home Loan Banks. His sympathy is with the usurious money lenders. It is not with the home owners. It cannot be. He has been connected with building and loan associations all his life."

Mr. Cavicchia defended Mr. Fort, saying:

"I would like to have the gentleman kno

On Dec. 27 Associated Press advices had the following to say:

A resolution calling upon the Reconstruction Finance Corporation report to the House loans it made during the first five months of existence was introduced to-day by Representative Howard (Dem., Neb.).

The Corporation was not required to submit a report of loans until July 20, when the Relief Act was signed by President Hoover. It had lent about \$800,000,000 up to that time.

The Howard resolution calls for the Corporation to submit "a full and complete report" of its operations "during the months of February, March, April, May and June of the year 1932, showing in detail all loans and commitments made by it during said months, the dates and amounts thereof, the names and addresses of the respective borrowers and prospective borrowers, the purpose of the respective borrowers and prospective borrowers, the purpose for which each loan or commitment was made or intended to be made, the present status of each loan with respect to any repayments effected, and the amount of public money and public credit employed in said operations." any repayments effected, and employed in said operations."

Reduction in Interest Rates on Loans and Discounts by Reconstruction Finance Corporation-3% Rate in Case of Relief Loans Unchanged-\$6,000,000 Saving Seen-Reduction Follows Proposal by Jesse Jones, Holding High Interest Deters Borrowers.

A reduction of ½ of 1% per annum on interest on loans and discounts by the Reconstruction Finance Corporation was announced by the Corporation on Dec. 24, to become effective Jan. 1. The reduced rates will apply to new loans authorized in the period from Jan. 1 to June 30 1933, and maturing on or before Dec. 31 1933, and also will apply to the outstanding balances of existing loans for the period from Jan. 1 to June 30 1933.

Summarizing the changes, the Associated Press advices from Washington Dec. 24 said:

associations, insurance companies, mortgage loan companies, credit unions, joint-stock land banks, livestock credit corporations and agricultural credit corporations, will be reduced from 5½% to 5%. Rate on loans to closed banks will be reduced from 5% to 4½%. Railroad loans will be reduced from 6% to 5½%.

Interest charged by the regional credit corporations will be reduced from 7%, including the cost of inspection and appraisal, to 5½%, exclusive of these costs.

these costs.

The borrower will bear the cost of inspection or appraisal, but the charge therefor will not exceed an amount equivalent to 1% of the amount of the loan. The rate of interest on the outstanding balances of existing loans by the credit corporations will be reduced one half of 1% for the period from Jan. 1 to June 30 1933. The Reconstruction Finance Corporation will rediscount paper for the credit corporations at the rate of 5%, which is the same rate charged other agricultural credit corporations, livestock credit corporations, banks and similar institutions.

These reductions were adopted by the Corporation illuminary of the present the corporation of the present control of the present con

corporations, banks and similar institutions.

These reductions were adopted by the Corporation "in view of the provailing low rates of money."

From the Washington account Dec. 24 to the New York "Times" we take the following:

"Times" we take the following:

In the case of relief loans, the rate is already at 3% and the Corporation holds it should not be made lower. There is no fixed interest charge on loans for self-sustaining construction projects, and the practice will be continued of establishing rates as individual applictaions come up for consideration. Under the new ruling, however, the latter class of borrowers receives the opportunity of refinancing the Corporation's loan through disposition of collateral deposited with it in private channels, the cost of such refinancing to establish the interest charged by the Corporation. In such cases the refinancing must be accomplished within two years of the date of the loan and the return to the Corporation for use of its money must not be less than 4%.

\$1,000,000,000,000 Loans Outstanding.

\$1,000,000,000 Loans Outstanding.

\$1,000,000,000 Loans Outstanding.

More than \$1,000,000,000 of loans already outstanding will be affected by the interest reduction, and although the Corporation declined to give an official estimate of the results of the ruling, one director said it probably would save between \$5,000,000 and \$6,000,000 annually to borrowers of loans already made. On Nov. 30 there were \$574,192,444 of loans outstanding to banks and trust companies alone, and an additional \$249,951,634 had been advanced to railroad companies.

The reduction in interest rates was first proposed to the Corporation's board of directors by Jesse Jones, on the ground that many otherwise anxious borrowers were withholding applications through unwillingness to pay the high interest charge. Whether the reduction ordered to-day is expected to bring in new borrowers could not be learned at the Corporation's headquarters to-day. The argument also was advanced by proponents of the reduction that, since the Corporation was paying only 3½% for its funds from the Treasury Department, it was not justified in charging for its funds from the Treasury Department, it was not justified in charging

The Corporation's announcement follows:

In view of the prevailing low rates for money, the board of directors of the Reconstruction Finance Corporation has reduced the rates of interest or discount on loans of the Corporation one-half of 1% per annum, effective Jan. I 1933. The reduced rates will apply to new loans authorized during the period from Jan. I to June 30 1933, and maturing on or before Dec. 31 1933; and also to the outstanding balances of existing loans for the period from Jan. I to June 30 1933.

The rate of interest on loans to banks, trust companies, building and loan appropriations, insurance companies, progresses, the companies are continued to the progress of the prog

associations, insurance companies, mortgage loan companies, credit unions, joint stock land banks, livestock credit corporations and agricultural credit corporations will be reduced from $5\frac{1}{2}\%$ to 5% per annum. The rate on loans to receivers or liquidating agents of closed banks will be reduced from

loans to receivers or liquidating agents of closed banks will be reduced from 5% to 4½% per annum.

During the same period the rate of interest charged by the regional agricultural credit corporations to farmers and stockmen will be reduced from 7% per annum, including the cost of inspection and appraisal, to 5½% per annum, exclusive of the cost of inspection and appraisal. The borrower will bear the cost of inspection or appraisal of the security for his loan, but the charge therefor will not exceed an amount equivalent to 1% per annum of the amount of his loan.

The rate of interest on the outstanding balances of existing loans by the regional agricultural credit corporations also will be reduced one-half of 1% per annum for the period from Jan. 1 to June 30 1933. The Reconstruction Finance Corporation will rediscount paper for the regional agricultural credit corporations at the rate of 5% per annum, which is the same rate charged other agricultural credit corporations, livestock credit corporations, banks and similar institutions.

The rate of interest on loans under Section 201 (d) of the Emergency Relief and Construction Act of 1932, for the purpose of enabling bona fide institutions to finance the carrying and orderly marketing of agricultural products and livestock, will be reduced from 5½% to 5% per annum, and the rate on loans under Section 201 (c) of the Emergency Relief and Construction Act of 1932, for the purpose of financing the sale of surpluses of agricultural products in the markets of foreign countries, will be 5% per annum.

For the period mentioned above the rate of interest on loans to railroads

will be reduced from 6% to 51/2%.

The rate of interest on loans or contracts to aid in the financing of self-liquidating projects under Section 201 (a) of the Emergency Relief and Construction Act of 1932 will be established in connection with each loan ap-

plication.

However, if a borrower under this section of the law refinances all its loans or contracts, or sells all its obligations held by the Corporation in connection therewith, during a period of two years from the date its loan or contract is authorized by the Corporation, on such a basis that the cost of the money to the borrower is lower than the cost of the money received from the Corporation, the borrower will be permitted, during such two years, to repay the Corporation on the same basis as to yield as that upon which the borrower refinances such loan or contract or sells such obligations, provided the return to the Corporation for the use of its money will not be less than the rate of 4% per annum. than the rate of 4% per ann

Investigation Into Activities of Reconstruction Finance Corporation Suggested by Senator Norris.

The Reconstruction Finance Corporation's report to Congress detailing loans advanced in November to financial institutions, railroads, business concerns and States was greeted in the Senate on Dec. 22 by a suggestion from Senator George W. Norris of Nebraska for investigation into the activities of the Corporation. Washington advices, Dec. 22 to the New York "Journal of Commerce" from which we quote, also said:

The report listed loans aggregating \$107.653,587 made by the Corporation during the month.

poration during the month.

Senator Norris, leader of the insurgent Republicans, told the Senate that such an inquiry should be made to let the country know what was being done with the millions of dollars of taxpayers' money. His suggestion was made after he had read a magazine article in the Senate dealing with the Corporation's work. He gave no indication whether he intends to offer a resolution for the investigation.

Three Groups Listed.

The article from which Norris read said of \$264,000,000 loaned to railroads, \$156,000,000 went to three groups—"the Morgan, Van Sweringen and Pennsylvania RR. interests." Quoting from the article to the effect that "hundreds of millions had been passed around" without Congress knowing who received it, the Senator added that those favoring complete publicity of the Corporation's activities had been defeated in that purpose.

Report for November of Reconstruction Finance Corporation-Loans Authorized Totaled \$107,653,587-Authorizations to Banks and Trust Companies \$22,258,996-To Railroads \$38,226,000.

Total loans authorized of \$107,653,587 during November are indicated in the report for that month of the Reconstruction Finance Corporation filed on Dec. 22 with South Trimble, Clerk of the House. Of the authorizations, the largest amount-\$38,226,000-was apportioned to the railroads, of which the Baltimore & Ohio received \$31,625,000. Loans to banks and trust companies totaled \$22,258,996. The summary of loans authorized under Section 5 follows:

| Summary of loans authorized finder Section 5 10hows.
| Summary of loans authorized finder Section 5 10hows.
| Summary of Table I.
Banks and trust companies (including receivers)	\$22,258,996.00
Building and loan associations	3,376,199.13
Insurance companies	2,151,000.00
Mortgage loan companies	2,730,800.00
Credit unions	66,746.00
Joint stock land banks	2,126,000.00
Agricultural credit corporations	132,547,65
Livestock credit corporations	473,565.55
Railroads (including receivers)	38,226,000.00

Applications for loans totaling \$5,747,008, approved during and prior to November, were withdrawn or canceled by the applicants during the month. Noting this the Washington account Dec. 22 to the New York "Times" said

Railroad loans other than that to the Baltimore & Ohio were \$2,000,000 to the Lehigh Valley; \$2,500,000 to the New York Central; \$1,500,000 to the receivers for the Wabash; \$301,000 to the Chicago Milwaukee St. Paul & Pacific and \$300,000 to the Puget Sound & Cascade Ry.

Decline in Number Continues.

Decline in Number Continues.

The decline in the number and amounts of individual loans as compared with those made earlier in the corporation's existence continued through November, and there were but few authorizations in excess of \$500,000, apart from the loans to railroads and subscriptions of capital stock in the corporation's regional agricultural credit agencies.

Included in the total authorizations of \$107,653,587 in November, was \$4,774,744 for emergency relief; \$129,616 in one new loan and one increase to a previous loan for the orderly marketing of agricultural commodities; \$6.000,000 of capital stock subscriptions to two new regional agricultural credit corporations; \$4,000,000 of increases in subscriptions to capital of two other such corporations already operating; \$2,500,000 of funds allocated to the Secretary of Agriculture and \$20,000 of subscriptions to stock of Federal Home Loan banks. of Federal Home Loan banks.

The \$6,000.000 of capital paid into the new Agriculture Credit Corporators was for those established during the month at Albany, N. Y., and

\$2,500,000 More for Farmers.

The additional \$2,500,000 allocated to the Secretary of Agriculture brought to \$120,000,000 the amount set aside for that purpose. At the end of November, \$75,000,000 had actually been paid out to him, and the

rest was held by the Corporation, but earmarked for his use. While the Corporation is required by law to allocate a definite amount of its funds to the use of the Secretary of Agriculture, the money is being applied in loans to farmers for feeder cattle and similar purposes.

Chairman Atlee Pomerene stated in his letter transmitting the report to Congress that of the \$5.747,008 of loan cancellations and withdrawals during November, \$1.038.980 represented applications approved during the month. An additional \$2.333,836 was withdrawn or canceled during the month on applications approved from July 21 to the end of October, while \$2,374,191 of cancellations and withdrawals was on loans approved prior to July 21.

while \$2,374,191 of cancellations and withdrawals was on loans approved prior to July 21.

During the month, the Corporation sold \$25,000,000 of its 3½% notes to the Secretary of the Treasury and increased to \$700,000,000 the amount of such notes held by him at the end of November. The notes, together with the \$500,000,000 of capital originally authorized, brings to \$1,120,-000,000 the amount that has been made available to the Corporation entirely through the Treasury. Although authorized to dispose of its debentures to the public, the Corporation has consistently financed itself through the Treasury Department.

Following in full is the monthly report of the Reconstruction Finance Corporation, showing loans authorized in November (exclusive of amounts withdrawn or canceled during November):

The rate of interest is $5\frac{1}{2}\%$ save where 5% is shown in parentheses. Stars signify that no part of the amount indicated had been disbursed up to Nov. 30 inclusive.

TABLE 1.

Statement of loans authorized during November 1932 under section 5 of the Reconstruction Finance Corporation Act, showing the name, amount and rate of interest in each case, exclusive of amounts withdrawn or canceled during November 1932.

Report for October of Reconstruction Finance Corporation-Loans Authorized to Banks and Trust Companies \$21,448,494—To Railroads \$25,926,269 Commitments to Finance Self-Liquidating Construction Increased to \$81,514,500-Further Outlay of \$36,000,000 Representing Subscription to Capital of Regional Agricultural Credit Corporations-New Treasury Notes of Corporation.

South Trimble, Clerk of the House, made public on Nov. 28 the report showing the loans authorized by the Reconstruc-tion Finance Corporation during October. It is noted in the "United States Daily" that the total of these loans or allocations during the month approximated \$170,000,000, exclusive of the \$36,000,000 of authorized subscriptions to the system of regional agricultural credit corporations set up in the Federal Land Bank Districts. The "Daily" further noted:

This report, covering activities and expenditures of the Corporation during October, showed loans aggregating \$59,023,185 under Section 5 of

the Act: \$22,634,762 for relief of distress and unemployment in the States.

\$22,634,762 for relief of distress and unemployment in the States.
81,514,500 in self-liquidating loans, and
7,500,000 in allocations to the Department of Agriculture for financial aid to farmers.

During October, the Corporation completed a total of \$675,000,000 of its 3½% notes as sales to the Secretary of the Treasury, and the Corporation during the month allocated \$7,500,000 to the Secretary of Agriculture, which runs up to \$117,500,000 the amount allocated to agriculture from Feb. 2 to Oct. 31. The Corporation also during October subscribed \$36,000,000 to the capital of its authorized 12 regional agricultural credit corporations and of that amount actually paid in \$24,000,000.

The loans authorized under Section 5 were as follows:

Banks and trust companies (including receivers)	\$21,448,494.57
Building and loan associations	3.701.907.76
Insurance companies	_ 1.209.000.00
Mortgage loan companies	4.392.500.00
Joint stock land banks	594.930.10
Agricultural credit corporations	1.272.978.89
Livestock credit corporations	477.105.00
Railroads	25,926,269.00
Total	950 002 195 29

From the Washington advices Nov. 28 to the New York "Times" we quote:

Loans to Banks Decrease.

Loans to Banks Decrease.

Loans authorized during the month for banks and trust companies and other financial institutions aggregated \$33,096,916.38, compared with \$42,923,959.50 in the preceding month. Commitments to finance self-liquidating construction involved \$81,514,500 against \$53,105.000 in September. An additional \$25,926,269 was approved in loans to railroads during October, compared with \$21,293,541 in the preceding month.

Another large outlay by the Corporation during the month was the \$36,000,000 of capital, which it undertook to subscribe to its twelve regional agricultural credit corporations.

These and other less imposing totals involved in its October operations brought the Corporation's aggregate commitments and authorizations for the month to \$206,923,447.38. Included were \$22,634,762 of direct and work relief loans to the various States and their political subdivisions, \$7,500,000 allocated to the Secretary of Agriculture to be distributed for crop production purposes, and \$251,000 of new loans to two "bona fide" institutions to insure orderly marketing of agricultural commodities.

Out of the latter loan authorizations \$175,000 went in two loans to the Growers Fruit Exchange of Inwood, W. Va., and \$76,000 to the Canner Finance Corporation of Cleveland. Neither of the loans to the Fruit Exchange had been advanced by the corporation up to Nov. 14, when the report was closed.

There was a marked decline during October in both the number and

Exchange had been advanced by the corporation up to Nov. 14, when the report was closed.

There was a marked decline during October in both the number and size of loans authorized to banks and other financial institutions. Only twenty-five of the total number of authorizations to banks and trust companies were for \$200,000 or more.

Among other borrowers obtaining loans of \$200,000 or more were two building and loan associations, four insurance companies, two mortgage loan companies, one Joint Stock Land Bank and one agricultural credit corporation, other than the regional agencies established by the Reconstruction Finance Corporation. All but one of the railroad loans were for more than \$200,000.

The Corporation offices in Washington received 768 applications for

more than \$200,000.

The Corporation offices in Washington received 768 applications for new loans during October, of which 601 were from banks and other financial institutions and the railroads; 88 from States and municipalities for relief purposes; 76 from applicants seeking loans for financing self-liquidating construction, and three from institutions seeking funds to assure carrying an orderly marketing of agricultural commodities.

Among the 601 applications from eligible borrowers under Section 5 of the Act were 484 from banks and trust companies, including 21 receivers or liquidating agents for closed institutions; 62 from building and loan associations; 6 from insurance companies; 10 from mortgage loan companies; 2 from credit unions; 3 from Joint Stock Land banks; 14 from private agricultural credit corporations; 10 from live stock credit corporations, and 10 from railroads.

In presenting the report to Mr. Trimble, Atlee Pomerene, Chairman of the Reconstruction Finance Corporation, said:

Chairman of the Reconstruction Finance Corporation, said:

Dear Sir—Pursuant to the provisions of Section 201 (b), Title II, of the Emergency Relief and Construction Act of 1932, the Reconstruction Finance Corporation submits this report of its activities and expenditures for October, 1932, together with a statement of loans authorized during that month, showing the name, amount, and rate of interest in each case.

Under the provisions of Section 5 of the Reconstruction Finance Corporation Act, the Corporation during this period authorized 553 loans aggregating \$56,552,185.38, and authorized increases aggregating \$2,471,000 in loans authorized prior to Oct. 1 1932, making a total of \$59,023,185.38, as shown in Table 1. These figures and the list of loans authorized, contained in Table 1, do not include amounts withdrawn or canceled from Oct. 1 to Nov. 14 1932, inclusive, the date this report was closed.

Loans Sometimes Canacter.

Loans Sometimes Cancelea.

Of the \$59,023,185.38 authorized under Section 5, \$21,448,494.57 was authorized to banks and trust companies including \$1,940,250 to aid in the reorganization or liquidation of closed banks); \$3,701,907.76 to build-

ing and loan associations; \$1,209,000 to insurance companies; \$4,392,500 to mortgage loan companies; \$594,930.16 to Joint Stock Land banks; \$1,272,-978.89 to agricultural credit corporations; \$477,105 to livestock credit corporations; and \$25,926,269 to railroads.

1978.39 to agricultural credit corporations; \$477,105 to livestock credit corporations; and \$25,926,269 to railroads.

Loans authorized by the Corporation are sometimes withdrawn or canceled in full or in part, due to: The funds are not required by the borrowing institution; part of the collateral is defective or not available for pledging at the time; the borrowing institution closed after the loan was authorized, and other reasons. Loans which were authorized under Section 5 in October and withdrawn or canceled in full during the period from Oct. 1 to Nov. 14, inclusive, no part of the proceeds being disbursed, are not included in the loans authorized and listed in Table 1, but are summarized below.

Likewise, in cases where parts of loans authorized in October were withdrawn or canceled during the period from Oct. 1 to Nov. 14, inclusive, the amounts withdrawn or canceled are not included in Table 1, the net amount of the authorizations being given. These withdrawals or canceled in full during the period from Oct. 1 to Nov. 14, inclusive, no part of the proceeds being disbursed, were as follows: To 12 banks and trust companies, aggregating \$321,091.71, and one building and loan association in the amount of \$25,000.

ount of \$25.000.

Advances Withdrawn.

Parts of loans authorized during October which were withdrawn or canceled during the period from Oct. 1 to Nov. 14, inclusive, were as follows: To banks and trust companies, \$154,490.61; to building and loan associations, \$37,592.24; to a Joint Stock Land bank, \$69.84; to agricultural credit corporations, \$10,434.95; and to a livestock credit corporation, \$1,200

\$1,200.

Loans authorized during September which were withdrawn or canceled in full during the period from Oct. 1 to Nov. 14, inclusive, no part of the proceeds being disbursed, aggregated \$385,369.50. These withdrawals and cancellations are listed in Table 2, because the loan authorizations were included in the Corporation's report for September.

Parts of loans authorized during September which were withdrawn or canceled during the period from Oct. 1 to Nov. 14, inclusive, aggregated \$358,369.09. These withdrawals and cancellations are listed in Table 3 because the loans to which they relate were contained in the Corporation's report for September.

Loans authorized during August which were withdrawn or canceled in full during the period from Oct. 1 to Nov. 14, inclusive, no part of the proceeds being disbursed, aggregated \$467,000. These withdrawals and cancellations are listed in Table 4, because the loan authorizations were included in the Corporation's report for August.

Other Withdrawals.

Other Withdrawals.

Parts of loans authorized during August which were withdrawn or canceled during the period from Oct. 1 to Nov. 14, inclusive, aggregated \$3.554.883.17. These withdrawals and cancellations are listed in Table 5 because the loans to which they relate were contained in the Corporation's

report for August.

Loans authorized during the period from July 21 to 31, inclusive, which were withdrawn or canceled in full during the period from Oct. 1 to Nov. 14, inclusive, no part of the proceeds being disbursed, aggregated \$101,500. These withdrawals and cancellations are listed in Table 6 because the loan authorizations were included in the Corporation's report for the period from July 21 to 21, inclusive. from July 21 to 31, inclusive.

Further List.

Parts of loans authorized during the period from July 21 to 31 1932, inclusive, which were withdrawn or canceled during the period from Oct. 1 to Nov. 14, inclusive, aggregated \$168,307.19. These withdrawals and cancellations are listed in Table 7 because the loans to which they relate were contained in the Corporation's report for the period from July 21 to 31. inclusive.

In addition to the above, loans aggregating \$671,000 which were authorized before July 21 1932 were withdrawn or canceled in full during the period from Oct. 1 to Nov. 14, inclusive, and parts of loans which were authorized before July 21 1932 aggregating \$4,765,448.12 were withdrawn or canceled during the period from Oct. 1 to Nov. 14, inclusive. In cases where loans authorized prior to October 1932 were increased during the month of October, the amounts of such increases are listed in Table 1 as loans authorized during October.

Applications Received.

Applications for loans received at the Washington office of the Corporation under Section 5 of the Act during October numbered 601, as follows: 484 from banks and trust companies (including 21 applications from receivers or liquidating agents of closed banks); 62 from building and loan associations; 6 from insurance companies; 10 from mortgage loan companies; 2 from credit unions; 3 from Joint Stock Land banks; 14 from agricultural credit corporations; 10 from livestock credit corporations; and 10 from railroads.

Under the provisions of Section 1, Table 1, of the Emergency Relief and Construction Act of 1932, the Corporation authorized during October \$22,634,762 for the purposes of relief, as shown in Table 8. Formal applications received under this section during October numbered 88. Under the provisions of Section 201 (a), Title II, of the Emergency Relief and Construction Act of 1932, the Corporation authorized during October loans or contracts aggregating \$81,514,500 as shown in Table 9.

Contract Canceled.

Part of a contract which was authorized under Section 201 (a) durin October was canceled before the close of this report in the amount of \$14,000. The amount canceled is not shown in Table 9, the net amount of the authorization being given.

Formal applications received under Section 201 (a) during October numbered 76.

numbered 76.

Under the provisions of Section 201 (d), Title II, of the Emergency Relief and Construction Act of 1932, the Corporation authorized during October three loans in the amount of \$251,000, as shown in Table 10.

Part of a loan which was authorized under Section 201 (d) during October was canceled before the close of this report in the amount of \$135,111.94.

The amount canceled is not shown in Table 10, the net amount of the authorizetton being given. ization being given.

Loans to Puerto Rico.

Formal applications received under Section 201 (d) during October imbered three.

numbered three.

Under the Reconstruction Finance Corporation Act, as amended, and the Emergency Relief and Construction Act of 1932, the Corporation is authorized to make loans in Puerto Rico. During the month the Corporation established a custodian in that island.

During October \$75,000,000 of the \$250,000,000 "third series" 3,4% notes authorized by the board of directors on July 23 1932, were sold to the Secretary of the Treasury, making a total of \$675,000,000 of 3½% notes of three series issued by the Corporation and sold to the Secretary of

the Treasury. The authorization for the remaining \$75,000,000 of notes of the "third series" which had not been issued was canceled. The three series of notes in the aggregate amount of \$675,000,000 matured on Oct. 27, and the board of directors on that date authorized the issuance of notes in the aggregate principal amount of \$1,000,000,000 designated as "Series A," maturing April 30 1933, and bearing interest at the rate of 3½% per annum. Of this amount, \$675,000,000 was accepted by the Secretary of the Treasury in exchange for the corporation's outstanding notes in an equivalent principal amount. The remaining \$325,000,000 will be purchased by the Secretary of the Treasury as the funds are required by the Corporation.

During the month the Corporation allocated \$7,500,000 to the Secretary of Agriculture in accordance with the provisions of Section 2 of the Reconstruction Finance Corporation Act, making a total of \$117,500,000 allocated from Feb. 2 to Oct. 31, inclusive. Of this sum \$75,000,000 had been paid over to the Secretary of Agriculture as of Oct. 31 1932.

Capital Subscriptions.

Capital Subscriptions.

Capital Subscriptions.

Section 201(e) of the Emergency Relief and Construction Act of 1932 provides that the Reconstruction Finance Corporation shall subscribe for the capital of the regional agricultural credit corporations and pay for such capital out of the unexpended balance of the amounts allocated and made available to the Secretary of Agriculture under Section 2 of the Reconstruction Corporation Act. During October the Corporation subscribed for the capital of 12 of the regional agricultural credit corporations in the aggregate amount of \$36,000,000. Of this sum, \$24,000,000 was paid in by the Reconstruction Finance Corporation during the month of October from the unexpended balance of the amounts allocated and made available to the Secretary of Agriculture under Section 2 of the Reconstruction Finance Corporation Act.

Under the authority conferred on it by the provisions of Section 201(e), of the Emergency Relief and Construction Act of 1932, the Corporation has created the following two regional agricultural credit corporations to serve the indicated Federal land bank districts, in addition to the 10 listed in the Corporation's report for September:

District Number 1 (New York, New Jersey, Vermont, New Hampshire, Maine, Massachusetts, Connecticut and Rhode Island); Regional Agricultural Credit Corporation of Albany. New York (with a branch office at Bangor, Maine).

District Number 2 (Pennsylvania, Maryland, Delaware, Virginia and

Bangor, Maine).

District Number 2 (Pennsylvania, Maryland, Delaware, Virginia and West Virginia), Regional Agricultural Credit Corporation of Baltimore, Md. Tables Attached.

Tables Attached.

The following tables are attached as a part of this report:

Table 1—Statement of leans authorized from Oct. 1 to Oct. 31 1932, inclusive, under Section 5 of the Reconstruction Finance Corporation Act, showing the name, amount, and rate of interest in each case (exclusive of amounts withdrawn or canceled from Oct. 1 to Nov. 14 1932, inclusive).

Applications for Loans of \$13,600,000 Approved by Federal Home Loan Bank Board-Chairman Fort That 197 Applications Having Total of \$34,000,000 Have Been Submitted.

Applications for loans totaling \$13,600,000 have been approved by the Federal Home Loan Bank Board, it was stated orally Dec. 23 by Chairman Franklin W. Fort, of the Board. He reported that 197 applications for lines of credit which he estimated to total approximately \$34,000,000 have been received by the Board. From the "United States Daily" of Dec. 27 we quote further as follows:

In one day this week, lines of credit amounting to \$1.080.000 were approved for applicants for loans from the district served by the Home Loan Bank at Little Rock, Mr. Fort said. Other district banks had applications approved during the week totaling from \$60,000 to \$700.000.

Procedure Expedited.

Although the actual work of approving loans has been in progress only a little more than three weeks, Mr. Fort said, the Board has now developed its routine of action so that it is able to turn out a comparatively large number of decisions on applications. Twenty-one applications for loans, carrying credit lines totaling \$700,000 were approved Dec. 22. the Chairman

The highest sum loaned thus far to one borrowing institution is \$300.000, according to Mr. Fort. The average request received is for a loan of about \$150.000, he indicated. The amount of the loans made to each district has not yet been announced.

No Definite Refusals.

All the applications received by the Board have first been approved by the district banks which sent them in, Mr. Fort said. No applications have as yet been definitely refused, although several have been held for further consideration.

The Record execute that effect the held of the second execute that effect the second execute the second ex

The Board expects that after the holidays a large number of the applications awaiting consideration will have been acted upon and that a substantial increase in the lines of credit extended will be shown, Mr. Fort said.

St. Louis-San Francisco and Denver & Rio Grande Roads Seek Additional Loans from Reconstruction Finance Corporation-Pere Marquette and Texas Oklahoma & Eastern Withdraw Loan Applications.

Approval by the Inter-State Commerce Commission of a three-year loan of \$3,000,000 from the Reconstruction Finance Corporation was asked by the St. Louis-San Fran-?7 in an application filed with both agencies

by J. M. Kurn and John G. Lonsdale, receivers for the road. Proceeds of the loan would be applied to payment of current taxes, and principal and interest of maturing equipment trust obligations. The application asks immediate approval of the full amount and its advancement in three instalments of \$1,000,000. As security for the loan the applicants offer receivers' certificates. Simultaneously the Denver & Rio Grance Western RR. asked the Commission's approval of a loan of \$2,500,000 from the R. F. C. to aid in the payment of taxes and of principal on equipment trusts. The road proposes to pledge its refunding and mprovement mortgage bonds together with shares of stock as collateral.

The St. Louis-San Francisco in February 1932 secured a \$2,805,175 loan from the Reconstruction Finance Corpora tion and in June the loan was repaid by the Railroad Credit Corporation. The Commission on April 29 approved another loan of \$1,800,000, conditional on the company submitting to the Commission a refinancing plan. A third loan of \$3,390,000 was approved by the Commission on June 30. Two loans of \$500,000 and \$2,000,000 respectively (exclusive of \$3,850,000 loan to construct the Dotsero Cutoff) have been advanced to the Denver & Rio Grande RR. by the Reconstruction Finance Corporation with the approval of the Commission, but the loan of \$500,000 has been repaid by the Railroad Credit Corporation.

The Inter-State Commerce Commission has dismissed the application of the Pere Marquette Ry. for a loan of \$1,000,000 from the R. F. C. at the request of the carrier, the company having received a loan of a like amount from the Ralroad Credit Corporation to be applied in the payment of interest due on its first mortgage bonds on Jan. 1.

The Texas Oklahoma & Eastern RR. has withdrawn its application to the Reconstruction Finance Corporation for a loan of \$217,477, on which the Inter-state Commerce Commission approved a loan of \$108,740 and the application has been dismissed.

Hearing on Application of Railroads to Maintain Present Surcharges Ends—Commission Told Extension of Emergency Rates Is Vital to Carriers-\$200,000,-000 Deficit Seen for Class I Lines in 1932.

The petition of the railroads for definite continuance after March 31 1933 of the emergency freight rate surcharges of 15% which was heard before the Inter-State Commerce Commission on Dec. 28 was adjourned for further hearings on Dec. 29 only if such are requested by interested parties. No shippers appeared, but they may express their opposition through affidavits filed with the Commission. During the course of the hearing the Commission was told that owing to the decline in railroad operating revenues the Class I roads probably will have a combined deficit of \$200,000,000 on their 1932 operations. Witnesses appearing in support of the railroads' request included among others Dr. Julius H. Parmelee, Director of the Bureau of Railway Economics. The "Wall Street Journal," Dec. 28, in its account of the hearings stated in part:

The present economic situation of the railroads warrants the continuations, after March 31 1933, of the emergency freight rate surcharges without the requirement that revenues so derived be paid into a loan fund for weak railroads, Dr. Julius H. Parmelee told the Commission. Appearing as the first witness for the carriers, Dr. Parmelee pointed out that railroad traffic and revenues have shown a continuous and progressive decline since 1929. since 1929.

The railroads as a whole have failed to earn their fixed charges in 1932 The railroads as a whole have failed to earn their fixed charges in 1932 by a considerable margin, he asserted. Net deficit amounted to \$169,000,000 during the first nine months of 1932 and seems likely to approach \$200,000,000 for the year as a whole, he said. During the first nine months, Dr. Parmelee declared, 122 roads operated at a loss. These carriers failed to earn their fixed charges by \$231,509,000. During the same period, after deducting emergency surcharge revenues, a total of 128 roads reported a deficit under fixed charges of \$265,019,000.

40 Cents of Each Dollar for Taxes

Dr. Parmelee further told the Commission that the railroads in 1932 paid 40 cents out of each dollar of net operating revenue for taxes. "This means," he said, "that two-fifths of the rail transportation properties of the United States were operated in 1932 for the benefit of states, federal and local governments."

and local governments."

Dr. Parmelee also pointed out that the declines in rail revenue that occurred in 1930 and 1931 have continued in 1932. Although the carriers have made large reductions in operating expenses, they were unable to match each dollar of lost revenue with a corresponding reduction in expenses. Accordingly, net railway operating income declined to a much greater relative degree than did revenues. For the United States as a whole, operating revenues during the first 10 months of 1932 declined 26.9% under 1981, with freight revenue falling 26.5% and passenger revenue 32.1%. Operating expenses were reduced 26.7%, the heaviest reduction being 34.7% in maintenance of way.

Ten Months' Net Down 44.1%.

The witness further declared that maintenance of equipment expenses were reduced 25.8%, and transportation expenses 25.6%. Net railway operating accome declined from \$464,250,000 in the first ten months of

1931 to \$259,535,000 in the corresponding period of 1932, a decrease of \$204,715,000, or 44.1%. "There are 162 Class I roads or systems, including \$204,715,000, or 44.1%. "There are 162 Class I roads or systems, including large switching and terminal companies, operating 242,186 miles of line, that reported information as to their complete fixed charges and net income to the Inter-State Commerce Commission for the first nine months of this year. These carriers in that period failed as a whole to earn their fixed charges by \$168,997,000. These same carriers reported a net income after fixed charges, for the first nine months of 1931, totaling \$84,366,000. "Out of the total of 162 carriers, 122 reported a deficit after fixed charges, which for these carriers for the first nine months of 1932 totaled \$231,509,000," Dr. Parmelee recited.

He said that after deducting the revenues from the

charges, which for these carriers for the list line months of 1932 totals \$231,509,000," Dr. Parmelee recited.

He said that after deducting the revenues from the emergency rates, there were 128 roads in the "red" during the first nine months of 1932; these showed a total net deficit of \$265,019,000.

"Only 30 Class I railroads, who participate in the marshaling and distributing plan, earned a net income in excess of their fixed charges, for the first nine months this year," he said.

Receipts from emergency rates reported by Class I steam roads for the country as a whole for the first ten months of 1932, were 2.6% of the aggregate gross freight revenue of the carriers. Compared to net railway operating income, the total emergency revenue was equivalent to 20.2%. Witness concluded that it is clear that a substantial portion of the net railway operating income earned in 1932 was contributed by the emergency revenue. The net operating income would have been greatly reduced had not these emergency revenues been received, Dr. Parmelee stated.

Questioned by Commissioner Eastman as to whether there had been any appreciable improvement in the railroad situation over the past several months, Dr. Parmelee stated that the rate of decline in traffic and revenues in those months was under that of the corresponding period last year.

Rate Rise Brought in \$52,000,000

Rate Rise Brought in \$52,000,000

G. E. Buckland, President of the Railroad Credit Corporation, testified as to the receipts accruing to the Railroad Credit Corporation from the pooled surcharge revenues. He said that for the ten months ended with October, cash proceeds from the increased rates amounted to \$52,205,225. Payments to the corporation on account of these accruals has amounted to

Other witnesses appearing in support of the railroads' request beside Dr. Julius H. Parmelee, included E. G. Buckland, President of the Railroad Credit Corporation; Daniel Willard, President of Baltimore & Ohio; Paul Shoup, Vice-Chairman of the board of the Southern Pacific Co.; D. T. Lawrence, Chairman of the Traffic Executives' Association for Eastern Territory, and J. E. Tilford and E. B. Boyd, tariff publishing agents respectively for the Southern and Western roads. An affidavit of testimony in support of the formal petition of the Association of Railway Executives from W. R. Cole, President of the Louisville & Nashville Railroad, also was read into the record.

Patrick J. Farrell Elected Chairman of Inter-State Commerce Commission.

Patrick J. Farrell was on Dec. 28 elected Chairman of the Inter-State Commerce Commission to take office Jan. 1, succeeding Claude R. Porter. Mr. Farrell succeeds to the post through the rotation procedure of the Commission. He has been with the Commission 32 years. He was appointed Commissioner by President Coolidge in June 1928. Prior to that he had been the Commissioner's first chief examiner, the first solicitor of the Bureau of Valuation and the first Chairman of the Commission's board of reference. In 1918 he became chief counsel for the Commission and continued in that position until he became Commissioner.

Gerard Swope on Stabilization of Employment-Assurance and Insurance-Would Have Employer and Employee Co-operate in Measures.

Discussing on Dec. 28 the subject of "Employment: Assurance and Insurance," Gerard Swope, President of the General Electric Co., observed that "in the study that is being given to this question now by commissions in different States, varied solutions are being proposed. In some," he noted, "the burden of unemployment reserves is borne entirely by the employer; in some, it is borne half by the employer and half by the employee; in some, two-thirds by the employer and one-third by the employee; in some, onethird by the employer, one-third by the employee and onethird by the State; in some, the unemployment reserve fund is segregated for the particular company, and again in others it is being put into a general fund for the use of unemployed in any company or industry in that particular State."
"It seems to me," said Mr. Swope, "that two fundamentals

of wise legislation for unemployment reserves, if legislation is attempted, are: first, that they should be contributory by employer and employee, and secondly, the funds should be segregated for the particular company and not placed in a general fund to be drawn on by all companies."

In outlining his proposals, Mr. Swope went on to say:

Many of the unemployment insurance plans that are being prescribed rovide for benefits after too long a waiting period, and are inadequate in mount, and payments extend over too short a period. The man during uch a period must be able at least to meet the responsibility for food, helter and clothing for his family, and after the brief period provided in hese plans has elapsed, he must still go on providing for these essentials.

But whatever these solutions, there is one further step that seems to me necessary. In any crisis as severe and long-continued as the present, even if unemployment reserves had been established years ago, they probably would not have been sufficient. So here again, before going to the State for assistance, or to charity for relief in such emergency, I believe the appeal should be made to all employees in each particular company to make a contribution toward unemployment benefits for their fellow employees to whom a certain minimum amount of work could not be given; and here again, the company should at least match such contributions. This, of course, should be used only in an unemployment emergency, where the normal reserves that have been built up over a period of years are not sufficient to meet the emergency; and this emergency call on other employees in the same company and on the company itself should cease when the emergency ceases.

In some instances, where such an unemployment emergency fund has been established, it has been found that the collateral benefits have been surprising. It has brought to every man in the organization, even at a distance from the particular places of unemployment, a recognition of this problem, a broader conception and understanding of his responsibilities, a knowledge that he also must necessarily share in these burdens; rather than have them borne entirely by the few unfortunates; that he with the rest of us who are fortunate enough to hold our jobs, should rightfully bear some of the burden. It is more direct to help our fellows in the same company, rather than to have them helped vicariously by the community through taxation, or by contributions to charity drives for relief of people unknown to us, without a personal claim. The burden is borne more equally and the results and benefits more directly placed, and with more of a knowledge and human touch than is possible in a general city- or Statewide emergency drive. And in those instances where such a plan has been effectiv

So, to sum up, from the standpoint of society as a whole and the human beings that comprise it:

First, we must decide in what volume and what kind of products we want industry to supply and how to have industry organized to be of service. Second, we must secure for workers in industry an assurance of minimum.

second, we must secure for workers in industry an assurance of minimum employment per year, at compensation adequate to enable them to live in accordance with a standard of fiving that we want to maintain and can maintain, with the requirement that the employees themselves analyze, understand, and accept their responsibilities and contribute toward the solution of the problem by laying aside a certain portion of their earnings for accident, invalidity, and death for old-age retirement and for periods of cessation of work if they come

for accident, invalidity, and death for old-age retirement and for periods of cessation of work if they come.

Third, where we have not advanced far enough to be able to give an assurance of employment, unemployment reserves should be built up and maintained as a separate reserve by each unit.

Fourth, every individual who has worked with his company a certain minimum length of time to qualify as a recipient of such benefits and who receives less than a specified annual compensation, shall contribute towards its cost and share in its administration.

Fifth, the employer should contribute to the unemployment reserves of less than the amount contributed by the employees.

Sixth, to have a minimum waiting period before such benefits become

Seventh, to have the minimum of such benefits adequate to provide for

Seventh, to have the minimum of such benefits adequate to provide for food, shelter and clothing.

Eighth, to provide such benefits over a sufficiently long period, without calling on the State or society for relief or charity.

Ninth, make provision for such unemployment emergencies as may transcend the usual periods of unemployment, which cannot be met by the regular unemployment reserves, by calling on all other employees of that particular organization for contributions and also on the employer for similar contributions.

If these things are done, either as a result of encouragement of industry by

for similar contributions.

If these things are done, either as a result of encouragement of industry by the State, or, if that is found inadequate, by legislation, we will find that the best brains of employer and employee will be directed toward a solution of these pressing and human problems, which must be solved. Therefore, these efforts will be along the lines of those of the scientists in your own Association, who are constantly drawing on their records and experience, and working for the advancement of knowing how and what to do, with the recognition, as stated in the foreword, that our knowledge is never complete and that there must always be progress.

In part, Mr. Swope, whose views were presented in At-

In part, Mr. Swope, whose views were presented in Atlantic City (Dec. 28) before the American Association for the Advancement of Science, also had the following to say:

If the primary function of industry, therefore, is to serve the community and to serve it effectively and efficiently, it must be apparent that someone or somebody should be aware of the extent of the service required by the community, in order to lay out the work and co-ordinate all efforts to accomplish this.

community, in order to lay out the work and co-ordinate all efforts to accomplish this.

After having decided on the scope of the work or service that the community needs or desires, it is necessary to provide the instrumentalities of production, to encourage initiative in better methods, and to associate in this work the number of men and women that may be required, and to enlist not only their service but their sympathy, understanding and loyalty. To do this, it seems to me that when young men and women enter a field of work, they should be assured that the work is worth while doing and that it is needed by the community, that from this knowledge they will gain respect for the work they have undertaken. Their work should afford them an opportunity to develop; it should stimulate them to give the best that is in them, they should feel there is such scope in the work that they can look forward to a broader horizon and greater responsibility if their tastes, talents and abilities lie in that direction. But if men and women of the rank and file are going to give the best that is in them, in the way of loyal and devoted service, they should be assured, as far as humanly possible, of continuity of employment; their work should be sufficiently remunerative so that by proper care they can look forward to taking on the responsibilities of a family, of providing for them in the way of reserves, or insurance in case of accident, invalidity or death, and pension reserves for old age—but primarily and immediately that as long as they are able to work and willing to work they should have some assurance of employment. To accomplish these things, it seems to me fundamental and essenfor old age—but primarily and immediately that as long as they are able to work and willing to work they should have some assurance of employment. To accomplish these things, it seems to me fundamental and essential that we enlist the understanding and co-operation of the men and women themselves, for this life is theirs; they have some responsibility; they must understand its purport, and therefore as a corollary, even if these things could be done for them by the State or by other agencies, they should not be done for them but with them, and primarily by them.

More and more, the attention of employer and employee, and the pressure of society upon both employer and employee, should be directed to finding the solution of this problem of assurance of employment over a long period, measured by the income of a year, rather than by a rate of wages per hour, per week or per month. Rates of wages per hour mean nothing to-day if a man has no work at all, or very little if he has but one or two days' work

a week. It is not rates of wages per unit of so short a time as an hour that count, it is necessary for a man to have an income over a period embracing all the seasons of a year in order that he may be able to meet the burdens and responsibilities he has assumed. Therefore, assurance of employment with a minimum amount of earnings per year must be looked forward to as the goal toward which we must strive and upon which the attention of the employer, the employee and society must be focused. This is no visionary program; some progress has been made in some industries, and it has actually been accomplished in several instances, even in these recent trying

actually been accomplished in several instances, even in these recent trying years.

This co-operative and contributory method to provide for employee benefits is becoming more and more recognized. It has been set forth in a tentative bill introduced in the Congress of the United States in the early part of this year, and favored by the large and influential railway labor unions, to provide old-age retirement and insurance for railway employees, which is based on a contribution by the employee and an equal contribution by the railways. This is educational for the man; it teaches and encourages him to save and makes for better co-operative work between employer and employee and better administrative methods; it places the entire burden on the individual and the particular industry; and later on the burdens will not have to be met indirectly by society through taxation.

The employer should contribute toward the unemployment reserve fund so that his interest will be enlisted to make employment more assured, that it will enter into the cost of the products and be reflected in the price of the products to the public. He will be more encouraged to work toward assurance of employment if he knows that, as he gives intelligent thought to his business and more and more minimizes irregularities of employment, the reward of such stabilization will not only go to his employees but will also come to him. If the employer is called upon to bear the entire burden of unemployment reserves, there is a premium put upon him to find some way of escape, especially as competition may force him either toward lowering wages or building up his work in States where the burdens are not so great. Where the burdens are shared, the spirit of the endeavor is entirely different, and develops a much better co-operative attitude on the part of the employer.

And if this is so, it follows as a corollary that such unemployment reserves

different, and develops a much better co-operative attitude on the part of the employer.

And if this is so, it follows as a corollary that such unemployment reserve funds by each particular company should be used to ameliorate the condition of unemployment in that particular company. It would be a mistake, it seems to me, to have such unemployment funds go into a general reservoir, that would be drawn on most by the inefficient companies and industries, where possibly their problem is more difficult, and least by those which are the most efficient and therefore have gone further in stabilizing employment, although these latter companies may have contributed to a greater degree to the general reserves. This to me seems manifestly unfair and would be prejudicial to the earliest and best solution of this unemployment problem. Another reason for such segregation of unemployment reserves is that we should know for each company and each industry what its cost is, and not have this concealed by placing the unemployment reserves in a general reservoir, to be drawn on by all companies.

Senator Harrison to Offer Senate Resolution for Inquiry into Economic Problems-Will Seek Advice from Economists, Financiers and Statesmen.

Senator P. Harrison of Mississippi, ranking Democratic of the Senate Finance Committee, who will be its Chairman in the new Congress, announced on Dec. 27 that when the Senate reconvened he will offer a resolution directing the Finance Committee to begin a study of the whole economic situation, with a view to obtaining constructive suggestions from leading economists, financiers and statesmen for restoration of economic stability. The New York "Herald Tribune" reports as follows from Washington Dec. 27:

The Mississippi Senator has discussed the proposed study with other Democrats on the Finance Committee and with Senator Reed Smoot. He has found active support and, he said, no opposition.

Hopes to Stabilize Exchanges.

Senator Harrison made it plain that he had in mind the monetary problem

Senator Harrison made it plain that he had in mind the monetary problem as one of the foremost propositions to be considered. He said exchanges must be stabilized and commodity prices increased. He also wants government debts refinanced at lower interest rates as well as drastic economies. While Senator Harrison was announcing his program, Senator Charles L. McNary of Oregon, acting Republican leader of the Senate, declared the pressure for monetary legislation was increasing greatly. He said it was coming not alone from agriculture but from business men. He predicted the new Congress would be forced to take up the problem and act on it, provided nothing was done this winter. Senator McNary indicated that the pressure for action was such that the short session might be compleled to act. to a

"We have now groped in economic despair for more than three years,"
Senator Harrison said. "The situation neither at home nor abroad shows
any marked improvement. The methods which have been adopted are
merely palliative. The situation has become cancerous. Certainly, in
the circumstances the best constructive thought of the nation should be
given, that the Congress and the new Administration may be aided in
adopting the wisest policies which will hasten economic recovery.

Balance Budget Emphasized.

Balance Budget Emphasized.

"Personally, I believe that radical curtailments in governmental activities and every economy in governmental administration must be adopted, thus effecting savings to the taxpayers. A balanced budget to preserve the credit of the Government must be obtained and maintained. Aside from that, exchanges must be stabilized and commodity prices increased. Tariff barriers must be lowered and international trade encouraged.

"As to the wisest and sanest method to be employed in order to deal with these questions, and others which may be inter-related to the general economic depression, financiers, economists and statesmen may differ, but certainly in such circumstances every one should give his best thought to a solution of these problems and as far as possible present them to the Contress as helpful guidance."

Showered with questions. Senator Harrison amplified his views. He emphasized the need of radical reductions in Government expenditures in order to balance the budget and predicted Governor Roosevelt, at the next

emphasized the need of radical reductions in Government expenditures in order to balance the budget and predicted Governor Roosevelt, at the next session, would be given "very broad powers for reorganization. co-ordination and consolidation of Government agencies." He said much saving could thus be effected and he mentioned one "foreign town" in which 52 Americans were employed as representing different bureaus and agencies at Washington. He pronounced this "an outrage."

Receives Advice from Roosevelt.

He admitted that Godernor Roosevelt had communicated with him and urged cutting of expenditures, and from this it is inferred that Governor

Roosevelt is seeking blanket power to reorganize bureaus and agencies and effect economies. On his plan for action on the monetary problem, Senator

effect economies. On his plan for action on the monetary problem, Senator Harrison said:

"As Chairman of the Finance Committee in the new Congress I shall certainly make an effort to reduce expenditures 25%. I have had but one communication from Governor Roosevelt and that is one in favor of cutting expenditures. Governor Roosevelt insisted on carrying out the economy pledge in the Democratic platform.

"We have offered this bill and that. We have groped for three years in economic despair. At most the measures which have been passed have been merely sedative. I have not talked this specific plan over with Governor Roosevelt, but I have talked it over with the minority members of the Finance Committee and with Senator Smoot, the Chairman, and all say it would be helpful.

"I do not know just how much can be saved in veterans' benefits, but certainly there ought to be readjustments. There will have to be cuts all along the line. I believe, also, that great savings can be made by the refunding of the Government's debt at a lower rate of interest. There has never been so fine an opportunity to save in this fashion.

"I hope the Finance Committee hearings can begin early in January, so that the new Administration may have the beneift of the ideas expressed there."

Barter System to Aid Unemployed - Emergency Exchange Association's Plan for Exchanging Labor for Scrip—Functioning in New York—Groups Plan National Exchange—State-Wide System in Force in California—Salt Lake City Banks Accept Scrip.

Under the auspices of the Emergency Exchange Association, of 52 Vanderbilt Ave., New York City, a barter local was opened last week at 4861 Broadway in the Inwood section of upper Manhattan to make practical contact with the problems of the locals and to establish the principles on which the operation of further locals may most effectively be conducted in a general system. We quote from the New York "Times" of Dec. 28, which further reported:

More than 200 unemployed men and women of diverse occupations have registered their willingness to work through this Inwood local and be paid in scrip which will entitle them to use a compensating quantity of such goods and services as the local has available. A half-dozen grocers have agreed to accept the crip of the Inwood local for goods in limited amounts at the outset. The grocers plan to use the accumulated scrip to pay for jobs which they have postponed because they could not afford to lay out the cash.

Plan Called Non-Competitive

Plan Called Non-Competitive.

The nationwide system proposed by the Emergency Exchange Associa-on would constitute a barter system with a substitute money operating arallel with the existing economic system of gold standard Dr. Frank D. Graham, Economist, of Princeton University, a director

of the Emergency Exchange Association contends, however, that production by the otherwise unemployed for one another's needs would have no effect in narrowing the market for the goods produced by workers who still have their regular jobs.

still have their regular jobs.

"A man without income can consume only at the bounty of some one else," Dr. Graham said, "and the latter, to make the gift. must forego something that he could otherwise himself have consumed."

According to Professor Graham, as soon as ordinary business could effect the adjustments necessary to permit the emergence of profits on an enlarged output, it would draw workers from the emergency barter organization and the output of the latter would shrink toward zero.

Not all of the directors and supporters of Emergency Exchange Association, Inc., however, are so sure of the immediate return of prosperity to the present employed economic system. Leland Olds, Chairman of the New York State Power Authority, said the new Association simply was attempting to deal with a condition, not with a theory, and that it was fundamentally "opportunistic" in its policies.

According to the same paper one of the principal features

According to the same paper one of the principal features of the plan now being put into force by the Emergency Exchange Association for bringing unemployed men and women into a working relation with unemployed equipment and materials was explained on Dec. 27 as a national clearing house for the multiple barter systems, which have been organized locally throughout the country through the spontaneous attempt of the unemployed to meet one another's needs. The "Times" further said:

Under the guidance of a board of directors of prominent economists, engineers, lawyers and consultants, whose names already have been published, and with the support of philanthropic agencies, civic and religious societies, relief bodies, bankers and business men, this Emergency Exchange Association, with quarters provided for it at 52 Vanderbilt Avenue by the Heckscher Foundation, proposes to arrange for the separated groups of unemployed men and women, organized in local barrer systems, to exchange goods and services from locality to locality, from the agricultural raw materials of the rural districts to the finished manufactured goods of the cities, without the use of money. of the cities, without the use of money.

Spreads Throughout Country.

Reports in possession of the Emergency Exchange Association reveal that the barter system as a local remedy for unemployment has grown rapidly throughout the country in the last six months. In California, Washington and Utah it has reached such a development that State organizations have been incorporated by the participants in the barter to administer their mutual interests.

Salt Lake City.

In Salt Lake City notably, the scrip or credit money issued by the management of the barter system there passes current easily and is cleared by the banks. In Seattle more than 20 parter locals have a membership

California.

In California, where some of the earliest exchanges between local organizations were effected, the Statewide barter organization has the coperation of the State Food Administration in exchanging food.

Dayton, Ohio.

In recognition of the mmediate utility of such barter systems in releasing relief funds and sustaining the morale of the unemployed by giving them an opportunity to help themselves, the Council of Social Agencies of Dayton, Ohio, assigned a secretary last spring to organize the unemployed in this way, with the result that Dayton now has six producing units with 400 families participating.

Pittsburgh, &c.

Similarly in Pittsburgh, the Welfare Fund, through its citywide net-work of Community Councils, has developed three barter districts. In Omaha, Neb., the community chest and social agencies started the move-

Multiple barter locals flourish likewise in Portland, Ore.; Denver. Colo.; ouston, Tex.; Minneapolis, Minn., and other large cities. In the vicinity New York, locals have been started at Nyack and White Plains.

The Emergency Exchange Association was incorporated quietly two months ago (said the "Times" of Dec. 24) through John Kirkland Clark, President of the State Board of Bar Examiners, who accepted a directorship because, he said, he believed it was exploring an important problem in a thoughtful and constructive fashion. In its issue of Dec. 24 the "Times" likewise said:

The chairman of the executive committee of the board of directors is Leland Olds, Assistant Chairman of the New York State Power Authority His associates on the executive committee are John Carmody, President of the Society of Industrial Engineers and editor of "Factory and Industrial Management," and Ernest Angell, Attorney. The executive director in charge of operations is Jacob Baker, industrial engineer and Vice-President of the Vanguard Press. He is assisted by Edna Lonigan, economist, former Chief Statistician of the New York State Labor Department. All of these are directors of the association.

Chief Statistician of the New York State Labor Department. All of these are directors of the association.

The remaining directors are David L. Podell, attorney for important trade associations; Stuart Chase, Economist; James Myers, Industrial Secretary of the Social Service Commission of the Federal Council of the Churches of Christ in America; Frank D. Graham, Economist Princeton University; Eustace Seligman, Attorney; James C. Sinnigen, Industrial Consultant, Arthur Holden, Architect; Ralph Modjeski, Civil Engineer, and Barrow Lyons, Journalist.

The first simple beginning of the plan is now established as the first local of the Emergency Exchange Association at 4861 Broadway, between Academy and 304th Street It has a vacant store as an office where the unemployed of the thickly settled residential vicinity register their occupations and learn how the plan works.

Scrip Dollars Circulated in Evanston, Ill.

Five thousand dollars in new scrip, or certificate money, began to circulate on Dec. 28 in Evanston, Ill., a suburb of Chicago, where ex-Ambassador Dawes lives, said a dispatch (Dec. 28) from Chicago to the New York "Times" which also had the following to say:

which also had the following to say:

It was in the form of dollar bills stamped with a picture of ex-President Roosevelt and bearing the name of the Evanston Independent Retail Merchants' Association as guaranter of its purchasing power.

This is the beginning of a scheme to restore prosperity to the merchants of Evanston and sell tax anticipation warrants to hold the credit of the city. If it is successful it may be extended to the Evanston school system and to other cities. It is already being discussed in Chicago, and Milwaukee is on the verge of adopting a similar plan at a special meeting of its City Council Friday.

The new money is known as Eirma dollars, the initials of the Money in the city of the Money is the second of the Money in the city of the Money is known as Eirma dollars, the initials of the Money is known as Eirma dollars, the initials of the Money is the Money in the city of the

Council Friday.

The new money is known as Eirma dollars, the initials of the Merchants' Association. For each of the 5,000 Eirma dollars a gold dollar is on deposit in an Evanston bank vault, protecting the scrip dollar. Where its expansion and forcing process comes in is in the stamp plan that goes with-it. When an Eirma dollar is presented at a store in payment of goods, the merchants have agreed to affix in a space provided on the back of the dollar a two cent trade discount stamp, cancel the stamp and send the dollar into circulation again.

again.

The money received for these trade discount stamps must equal the amount of Eirma dollars sold and is invested in City of Evanston tax anticipation warrants. The warrants are placed in trust and can be disposed of only upon resolution of the Merchants' Association.

Eventually the warrants or the proceeds from their sale will be distributed to merchants in proportion to their purchases of trade discount stamps. Alderman Herbert S. Simpson, Chairman of the Finance Committee, said to-day that the plan had been examined by the board of directors of the Evanston Merchants' Institution, local bankers and Professor F. E. Clark and associates at Northwestern University before its approval by the City Council.

Ohio Area Uses a Scrip System-Substitute Currency Provided by Joint Stock Corporation-Endorsement by Irving Fisher.

Under date of Dec. 5 Associated Press advices from Yellow Springs, Ohio, said:

Scrip is in successful operation in this farming area and business is thriving

on it

The "substitute currency" is provided by a joint stock corporation, and
the principles involved are so intriguing to economists that Dr Irving Fisher
of Yale University recently visited Yellow Springs to study the system, and
gave it an endorsement. It works like this;

A farmer having 100 bushels of potatoes, but no cash, wants a carpenter
to repair his barn. The carepenter, perhaps otherwise unemployed, is
willing to take his pay in commodities, rather than cash, but does not want
only potatoes.

So the farmer sells his potatoes to the exchange, which pays him in scrip,
the farmer then hires the carpenter, paying wages with this scrip, and the
carpenter spends the scrip at the exchange, buying potatoes or other things
he needs. If either the carpenter or the farmer has some scrip left over he
can keep it indefinitely and spend it any time he wants to.

Scrip of the Yellow Springs Exchange is issued on parchment bond paper
in denominations of 10 cents, 25 cents, 50 cents, \$1 and \$5. So popular has
the store become that it has had to enlarge its space twice in the last two
months. It now has about \$1,000 worth of scrip in circulation and is doing
about \$1,000 worth of ousiness a week, about one-third of which is in regular
cash.

Battle Creek (Mich.) Firm Pays Bills With Work.

On Dec. 28 Associated Press accounts from Battle Creek (Mich.) stated:

R. J. Corlett & Sons, coal and lumber dealers, have a new building and a whole lot fewer unpaid bills on their books. Customers with unpaid bills were permitted to work them out wrecking the old plant and building the

e new customers even established credit that way.

Missouri Law Imposing Graduated Tax Rate on Incomes Upheld by State Supreme Court.

The Missouri Supreme Court, in a recent decision, upheld the constitutionality of the "graduated progressive rates" of income tax provided in the law passed by the 1931 Legislature. Jefferson City (Mo.) advices, Dec. 24, to the "United States Daily," indicating this, added:

States Daily," indicating this, added:

In an opinion written by Judge William T. Ragland, the Court upheld the Circuit Court of Jackson County in declaring legal the assessment of income tax against Langston Bacon, Kansas City.

Bacon brought the suit in an effort to enjoin Jackson County officials from collecting tax from him, contending the 1931 amendment to the income tax law was unconstitutional. The measure provides for a graduated scale of tax rates, increasing as the amount of income increased, which take the place of the flat 1% rates in effect since 1917.

The opinion stated, in part: "From our analysis of the statute, it is obvious that the tax required to be levied under it is uniform, and not discriminating as between taxpayers in the same class. . . . The basic principle underlying all such classifications is the ability of the taxpayer to pay. . . .

"Many economists and students of Government regard a progressive tax as more just and equal in point of sacrifice than a proportional one, since persons with large incomes can more readily spare a fixed portion of their income than those who have difficulty in sustaining themselves upon what they receive each year."

they receive each year.'

Pennsylvania Building and Loan Act Declared Constitutional-Holdings of Member Borrowers May Be Pledged As Collateral for Loans by Reconstruction Finance Corporation, According to Ruling.

The statute passed by the Pennsylvania Legislature on July 28 1932 authorizing a building and loan association to pledge as collateral for loans made to it by the Reconstruction Finance Corporation, or other Federal agency, bonds, mortgages and shares of stock delivered to it by member borrowers, is a valid and constitutional enactment, in the opinion of the Deputy Attorney-General, Herbert D. Saylor. This was indicated in Harrisburg advices, Dec. 5, to the United States Daily," which continued:

Ruling specifically on the applicability of the statute to assets which came into the possession of the Association prior to the passage of the Act, Mr. Saylor has ruled that there would be no impairment of the obligations of the contracts between the Association and its borrower by such pledge. His ruling, in the form of a letter to the Secretary of Banking, William D. Corder tallows in tall training the contracts.

Gordon, follows in full text:

Sir: You have asked to be advised whether, under the provisions of Act No. 4 of the Extraordinary Session of 1932, approved July 28 1932, a building and loan association under your supervision may pledge as collateral for loans made to it by the Reconstruction Finance Corporation, or other Federal agency, bonds, mortgages, and shares of stock delivered to it by member borrowers.

Section 2 of the Act of 1932 provides that any building and loan associa-

Section 2 of the Act of 1932 provides that any building and loan as tion of the Commonwealth

tion of the Commonwealth
. . . shall have power and authority to borrow money from the Federal Home
Loan Bank, the Reconstruction Finance Corporation, or any other corporation
or agency established under the authority of the United States Government, except
National banks, upon such terms and rates of interest, not exceeding the legal rate
of interest in this Commonwealth, as may be agreed upon, and to assign its bonds
and mortgages or other property, including the right to repledge the shares of stock
pledged as collateral security without securing the consent of the owner thereto,
as security for the payment of its indebtedness as evidenced by its bond, obligation,
or note given for such borrowed money, and such bond, obligation, note or notes
may be in such form as is prescribed by the corporation or agency established under
the authority of the United States Government, as aforesaid: Provided, however,
That no building and ican association shall at any time borrow money from any
such corporation or agency or in any manner now authorized by law in an amount
exceeding 35% of the withdrawal value of the stock issue by such association.

Right to Pledge Assets Is Given.

Right to Pledge Assets Is Given,

Right to Pledge Assets Is Given.

Nothing could be clearer than the provisions recited. Without question, this Act, in terms complete in themselves, and independently of other legislative authority, gives to a building and loan association the right to pledge its assets, consisting of bonds and mortgages given to it, and stock assigned to it, as collateral for loans made to it by any governmental agency of the United States other than a National bank.

However, the question arises whether that right may be exercised with respect to assets which came into possession of an association prior to the approval of the Act. Where a member borrower has contracted with the association before it was given the power to pledge can he prevent the exercise of such power because of constitutional provisions protecting the obligations of contracts? Is the Act of 1932 unconstitutional as far as bonds and mortgages given and stock assigned prior to July 28 1932 are concerned?

concerned?

If a building and loan association enjoyed, previous to July 28 1932, the right to pledge its assets, the 1932 Act did not increase its rights. It merely stated them in connection with the grant of power to borrow money from certain governmental agencies. However, an examination of prior legislation indicates that heretofore no such right existed.

Associations Restricted Before Act of 1932.

Prior to the 1932 enactment, a building and loan association was closely restricted in power to borrow money. The Act of June 2 1891, P. L. 174, as amended by the Act of June 25 1895, P. L. 303, permitted it to make, under certain conditions, temporary loans not exceeding in the aggregate "at any one time 25 per centum of the withdrawal value of the stock issued" by the association and to "secure the payment of the same by interest-bearing order, note or bond as collateral."

The Act of July 9 1919, P. L. 808, gave associations the additional right under the same conditions to borrow up to the same limit and to secure the payment of such loans "by pledge of bonds of the United States Government issued for war purposes as collateral."

Neither of these acts affirmatively gave an association the power to pledge any other assets as collateral for loans made to it. In the opinion of Nov. 29 1905 (Official Opinions of the Attorney-General 1905-06, page 155), the then Commissioner of Banking was advised that under the Act of 1891 associations could not pledge mortgages. The grant of power made by the General Assembly in 1919 indicates that it was the legislative understanding and intention that an association could not pledge bonds and mortgages given to it by borrowers and the stock assigned by them, as collateral for loans.

We are then faced with the question whether a building and loan association which did not have, before July 28 1932, the right to pledge a member's bond, mortgage, and shares, now enjoys such right without restriction. Would the exercise of that right impair the obligation of the contract entered into when the association took a member's bond and mortgage and accepted an assignment of his stock in the association?

Contractual Relationship With Member Borrower.

Contractual Relationship With Member Borrower.

Admittedly there is a contractual relationship existing between the member borrower and the association. No statute can impair the obligations of such a contract. This is elementary. tions of such a contract.

"No State shall . . . pass any . . . law impairing the obligation of contracts

on of contracts . . ."

Section 1 of the Fourteenth Amendment to the Constitution provides

. . . No State shall make or enforce any law which shall abridge the privileges of immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property, without due process of law; . . . Furthermore, the Pennsylvania Constitution of 1874 safeguards property

rights in the same general manner. Article I, Section 17, provides as

follows:

No ex post facto law, nor any law impairing the obligation of contracts, or making irrevocable any grant of special privileges or immunities, shall be passed.

Has the Legislature, in authorizing a building and loan association to do something more than it could do before it passed the 1932 Act, attempted to do what the State and Federal constitutions prohibit? Does a building and loan association, in parting with the possession and control of a bond and mortgage given and shares of stock pledged by a borrower, deny to him any of his contract rights?

Terms Said to Indicate Others May Secure Title.

There is no reason to believe that it does. The terms of the bond and mortgage usually given by the borrower evidence his intention that others than the association named therein may secure title to them. The words "obligee, its successors and assigns," and "mortgagee, its successors and assigns," appear repeatedly in them as in all such documents where the party secured thereby is an individual or corporate entity other than a building and loan association. The commonly used form of application for loan and stock loan note and assignment refer to the "association, its successors and assigns," and to give to all of them right, title and interest in and to the shares of stock as collateral for the obligation evidenced by the note.

In none of these documents is there any phraseology imposing upon the association the duty to retain title and possession thereto. No such restriction is imposed on any other obligee or mortgagee. The inference is clear that the member borrower has agreed to permit the association to assign his obligation and stock, provided, of course, such action does not impose upon him a liability that would otherwise not exist. The mere lack of power in the association legally to make such assignment, even though permitted by the borrower, does not affect the nature of the contract in such manner that the later grant of the power alters the terms of the contract.

The borrower has left open to the association a course of action which it, as far as he is concerned, is free to take when, as, and if the Legislature gives it authority. Such course of action is ordinarily open to any other obligee, mortgagee, or assignee which enjoys the right to reassign or repledge. Whether or not the association secures such right, or acts upon it when secured, is of no consequence to the borrower and has no effect on his rights or obligations.

his rights or obligations

Contractual Relationship Declared Unchanged.

Contractual Relationship Declared Unchanged.

Consequently, the Act of 1932 does not effect any change in the contractual relationship between borrower and association by granting power to the association. The exercise of the power does not impair any contract entered into before the grant. There is merely a change in the statutory rights of one of the parties to the contract. Only where rights created by a law are themselvese contractual and not merely permissive does a change in the law alter the terms of a contract existing before the change: Coombes v. Getz, 285 U.-S. 434, 76 L. Ed. 866 (1932).

Furthermore, it can not be said that the mere legal disability of a contracting party to deal with a contract can not be removed by subsequent enabling legislation. If the disability is not recognized in the contract and does not enter into the nature of the rights of either party, and if no provision is made respecting such right if the disability be removed, such removal by statute does not impair the obligation of the contract. See Gray v. Monongahela Navigation Co., 2 W. & S. 156 (1841), where, at page 159. Chief Justice Gibson said:

... A grant of additional privileges to a corporation has certainly not been

. . . A grant of additional privileges to a corporation has certainly not been thought an invasion of the contract which exists between it and subscribers to its

See also Cross v. The Peach Bottom Railway Co., 90 Pa. 392 (1879), where the giving of additional privileges to a corporation was held not to be an invasion of the contract of subscription for its stock.

Terms of Earlier Act Repealed This Year.

Terms of Earlier Act Repealed This Year.

The Act of May 25 1878, P. L. 155, as amended by the Act of June 10 1881, P. L. 107, No. 118, makes it a misdemeanor for any person, bank, savings fund, building association or any corporation to repledge any securities received for money lent or borrowed during the continuance of the contract of hypothecation of such securities. Its terms are repealed by the self-sustaining and unambiguous provisions of the Act of 1932, as far as the repledging of stock of a building and loan association to a Federal agency is concerned. The Act of 1878 is penal in its nature. No contractual rights under it could have been created; none survive its repeal.

Of course the repledgee in any case can have, with respect to collateral assigned to it, no higher rights than the building and loan association enjoys. No repledge can adversely affect the rights of the member borrower. He is entitled to a return of his assigned stock when he has paid the obligation it secures. His right to repay his loan before maturity given him by the Act of April 10 1879, P. L. 16, as amended by the Act of April 30 1929, P. L. 901, can not be denied him.

An association should not repledge any shares of stock assigned to it unless accompanied by the obligation of the member borrower, nor for an

amount in excess of the amount remaining due on such obligation at the time of the assignment. Were it to do otherwise, the right of the member borrower to a return of his property might be destroyed and the officers of the association might be charged with conversion.

The association should repay promptly to the repledgee any amounts paid by the member borrower, and when final payment has been made by him, it should secure the return of his collateral. It may seem elementary to state the foregoing and to say that agencies of the United States Government may be expected to be properly advised as to the right of an association to borrow and to pledge. However, it is well to make it clear that an association can not avail itself of the provisions of the Act of 1932 if by so doing it takes away the rights of a member borrower.

We believe that the Act of 1932 is a valid and constitutional amendment and that, subject to the limitations it imposes, it gives to building and loan associations the powers it prescribes without adversely affecting the rights of member borrowers.

loan associations the powers it prescribes without adversely affecting the rights of member borrowers.

Therefore, you are advised that any building and loan association under your supervision may within the limits prescribed by the Act of July 28 1932 pledge with the Reconstruction Finance Corporation, or any other agency established under the authority of the United States Government except National banks, any bonds and mortgages owned by it, or shares of its stock pledged to it, whether the contracts with the member borrowers giving it title to such assets were entered into prior to or after July 28 1932, without the necessity of consent by the member borrowers concerned.

Reforms in Public Utility Company Financial Prac-tices Advocated by Harry M. Addinsell of Chase Harris Forbes Corp.

Sweeping reforms in public utility company financial practices, for the good of both the investor and the public utilities, were advocated on Dec. 15 by Harry M. Addinsell, President of the Chase Harris Forbes Corp. Mr. Addinsell addressed the Investment Bankers' Forum of the New York University Graduate School of Business Administration in co-operation with the Investment Bankers' Association of America. The meeting was held in the Governors' Room of the New York Stock Exchange.

After reviewing the history of public utility financing, Mr. Addinsell, speaking as the head of one of the largest security issuing houses in the country, proposed changes in security nomenclature better to identify the securities sold to the public by utility companies, recommended refinements in debenture financing in the interest of greater investment safety, and advocated, among other changes, cessation of the sale of holding company stocks to customers of utility operating companies. Further simplification of capital structures, universal use of the audit method of utility accounting, re-arrangement of scattered groups of operating subsidiaries into groups of sufficient size to permit of greater economies in consolidated operation, and the gradual exchange of properties among the large systems so that geographic co-ordination of the units in each system may be more logical, were also urged.

Past experience indicates the advisability of making improvements in practice which should be constructive in that they will strengthen the credit standing of the utilities, Addinsell said, although he declared that without the holding company form of corporate organization the continued trend toward lower rates and better services might well have been materially retarded. Funds could not have been provided in sufficient quantity at low enough cost to permit expansion and improvement of the facilities of countless small local operating organizations, with the resultant decreases in rates. Mr. Addinsell further said:

Yet, to-day we hear from many sides great criticism of the holding company. To it are laid all forms of financial evil. The failure of certain large units has caused advocates of governmental ownership to class nearly all holding companies as devoid of real merit. This broad criticism I believe to be ill-founded and unjustified. Many examples abound to-day of holding companies which were, and are, strong, solvent and essential to the industry.

of holding companies which were, and are, strong, solvent and essential to the industry.

That the holding company is susceptible of mismanagement none will deny. Likewise, none will deny that some practices indulged in during the past must be eliminated in the future. One of these is the unwise use of operating company credit to assist the holding company. "Upstream" advances of funds from subsidiary to parent should not occur. The operating company is in the business of supplying its customers with the best possible service at the lowest possible cost commensurate with a fair return to investors in its securities. A sound financial condition is essential to the proper functioning of this duty. Loans to weaker parents or the use of operating companies' credit to provide funds for other unrelated organizations cannot be condoned. Similarly, the disposition of earnings available for dividends must be guided not by what the holding company requires, but by prudent business judgment as to what is best company requires, but by prudent business judgment as to what is best for the operating company. Fortunately, the capable and intelligent management of the leaders of the industry and of the investment banking fraternity recognize the unsoundness of this practice and steps have been and will be taken to cure it.

As to the exchange of properties among the large systems in order to obtain better geographic co-ordination, he said that a notable step had been taken in this direction in 1930 by the North American Co. when it sold to Pacific Gas & Electric Co. its controlling interest in the San Joaquin Light & Power Corp., the Great Western Power Co. and Midland Counties Public Service Corp. These companies were physically interconnected with the properties of Pacific Gas

& Electric Co. and the exchange thereof by North American for a large stock interest in Pacific Gas & Electric was a logical and foresighted step, he said. By this type of exchange a better integration of management and control can be accomplished. It is not necessary, he asserted, that each holding company should control properties in only one State. Public utility financial statements should be so arranged as to make them capable of analysis by the average well informed investor and "much good could be accomplished by the adoption of a uniform classification of accounts for holding companies," Mr. Addinsell stated. He continued:

The desirability of the sale of equity securities of holding companies to customers of the operating companies is open to serious question. Prior to the fall of 1929 this type of preferred and common stock was sold, in some cases, to the uninformed customer of the local operating company. Local company employees became high-pressure salesmen for holding companies' securities. Purchasers may have believed that the securities which they were buying represented in substance, if not in name, the earnings power of the local company. The fluctuations of business conditions and earning power are more pronounced in their effect on holding company's securities than on those of the operating subsidiaries. Unfortunate financial losses to these customers and impaired public relations of the utilities have on occasion been the result. The customers of the operating company are generally not in a position to take the oridnary business risks incident to the purchase of holding company junior securities. A primary object of customer ownership sales should be to insure safety of investment for the customer.

The speaker said there were numerous technical details concerned with corporate financing "which we recognize are capable of improvement. Of these I will mention only one; this is the need for a further strengthening of the negative pledge clause contained in most unsecured debenture agreements. If this is not done the time may well arrive when a continued decline in the value of pledged assets will result in a continued pledging of additional assets until the supposed security behind the debentures had been entirely subjected to the pledge. A further decline would then wipe out the debenture holders without giving them any possibility of recouping their losses. It is alleged that this is exactly what took place in the Insull situation, with a fatal effect on debentures which originally had behind them a full sufficiency of assets."

Important steps are already being made by many companies in the further simplification of capital structure, Mr. Addinsell said, and he recommended their continuance. As to the future, he thought that new funds for public utilities would be raised primarily through the issuance of mortgage bonds. As the country gradually emerged from the present period of reduced earnings and generally inactive business, equity securities would again be utilized as an important means of providing capital. Common stocks of sound operating companies would then be regarded, more than ever before, as an investment medium. He said he looked to the continued use of the holding company as a means for economic and efficient financing and management of operating properties, and asserted that their operations would be carried on in a sounder, more conservative fashion. The speaker pointed out that the year 1932 was marked by the completion of many difficult financial tasks, the utilities alone entering the year with the problem of refunding over \$377,000,000 of maturities, exclusive of traction and rapid transit securities. At the present time only about 6% of the total maturities of 1932 remain unpaid, Mr. Addinsell said, adding that this accomplishment signified a high degree of co-operation between banks, investment bankers, the utility companies and the investing public. In some cases it had been impossible to provide these funds through security flotations, the banks stepping in with temporary assistance in the form of bank loans which were subsequently liquidated. Mr. Addinsell also observed:

The utility industry finds itself well prepared for the future. During 1933, maturing issues will be considerably less than last year. Excluding tractions, the aggregate of maturities next year is only about \$208.000.000 as compared with \$377.000.000 last year. It appears probable, therefore, that the amount of utility financing during 1933 will be considerably less than in 1932, although a return of business conditions to a more normal level during the year might well result in the sale of a larger amount of securities for providing new capital than would now be expected.

There are comparatively few weak spots lef' in the holding company field, he added.

Mid-Winter Trust Conference to Be Held in New York Feb. 14-16.

The fourteenth annual mid-winter trust Inference of the Trust Division. American Banker: Association, will be held Feb. 14, 1^r and 16 1933 at the Waldorf-Astoria Hotel, New York City, it is announced by R. M. Sims, President of the Division, Vice-President American Trust Co., San Francisco. The annual banquet will bring the conference

to a close the evening of Feb. 16. "The most substantial service a trustee renders its beneficiaries is the conservation of estates and this subject will be the keynote of the midwinter trust conference this year," Mr. Sims says in his announcement. "To this end a program is being prepared which will give special attention to the administration of trust funds and to investment problems from the standpoint of the trust officer." About 1,000 trust men and bankers from all sections of the country are expected to attend the conference.

ITEMS ABOUT BANKS, TRUST COMPANIES, &c.

The sale of a National Metal Exchange membership was made Dec. 27, at \$750, unchanged from the last previous sale.

Arrangements were made Dec. 28, for the sale of a National Raw Silk Exchange membership at \$1,350, an increase of \$250 over the previous sale.

F. Abbot Goodhue, President of the Bank of the Manhattan Co. of New York City, announced on Dec. 27 the promotion of Rosser J. Smith from Assistant Cashier to Assistant Vice-President.

Frank C. Meyer, a Second Vice-President of the Chase National Bank, New York, died on Dec. 23 of bronchial pneumonia. Mr. Meyer, who was 49 years old, was a member of the staff of the Garfield branch of the bank. His banking career began in 1904, when he became Secretary to the President of the National Shoe & Leather Bank. Shortly after, Mr. Meyer became associated with the old Metropolitan Bank, which was merged with the Chase National in 1921. After the merger the Metropolitan Bank became known as the Prince Street branch of the Chase. He remained with this branch until about three years ago, when he took charge of the branch located at Worth Street. Last year he was transferred to the Garfield branch.

Howard S. Cullman, one of the Commissioners of the Port of New York Authority, was elected a Director of the New York Title & Mortgage Co. on Dec. 21. Mr. Cullman is a partner in Cullman Bros., Inc., cigar leaf tobacco merchants, now in the third generation, at 161 Front Street. Mr. Cullman has been a Commissioner of the Port of New York Authority since 1927. He is a Director of the County Trust Co. He was formerly Director of the International Acceptance Bank, Inc.

Moses Suydam Lott, President of the Kingsboro National Bank, Brooklyn, died suddenly of a heart attack on Dec. 24, at the age of 71 years. He had been at the bank on Dec. 23. Mr. Lott had been a banker in the metropolitan area about 50 years. He started his career in Brooklyn as Vice-President of the Washington Trust Co., in which capacity he served with the bank for 15 years. When the Corn Exchange Bank Trust Co. took over the Washington Trust, he continued with the new institution as an officer. About a year after the merger he became Vice-President of the Lincoln Trust Co. of Manhattan. Subsequently he joined the Mechanics & Metals National Bank as Vice-President, and when this bank was merged with the Chase National Bank he became manager of the Worth Street branch of the Chase. Three years later, with the intention of retiring from business, Mr. Lott resigned from the post. Later, on the plea of friends, he aided in the formation of the Kingsboro National Bank. The bank was opened in 1929 and he was made a Director. Three years ago he was elected President.

New York Supreme Court Justice Cotillo approved yesterday, Dec. 30, the application of State Superintendent of Banks Broderick for permission to pay an additional 10% dividend to depositors and other creditors of the closed Bank of United States. The payment is scheduled to be made to-day and will require \$13,362,494. It will bring the total dividend payments to date to 55%.

The Lincoln Savings Bank of Brooklyn, with main offices at 531 Broadway, and the Fort Hamilton Savings Bank, 5th Ave. and 74th St., Brooklyn, were merged yesterday morning (Dec. 30) according to the Brooklyn "Daily Eagle." The merger is effected under the name of the Lincoln Savings Bank. In its account of the union the "Eagle" says—

Announcement of the merger was made following meetings of the trustees of each of the institutions and receipt of official approval from Bank Superintendent Broderick. merger marks the third time in its history that the Lincoln has in-d its size and facilities through mergers with other mutual savings

ries Froeb, present Lincoln President, will continue to head the en-institution, which will now have more than 160,000 depositors and ts of \$123,000,000.

ust H. Wenzel of the Lincoln will be in charge of the new branch.
se of the officers or trustees of the Fort Hamilton will be taken over.
sident Froeb made the following statement:

"Many of our depositors who formerly lived in the neighborhood of the main office at 531 Broadway have settled in other sections of Brooklyn and for that reason it has been necessary to extend the services of the Lincoln throughout the Borough.

"I am happy to say that all of the employees of the Fort Hamilton will be retained by the Lincoln. Beginning Jan. 3, the Fort Hamilton Savings Bank will be conducted as the Lincoln Savings Bank.

"The success which the Lincoln has had with previous mergers proves the value of enlarged facilities through branch offices. The same business methods used at the Williamsburg and Flatbush offices will be applied at Fort Hamilton and should tend immediately to promote growth of that office to the good of the community."

Now Has Four Offices.

Now Has Four Offices.

Consolidation of the two banks gives the Lincoln four offices, the largest number operated by any savings bank in Brooklyn. In addition to its main office at 531 Broadway, it maintains a Williamsburg office on Graham Ave. near Broadway and a Flatbush unit at Nostrand Ave.

Both these branches were acquired through mergers. The Williamsburg unit was formerly the Sumner Savings Bank, and was absorbed in August 1924. The Flatbush office was the Church Lane Savings Bank until taken over by the Lincoln in October 1930. The latter branch was moved from 3022 Church Ave. to its present location in September of this year.

The State law provides that a savings bank may actually open and operate but one unit, but no limit is set as to the number of branches which may be acquired through consolidation.

The Lincoln Savings was founded in 1866 as the German Savings Bank. It changed its name to the present title in 1918. One of the oldest of Brooklyn's mutuals, it has enjoyed continuous growth.

Charles Froeb has been President since 1914. Other officers are Joseph Huber, First Vice President: T. Engelhardt, Second Vice-President; Frough Cretsch, Third Vice-President; George H. Doscher, Secretary and Cashier; Louis C. Voigt, John A. Elbe, A. H. Wenzel, George Neumann and Harry J. Smith, Assistant Cashiers; William C. Hundt, Assistant Cashier and Auditor.

The Fort Hamilton Savings was founded in Sentember 1922. It has

A Middleport, N. Y., dispatch, on Dec. 23, to the New York "Times," stated that checks amounting to \$74,146 had been mailed to the 691 depositors of the First National Bank of Middleport, making a total of \$181,179, or 54%, repaid. The bank closed on Dec. 18 1931, as noted in our issue of Dec. 26 of that year, page 4271.

From the Boston "Transcript" of Dec. 20 it is learnt that Judge Charles H. Donahue of the Massachusetts Supreme Court on that day authorized Arthur Guy, Bank Commissioner for Massachusetts, to pay a dividend of 10% to depositors in the savings department of the Salem Trust Co. of Salem, Mass., amounting to \$127,663. The paper mentioned, continuing, said:

The Court also authorized the Bank Commissioner to borrow \$25,000 from the commercial department of the bank in order to make payment of the dividend possible to every depositor in the savings department. The dividend is the second to the savings department depositors since the closing of the institution, a previous dividend of 15% having been authorized by the Court last August.

The Salem Trust Co., a subsidiary of the Federal National Bank of Boston, closed on Dec. 15 1931, when the latter institution failed to open. Our last previous reference to its affairs appeared in the "Chronicle" of Nov. 26 last, page 3640.

Oliver B. Ellsworth, heretofore a Vice-President of the Riverside Trust Co. of Hartford, Conn., was last week promoted to the Presidency of the institution to succeed the late Harry A. Allen, who had been President since the reorganization and reopening of the institution in September In reporting Mr. Ellsworth's advancement to the Presidency, which became effective at once, the Hartford "Courant" of Dec. 22 said in part:

"Courant" of Dec. 22 said in part:

. . . Mr. Ellsworth first became associated with the Riverside Trust
Co. as a member of the stockholders' reorganization committee. He took
a prominent part in the work, especially in the formulation of the plans,
in the course of which his familiarity with banking was recognized.
Although a resident of Portland, Conn., he found time to give personal
attention to the detail work involved.

President Ellsworth is a resident of Portland, where he was born July 17
1897, and where he received his early education. He began his banking
career in 1919, entering the employ of the First National Bank of Portland. Five years later, when only 27 years of age, he was elected President.
He was then the youngest National bank President in the United States.
Mr. Ellsworth had a prominent part in the merger of the First National
Bank of Portland and the Freestone Savings Bank, which were brought
together to form the Portland Trust Co. in 1925. He was elected Secretary
and Treasurer of the consolidated bank.

On Jan. 6 1932 Mr. Ellsworth was elected Vice-President of the Riverside
Trust Co. Since that time he has devoted himself almost exclusively to its
business affairs. He continued in the capacity of director of the Portland
Trust Co.

Mr. Ellsworth is a director of the Middletown National Bank of Middletown, Conn.; President of the Middletown Clearing House Association; Treasurer of the Middlesex County Historical Society, and a director of the Middlesex Hospital of Middletown.

During the World War Mr. Ellsworth enlisted as a private in the ambulance corps, and served in France. At the end of the war he was discharged with the rank of first lieutenant. He is now a captain in the Medical Administrative Reserve Corps, U. S. A.

With reference to the affairs of the Steneck Trust Co. of Hoboken, N. J., the closing of which on June 27 1931 was noted in our July 4 1931 issue, page 61, Trenton advices on Dec. 27 to the New York "Times" contained the following:

State Banking Commissioner William H. Kelly petitioned the Court of Chancery to-day (Dec. 27) for authority to pay an 8% dividend, amounting to about \$552.000, to general creditors of the closed Steneck Trust Co. of Hoboken. The greater part of the dividend will go to depositors.

As of Dec. 12 1932, the First National Bank of Donora, Pa., went into voluntary liquidation. The institution, which was capitalized at \$125,000, was succeeded by the Union National Bank of Donora.

Effective Dec. 19"1932, the Lehigh Valley National Bank of Bethlehem, Pa., capitalized at \$400,000, was placed in voluntary liquidation. The institution was absorbed by the First National Bank & Trust Co. of Bethlehem.

Concerning the affairs of the Duquesne National Bank of Pittsburgh, Pa. (the closing of which on Nov. 15 last was reported in our issue of Nov. 19, page 3471), the Pittsburgh "Post Gazette" of Dec. 24 carried the following:

"Post Gazette" of Dec. 24 carried the following:

An assessment of \$500.000 made upon the shareholders of the closed Duquesne National Bank of Pittsburgh has already brought in a substantial sum for the benefit of depositors and other creditors of the bank it became known late yesterday (Dec. 23). No indication was given as to when any dividend distribution can be made.

Although allowed until Jan. 7 1933 to pay 25% of the assessment, and granted the further privilege of paying the balance in similar amounts during February, March and April, many shareholders are paying before Jan. 1 to be able to charge off the amount of the 25% payment in making their income tax returns for 1932, according to C. O. Thomas, receiver for the Duquesne National.

Duquesne National.

The assessment was levied by F. G. Awalt, Acting Comptroller of the Currency, who directed Thomas to "take all necessary proceedings, by suit or otherwise," to enforce the individual liability of the shareholders, under which each of the latter is liable for 100% of the par value of the stock he owns. The assessment has been found necessary in order to pay the debts of the bank, Awalt stated in his notice of demand.

When the Duquesne National closed, Nov. 15, an announcement by the directors did not disclose the condition of the institution at that time. In the last statement of national banks called for on Sept. 30 (1932) the Duquesne National reported resources of \$9,178.451.03. A paid-in capital stock of \$500,000 was listed, with a \$1,000,000 surplus. There were demand deposits of \$2,372,966.50 and time deposits of \$1,761,865.31.

The Board of Directors of Mitten Men & Management Bank & Trust Co., of Philadelphia, Pa., announce the resignation of C. George Doyle as Assistant Secretary, effective to-day, Dec. 31, according to the Philadelphia "Ledger" of Dec. 29. Mr. Doyle was the executive in charge of advertising and business extension for several years, it was stated.

As an aftermath to the closing on July 14 last of the Bank of Brightwood of Washington, D. C., Ramond L. Schreiner former President of the institution, was sentenced on Dec. 16 to three years' imprisonment by Justice Daniel W. O'Donoghue in the District Supreme Court. The Washington "Post" of Dec. 17, from which this is learnt, after stating that the former banker would be eligible for parole in six months, continuing, said in part:

Pleading guilty two months ago to a charge of embezzling approximately \$15,000 of the funds of the bank, Schreiner, through his attorneys, Harvey L. Cobb and Daniel S. Ring, threw himself on the mercy of the Court. He produced two letters written by depositors in the bank asking that he be placed on probation. Both depositors had more than \$9,000 in the

institution.

A petition bearing the signatures of 300 persons who lost money when the bank was closed, was presented to Justice O'Donoghue. The tenor of this petition was that Schreiner should be denied probation.

In asking for leniency for Schreiner, Mr. Cobb said that all his mistakes had been mistakes of judgment and that no criminality was shown in any of them. It was stated by the attorney that some \$68,000 was the amount of shortage existing in the bank's accounts. A portion of this is covered by Schreiner's bond.

Schreiner, now only 34 years old, . . . began working in the bank at the age of 24, and soon worked his way up to the Presidency of the institution, which was closed early in the summer.

The reopening on Jan. 2 1933 of the Farmers' State Bank of Valparaiso, Ind., was announced on Dec. 21, according to advices from that place on Dec. 22 to the Indianapolis "News." The dispatch went on to say that since its election The dispatch went on to say that since its closing about a year ago J. E. Ohlfest, the former Cashier, has been in charge as liquidator, under the direction of the Indiana State Banking Department.

A dispatch from Evansville, Ind., on Dec. 21 to the Chicago "Tribune," stated that the directors of the Central Union Bank of Evansville, closed since Jan. 11 1932, had announced a 4% dividend to some 5,000 depositors of the institution, aggregating \$87,500, to be paid beginning Dec. 22.

It is learnt from the Chicago "News" of Dec. 22 that Judge Hugo M. Friend, of the Circuit Court, the previous day entered an order authorizing Receiver H. C. Vernon of the Chatfield Trust & Savings Bank of Chicago, Ill., to pay a dividend of 15% to the depositors. The total to be paid is \$40,541. The bank was closed on June 22 1932, as noted in our issue of June 25 last, page 4606.

Walter R. Bimson has resigned as an Assistant Vice-President of the Harris Trust & Savings Bank of Chicago, Ill., to accept the Presidency of the Valley Bank & Trust Co. of Phoenix, Ariz., according to the Chicago "Tribune" of Dec. 25, which went on to say:

The bank is the largest in the State of Arizona and branches in nine towns in that State, with deposits of over seven million dollars.

Mr. Bimson has been with the Harris Trust & Savings Bank of Chicago for over 12 years, having entered the employ of that bank soon after the war, when he resigned from the United States Navy. He has been active in the Illinois Emergency Relief work and has resigned as Treasurer of the special work fund. special work fund.

George M. Reynolds, Chairman of the Board of Directors of the Continental Illinois National Bank & Trust Co. of Chicago, announced on Wednesday of this week, Dec. 28, his resignation from that office and his retirement from active banking. Mr. Reynolds' resignation will become effective Jan. 7. He expects shortly thereafter to depart for Califorma, where he will pass the rest of the winter. He will continue as a director of the bank. Considerations of health and a desire to have a few years of rest after more than half a century of banking, Mr. Reynolds said led to his decision to retire. A statement issued by Mr. Reynolds-as contained in a Chicago dispatch on Dec. 28 to the New York Times, from which the foregoing is also taken-read as follows:

"On the 15th of Jan. I shall be 68 years old. I have been in the banking business for more than fifty-two years. Since the age of 15 I have had no freedom from business responsibilities.

"For some time I have fall that I all the source of the source of

no freedom from business responsibilities.

"For some time I have felt that I should like the remaining years of my life to be free from business and its demands, so that Mrs. Reynolds and I might do some of those things which we have long wanted to do.

"She has accommodated herself to my schedule for so long that turnabout seems fair play. This desire to retire from active responsibility in the management of the bank has been known to my associates, but recently I came to the conclusion that I could properly ask to be relieved of those definite duties imposed on me by my position as Chairman of the Board of Directors.

definite duties imposed on me by my position as Chairman of the Board of Directors.

"Accordingly I have tendered my resignation, and it has been accepted, effective Jan. 7, 1933.

"When I came to Chicago, the first of Dec., 1897, the population of the city was 1,600,000. It is now approximately 3,600,000. The deposits in the city at that time were approximately \$380,000,000. They are now approximately \$3,200,000,000 and during this period of time the development of Chicago and this section of America and America itself has been the greatest in any equal period of time in any country in the world."

The dispatch mentioned furthermore said in part:

The dispatch mentioned furthermore said in part:

No successor to Mr. Reynolds as Chairman of the Board was indicated to-day (Dec. 28). It is considered probable that the matter will be taken up at the directors' meeting on Jan. 13. * * * *

Mr. Reynolds, as Chairman of the Board of the largest bank west of New York City, has been one of the leading financial figures of the country. In addition to retiring from active service with his own bank, he will give up the Chairmanship of the Chicago Clearing House Association, a position that he has held since he succeeded James R. Forgan ten years ago. He will retire also from the Board of the Federal Reserve Bank of Chicago aftr eighteen years' service, and will relinguish the Chairmanship of the National Credit Corporation.

Mr. Reynolds began his career as a clerk in a small town bank in Guthrie County, Iowa. He moved to Hastings, Neb., in 1886 and engaged in the farm-loan business for two years. Later he was cashier of the Des Moines National Bank, Des Moines, Iowa, and in 1895 became its President.

In 1897 Mr. Reynolds was summoned to Chicago to be Cashier of the Continental National Bank, a position that he held for five years. Then, after serving as Vice President for four years, he became President of that bank in 1906 and continued as President, after its consolidation with the Commercial National Bank until in 1921, when he was made Chairman of the Board.

He became Chairman of the Board of the Continental National Bank & Trust Co. in 1927, when the Continental National Bank as Interested to C

of the Board.

He became Chairman of the Board of the Continental National Bank & Trust Co. in 1927, when the Continental & Commercial National Bank and the Continental & Commercial Trust & Savings Bank were consolidated. In 1929 when this institution merged with the Illinois Merchants' Trust Co. to form the Continental Illinois Bank & Trust Company, Mr. Reynoldh was made Chairman of the executive committee, and his brother, Arthur Reynolds, became Chairman of the Board.

On May 4 last when Arthur Reynolds retired from the Chairmanchia of

became Chairman of the Board.

On May 4 last, when Arthur Reynolds retired from the Chairmanship of the Continental Illinois Bank, George Reynolds succeeded him.

On Oct. 17 the bank became a national institution and changed its name to the Continental Illinois National Bank & Trust Co. • • •

In addition to his banking connections, Mr. Reynolds is a director of the New York Life Insurance Co., the Pullman Co. and the Union Carbide & Carbon Corp. He was President of the American Bankers' Association in 1908 and in the same year accompanied the National Monetary Commission to Europe. During the War Mr. Reynolds was President of the Citizens' War Board of Chicago. to Europe. During the War Board of Chicago.

Three Illinois State Banks were closed on Dec. 27 by Oscar Nelson, State Auditor for Illinois. The institutions are the Norwood Park Trust & Savings Bank of Chicago; the State Bank of Franklin Park, and the State Bank of River Grove at River Grove. The Franklin Park institution was closed for examination and adjustment and the other banks at the request of their respective directors. Chicago advices on Dec. 27 to the New York Times, from which the above information is obtained, went on to say:

The Norwood Park bank has a capital of \$100,000, a surplus of \$20,000 and deposits of \$80,000. The Franklin Park bank's report showed capital of \$75,000, surplus of \$20,000 and deposits of \$175,000. The River Grove bank has a capital of \$25,000, a surplus of \$10,000 and deposits of \$40,000.

The Comptroller of the Currency on Dec. 19, 1932 granted a charter to the Illinois National Bank & Trust Co. of Rockford, Ill. The new bank, which represents a conversion of the Illinois Bank & Trust Co. of Rockford, is capitalized at \$200,000. Edwin Mead and Eugene Abegg are President and Cashier, respectively, of the new institution.

A membership in the Chicago Stock Exchange was posted Dec. 23, for transfer to Charles S. Garland, resident partner of the New York brokerage firm of Brown Brothers, Harriman & Co.

Monroe, Mich., advices, on Dec. 21, appearing in the Toledo "Blade," stated that Circuit Judge Jesse H. Root had signed an order on Dec. 20 whereby A. E. Shinevar, Monroe, receiver of the People's Bank at Ida, is allowed to pay a 10% dividend to the 200 depositors. The dividend will approximate \$17,600 and be paid during the holidays. Depositors previously were paid a 25% dividend, it was said.

Elvin E. Johnson, Vice-President of the Livestock National Bank of Omaha, Neb., and President of the Omaha Clearing House, recently celebrated the 25th anniversary of his connection with the bank, according to the "Commercial West" of Dec. 24. Mr. Johnson has been with the institution since it opened for business Dec. 9 1907.

Depositors of the Farmers' & Merchants' Bank at Kinston, N. C., an institution which closed in April 1931, have received an initial dividend of 5%, totaling \$18,689, according to a dispatch from Kinston on Dec. 21, printed in the Raleigh "News and Observer."

Dividend checks aggregating \$32,000 were paid on Dec. 16 1932 to approximately 2,000 depositors of the defunct People's Bank of Jacksonville, Fla., which closed July 5 1929, according to Associated Press advices from Jacksonville on that

That dividends approximating \$37.000 to depositors in three Mississippi State banks in liquidation were being prepared for immediate distribution was announced on Dec. 15 by J. S. Love, State Superintendent of Banks for Mississippi, according to Associated Press advices from Jackson, Miss. The banks named were the Bolivar County Bank at Rosedale; the Farmers' Bank at Osyka, and the D'Lo Guar-

A 10% dividend of \$15,000 will be distributed at Cleveland (Bolivar County), Love said; 12% at Osyka, approximating \$9,000, and 5% at D'Lo, amounting to \$13,000.

The Superintendent

The Superintendent said another distribution is in prospect at the Rosedale bank within the next several weeks, and that the Banking Department is making an effort to pay dividends at a number of other points before the end of the year.

The directors of the Hibernia Bank & Trust Co. of New Orleans, La., have declared out of the earnings for the quarter ending Dec. 31 1932, a regular quarterly dividend of \$0.62½ (2½%) per share, on its capital stock, payable on Jan. 1 1933, to stockholders of record Dec. 23 1932. This dividend is at the rate of 10% per year on the \$25.00 par value stock and is the 108th consecutive dividend to be paid by the Hibernia.

The first National Bank of Del Rio, Tex., capitalized at \$100,000, was placed in voluntary liquidation on Dec. 10, 1932. The institution was taken over by the Del Rio National Bank of the same place.

Associated Press advices from Glenwood Springs, Colo., on Dec. 21 reported the closing on that day of the Citizens' National Bank of Glenwood Springs. The dispatch, continuing, said:

The closing action was taken by the Board of Directors, and Bank Examiner W. M. Male of Pueblo was ordered to come here and take charge. In its last statement the bank listed assets of \$590,000 and deposits of \$407,000. Officers are: G. H. Bell, President; Fred Wirth, Cashier; R. E. Heisler, Assistant Cashier. The bank was founded 29 years ago.

Closing of the First Bank of Hermosa Beach, Calif., was reported in a Los Angeles dispatch on Dec. 28 to the "Wall Street Journal", which said:

State Banking Department has closed the First Bank of Hermosa Beach, Calif., for inability to maintain the necessary reserves, states Edward C. Rainey, State Superintendent of Banks. As of Dec. 27, capital was reported at \$50,000; surplus \$2,500, savings deposits \$69,500 and commercial deposits at \$39,300.

The probable reopening of the First Inland National Bank of Pendleton, Ore., is indicated in the following which appeared in the Portland "Oregonian" of Dec. 16:

A telegram received from Edwin Winter, Vice-President, First Inland National Bank, Pendleton, who has been in Washington in conference with officials of the Reconstruction Finance Corporation, said the Comptroller of the Currency had approved the bank's application for a loan and its plans for reopening and that the matter now rests with the finance corporation. He expressed himself as confident the loan would be granted, which would mean reopening of the bank. It was stated the bank, which has been closed since Oct. 18, easily qualified for the loan requested. . . .

The Royal Bank of Canada (head office Montreal) in its annual statement released on Dec. 29 through the New York agency, shows liquid assets of \$355,929,915, equal to 52.86% of liabilities to the public. Total assets stand at \$765,512,920. Included in the liquid assets are cash holdings of \$164,630,724, which is equal to more than 24% of public liabilities.

The statement (which covers the fiscal year ended Nov. 30 1932) cites evidence of the satisfactory manner in which leading Canadian financial institutions have passed through the unsettled conditions of the past year. Curtailed industrial and trading activity is reflected in lower commercial loans and the increase in liquid assets over the previous year. Savings deposits were well maintained, particularly in face of the large Government loans put out during the year. Total deposits at \$619,094,143 show a reduction for the year of less than 7% from \$664,795,718.

Savings deposits also made a gratifying showing and at \$468,391,153 were down less than \$8,000,000. In view of the large Government loans floated during the year, the total would indicate a tendency among depositors to keep ample cash balances and to add steadily to their savings, says the report. Non-interest deposits, which in the main are the working balances of business and farming customers, reflect the curtailment of trade activity and lower prices. These decreased to \$128,983,165 from \$170,913,903. The reduction in loan accounts more than offsets the reduction in commercial deposits.

Earnings are declared to have held up well in view of the lessened business activity and the lower interest rates at reserve centers. Profits for the year were \$4,861,849, compared with \$5,448,327. These profits fully covered dividend requirements of \$3,850,000, contribution to officers' pension fund, appropriation for bank premises and reserves for Dominion Government taxes.

For a number of years the bank has carried an unually large amount in undivided profits. This year the directors have authorized a transfer of \$3,000,000 of this amount to investment depreciation reserve, thus strengthening the inner reserves of the bank to this extent and leaving \$1,166,-954 to be carried forward to credit of profit and loss account.

Dominion and Provincial Government securities are shown as \$89,448,844, compared with \$85,473,058 at the end of the previous year, while Canadian municipal securities and British, foreign and Colonial public securities are shown as \$26,750,444, compared with \$24,641,816 a year ago. Commercial loans stood at \$360,562,286, against \$419,345,043, while call loans in Canada have been reduced to \$28,951,263 from \$39,137,268 and call loans elsewhere to \$36,400,142 from \$37,156,111. Reduced import and export trade account for a reduction in letters of credit to \$20,092,951 from \$28,966,506.

The Royal Bank of Canada has combined capital, reserve and undivided profits of \$71,166,955 and maintains 835 branches in Canada, Newfoundland and abroad. Sir Herbert S. Holt is President; A. J. Brown, K.C., Vice-President, and M. W. Wilson, Vice-President and General Manager. The New York Agency is at 68 William Street. The agents are Frederick T. Walker, John A. Beatson and Edward C. Holahan.

The 58th annual report of the Banque Canadienne Nationale (head office Montreal), covering the fiscal year ended Nov. 30, 1932, has just recently been issued. Net earnings for the period, after the usual deductions, are shown in the statement as \$972,075, which when added to \$205,169, the balance to credit of profit and loss brought forward from the preceding fiscal year, made \$1,117,244 available for distribution. This sum was appropriated as follows: \$700,000 to pay four quarterly dividends; \$30,000 contributed to pension fund; \$112,000 to pay Dominion Government taxes, and \$125,-000 representing provision for payment to the Treasurer of the Province of Quebec under Statute 14 Geo. V. Ch. 3. leaving a balance of \$210,244 to be carried forward to the current fiscal year's profit and loss account: The bank's total assets are shown in the statement at \$132,921,697 (as compared with \$150,210,246 the previous year) while total deposits (savings and current) are shown at \$105,570,316. The institution's total liabilities to the shareholders (capital, rest fund, dividends and undivided profits) are given at \$14,389,402.

The annual report of Barclays Bank (Dominion, Colonial and Overseas), head office London, covering the fiscal year ended Sept. 30, 1932, has just come to hand. It shows net profits for the twelve months (after having made full provision for rebate and bad and doubtful debts) of £372,103, which when added to £244,738, the balance to credit of profit and loss brought forward from the preceding fiscal year, made a total of £616,841 available for distribution. Out of this amount allocations were made as follows: £80,000 to take care of income tax, etc.; £100,000 added to contingency fund; £107,495 to pay interim dividends at the rate of 8% per annum on the cumulative preference shares, and at the rate of 41/2% per annum on the "A" and "B" shares (less income tax); £53,790 to take care of final dividend at the rate of 8% per annum on the cumulative preference shares of £1 each fully paid (less income tax), and £59,672 to pay final dividend at the rate of 5% per annum on the "A" shares of £1 each fully paid, and the "B" shares of £5 each, £1 paid (less income tax), leaving a balance of £215,885 to be carried forward to the current fiscal year's profit and loss account.

Total resources of the institution are shown in the statement as £82,535,886 of which £30,396,685 represent cash in hand and other cash items, while current deposit and other accounts, including reserve for income tax and contingencies and balance of profit and loss, are given at £71.621.970. The bank's paid-up capital is £4,975,500 and its reserve fund £1,650,000. Frederick Craufurd Goodenough is Chairman of the Board of Directors; Raoul Hector Foa, Deputy-Chairman, and Sir John Caulcutt, General Manager.

The ordinary general meeting of the shareholders of the bank will be held in London on Jan. 19, 1933.

We are in receipt of the annual report of the National Bank of Scotland, Ltd., (head office, Edinburgh), covering the fiscal year ended Nov. 1 1932. The statement, which was presented to the shareholders at their annual general meeting on Dec. 22, shows net profits, after deducting expenses of management at head office, London office, and 180 branches and sub-offices, allowing for rebate, interest, &c., and after making provision for all bad and doubtful debts not otherwise provided for, of £265,367. To this amount was added £72,727, representing balance brought forward from the preceding fiscal year, making together £338,094 available for distribution. From this sum the following appropriations were made: £132,000 to pay a dividend at the rate of 16% per annum (this being exclusive of income tax of £44,000) payable to the proprietors in equal parts on Jan. 10 and July 11 1933; £100,000 credited to contingent fund; £25,000 applied in reduction of cost of heritable property and of alterations, and £5,000 to staff widows' fund, leaving a balance of £76,094 to be carried forward to the current year's profit and loss account.

The bank's total resources are shown in the report as £40,353,791, and deposit receipts, deposit accounts, current accounts, and other creditor balances, at £33,867,669. The paid-up capital of the institution is £1,100,000 and its reserve fund £1,550,000, exclusive of the £132,000 set aside to meet the dividend requirement, and £76,094 carried forward. The Most Hon. the Marquis of Zetland is Governor; Sir Hector Munro of Foulis, Bt., Deputy-Governor, and John Taylor Leggat, General Manager of the institution, which was established March 21 1825.

THE WEEK ON THE NEW YORK STOCK EXCHANGE.

Under the leadership of the railroad issues, the stock market this week showed moderate improvement, a rallying tendancy with moderate gains in some of the leading issues. Trading has been in larger volume at times. Tobacco shares have been heavy and for brief periods industrial stocks have been stronger. Call money renewed at 1% on Tuesday and continued unchanged at that rate on each and every day of the week.

The market recorded modest gains during the abbreviated session on Saturday. Trading was quiet and the changes were moderate, only a few of the more active stocks showing gains above a point. Railway shares were fractionally higher, though Delaware & Hudson improved over a point at its best for the day. Drug, Inc., was in special demand during the early trading and moved up 11/4 points. Public utilities were fairly firm, but showed only small gains and oil stocks were in moderate demand. Further covering was apparent and gave a firm undertone to stocks, but for the most part the market movements were insignificant. The gains included among others, Allied Chemical & Dye, 11/2 points to 78; American Can, 4 points to 125; American Sugar pref., 2½ points to 83½; Coca-Cola, 3½ points to 73½; Ingersoll-Rand, 1¾ points to 26¾; J. C. Penny, 4 points to 871/2; Procter & Gamble pref., 21/2 points to 102, and Hercules Powder pref., 5 points to 83.

The stock market, the curb market and commodity markets were closed on Monday, Dec. 26, in observance of Christmas Day.

Trading was quiet and the market slightly easier on Tuesday, and while there were occasional advances in some special stocks, most of the changes were toward lower levels. Tobacco shares were under pressure most of the time, American Tobacco B yielding more than a point and Reynolds Tobacco was also down. Eastman Kodak and Homestake Mining and a few other prominent issues were also down, due largely to tax-loss selling and year-end adjustments. Railroad stocks made the poorest showing, though the net loss was largely fractional. Industrial and public utility shares were fairly firm, but made little progress. The changes were, as a rule, on the side of the decline and included among others American Tobacco 21/4 points to 54, Detroit Edison 2 points to 65, Homestake Mining 3 points to 156, National Lead pref. A 134 points to 106, West Penn. Electric pref. 534 points to 39, United States Steel 1 point to 255, Manhattan Elevated Gtd. 2 points to 15, American Home Products 11/8 points to 351/4, American Sugar Refining pref. 21/8 points to 81 and Louisville & Nashville 1 point to 191/4.

Irregularity characterized the trading on Wednesday, and while the trend, on the whole, was mildly upward, there were a number of prominent issues that sagged before the The strong spots included such active issues as New York Central, United Aircraft, Auburn Auto, Allied Chemical & Dye and Case Threshing Machine. Railroad stocks also were active and showed modest gains at the close. The principal changes were on the side of the decline and included among others, West Penn. Electric A 2 points to 33, Yellow Taxi Cab & Coach 6¾ points to 19½, Spalding 1st pref. 20½ points to 32, Ward Baking pref. (z) 2½ points to 13½, Union Pacific pref. 2¾ points to 62¾, J. I. Case pref. 1¾ points to 49¾, Curtis Publishing Co. 2 points to 42, Delaware & Hudson 2½ points to 49½, International Business Machines 25% points to 881/2 and National Lead 2½ points to 57½.

Stocks were irregularly higher on Thursday, though the market continued quiet and the undertone was fairly steady. A few active stocks lagged behind the market, United States Steel slipping back around noon time, though it sprinted forward later in the day and closed at 265%, with a net gain of 15% points. Other changes on the side of the advance were Air Reduction, 1½ points to 60½; Allied Chemical & Dye, 2½ points to 82¾; American Can, 1½ points to 55½; Amer. Tel. & Tel., 2 points to 104¾; American Water Works pref., 21/8 points to 50; Atchison, 11/4 points to 393/4; Auburn Auto, 11/4 points to 483/4; J. I. Case, 21/4 points to 40%; Colorado & Southern, 4 points to 15; Delaware, Lackawanna & Western, 11/4 points to 211/2; Johns-Manville pref., 13/4 points to 58; Norfolk & Western, 13/4 points to 1141/2; Public Service of New Jersey, 11/4 points to 521/4; Standard Gas & Electric pref., 2 points to 41; Union Pacific, 3 points to 701/4; West Penn Electric pref., 25/8 points to 40; Atlantic Coast Line, 11/4 points to 173/4, and Corn Products, 15/8 points to 537/8.

The market was decidedly irregular during the early

trading on Friday, but improved as the day progressed. Around the noon hour, prices started upward and as the rally developed momentum, many prominent issues among the railroad shares and industrial stocks moved forward to higher ground. Tobacco stocks were under pressure during the forenoon and the losses among those stocks ran as high as four or more points. In the subsequent dealings some of this loss was canceled. The principal changes for the day were on the side of the advance and included among others, American & Foreign Power pref. 2½ points to 10¾, American Smelting pref. 4 points to 12%, Atchison pref. 23/8 points to 593/8, Auburn Auto 21/8 points to 503/8, Bethlehem Steel pref. 31/8 points to 29, Pacific Tel. & Tel. 2 points to 80, Shell Union Oil pref. 2½ points to 38¼, Sun Oil pref. 2 points to 92 and Westinghouse pref. 4 points to 74. The market was moderately firm at the close.

COURSE OF BANK CLEARINGS.

Bank clearings this week will again show a decrease as compared with a year ago. Preliminary figures compiled by us, based upon telegraphic advices from the chief cities of the country, indicate that for the week ended to-day (Saturday Dec. 31), bank exchanges for all the cities of the United States from which it is possible to obtain weekly returns will be 37.1% below those for the corresponding week last year. Our preliminary total stands at \$3,722,048,648, against \$5,917,970,907 for the same week in 1931. At this center there is a loss for the five days ended Friday of 28.9%. Our comparative summary for the week follows:

Clearings—Returns by Telegraph. Week Ending Dec. 31.	1932.	1931.	Per Cent.
New York	\$1,876,231,435	\$2,639,560,304	-28.9
Chicago	136,043,005	187,727,679	-27.5
Philadelphia	195,000,000	. 194,000,000	+0.5
Boston	120,000,000	173,000,000	-30.6
Kansas City	38,154,007	48,399,988	-21.2
St. Louis	46,300,000	53,100,000	12.8
San Francisco	57,773,000	78,700,000	-26.6
Los Angeles	No longer will re		
Pittsburgh		74,987,520	-34.1
Detroit		64,301,616	-42.8
Cleveland		56,555,699	-31.2
Baltimore.	29,264,423	49,811,347	-41.2
New Orleans	24,859,499	21,682,828	+14.7
Twelve cities, five days	\$2,648,664,087	\$3,641,746,981	-27.3
Other cities, five days	455,949,040	602,860,985	-24.4
Total all cities, five days	\$3,104,613,127	\$4,244,607,966	-26.9
All cities, one day	617,435,521	1,673,362,941	-63.1
Total all cities for week	\$3,722,048,648	\$5,917,970,907	-37.1

Complete and exact details for the week covered by the foregoing will appear in our issue of next week. We cannot

foregoing will appear in our issue of next week. We cannot furnish them to-day, inasmuch as the week ends to-day (Saturday) and the Saturday figures will not be available until noon to-day. Accordingly, in the above the last day of the week has to be in all cases estimated.

In the elaborate detailed statement, however, which we present further below, we are able to give final and complete results for the week previous, the week ended Dec. 24. For that week there is a decrease of 15.6%, the aggregate of clearings for the whole country being \$4,506,399,391, against \$5,339,932,431 in the same week in 1931. Outside of this city there is a decrease of 12.9%, the bank clearings at this

center recording a loss of 17.0%. We group the cities according to the Federak Reserve districts in which they are located, and from this it appears that in the New York Reserve Cistrict, including this city, the totals show a loss of 17.0%, in the Boston Reserve District of 27.7% and in the Philadelphia Reserve District of 15.7%. In the Cleveland Reserve District there is a decrease of 17.5% and in the Atlanta Reserve District of 5.8% but in the Richmond Reserve District there is an increase of 20.3%. In the Chicago Reserve District the totals are smaller by 28.6% in the St. Louis Reserve District by 10.7% and in the Minneapolis Reserve District by 4.5%. In the Kansas City Reserve District the totals show a diminution of 16.6%, in the Dallas Reserve District of 11.3% and in the San Francisco Reserve District of 15.7%.

In the following we furnish a summary of Federal Reserve districts:

THE CURB EXCHANGE.

Speculative activity on the New York Curb Market has been dull and without noteworthy movement this week. Changes have been narrow and for the most part the tone has been heavy, though there was a slight improvement on Thursday. Public utilities have been fairly strong throughout the trading and oil stocks have been moderately steady, but there has been comparatively little activity apparent in the motor issues. On Saturday trading was on a small scale, only a few of the usually active stocks appearing on the tape during the first hour. Duke Power was a feature of the early trading as it ran up 5 points, followed by Consolidated Gas of Baltimore and Commonwealth Edison, both of which showed substantial improvement. Scattered short covering was apparent in one or two of the power shares and Electric Bond & Share held firm, while American Gas & Electric climbed up a point or more. New Jersey Zinc turned active as copper up a point or more. shares firmed up, and Cord Corporation provided the activity in the motor group. Oil stocks were moderately firm, Gulf Oil of Pennsylvania showing a slightly higher range. Industrial gains were small and prices in the investment trust section were somewhat mixed. On Monday, the Curb Exchange was closed in observance of Christmas Day.

Prices continued to move within a narrow channel on Tuesday, the trading indicating a highly professional market. The list was heavy in tone, though the losses, as a rule, were small. Much of the trading was in preferred stocks, most of which appeared on the tape in lots of 10 shares. Public utilities were quiet most of the day, though Utica Gas & Electric pref. surged forward about 3 points at its best for the day. American Gas & Electric, Superpower, Niagara Hudson and American Light & Traction were only slightly changed. In the industrial stocks, Air Investors pref. and National Dairy Products pref. A showed slight gains, but Aluminum Co. of America was unchanged. Oil shares were irregular, Ohio Oil pref. and Gulf Oil of Pennsylvania showing slight advances, while Humble Oil and Standard Oil of Indiana registered fractional losses. The curb market displayed moderate improvement on Wednesday as some of the more activ issues moved briskly forward. The industrial stocks were prominent in the trading, Aluminum Co. of America moving up to 46, while Glen Alden Coal advanced to 8½. The movements of public utilities will be mixed. Georgia Power & Light yielding over 3 points, The movements of public utilities were somewhat while General Public Service pref. dropped to 34. Electric Bond & Share was in good demand and moved upward to 1814, but the Ford stocks were off. During the late trading a large number of low-priced stocks appeared on the tape, many blocks changing hands for tax purposes. Oil share were fairly strong, Ohio Oil gaining about 2 points, while Standard Oil of Indiana moved fractionally upward. Mining stocks were also irregular, Newmont and New Jersey Zine showing a slight gain, while Bunker Hill Sullivan dropped back fractionally. Public utilities again moved to dropped back fractionally. Public utilities again moved to the front on Thursday, though prices were inclined to be irregular. The strong stocks were American Gas & Electric, which gained about a point, as did Northern States Power. In the industrial group, Aluminum Co. of America was off a point or more and Alabama Great Southern was 2 points down. The investment trust section showed a firm undertone and oils were steady, but moved within narrow limits. Practically all groups moved forward on Friday and trading became almost buoyant at times. The total amount of buying was greatly enlarged and while there were numerous

buying was greatly enlarged and while there were numerous sales for tax purposes, the volume was not enough to offset the buying demand. Public utilities were again the favorites sales for tax purposes, the volume was not enough to offset the buying demand. Public utilities were again the favorites and many of the popular speculative stocks surged upward to new levels for the current movement. Industrial issues were also strong and many stocks like Aluminum Co. of America, Ford of Canada A and American Cyanamid B shares moved briskly upward. The changes for the week were generally on the side of the advance and included, among others, American Beverage, 3% to 3½; Aluminum Co. of America, 43½ to 46½; American Gas & Electric, 29¼ to 32¼; American Laundry Machine, 8½ to 8¾; American Light & Traction, 16 to 16½; American Superpower, 4 to 4½; Atlas Corp., 6% to 7; Brazil Traction & Light, 8⅓ to 8¾; Central States Electric, 2 to 2½; Cities Service, 2¼ to 2½; Commonwealth Edison, 74½ to 79½; Consolidated Gas of Baltimore, 65 to 65%; Cord Corp., 6½ to 6½; Deere & Co., 8½ to 8¾; Electric Bond & Share, 16¾ to 19; Ford of Canada A, 5½ to 5⅓; Gulf Oil of Pennsylvania, 27½ to 27¼; Hudson Bay Mining, 25½ to 2½; International Petroleum, 10½ to 10¾; New Jersey Zinc, 25¼ to 27; Niagara Hudson Power, 15 to 15½; Pennroad Corp., 1¼ to 15½; Pennsylvania Water & Power Co., 51 to 52; A. O. Smith, 19½ to 20; Standard Oil of Indiana, 21½ to 21¾; Swift & Co., 6½ to 7½; Teck Hughes, 3¼ to 5½; United Founders, 1 to 1½; United Gas Corp., 1½ to 1¾, and United Shoe Machinery, 32½ to 33. SILVER.

Quiet conditions continued during the past week, but with easier advices from China movements in prices have been downward. India and America sold, but offerings were only moderate, the decline being due more to an absence of demand. China was again the chief source of support, buying for this quarter continuing, although orders were generally limited as to price. On most afternoons, the market closed with an easy tendency owing to offerings from America.

The lower prices attracted little inquiry and, at present interest is lacking, but the market might respond to a more settled general outlook.

The following were the United Kingdom imports and exports of silver registered from mid-day on the 5th instant to mid-day on the 12th instant.

Soviet Union (Russia) Poland (incl. Danzig) Germany Belgium France. Iraq British India British South Africa New Zealand Other countries.	£79.000 20.993 16.658 6.000 3.153 3.697 12.940 3.664 3.125 3.017	Netherlands China. Sweden. Germany Norway France Other countries	1.410 1.754 1.389

CURRENT NOTICES.

—During a period when one of the big problems of business has been to maintain revenue many companies have developed plans for using their 'non-selling' employees for sales work. A digest of the employee-selling experiences of 87 retail, wholesale, service and manufactu ing organizations using factory, office and other employees to get business is presented in a 48-page report entitled "Selling by Employees," published recently by the Policyholders Service Bureau of the Metropolitan Life Insurance Co. The first part of the report summarizes the experience of various companies which have adopted employee-selling plans: it discusses the different types of plans and factors to be considered in organizing an employee-selling program, and outlines the methods taken to insure the co-operation of the personnel Part 11 presents in some detail a few typical plans. The report concludes with a list of references which may be useful to those wishing to draw up a plan for themselves. Copies of "Selling by Employees" may be obtained by writing to the Policyholders Service Bureau, Metropolitan Life Insurance Co., One Madison Ave., New York City.

—Under the name, Martin-Holloway-Purcell, D. H. Martin, Vice-

Metropolitan Life Insurance Co., One Madison Ave., New York City.

—Under the name, Martin-Holloway-Purcell, D. H. Martin, Vice-President; W. W. Holloway, Vice-President, and Hoyt Purcell, of the sales department of the Fidelity National Corp., the investment division of the Fidelity National Bank & Trust Co. of Kansas City, Mo., will open business for themselves as security dealers on the fifteenth floor of the Fidelity Bank Building, Kansas City, on Jan. 1. Mr Martin, who originated the bond department of the Fidelity Bank in 1911 was President of the Southwestern group of the Investment Bankers Association during the year 1930 and was a member of the Board of Governors of the Investment Bankers Association during the year 1931 Mr. Holloway habeen connected with the bank for the past twelve years and Mr. Purcell for the past five years. The new firm will maintain contacts with all markets, dealing mainly in Middle West municipals and specializing in municipal bonds of Kansas, Missouri and adjoining States.

—Fenner, Beane & Ungerleider, members of the New York Stock Ex-

—Fenner, Beane & Ungerleider, members of the New York Stock Exchange, on Jan. 3 will open a branch office in Roanoke, Va. This will be the 54th branch office of the firm. Together with 21 correspondent offices, these branches comprise the second largest private wire system in the country, located principally throughout the South, Atlantic Seaboard and East Central States. It will be the firm's third office in Virginia.

—E. A. Harden & Co., Inc., 70 Pine St., New York, announce that Carl L. Cleaver, formerly with DuBosque, George & Farrington, has joined their organization as a Vice-President, and that Irving Williams Jr., formerly of Williams & Vogell, has become manager of their trading department.

—Alex. Brown & Sons, Baltimore, have prepared a pamphlet setting forth important factors in connection with Baltimore & Ohio RR. Co.'s recent offer in respect of its 4½% bonds due March 1 1933.

—Hemphill, Noyes & Co., members of the New York Stock Exchange, announce that J. Dwyer Kinnucan, formerly with Eastman, Dillon & Co., has become associated with their Detroit office.

—Charles Softye, formerly of Softye & Notine, has formed the firm of Softye & Co., Inc., 44 Wall St., New York, to transact a general trading business specializing in natural gas bonds.

—Rackliff, Whittaker & Loomis, Inc., have opened a St. Louis office in the Boatmen's Bank Building, in charge of George F. Ryan, with whom E. E. Peugnet is associated.

—J. Roy Prosser & Co., 52 William St., New York, have issued their regular quotation circular with current investment suggestions.

—Atkinson & Co., 44 Pine St., New York, announce the opening of a trading department under the management of E. R. Hudson.

—James Talcott, Inc., has been appointed factor for A. H. Sands & Co., New York, distributors of woolen goods.

-N. L. B. Tweedie has become associated with Baar, Cohen & Co. as manager of their foreign departmen.

—Harris B. Fisher Jr. will become associated with C. D. Halsey & Co. of Jan. 1 1933.

Weekly Return of New York City Clearing House. Beginning with March 31 1928, the New York City Clearing House Association discontinued giving out all statements previously issued and now makes only the barest kind of a report. The new returns show nothing but the deposits, along with the capital and surplus. The Public National Bank & Trust Co. and Manufacturers Trust Co. are now members of the New York Clearing House Association, having been admitted on Dec. 11 1930. See "Financial Chronicle" of Dec. 31 1930, pages 3812-13. We give the statement below in full:

STATEMENT OF MEMBERS OF THE NEW YORK CLEARING HOUSE ASSOCIATION FOR THE WEEK ENDED SATURDAY, DEC. 24 1932.

As per official reports: National, Sept. 30 1932; State, Sept. 30 1932; trust com-anies, Sept. 30 1932. † As of Nov. 26 1932.

Includes deposits in foreign branches as follows: (a) \$197,418,000; (b) \$53,701,-000; (c) \$60,050,000; (d) \$24,575,000.

The New York "Times" publishes regularly each week returns of a number of banks and trust companies which are not members of the New York Clearing House. The Public National Bank & Trust Co., and Manufacturers Trust Co., having been admitted to membership in the New York Clearing House Association on Dec. 11 1930, now report weekly to the Association and the returns of these two banks are therefore no longer shown below. The following are the figures for the week ending Dec. 23:

INSTITUTIONS NOT IN THE CLEARING HOUSE WITH THE CLOSING OF BUSINESS FOR THE WEEK ENDED FRIDAY, DEC. 23 1932.

Philadelphia Banks.—Beginning with the return for the week ended Oct. 11 1930, the Philadelphia Clearing House Association began issuing its weekly statement in a new form. The trust companies that are not members of the Federal Reserve System are no longer shown separately, but are included with the rest. In addition, the companies recently admitted to membership in the Association are included. One other change has been made. Instead of showing "Reserve with Federal Reserve Bank" and "Cash in Vault" as separate items, the two are combined under designation "Legal Reserve and Cash."

Reserve requirements for members of the Federal Reserve System are 10% on demand deposits and 3% on time deposits, all to be kept with the Federal Reserve Bank. "Cash in Vaults" is not a part of legal reserve. For trust companies not members of the Federal Reserve System the reserve required is 10% on demand deposits and includes "Reserve with Legal Depositaries" and "Cash in Vaults."

Beginning with the return for the week ended May 14 1928, the Philadelphia Clearing House Association discontinued showing the reserve required and whether reserves held are above or below requirements. This practice is continued.

	Week Ended Dec. 24 1932.	Changes from Previous Week.	Week Ended Dec. 17 1932.	Week Ended Dec. 10 1932.

Weekly Return of the Federal Reserve Board.

The following is the return issued by the Federal Reserve Board Thursday afternoon, Dec. 29, and showing the condition of the twelve Reserve banks at the close of business on Wednesday. In the first table we present the results for the System as a whole in comparison with the figures for the seven preceding weeks and with those of the corresponding week last year. The second table shows the resources and liabilities separately for each of the twelve banks. The Federal Reserve Agents' Accounts (third table following) gives details regarding transactions in Federal Reserve notes between the Comptroller and Reserve Agents and between the latter and Federal Reserve banks. The Reserve Board's comment upon the returns for the latter week appears on page 4461, being the first item in our department of "Current Events and Discussions."

Weekly Return for the Member Banks of the Federal Reserve System.

Following is the weekly statement issued by the Federal Reserve Board, giving the principal items of the resources and liabilities of the reporting member banks from which weekly returns are obtained. These figures are always a week behind those for the Reserve banks themselves. Definitions of the different items in the statement were given in the statement of Dec. 14 1917, published in the "Chronicle" of Dec. 29 1917, page 2523. The comment of the Reserve Board upon the figures for the latest week appears in our department of "Current Events and Discussions" on page 4462, immediately preceding which we also give the figures of New York and Chicago reporting member banks for a week later.

Beginning with the statement of Jan. 9 1929, the loan figures exclude "Acceptances of other banks and bills of exchange or drafts sold with endorsement" and include all real estate mortgages and mortgage loans held by the bank. Previously acceptances of other banks and bills sold with endorsement and some of the banks included mortgages in investments. Loans secured by U. S. Government obligations are no longer shown separately, only the total of loans on securit being given. Furthermore, borrowing at the Federal Reserve is not any more subdivided to show the amount secured by U. S. obligations and those secured by commercial paper, only a tump total being given. The number of reporting banks is now omitted; in its place the number of cities included (then 101), was for a time given, but beginning Oct. 9 1929 even this has been omitted. The figures have also been revised to exclude a bank in the San Francisco district with loans and investments of \$135,000,000 on 1920 even this has been omitted. The figures have also been revised to exclude a bank in the San Francisco district with loans and investments of \$135,000,000 on 1929 even this has been omitted. The figures have also been revised to exclude a bank in the San Francisco district with loans and investmen

r Cash sale a Deferred delivery † At the exchange rate of \$4.865 to the £ Sterling. c Natural bond.

NOTE.—State and City Securities.—Sales of State and City securities occur very rarely on the New York Stock Exchange and usually only at long intervals, dealing in such securities being almost entirely at private sale over the counter. The Stock Exchange record hence is imperfect and misleading, and accordingly we omit it here. Bid and Asked quotations, however, by active dealers in these securities will be found on a subsequent page under the general head of "Quotations for Unlisted Securities".

Cincinnati Stock Exchange.—See page 4508.

New York Curb Exchange—Weekly and Yearly Record

In the following extensive list we furnish a complete record of the transactions on the New York Curb Exchange for the week beginning on Saturday last (Dec. 24 1932) and ending the present Friday (Dec. 30 1932). It is compiled entirely from the daily reports of the Curb Exchange itself, and is intended to include every security, whether stock or bonds, in which any dealings occurred during the week covered.

Week Ended Dec. 30.		Week's R		Sales for Week.	Rang	e Sinc	e Jan.	1.		Friday Last Sale	Week's Range of Prices.	Sales for Week,	Range Str	ce Jan. 1.

Current Earnings-Monthly, Quarterry and Half Dearly.

CUMULATIVE INDEX COVERING RETURNS IN PRESENT AND PREVIOUS ISSUE.

Below will be found all returns of earnings, income and profits for current periods, whether monthly, quarterly or half-yearly, that have appeared the present week. It covers all classes of corporate entities, whether railroads, public utilities, industrial concerns or any other class and character of enterprise or undertaking. It is all inclusive in that respect, and hence constitutes an invaluable record.

The accompanying index, however, is not confined to the returns which have come to hand the present week. It includes also some of those given in our issue of Dec. 24. The object of this index is to supplement the information contained in our "Monthly Earnings Record," which has been enlarged so as to embrace quarterly and semi-annual statements as well as monthly reports. The "Monthly Earnings Record" was absolutely complete up to the date of issue, Dec. 23, embracing every monthly, semi-annual and quarterly report which was available at the time of going to press.

The index now given shows the statements that have become available in the interval since then. The figures in most cases are merely for a month later, but there are also not a few instances of additions to the list, representing companies which had not yet made up their returns when the December number of the "Monthly Earnings Record" was issued.

Earnings Record" was issued.

We mean to continue giving this current index in the "Chronicle" each week, furnishing a reference to every return that has appeared since the last preceding number of the "Monthly Earnings Record." The latter is complete in and by itself, and for most persons will answer all purposes. But to those persons who are desirous of seeing the record brought down to date every week, this further and supplementary index in the "Chronicle" will furnish an invaluable addition. The "Chronicle" index in conjunction with the "Monthly Earnings Record" will enable any one at a glance to find the very latest figures of current earnings and income, furnishing a cumulative record brought down to date each and every week—an absolutely unique service. A further valuable feature is that at the end of every return, both in the "Chronicle" and the "Monthly Earnings Record," there is a reference line showing by date and page number the issue of the "Chronicle" where the latest complete annual report of the company was published.

Note.—The decrease in freight revenue for the month of November and for the period this year was due to general depressed condition of business which caused marked decrease in the movement of practically all commodities; the principal decreases in November occurring in the movement of paving materials, cotton and cottonseed, forest products, phosphate rock, gas and oil, and less than carload shipments; the latter being attributable to a large extent to motor truck competition, including the reductions in freight rates to meet this competition as well as the loss of tonnage to motor trucks and private automobiles.

The decrease in passenger revenue is attributable to decrease in passenger train travel on account of the economic conditions and to the increased use of automobiles.

The decrease in "other revenue" was due to decrease in switching service performed for other railroads.

No taxes were accrued during November for the reason that most of our recent settlements of past due taxes were made on compromise basis at savings of 25%, resulting in sufficient credit to "railway tax accruals" to offset accrual for November and December 1932.

FINANCIAL REPORTS

Armour & Co. (Ill.).

(Annual Report-Year Ended Oct. 29 1932.)

Armour & Co. (III.).

(Annual Report—Year Ended Oct. 29 1932.)

T. G. Lee, President of Armour & Co., in his annual report to stockholders said in part:

During the year the total dollar value of sales was approximately \$468,-000,000—which is \$200,000,000 less than the \$668,000,000 sales in 1931, and compares with total sales of about \$900,000,000 in 1930.

Notwithstanding these extraordinary declines in the value of goods sold, the actual quantity of packing-house products handled in 1932 was only slightly less than in the previous year. The difference in the sales values of these products is almost wholly represented by the decline in selling prices.

It is the practice of the American meat packing business to buy all the livestock which farmers send to market. The products resulting therefrom must be then promptly moved into consumptive channels. We must accept the prices which purchasers will pay. During the past year consumptive channels have been chiefly characterized by the waning buying power of the public, which has reflected itself in the progressively lower prices realized for our goods.

The outstanding commercial fact is that throughout the year, except for minor fluctuations, our business was done on a steadily declining scale of prices. The average selling prices of most of the important items in our business declined during the year by at least 25%. The result is partly indicated in the fact that whereas our inventory on Oct. 31 1931 amounted to \$69,568,268, it was \$52,514,177 at the close of the fliscal year 1932—a reduction of \$17,054,091, largely due to the lower values prevailing as of Oct. 29 1932. The total loss sustained during the year by reason of declines in values of inventories during the year was between \$10,000,000 and \$11,000,000.

The management continued to exert every energy toward the reduction of expenses, and operating costs have again been drastically reduced. During the year a reduction of 10% in salaries and wages was accepted by the officers and employees in addition to

the funded debt of company represents, in part, cash obtained to carry the high-priced inventories of the war period and immediately thereafter, the management utilized during the year cash funds made available through declining inventory values in an amount which retired \$22,181,600 of funded debt.

the high-priced inventories of the war pears as funds made available through the management utilized during the year cash funds made available through declining inventory values in an amount which retired \$22,181,600 of funded debt.

During the past year there has been a reduction in property values of \$5,433,552, due to depreciation in excess of additions and improvements. While capital expenditures were held to a minimum, the properties were adequately maintained, and maintenance expense of \$4,758,406 was charged to operations.

The Delaware company surplus includes an accumulated operating surplus, and the Illinois company surplus is after deducting a small operating deficit, leaving a net capital surplus balance of \$17,234,320 at Oct. 29 1932.

Current assets amount to \$118,196,445, against current liabilities of \$11,427,365, a ratio of 10.34 to 1 as contrasted with a ratio of 9.21 to 1 at the end of the preceding year.

Exchange restrictions are in force in countries in which some of the current assets are located. Conversions in such cases have been made at the official rates.

Our export business continues to encounter obstacles being raised by Eurpoean countries against the import of foreign products. These barriers, coupled with the weakness of the foreign currency values, have made our export business increasingly difficult.

The policy of the management is to so conduct our business as to take into realistic account the actual conditions which surround us, cherishing no illusions as to immediate improvement. The fact which cannot be escaped is that the prices at which we must currently sell our goods are the lowest which have prevailed in the present century. The public, even in an acute depression, will buy our products in ample volume but only at drastically reduced prices in line wit. the value of competing products. Our task is to bring our costs within current value, so that our business will be adjusted to present realities and ready to respond to any improvement in actual economic conditions.

In addition there are similarly pledged the following items not shown in the above balance sheet: The entire capital stock of Eastern Cuba Sugar Corp. (48,000 shares of \$100 par value each owned by Cuban Cane Products Co., Inc.); a certain bond issue to Cuban Cane Products Co., Inc. by Eastern Cuba Sugar Corp. in the principal amount of \$900,000 (secured by first mortgage on Central Velasco and certain other mortgageable properties of Eastern Cuba Sugar Corp. not subject to any other mortgage); and a demand note issue; by Eastern Cuba Sugar Corp. in the sum of \$2,161,782. Central Velasco and certain other mortgageable properties of Eastern Cuba Sugar Corp. are mortgaged to secure the first mortgage bonds of Violet Sugar Co. and the 15 year 7½% mortgage sinking fund gold bonds of Eastern Cuba Sugar Corp.—V. 133, p. 4500.

(The) Cuban-American Sugar Co., New York.

(Annual Rreport-Fiscal Year Ended Sept. 30 1932.)

President George E. Keiser Dec. 21 wrote in part:

President George E. Keiser Dec. 21 wrote in part:

Continuing the plan to stabilize the raw sugar industry, the Cuban crop was restricted to 2,700,000 tons (actual production 2,602,864 tons) and company manufactured at its Centrals in Cuba its full quota of 1,278,820 bags of 325 pounds each, of which 921,392 bags were available for shipment to the United States, 285,768 bags for countries other than the United States, and 71,660 bags for consumption in Cuba, as compared with a total production of 1,398,273 bags for the previous year when Cuba's crop was restricted to 3,122,186 tons. Our Cuban production has been reported in the previous annual reports in units of 320 pounds each. Inasmuch as it has now become customary in the Island to refer to the production in units of 325 pounds we have adopted that basis for this report.

The output of the two refineries for the fiscal year was 267,561,709 pounds for the preceding year.

The operations for the year, after deducting all expenses including interest depreciation, repairs and maintenance, amortization of cane fields and the usual reserve for Colono losses resulted in a loss of \$2,054,188, which compares with a loss of \$2,765,605 for the previous year.

The continued unsatisfactory showing is principally attributable to the low prices for Cuban raw sugar prevailing throughout the year, the market reaching an unprecedented low of 57 cents per 100 pounds cost and freight New York in May 1932, although subsequently it reacted to higher but still unsatisfactory levels.

Every effort was made to effect economies wherever possible without impairing the efficiency of the organization and of the physical properties. The savings thus effected were not sufficient to make up for the decline in the amount realized from the sale of our product.

In previous annual reports to stockholders it has been customary to include as current assets the advances made to Colonos and which are secured by cane in the fields, as well as the company's investment in planted and growing cane,

ing in the fields, the board deemed it advisable to show these assets under a separate caption. It is impossible under present conditions to determine the value of the cane represented by these accounts but there have been charged to the profit and loss account for the year amounts aggregating \$238,308 representing amortization of cane fields and reserve for possible losses of advances to Colonos.

The acceptances outstanding on Sept. 30 1932 of \$500,000 have since been paid at maturity and at present company has no bank indebtedness. When reviewing the net cash position (total of inventories of sugars, accounts receivable and cash in banks, less current liabilities) it is at least gratifying to note the improvement over last year of more than \$700,000 in spite of even more adverse conditions.

With an earnest desire to correct the deplorable condition in the Cuban industry and with the hope that a situation might be brought about whereby its raw sugars could be sold in the United States on a fair competitive basis, President Machado decreed on July 2 1932, amontg other provisions, that 115,000 tons of United States quota then on hand be transferred to the allotment for countries other than the United States, and that the shipment of 700,000 tons of stocks in Cuba exportable to the United States during 1932 be prohibited until 1933, unless the average price of Cuban raw sugars sold in the United States for five consecutive days reached 1.50 cents per pound, cost and freight New York

President Machado also issued a decree on Nov. 2 1932, which provides that the 1933 crop be limited to 2.000,000 tons. In determining this quantity, consideration has been given to the probable requirements of Cuban raw sugars in the United States market, and the available supply on hand for that market.

The ocard desires to acquaint the stockholders of the effect of the present tariff law on the United States market. Under this law the importations of raw cane sugar of the Insular Possessions (Philippines, Hawaii and Porto Rico)

General Corporate and Investment News.

STEAM RAILROADS.

Freight Cars in Need of Repairs.—Class I railroads on Dec. 1 had 265,239 freight cars in need of repair, or 12.6% of the number on line, according to the car service division of the American Railway Association. This was a decrease of 2,931 cars below the number in need of repair on Nov. 1, at which time there were 268,170, or 12.7%. Freight cars in need of heavy repairs on Dec. 1 totaled 194,468 cars, or 9.2%, an increase of 1,173 compared with the number on Nov. 1, while freight cars in need of heavy totaled 70,771, or 3.4%, a decrease of 4,104 compared with Nov. 1.

Locomotives in Need of Repairs.—Class I railroads of this country on Dec. 1 had 9,316 locomotives in need of classified repairs, or 18% of the number on line, according to recorts filed by the carriers with the car service division of the American Railway Association. This was an increase of 126 compared with the number in need of such repairs on Nov. 1, at which time there were 9,190 locomotives in need of repair, or 17.8%. Class I railroads on Dec. 1 had 9,266 serviceable locomotives in storage compared with 9,080 on Nov. 1.

Matters Covered in the "Chronicle" of Dec. 24.—(a) Murfreesboro-Nashville Ry. to receive loan of \$4,300.000, p. 4326; (b) Railroad wage deduction extended nine months at present scale, p. 4327; (c) I.-S. C. Commission sets hearings to consider maintaining present surcharges beyond March 31, p. 4329.

Ann Arbor RR.—Bond Interest.—

The interest due Jan. 1 1933, on the 1st mtge. gold 4% bonds, due 1995, will be paid on that date.—V. 135, p. 2332.

Baltimore & Ohio RR.—Continues Terms for Bond Deposits to Jan. 9.—The time in which the company will make a down payment of 10% in cash for deposits of its \$63,250,000

20-year $4\frac{1}{2}\%$ convertible bonds under the refunding plan for meeting their maturity on March 1 has been extended to The announcement by George M. Shriver, Senior Vice-President, follows:

Vice-President, follows:

Holders of more than 84% of the bonds have accepted the offer of the company to pay 50% of the principal amount of the bonds, with accrued interest, in cash and to deliver, in respect of the remaining 50%, a like principal amount of its 5% refunding & general mortgage bonds, series F, due March 1 1996.

The offer must be accepted by holders of substantially all the bonds in order that the transaction may be consummated. To insure prompt consummation of the plan, and in view of the fact that the bonds are widely scattered, and many holders who desire to accept the offer have been unable to present their bonds within the time fixed, the company will continue, up to the close of business on Jan. 9 1933, to pay in cash, upon presentation of bonds for stamping, 10% on account of the principal thereof.

Bonds should be presented promptly for stamping to the company, 120 Broadway, New York.

Stamped bonds will be forthwith returned to the bondholders, together with the 10% cash payment, which bondholders are to retain, even if the plan is not carried out.

No further extension of the time within which bondholders may receive an advance cash payment will be made.—V. 135, p. 4381.

Boston & Maine RR.—Operation and Abandonment.—

Boston & Maine RR.—Operation and Abandonment.—
The I.-S. C. Commission on Dec. 16 issued a certificate authorizing the company to operate over the line of the Boston & Albany RR. between Palmer and Barre, and to abandon operation over its own line between

the same points, in Hampden, Hampshire and Worcester Counties, Mass V. 135, p. 3853.

Boston Revere Beach & Lynn RR.—Seeks Bond Extens'n.
The company has petitioned the Mass. Department of Public Utilities for approval of an extension for five years of the \$1,000.000 5-year 6% bonds, which falls on Jan. 15. Company says it is inexpedient and probably impossible to retire or refund this issue at the present time.—V. 135, p. 4211.

Canadian Pacific Ry.—To Close Hotel.—
The company announces that at the end of January it will close the Place Viger, one of the best-known hotels in Montreal.—V. 135, p. 4381.

Central Argentine Ry., Ltd.—Postpones Div. Action.—
The directors announce that consideration of the dividend on the 6% cumul. conv. preference stock for the half-year ended Dec. 31 is postponed and that it will be considered at the same time as the interim dividend on the 4½% preference stock in March or April 1933 (Lor don "Stock Exchange Weekly Official Intelligence").—V. 135, p. 3159.

Chicago Rock Island & Pacific Ry.—Pledge of Bonds.—
The I.-S. C. Commission on Dec. 16 authorized the company to pledge and repledge not exceeding \$3,792,000 of Rock Island Arkansas & Louisiana RR. 1st mtge. 4½% gold bonds as collateral security for short-term notes. The report of the Commission says in part:
The applicant requests authority to pledge and repledge these bonds as collateral security for short-term notes. The applicant requests authority to pledge and repledge these bonds as collateral security for short-term notes which it may issue within the limitations of Section 20a(9). The notes will be ussued by the applicant if it becomes necessary to procure additional funds to meet its temporary financial requirements within the next few months.

To show the necessity for obtaining short-term loans the applicant has filed a forecast of its cash receipts and disbursements for the period from Dec. 1 1932 to June 30 1933, inclusive, which indicates that on the latter date its disbursements will exceed its cash on hand, Dec. 1 1932, and the estimated receipts, by \$1,154.214.

Our order herein will authorize the pledge of the bonds at the ratio of not exceeding \$125 in value of bonds at their prevailing market price to each \$100, face amount, of notes, such ratio to be maintained by the pledge of additional bonds, if so required by the holders of the notes.—V. 135, p. 2488, 981.

Delaware Lackawanna & Western PP

Delaware Lackawanna & Western RR.—Seeks to Pledge Bonds with Railroad Credit Corporation for \$1,000,000 Loan.—
The company has asked permission of the I.-S. C. Commission for authority to pledge \$1,843,000 bonds as collateral for a loan of \$1,000,000 from the Railroad Credit Corporation to pay fixed interest obligations.—V. 135. p. 3687.

Denver & Rio Grande Western RR.—Seeks Loan of \$2,500,000 from R. F. C.—

The road has asked the I.-S. C. Commission approval for a loan of \$2,500,000 from the R. F. C. to be used for taxes, interest and equipment trust certificates. As collateral the road offered bonds of the refunding and improvement mortgage and stocks.—V. 135, p. 4211.

East Kentucky Southern Ry.—Abandonment.—
The I.-S. C. Commission on Dec. 19 issued a certificate permitting the company to abandon, as to inter-State and foreign commerce, its line of railroad, extending from Grayson southeasterly to Webbuille, approximatey 13 miles, in Carter and Lawrence Counties, Ky.—V. 130, p. 1823.

railroad, extending from Grayson southeasterly to Webbville, approximatey 13 miles, in Carter and Lawrence Counties, Ky.—V. 130, p. 1823.

Erie RR.—15% Increase in Commutation Rates.—

The I.-S. C. Commission declined Dec. 27 to suspend a fare schedule of the road which provides increases of about 15% on commutation rates in the New York area. The increases will become effective on Jan. 1. About 37,000 commuters in 50 communities in southern New York and New Jersey will be affected by the new rates, it is estimated.

The new tariffs have been under consideration at the Commission since the middle of November, and protests against the increases had been received from practically all the communities affected and from hundreds of interested citizens. Under the Commission's regulations, new or altered tariffs may become effective at the discretion of the applicant road unless suspended pending an investigation. Such a suspension was refused. The new tariff, while increasing commutation fares generally, provides for a reduction in existing fares sold on a 25-trip basis. It is planned by the road to substitute the 25-trip tickets for the present 50-trip family tickets and 10-trip tickets.

The company defended the proposal for increase in commutation tickets by asserting that cost of operations on the commutation service was in excess of the revenues received from that source, without any consideration for a return on the road's investment in facilities. It was pointed out that although 80% of passengers carried are commuters, they supplied only about 38% of the total revenues.

It was asserted that with the exception of the war period, existing commutation rates had remained in effect since 1910, while railroad labor costs had increased 125%; costs of materials and supplies 75%, and taxes paid to New Jersey 329%.

The Commission gave no reasons for its action except the statement that it found the road's proposal "not unjustified."—V. 135, p. 4031.

the Commission gave no reasons for its action except the statement it found the road's proposal "not unjustified."—V. 135, p. 4031.

Gulf & Ship Island RR.—To Pay Jan. 1 Interest.— Interest due Jar. 1 1933 on the 1st mtge. ref. & terminal 5% gold bonds, due 1952, plain and stamped, will be paid on that date.—V. 135, p. 1160.

Lehigh Valley RR.—Issue Authorized.—
The I.-S. C. Commission has authorized the road to issue \$1,000,000 general consolidated 4½% bonds which will be pledged up to Jan. 31 1934 as collateral for short-term notes.—V. 135, p. 4031.

Missouri Pacific RR.—Acquisition of Northeast Oklahoma R. Again Denied—See latter company below.—V. 135, RR. p. 4381.

New Jersey & New York RR.—Bonds Extended.—
The I.-S. C. Commission on Dec. 16 authorized the company to extend from Jan. 1 1932 to Jan. 1 1938, the maturity date of \$631,000 of general mortgage 5% 40-year gold bonds.

The report of the Commission says in part:
The applicant states that it is unable to provide funds to pay the bonds at maturity and proposes to arrange for their extension by entering into a contract with the holders of the bonds whereby it is mutually agreed to extend the maturity date of these bonds to Jan. 1 1938, the interest rate for the extended period to be as at present, namely 5%, payable semi-annually. In connection therewith, the applicant will make a payment of \$1 for each \$1,000 bonds extended. The bonds as extended will continue to be secured by the general mortgage.—V. 132, p. 845.

sl for each \$1,000 bonds extended. The bonds as extended will continue to be secured by the general mortgage.—V. 132, p. 845.

New York Central RR.—Title to Grand Central Unit Goes to Government.—

Title to the 8-story building in East 45th St., N. Y. City, partly occupied by the Grand Central postal station, passed to the Federal Government.—

Title to the 8-story building in East 45th St., N. Y. City, partly occupied by the Grand Central postal station, passed to the Federal Government from the New York Central RR. for \$9,000,000 Dec. 29 in the Federal Building. The property was acquired under an Act of Congress passed on June 12 1930, which authorized the acquisition at a cost of not more than \$14,500,000. No part of the purchase price has been paid, an agreement having been reached whereby the Government will settle the debt in full not later than June 3 1937, plus 4% interest from Dec. 29 1932 to the day of payment. The New York Central reserved to itself all subsurface easements of light, air and support. A part of the Grand Central Terminal track system runs under the building.—V. 135, p. 4382.

Northeast Oklahoma RR.—Control.—

The I.-S. C. Commission has affirmed its original finding that acquisition by the Missouri Pacific RR. for control of the northeast Oklahoma RR., by purchase of its capital stock, is not shown to be in the public interest.

The proceeding originated Jan. 12 1931 with an application by the Missouri Pacific RR. for authority to acquire control, by purchase of capital stock, of the Northeast Oklahoma RR. An order denying the application was entered.

Division 4 of the Commission was not satisfied that the price proposed to be paid for the carrier's securities had been justified, or that the expenditure of the amount involved would be a prudent commitment of carrier funds under prevailing economic conditions.—V. 114, p. 1408.

Northern Pacific Ry.—To Receive Dividend.
See Northwestern Improvement Co. under "Indust 'Industrials' below.see Northwester 135, p. 2488.

Pennroad Corp.—Answers Suit.—

The corporation has filed an affidavit of just and legal defense in Chancery Court at Wilmington, Del., to the receivership and accounting suit filed against it by John W. Perrine and Julia A. Perrine, both of Philadelphia. After citing that the complainants are not residents of Delaware the corporation asked the court to order the complainants to post a bond to guarantee court costs of the litigation. The court issued an order directing complainants to post \$500 cost bond on or before Jan. 12, or the bill of complaint will be dismissed. The court reverses the right to require additional security if it deems it advisable.—V. 135, p. 4212.

Pennsylvania RR.—New Director.— Franklin D'Olier has been elected a director to succeed the late Jay

Franklin D'Olier has been elected a Cooke.

Cooke.

Mr. D'Olier is a Vice-President of the Prudential Insurance Co., and a director of several financial and industrial organizations of New York and Philadelphia, as well as of Newark.—V. 135, p. 4382.

Cota Logn of \$1.000,000.—

Prinadelphia, as well as of Newark.—V. 135, p. 4382.

Pere Marquette Ry.—Gets Loan of \$1,000,000.—

The company has received a loan of \$1,000,600 from the Railread Credit Corporation to be applied in the payment of \$1,031,480 of interest due on its first mortgage bonds on Jan. 1.

The I.-S. C. Commission at the request of the road has dismissed its request for a further loan of \$1,000,000 from the Reconstruction Finance Corporation.

The I.-S. C. Commission on Dec. 21 authorized the company to pledge with the Railroad Credit Corporation its equity in \$9,000,000 of 1st mtge. 4½% gold bonds, series C, now pledged with the Reconstruction Finance Corporation as collateral security for a loan, and also to pledge all or any part of \$386,000 of such series C bonds now in its treasury.—V. 135, p. 4382.

St. Louis-San Francisco Ry.—Asks for \$3,000,000 R. F. C. Loan.—

Authority to borrow 3,000,000 from the R. F. C., with receivers' certificates as collateral, is asked by the receiver of the company from the I.-S. C. Commission. The proceeds would be used for paying current taxes and principal and interest on equipment trust certificates.—V. 135, p. 4382.

Savannah & Atlanta Ry.—Banks Veto Rail Financing—Road Unable to Get Reconstruction Finance Corporation Loan.—The Chase National Bank, N. Y. City, and the Citizens & Southern National Bank of Savannah, Ga., have declined to accept new 3-year certificates to replace the \$500,000 of receivers' certificates which they now hold. This means that a loan of \$276,219 conditionally extended to the road by the R. F. C. will not be available.

The road's receiver applied to the Government for a loan of \$828,761 from the R. F. C. to pay \$500,000 of receiver's certificates, \$52,541 of prior claims and \$276,219 of taxes, interest, joint terminal accounts and balances due other lines. The 1.-S. C. Commission rejected the application for the amount desired to pay the certificates but approved a loan of \$276,200 for three years, upon pledge of a like amount of receiver's certificates and on condition that the holders of the overdue certificates extend the same to a maturity date not earlier than the maturity date of the loan and also that the overdue certificates would rank equally with those accepted by the R. F. C.—V. 135, p. 1161.

Seaboard Air Line Rv.—Co-Receiver Resigns.—

Seaboard Air Line Ry.—Co-Receiver Resigns.— Ethelbert W. Smith has announced his resignation as co-receiver, effective n. 1.—V. 135, p. 2171.

Southern Pacific Co.-Assumption of Obligation and

Southern Pacific Co.—Assumption of Obligation and Liability.—

The I.-S. C. Commission on Dec. 14 authorized the company to assume obligation and liability as guarantor, in respect of not exceeding \$4.056,000 ist mtge. 4% gold bonds of the San Antonio & Aransas Pass Ry., the bonds to be pledged and repledged as collateral security for short-term notes. The Commission, however, dismissed that part of the application which sought authority to assume obligation and liability in respect of \$4.159.000 ist mtge. 4% gold bonds of the San Antonio & Aransas Pass Ry. and to pledge and repledge them as collateral security for short-term notes. The report of the Commission says in part:

The applicant owns substantially all of the outstanding capital stock of the San Antonio & Aransas Pass Ry. It states that it owns \$4.159.000 San Antonio & Aransas Pass Ry. It states that it owns \$4.159.000 San Antonio & Aransas Pass Ry. It states that it owns \$4.159.000 San Antonio company's 1st mtge. 4% gold bonds, which were issued by that company on Dec. 20 1892, and were guaranteed by the applicant at company on Dec. 20 1892, and were guaranteed by the applicant at \$4.056.000 1st mtge. 4% gold bonds, and the applicant was authorized to pledge these bonds as collateral security for short-term notes, but this authority did not extend to the pledge of the bonds after being guaranteed by the applicant.

The applicant requests authority to pledge and repledge upon such terms as may be obtainable the \$4.159.000 of bonds now owned by it and bearing its guarantey, and to assume obligation and liability as guarantor of said bonds as an incident to such pledge or repledge. It also requests authority to assume obligation and liability as guarantor of said bonds as an incident to such pledge or repledge. It also requested the above-mentioned bonds which have been, or will be, delivered to it under authority to assume obligation and liability as guarantor of the \$4.056.000 of the above-mentioned bonds which have been, or will be, delivered to shor

Texas Oklahoma & Eastern RR.—Loan Withdrawn.—
The company has withdrawn its application to the R. F. C. for a loan of \$217,477 on which the I.-S. C. Commission approved a loan of \$108,740 and the application has been dismissed.—V. 135, p. 1161.

Texas & Pacific Ry.—Interest on 2d Mtge. Bonds.—
Interest of 5% will be paid on March 1 1933 on the 2d mtge. 5% income gold bonds, due 2000, on presentation of Coupon No. 45.—V. 134, p. 3267, 3270, 4487; V. 135, p. 982.

Union Pacific RR.—Resignation.— N. H. Loomis will retire on Dec. 31 1932 as General Solicitor.—V. 135, p. 4213.

Wabash RR.—Interest on Debenture Bonds.— Interest of 3% due Jan. 1 1933 on the debenture mortgage 6% gold bonds, series B, due 1939, will be paid on that date.—V. 135, p. 3855.

PUBLIC UTILITIES.

Matters Covered in the "Chronicle" of Dec. 24.—(a) Smaller decline recorded in weekly electric output, p. 4280; (b) Gas utility revenues stabilize in October, p. 4283.

American Cities Power & Light Corp.—Dividend.—
The directors have declared the regular quarterly dividend of 1-32d of 1 share of class B stock on each share of conv. class A stock, optional dividend

series, payable Feb. 1 1933 to holders of record Jan. 5 1933. The class A stockholders have the option of receiving 75 cents in cash in lieu of the dividend in class B stock, provided written notice is received by the corportation on or before Jan. 16 1933. A similar distribution was made on Nov. 1 last.—V. 135, p. 2829.

American Community Power Co.—To Sell Collateral.—
Pursuant to a decree of Federal Court dated Dec. 22, \$2,250,000 of first mortgage and collateral trust 6½% gold bonds, series A, of the General Public Utilities Co. will be sold to the highest bidder on Jan. 23 1933, at the New York County Court House. The collateral to be auctioned is under the note agreement of American Community Power Co., dated Nov. 1 1930, and is the result of the foreclosure and sale proceedings in which the Central Hanover Bank & Trust Co., as trustee, took action against American Community Power Co., John K. Garrigues and Herbert W. Briggs, receivers for the company. It was announced that Joseph Lorenz, special master, will not accept a bid of less than \$225,000 in cash or \$250,000 principal amount of one-year 5½% secured notes of American Community Power Co.—V. 135, p. 3688.

American Light & Traction Co.—Smaller Distribution.
—The directors Dec. 28 declared a dividend of 50 cents per share on the common stock, par \$25, payable Feb. 1 1933 to holders of record Jan. 13. This compares with quarterly distributions of 62½ cents per share made on this issue from August 1930 to and incl. November 1932.—V. 135,

American Power & Light Co.—Earnings.—
For income statement for 12 months ended Oct. 31 see "Earnings Department" on a preceding page.—V. 135, p. 4032.

Associated Gas & Electric Co.—Output Increases.—
Low temperatures and longer nights have combined to increase demands for services furnished by the Associated system with the results that in the week ended Dec. 17 the amount of electricity generated and the gas sendout were the heaviest since early in the present year.

During the week, the System sent out 396,008,700 cubic feet of gas which was 48,172,500 cubic feet or 13.8% more than in the corresponding week of 1931. It compares with a 354,185,000 cubic feet sendout in the preceding week. Incidentally, it was the heaviest weekly volume of gas consumed in the Associated territory since the week of March 12 last when 397,891,600 cubic feet was reported.

Net output of electricity generated by the Associated System, excluding sales to other utilities, amounted to 51,699,175 units (kwh.), only 4.5% below last year. This was the heaviest weekly consumption of electricity in the territory served since that of Feb. 6 when 51,879,735 units were generated. Furthermore, it compares with 50,356,507 units in the previous week and 54,169,083 units last year.

Earnings.—

Earnings.

For income statement for 12 months ended Nov. 30 see "Earnings Department" on a preceding page.

Hearing Postponed.—

Hearings on the motion for a preliminary injunction to restrain the Pennsylvania Securities Commission from prohibiting the sale in Pennsylvania of the 1932 series A 5% and 6% convertibles of the Associated Gas & Electric Co. was tentatively postponed until the week of Jan. 9 by Judge Kirkpatrick in the U. S. District Court at Philadelphia Dec. 27.

The postponement was at the request of counsel for the Commission, who explained he had not sufficient time to prepare a defense to the suit. He agreed that the temporary restraining order issued by Judge Kirkpatrick enjoining the Commission from enforcing its order of Dec. 15 against the sale of the securities should remain in effect.

The Commission refuses to sanction the sale of these securities upon the ground that they are convertible at the option of the company rather than at the option of the holder. The position taken by Associated Gas is that while the Commission has authority to regulate the registration of stock and bond brokers and salesmen it does not have any right to define the type of securities marketable in Pennsylvania.—V. 135, p. 4383.

Berlin City Electric Co., Inc.—Bonds Drawn for Re-

Berlin City Electric Co., Inc. -Bonds Drawn for Re-

demption.—
Dillon, Read & Co., as fiscal agents, announce that \$105,000 of the 30-year 6½% sinking fund debentures due Feb. 1 1959 have been drawn for redemption on Feb. 1 1933 out of moneys to be paid for sinking fund purposes. Debentures so designated are payable at the office of Dillon, Read & Co. in New York at par. At the option of holders, principal and interest may be collected in London, Amsterdam, Zurich, Basle, or Stockholm in the currencies of the respective countries at the exchange rate prevailing on the date of presentation.—V. 135, p. 125.

California Water Service Co.—Earnings.—
For income statement for 12 months ended Nov. 30 see "Earnings partment" on a preceding page.—V. 135, p. 4213.

Canadian Western Natural Gas, Light, Heat & Power Co., Ltd.-To Retire Debenture Stock

The company will on June 15 1933 redeem the whole of the outstanding 1st mtge. 5% debenture stock at 105%. No transfer will be registered after May 15 1933.—V. 134, p. 1585.

Chester & Philadelphia Ry.—Resumes Dividend.—
A dividend of 87½ cents per share has been declared on the common stock, par \$50, payable Jan. 15 to holders of record Jan. 9. A distribution of 30 cents per share was made on July 15 last, as against 37½ cents per share in each of the four preceding quarters.—V. 135, p. 2490.

Cities Service Co.—Merger of Wisconsin Units.—
Formal announcement was made on Dec. 23 of the consolidation of four subsidiaries in the Northwest into a new corporation, with general offices in Milwaukee and Winona, Minn.
The concerns involved are Lindsay McMillan Co., Milwaukee; Winona Oil Co., Interstate Oil Co., La Crosse, and Lockwood Oil Co., Kenosha. The new company, to become operative Jan. 1, will be known as Cities Service Oil Co., Inc., of Wisconsin.
The eastern half of Wisconsin will be in charge of the Milwaukee office, and the Winona office will take care of the western half of Wisconsin, northern Michigan, and southeastern Minnesota. The Kenosha and La Crosse plants and offices will be eliminated. (Milwaukee "Sentinel.")—
V. 135, p. 2490.

Consolidated Gas Utilities Co.-Funds Provided for

Consolidated Gas Utilities Co.—Funds Provided for Interest Payment on Bonds—Receiver Appointed.—

The protective committee for holders of 1st mtge. & coll. 6% bonds, headed by William W. Battles, has sent a letter to bondholders notifying them that funds for the payment of the Dec. 1 interest coupon have been provided. These funds are on deposit with the Manufacturers Trust Co., New York, where coupons may be desposited for collection.

The company has assented to the appointment of Logan W. Cary, its President, as receiver, but the situation, in the opinion of the committee, does not at this time require the deposit of bonds or any other action. Receivership bills were filed in Chancery Court at Wilmington Dec. 28 against Consolidated Gas Utilities Co. and one of its subsidiaries, Consolidated Gas Service Co. Both bills were filed by committee representing holders of 6½% conv. gold debentures, series A, of Consolidated Gas Utilities Co. The bill against Consolidated Gas Utilities alleged that the corporation on Dec. 1 defaulted in payment of \$248.550 interest on its outstanding \$8.869.500 6% gold bonds and also defaulted in payment of \$127.611 interest on its outstanding \$4.026.500 6½% debentures.

To Issue Receivers' Certificates to Pay Bond Interes &c.—An Associated Press dispatch from Oklahoma City Dec. 27 stated:

An Associated Press dispatch from Oklahoma City Dec. 27 stated:
Federal Judge Edgar S. Vaught to-day approved the issuance of at least
\$250,000 in receivership certificates of the Consolidated Gas Utilities Corp.
and the Consolidated Gas Service Corp. The \$250,000 was sought to pay
interest on 1st mtge. bonds on which days of grace will expire on Friday

interest on 1st mtge, bonds on which uays of grades of the company would (Dec. 30).

Judge Vaught indicated he also thought the assets of the company would be further protected by the payment of about \$40,000 interest on outstanding debentures. Sale of the receivership certificates also will make it

possible for the companies to meet tax payments of about \$40,000 falling due within 60 days.—V. 135, p. 4032.

Dayton Street Ry.—Rehabilitation.—
This company, through its President, William A. Keyes, on Dec. 24 authorized the purchase of 12 trackless trolleys for operation over its line, and an expenditure of between \$175,000 and \$200,000 for the complete rehabilitation of its service.
This action followed a fire which destroyed the company's car barns in East Dayton several months ago. All the street cars, with the exception of a few small ones, were destroyed in the fire and the company has been using borrowed ones to maintain its service.
The contract for the buses was awarded to the J. C. Brill Co., Phila.
Mr. Keyes said it was probable that the system could be completed by March 1.—V. 117, p. 207.

Electric Power & Light Corp.—Earnings.—

Electric Power & Light Corp.—Earnings.—
For income statement for 12 months ended Oct. 31 see "Earnings Department" on a preceding page.—V. 135, p. 4033.

Empire District Electric Co.—To Build Dam.—
This company, controlled by the Cities Service Power & Light Co., a subsidiary of the Cities Service Co., has accepted a license to construct the Table Rock Dam on White River, according to dispatches from Springfield, Mo., which also stated that the new structure will cost approximately \$25,000,000.—V. 135, p. 464.

Federal Light & Traction Co.—Earnings.—
For income statement for 12 months ended June 30, see "Earnings Department" on a preceding page.

Honolulu Rapid Transit Co.—Omits Dividend.—
The directors have decided to omit the quarterly dividend usually payable about Dec. 31 on the capital stock, par \$20. Distributions of 20 cents per share were made in March, June and September last as compared with 35 cents per share previously paid each quarter.—V. 134, p. 2718.

Houston Gas & Fuel Co.—To Intervene in Receivership.—
Minority bondholders have been authorized by Federal Judge Bryant of
Houston, Texas, to intervene in the receivership and foreclosure suit of the
Fidelity Philadelphia Trust Co.—V. 135, p. 2491.

Illinois Power & Light Co.—New President.—
Henry L. Hanley, formerly Vice-President, has been elected President to succeed the late Clement Studebaker Jr.—V. 134, p. 2521.

Interborough Rapid Transit Co.—Listing of Certificates of Deposit for Voting Trust Certificates for Capital Stock.—

The New York Stock Exchange has authorized the listing of certificates of deposit for voting trust certificates representing 350,000 shares of capital stock on official notice of issuance. The protective committee for the stock comprises Arthur W. Loasby. Chairman, Edgar S. Bloom, A. J. Brosseau, H. W. Croft, and Ellery W. Mann. Manufacturers Trust Co., New York, is depositary.

H. W. Crott, and Ellery W. Mann. Manufacturers Trust Co., New York. Is depositary.

Claims Must Be Filed by March 20.—

Victor J. Dowling and Thomas E. Murray Jr., receivers, have issued a notice to holders of claims and demands against the company, fixing March 20 1933, as the date on or before which all claims and demands shall be presented to the receivers.

"All persons failing to present their claims or demands against the company to the receivers on or before March 20 1933," the notice declares, "shall be barred from sharing in the benefits of the distribution of the moneys and proceeds of the properties that now or hereafter shall be in the hands of the receivers, and from sharing or participating in the distribution of any of the proceeds from the sale of said properties, if any such sale shall be hereafter adjudged and decreed in said cause."

Forms for proofs of contract claims and demands required to be presented for the receivers are obtainable at the office of H. T. Berry, Comptroller for receivers, 165 Broadway, New York, at which office such contract claims and demands are to be presented. Forms for proofs of personal injury and other tort claims are obtainable at the office of the claim agent, Interborough Rapid Transit, 15 Park Row, New York, at which office they are to be presented to the receivers.—V. 135, p. 4384.

Kentucky Utilities Co., Inc.—Expands Business.—

Kentucky Utilities Co., Inc.—Expands Business.—
The receiver for the Kentucky Electric Development Co. has decided that in the future the company will purchase all of its power for its several rural lines, instead of buying part of it and producing the remainder. Thus the Kentucky Utilities Co. has secured a new wholesale customer. ("Electrical World").—V. 135, p. 629.

Long Island Lighting Co.-Makes Offer to Bondholders

Long Island Lighting Co.—Makes Offer to Bondholders of Patchogue Gas Co.—

The 1st mtge. 5% gold bonds will become due and payable at the office of the City Bank Farmers Trust Co., 22 William St., N. Y. City on Jan. 16. 1933.

Holders who may desire to exchange their holdings of these bonds for a like principal amount of 1st ref. mtge. gold bonds, series B 5% due Sept. 1. 1955, of the Long Island Lighting Co., successor by merger to the Patchogue Gas Co. (having attached thereto Sept. 1. 1933, and subsequently maturing coupons), may do so by detaching and collecting in the usual way, the coupon due Jan. 15. 1933, from their Patchogue Gas Co. bonds, and depositing not later than the close of business on Jan. 9. 1933, said bonds, without coupons, with the City Bank Farmers Trust Co. The Long Island Lighting Co. bonds delivered in such exchange will be accompanied by checks or cash at the rate of \$3.13 per \$500 principal amount of bonds, being equivalent to interest thereon from Jan. 15. 1933, to March 1. 1933. The earliest maturing coupons on the Long Island bonds will cover interest from March 1. 1933, to Sept. 1. 1933.—V. 135, p. 4214.

Malden & Melrose Gas Light Co.—To Issue Stock.—

Malden & Melrose Gas Light Co.—To Issue Stock.—
The company has filed a petition with the Mass. Department of Public Utilities seeking authority to issue at par 42.497 additional shares of \$25 par stock. Proceeds would be used for payment of indebtedness incurred in making extentions and additions to plant and property.—V. 132, p. 3713.

Manhattan Ry.—Second Mortgage Interest.—
The interest due Dec. 1 1932 on the Ed mage. 4% gold bonds, due 2013, is now being paid.—V. 135, p. 4384.

Mexican Telephone & Telegraph Co.—Div. Deferred.—
The directors have decided to defer the quarterly dividend due Dec. 31 on the \$7 cum. prior preference stock of no par value. The last regular quarterly payment of \$1.75 per share was made on this issue on Sept. 30 1932.—V. 134, p. 4158.

Middle West Utilities Co.—Time Extended.—
An order has been entered in the U.S. District Court at Chicago, extending the time for filing claims against the company to April 1933, from Jan. 1.—V. 135, p. 4384.

Mohawk Valley Co.—Earnings.—
For income statement for 12 months ended Sept. 30 see "Earnings Department" on a preceding page.—V. 135, p. 818.

Montreal Tramways Co.—Dividend Rate Decreased.—
A quarterly distribution of \$2.25 per share has been declared on the common stock, par \$100 payable Jan. 14.
This compares with quarterly dividends of \$2.50 per a share made on this issue from August 1922 to and incl. October 1932.

Wage Cut Announced .-

The 2 800 members of the company's union have voted unanimously to take a wage cut of four cents an hour for one year starting Jan. 1. The reduction is approximately 7½%.

The company's executives originally proposed a 10% cut, but later modified their proposal

The new contract also carried a proviso for a maximum of nine hours a day, against 10 hours in the 1932 contract. The minimum number of working hours is set at six a day with the inclusion of a day off each week to alleviate the unemployment situation.—V. 135, p. 2831.

National Public Service Corp.-Collateral Bid in by Bank.

Stocks pledged with the Central Hanover Bank & Trust Co. as security for \$5,750,000 loans to the National Public Service Corp. were acquired by the bank at public auction at New York Dec. 29 for the amount of the loans. Representatives of the bank were the only bidders.

A total of 501,275 shares of no par common stock of the New England Public Service Co., representing 52.1% of the shares, was sold for \$1,800,00°C; 44,491 common shares of Eastern New Jersey Power Co. and 163,350 no par common shares of the Jersey Central Power & Light Co. were sold together for \$3,20°C,00°C, the shares representing 32.4% control of the companies; 10,313 shares of Jersey Central Power & Light preferred stock were sold of \$500,00°C, and 116,60°C common shares of Central & South West Utilities Co. were sold for \$100,00°C.

Efforts to prevent the sale of the stocks were made Dec. 28 and 29 by interests that had been endeavoring to reorganize the Eastern Insull properties, but Judges Goddard and Swan of the U. S. District Court and Judge Manton of the Circuit Court of Appeals refused to issue restraining orders after hearing pleas by the interests involved.

The \$5,75°C,00°C bank loans were part of total advances of \$20,941,00°C made by five banks in New York to various Eastern utility units of the Insull group. The other lending institutions are the Chase National Bank, the Chemical Bank & Trust Co., the Manufacturers Trust Co. and the New York Trust Co. They have not determined upon their course of action.—V. 135, p. 4385.

Northwestern Electric Co.—Reduction of Dividend.—
In connection with the reduction in the dividend on the 1st pref. stock, President Guy W. Talbot, in a letter to the stockholders, Dec. 20, stated:
At the end of 1931 the company had borrowed cash to the extent of \$2,962,695, which had been invested in additions and improvements to its property and equipment to serve the public. During 1932 it has been necessary to borrow an additional sum of \$83,664, making a total floating debt of \$3,046,359 on Nov. 30 1932. All of these funds have been supplied as needed, and at an interest rate of only 6% by American Power & Light Co., the owner of the company's common stock, which has lent the money in reliance upon its faith in your company's present and future stability. This favorable financial backing by American Power & Light Co. has been a large factor in the successful development of your company's property and business. It has enabled the company not only to borrow money at a low rate, but also to avoid borrowing money from bankers or other interests which might now be demanding repayment, and is but one example of the many advantages obtained by your company, its preferred stockholders and its customers from its connection with a strong, well-managed and properly functioning 'holding' company.

However, considering the amount of money your company has already borrowed and the business and other conditions now confronting us, your trustees believe that the company should now secure its cash requirements primarily from its own operations. Even in times like these some cash must be spent for new electric lines and for meters, poles, transformers and other equipment to supply service to customers who apply for it, in addition to the cash required for operating expenses, interest, and the very heavy burden of taxes. These taxes alone amount to approximately \$511,000 for 1932, an increase of more than \$35,000

Omaha & Council Bluffs Street Ry .- Payment of Interest

The company will on Jan. 1 1933, through New York Trust Co., 100 Broadway. New York, pay $1\frac{1}{2}\%$ interest to the holders of coupons dated Jan. 1 1933, attached to its 1st consol. mtge. 5% gold bonds pursuant to third extension agreement and supplemental indenture.—V. 135, p. 4215.

Oregon-Washington Water Service Co.—Earnings.—
For income statement for 12 months ended Nov. 30 see "Earnings Department" on a preceding page.—V. 135, p. 4215.

Pacific Northwest Public Service Co.—Reduces Dividend on \$6 1st Pref. Stock of No Par Value.—

The company on Dec. 1 last paid a dividend of \$1 per share on the \$6 cum. 1st pref. stock, no par value, to holders of record Nov. 15. Previously, the company made regular quarterly distributions or \$1.50 per share on this issue.—V. 135, p. 4385.

Penn Central Light & PowerCo.—Stock Off List. See Missouri-Kansas Pipe Line Co. under "Industrials" below.—

Pennsylvania Gas & Electric Co.—Earnings.—
For income statement for 12 months ended Nov. 30 see "Earnings Department" on a preceding page.—V. 135, p. 3857.

Puget Sound Power & Light Co.—Pref. Divs. Deferred.
The directors have decided to defer the quarterly dividends due Jan. 15 on the \$5 cum. prior pref. stock and on the \$6 cum. pref. stock, both of no par value. On the former issue, the company made regular quarterly distributions of \$1.25 per share to and incl. Oct. 15 1932. while on the latter issue a dividend of \$1 per share was made on Oct. 15 as compared with \$1.50 per share previously each quarter.—V. 135, p. 3166

Rhine-Westphalia Electric Power Corp. (Rheinisch-Westfalisches Elektrizitatswerk Aktien-Gesellschaft, Westfalisches Elektrizitats Germany).—\$1.07 Dividend.-

The directors have declared a dividend of \$1.07 per share on the American shares, payable Jan. 10 to holders of record Jan. 3 1933. On Jan. 22 last a distribution of \$1.06 per share was made, while on Dec. 17 1930 the

company paid a dividend of \$2.14 per share: on Jan. 4 1930, \$2.16, and on Dec. 1 1928, \$1.92 per share.—V. 135, p. 4386.

Rochester & Lake Ontario Water Service Corp.-

Earnings.—
For income statement for 12 months ended Nov. 30 see "Earnings Department" on a preceding page.—V. 135, p. 4215.

Shasta Water Co.—Initial Dividend.—

A letter to the stockholders detailing plans for the payment on Jan. 15 of the initial dividend of 40 cents per share on the new common stock after completion of exchange for outstandin, class A and B stock, states that earnings since Aug. 1 1932, when the present management took charge of the company's affiars, have averaged \$4.260 a month up to Nov 30. This compares with a monthly average of \$2.462 for the like 1931 period. Cash at the close of the 1932 period was \$38.526, against \$7,216 as of Nov. 30 1931.—V. 129, p. 1441.

South Bay Consolidated Water Co., Inc.—Earnings.—
For income statement for 12 months ended Nov. 30 see "Earnings Department" on a preceding page.—V. 135, p. 4215.

Southern Public Utilities Co.—Rate Decision.—
Orders approving, with certain modifications, reduced rate schedules of this company and the Duke Power Co. have been issued by the South Carolina RR. Commission. Schedules recently submitted by the companies had been rejected.

The orders provide that the new schedules snall effect no increase in the rates for any consumer, snall eliminate a provision for cancellation on 90-days' notice and shall contain no clause providing for rate increases to meet possible additional burdens of Federal and State taxes. ("Electrical World.")—V. 135, p. 3357.

An exchange offer of new bonds and bond scrip certificates representing premium has been made by the company to holders of the collateral trust 6% bonds due June 10 1933, and of 6% gold notes due Feb. 10 1933. Holders of these securities have been given rights to exchange the bonds and notes for 105% of par value of 10-year collateral trust 6% bonds dates Oct. 1 1932.

According to the rights of the rights of the rights of the rights. Southern Union Gas Co.—Bond Exchange Offer.

and notes for 105% of par value of 10-year conactant.

Oct. 1 1932.

According to the rights, the exchange will be made on a par-for-par basis, with bond scrip certificates representing the extra 5% of par value of bonds exchanged in addition to interest due on Dec. 16 last. It was announced that interest will be adjusted on each issue.

Peabody & Co. of Chicago, are depository under the plan of exchange.

Date of Annual Meeting Changed.—
The date of the annual meeting has been changed to the Saturday after the third Monday in March, which this year will be March 25, from the third Tuesday in February as heretofore.—V. 134, p. 506.

Texas-Louisiana Power Co.—No Funds for Interest.—

A. P. Barrett and Wiley F. Corl, receivers, announce that they do not have sufficient funds on hand with which to pay the interest due Jan. 1 1933 on the 1st & ref. 6% gold bonds of 1946. They further state that the operations of the company will not produce sufficient funds to pay the interest within the 60-day grace period, but if conditions justify an effort will be made to borrow the deficiency by means of the sale of receivers' certificates, which if done would allow interest to be paid at that time.—

V. 135, p. 3357.

Toledo Light & Power Co.—Notes Off List.— See Missouri-Kansas Pipe Line Co. under "Industrials" below.-

United Gas Corp.—Stated Value Decreased.—
The stockholders on Dec. 29 voted to reduce the stated value of the common stock from \$14.91 to \$1 a share and to change the present number of no par common shares into an equal number of \$1 par common shares. The changes became effective on Dec. 31. See also V. 135, p. 4215.

ment" on a preceding page.—V. 135, p. 4215.

United Gas Improvement Co.—New Directors.—
Charles D. Dickey of Philadelphia (a partner of J. P. Morgan & Co. and Drexel & Co.). Floyd L. Carlisle of New York (Chairman of the board of the Consolidated Gas Co. and the Niagara Hudson Power Corp.) and Edward B. Leisenring of Ardmore, Pa. (President of the Westmoreland Coal Co.) have been elected directors succeeding Edward T. Stotesbury of Philadelphia and Harold Stanley of New York (both partners in J. P. Morgan & Co.) and Landon K. Thorne of New York (President of Bonbright & Co.) william W. Bodine, a Vice-President of the United Gas Improvement Co., was placed on the directorate to succeed his father, the late Samuel T. Bodine, who was Chairman of the board.—V. 135, p. 3167.

Ittilities Sarvice Co.—Time for Denosite Extended.—

Utilities Service Co.—Time for Deposits Extended.—
The time for deposit of 1st lien 6% bonds has been extended by the reorganization committee to Jan. 15 from Dec. 30. A total of \$4,809,000 out of \$5,000,000 bonds, or more than 96% has been deposited to date.—V. 135, p. 4216, 3525.

Washington Gas Light Co.—Litigation Over Ownership Ends—Present Set-Up Does Not Violate La Follette Anti-Merger Law.—The following is taken from the Washington "Post" of Dec. 24:

"Post" of Dec. 24:

The prolonged litigation over ownership of the Washington and the Georgetown Gas Light Cos. was settled for the second time Dec. 23, this time without resort to trial, when Justice Peyton Gordon, in District Supreme Court, signed decrees modifying an order of the P. U. Commission and holding that the present set-up is wholly within the requirements of the La Follette anti-merger law.

Simultaneously, the Commission issued an order reviewing the two-year inquiry and explaining the present division of the shares of the Washington & Suburban Cos., which the Court held was similar to the Seaboard Investment Trust, a Massachusetts trust, which former Chief Justice Alfred A. Wheat in 1930 declared was not in violation of the La Follette Act.

The immediate effect of the compromise will be to permit the stock-holders of the local gas companies to vote their stock, an action denied them by the Commission's order of last May. Management of gas companies will remain entirely in the hands of local directors, according to counsel.

The immediate effect of the compromise will be to permit the stocknolders of the local gas companies to vote their stock, an action denied
them by the Commission's order of last May. Management of gas companies will remain entirely in the hands of local directors, according to
counsel.

Both parties appear to be satisfied with the settlement and both sides
claim to have gained a victory. The upshot of the whole matter appears to
be that the local gas companies are still owned by foreign interests; which,
however, come within the terms of the ineffective La Follette anti-merger
Act, but that management of the Washington companies is now local and
that no fees or excess profits are being passed along to outside corporations.

While consenting to the Court order, the Commission does not entirely
close the case, retaining the right to question "the propriety of the holding
of shares of beneficial interest of Washington and Suburban companies'
if at any future time further facts or circumstances are produced which
would warrant a further inquiry.

Trustees of the Washington & Suburban companies are further required
to report to the District Supreme Court "any substantial transfer of the
shares of beneficial interest of Washington & Suburban Cos. or any substantial interest therein."

Although the entire ownership setup of the local gas companies has undergone a shake-up, the only significant change since the issuance of the
Commission's order is the elimination of the Central Public Service Corp.
the Westfield Trust and A. E. Peirce from the picture. This, however,
was accomplished by the refinancing of Central Public Service, largely,
rather than the Commission's influence.

Referring to this elimination, the Commission's order stated: "The
main objective of the Commission was to free the Washington Gas Light
Co. from their dominance. the managerial control, attempted to be exercised by the Central Public Service Corp. or any other outside agency.
This objective, the Commission is convinced, has been atta

The changes in ownership of the local gas companies since the issuance of the Commission's order last May are summarized in the new order as follows:

"All ownership or control, direct or indirect, by the Central Public Service Co, and its subsidiaries has ceased; 1,900 shares of the 6,000 shares

of the Washington & Suburban Cos. are held directly by the so-called Chase National Bank group; 1,200 shares are held by the wholly independent Continental Illinois National Bank & Trust Co. (Chicago).

"The remaining 1,800 shares are distributed between Public Utility Holding Corp. of America (900) and the United Founders group (900). A careful examination of the interlocking holdings of these two groups indicates that the United Founders Corp. and its subsidiaries own a substantial but by no means controlling interest in Public Utility Holding Corp. of America, and that the Chase group are also owners of a substantial interest in the Public Utilities Holding Corp. of America through the Public Utilities Associates, Inc., and Chase, Harris Forbes Corp. of New York.

"It would appear from the above and the chase group are also controlled the controlled the

stantial interest in the Public Utilities Holding Corp. of Allie 12 the Public Utilities Associates, Inc., and Chase, Harris Forbes Corp. of New York.

"It would appear from the above analysis that all of the common shares of beneficial interest of the Washington & Suburban Cos. are at present held at two national banks which are forbidden by law to be public utility holding or operating companies, and by practically independent corporate entities.

holding or operating companies, and by practically independent corporate entities.

"Under these circumstances, in the light of the facts now before it, and of the decision of the Supreme Court of the District of Columbia in Public Utilities Commission vs. Seaboard Investment Trust, the Commission is of the opinion that so long as conditions now existing remain unchanged, it should interpose no objection to the owning and voting of the stock of the Washington Gas Light Co. by the trustees of the Washington & Suburban Cos.: Provided, that due provision is made for the prompt report of any change or changes in said conditions, and it is understood that the Commission reserves to itself the right, at any time, to take such action as it may deem appropriate."

Appeals Were Withdrawn.

Commission reserves to itself the right, at any time, to take such action as it may deem appropriate."

Appeals Were Withdrawn.

The several owners of the gas company, named in the Commission's first order, with the exception of the Central Public Service Corporation and the Westfield Trust, whose appeals were withdrawn, likewise retained their rights "to contend that the Public Utilities Commission was without jurisdiction or authority to make or hold the investigation... or to conduct any other investigation or to make any other order or orders of the same or similar nature."

The Commission's new order reviews its activities during the past two years with relation to the gas company ownership inquiry and then states that all of the shares of beneficial interest of the Washington & Suburban Cos., formerly held by the Westfield Trust, which was headed by Mr. Peirce, have been transferred to other parties.

There were originally 171.993 of such shares, the Commission explains, but these were reduced to 6,000 prior to the transfer "for the purpose of saving transfer fees." The new owners are listed as follows:

Chase National Bank, 1,300; Public Utility Associates, Inc., 600; Public Utility Holding Corp. of America, 900; United Founders Corp., 480; American & General Securities Corp., 180; Second International Securities Corp., 120; U. 8. & British International Co., Ltd., 120; American Equities Corp., 100; Utility & Industrial Corp., 1,200; and Continental Illinois Bank & Trust Co., 1,000.

The District Supreme Court in its decrees, finding that the Washington & Suburban Cos. was similar to the Seaboard Investment Trust and therefore was not operating in violation of the La Follette Act, ordered the Commission's order modified so as not to require the Chase, Harris Forbes Corp., the Public Utility Holding Corp. of America, the Washington & Suburban Cos. "and all related and affiliated corporations, companies," &c., to surrender their stock.—V. 135, p. 4386.

Fixed Trust Oil Shares, \$364.97 a unit.
Basic Industry Shares, \$156.03 a unit.—V. 135, p. 4216.

Alliance Insurance Co., Phila.—Increases Dividend.—
A semi-annual dividend of \$1.50 per share has been declared on the capital stock, payable Dec. 28 to holders of record Dec. 27. Previously, the company made semi-annual distributions of \$1.25 per share on this issue.—V. 132, p. 851.

Allied General Corp.—Investment Trust Average Declines. The corporation's investment trust common stock index registered a further decline during the past week in sympathy with the movement of securities prices in general, it is announced. The average for the common stocks of the five leading management trusts, influenced by the leverage factor, stood at 9.99 on Dec. 23, compared with 11.08 on Dec. 16, a high of 17.3 for the year on Sept. 2 and a low of 4.4 on May 27.

The average of the non-leverage stocks stood at 9.92 as of the close Dec. 23, as against 10.48 at the close of the previous week, a high of 12.0 for the year, recorded on Sept. 9, and a low of 7.1 recorded on July 1. The average of the mutual funds, which are usually quoted on an asset value basis, stood at 7.88 on Dec. 23, against 8.29 on Dec. 16, and 9.5 on Sept. 2, the high for 1932, and 5.7 on July 8, the low for 1932.—V. 135, p. 4386.

Aluminium Ltd.—May Purchase Preferred Stock.—
Supplementary letters patent have been issued under the Seal of the Secretary of State of Canada, date d Nov. 30 1932, amending the provisions of the letters patent by adding to the rights, privileges and restrictions applicable to the redeemable preferred shares the following:
"Any preferred shares offered at a price not exceeding the amount at which they may be redeemed without the consent of the holders thereof may be purchased and redeemed by the company."—V. 135, p. 2177.

may be purchased and redeemed by the company."—V. 135, p. 2177.

American Assembling Machine Co.—Plant Sold.—

The T. W. & C. B. Sheridan Co. of N. Y. City has purchased the plant of the American Assembling Machine Co. at Easton, Pa. from the receiver, Chester Snyder, for "\$100,000 and other valuable considerations." The sale was approved by Judge R. C. Stewart. The order allows the Sheridan firm to obtain all rights, patents, patents applied for and good-will of the Juengst Co. and of the American Assembling Machine Co. The order directed the Sheridan Co. to agree also to pay the receiver 5% commission on all sales made of new gatherers, stitchers, coverers, binders, Rowe trimmers and Donnelly wrapping machines for 10 years from Jan. 1 1933, until total commissions reach \$100,000, of which \$10,000 is to be paid on Jan. 1 next. The commissions are in addition to the \$100,000 purchase price.

The receiver was appointed some time ago on the application of the Continental Bank & Trust Co., Bank of Sicily Trust Co. and Hibernia Trust Co., all of N. Y. City. The concern makes machinery used principally in the printing industry.

American Business Shares Corp.—Capital Increased.—

American Business Shares Corp.—Capital Increased.—
The stockholders on Dec. 29 approved an increase in the capital stock from 500,000 to 5,000,000 shares of \$1 par value.—V. 135, p. 4386, 3859.

American Electric Securities Corp.—Resumes Dividend

The stockholders on Dec. 29 approved an increase in the capital stock from 500,000 to 5,000,000 shares of \$1 par value.—V. 135, p. 4386, 3859.

American Electric Securities Corp.—Resumes Dividend on Common Stock.—

A dividend equivalent to 10 cents per share on the common shares to payable to-day Obec, 31) from a special reserve account representing dividends between the common shares to be payable at a date not determined at the time of the declaration of the dividends. Such reserve having been equivalent to somewhat less than 10 cents per share on all the common shares outstanding, the deficiency was contributed by some of the larger holders of common shares. President A. F. Ritter announced. The last regular quarterly distribution of 10 cents per share was made on this issue on Oct. 15 1931.

A dividend equivalent to 10 cents per share on the participating preferred shares (of the par value of \$1 per share) is also payable on Dec. 31 1932. With this payment all dividends on the participating preferred shares ince the organization of the corporation have been paid in full and one-third of the regular preferred dividend on such shares for the current quarterly dividend period has also been paid.

President A. F. Ritter in a letter to the stockholders says: While operations of the corporation will show a loss for the year 1932, the losses, except insofar as incurred through the sale of securities to retire bank loans, are not considered actual losses as they result from the sale of securities, at depreciated market prices, in order to reinvest the proceeds in other securities. Such reinvestment resulted in greater diversification and increased income to the corporation. The bank loans were retired as a precautionary measure in the early part of the year, when banks were evidencing increasing reluctance in the renewal of loans and the outlook was so uncertain that safety of principal seemed to necessitate retirement of the loans.

Your corporation has no funded debt or other obligations except those was one of t

American Insurance Co., Newark, N. J.—New Director.
Horace K. Corbin, Vice-President of the Fidelity Union Trust Co. of
Newark, N. J., has been elected a director to fill the vacancy caused by
the resignation of Charles Niebing.—V. 135, p. 129.

American Safety Razor Corp.—Loses Suit.—
Vice-President Jardine of Standard Safety Razor Corp. announces that
the United States Circuit Court of Appeals at Philadelphia has affirmed
the decision of Judge Kirkpatrick of the U. S. District Court in the suit of
the corporation against Frings Bros. of Philadelphia based on the sale
by that company of blades manufactured by Standard Safety Razor and
alleged to infringe the patents on the new "Gem Micromatic" razor and
blade made by American Safety Razor.

The decision of Judge Kirkpatrick had held that the Gem patents were
invalid because of the prior state of the art, and that they represented no
improvements not covered in earlier patents.—V. 135, p. 4387.

Amoskeag Mfg. Co.—Plans to Refund 6% Bonds.-statement to the bondholders follows:

invalid because of the prior state of the art, and that they represented no improvements not covered in earlier patents.—V. 135, p. 4387.

x In Union of South Africa currency. y The 102,000 Brakpan Mines, Ltd., shares offered to shareholders of that company as per circular dated Nov. 28 1932 do not participate in this dividend.

The dividends are declared in the currency of the Union of South Africa, ut the London office will pay on the basis of the equivalent British currency calculated at the rate of exchange ruling on the date fixed for payment of the dividends from the head office. Johannesburg, viz., Jan. 27 1933. Amounts payable in respect of share warrants will be on the same basis irrespective of the date of presentation of coupons.

Warrants dispatched from the London office to persons resident in Great Britain or Northern Ireland will be subject to a deduction of United Kingdom income tax at rates to be arrived at after allowing for relief in respect of Dominion taxes.

The transfer books and register of members will be closed in each case from Jan. 1 to Jan. 7 1933, both days inclusive.

The dividends on the shares included in share warrants will be payable to the persons presenting the relative coupons at Barclays Bank (D. C. & O.), Circus Place, London Wall, London, E. C. 2, on or after Feb. 17 1933. Coupons must be deposited four clear days before being paid, and unless accompanied by Inland Revenue declarations they will be subject to a deduction of United Kingdom income tax as above.—V. 135, p. 4217.

accompanied by Inland Revenue declarations they will be subject to a deduction of United Kingdom income tax as above.—V. 135, p. 4217.

Arlington Apartments, Inc.—Report to Depositors.—
The committee for the protection of the holders of bonds sold through the F. H. Smith Co. (George E. Roosevelt, Chairman), in a notice to the holders of 1st mtge. 6½% bonds, dated Dec. 14, states:

"The Arlington Corp., a corporation organized by the committee, was the successful bidder for the Arlington Apartments property at the foreclosure sale held on Sept. 21 1932. The amount of the bid was \$150,000. The sale has been confirmed by the U. S. District Court for the Western District of Pennsylvania. The committee transferred to the corporation deposited bonds of this issue aggregating \$1,524,300 in principal amount (out of a total of \$1,650,000 in principal amount of the property. The corporation obtained a temporary loan of \$30,000, the proceeds of which, together with the proportion of the cash in the possession of the trustee applicable to deposited bonds, were used to pay the portion of the purchase price payable in cash, including \$21,495 owing on account of delinquent taxes, and the proportionate share of the net proceeds of the foreclosure sale payable to non-depositing bondholders (amounting to 8.77% of the principal amount of their bonds).

"All of the capital stock of the Arlington Corp. has been issued to the committee and is being held by it on behalf of depositing bondholders, whose interests will continue to be represented by the certificates of deposit they now hold. The Arlington Corp. is now operating the property under the direction and supervision of the committee. As soon as a plan of liquidation or reorganization is formulated it will be submitted to depositors for their approval. No plan will become effective if, within 20 days after it is submitted to depositors for more of the principal amount of the deposited bonds of this issue dissent from such plan."—V. 135, p. 1826.

Associated Simmons Hardware Cos

Associated Simmons Hardware Cos.-Co-Trustee Resigns.

To the holders of Associated Simmons Hardware Companies 10-year 6½% gold notes, and to Roy H. Goddard, Louis K. Liggett, Charles S. Sargent, H. Taylor, C. D. Smiley Jr., and Leigh B. Liggett, trustees of the Associated Simmons Hardware Companies:

The First National Bank in St. Louis has resigned as co-trustee under the trust indenture executed by this company under date of June 4 1923, securing its issue of \$10,000,000 10-year 6½% gold notes, said resignation to become effective on Dec. 30.—V. 135, p. 4218.

Atlantic Ice & Coal Co.—Smaller Preferred Dividend.—
The directors have declared a dividend of 2% on the 7½% cum. pref. stock, par \$100 payable Jan. 1 to holders of record Dec. 20. The last regular semi-annual payment of 3¼% was made on July 1 1932.—V. 135, p. 822.

Bendix Aviation Corp.—May Sell Control of British Unit Estimated Earnings, &c.—The "Wall Street Journal" of Dec. 28 states:

Dec. 28 states:

Negotiations are understood to be under way by which this corporation will sell to a well-known British firm a two-thirds interest in its British subsidiary, Bendix-Perrot Brakes, Ltd., of Birmingham, England. The price, which is reported to be for a cash settlement, has been placed at \$300,000.

The move will be brought about in anticipation of increased earnings from this source, inasmuch as Bendix will retain one-third interest in the company but will be relieved of active management and the attending expense of supervision from so remote a point. The English firm will continue to manufacture the greater portion of the Bendix line in that country. The other foreign subsidiary, Stromberg Motor Devices, Ltd., of the same city, is expected to remain as is.

The Bendix Aviation Corp. this year has cut expenses sharply, and its budget for next year will reflect further economies. As a result, according to the present outlook, it can make a profit, or at least break even, next year on the same volume of business which it received in 1932.

The Bendix corporation is also expected to inaugurate a heavy house-cleaning process in the matter of charge-offs before closing its books for the year ending Dec. 31 1932. A good portion of it will be charged to operations, including about \$1,500.000 in depreciation. As a result, the net loss for the year, at the present rate of write-offs, will be between \$600.000 and \$700.000. This would indicate a final quarter deficit of between \$225.000 and \$325,000. For the year ended Dec. 31 1931, the company reported a net profit of \$1,555,478 or 74 cents per share on 2,097,663 shares of capital stock outstanding.

The company's balance sheet probably will make a good showing for the year. Cash since July 1 has been increased \$900,000, bringing total cash and imminently maturing bonds to approximately \$4,000,000.—V. 135, p. 4218.

Bucyrus-Monigham Co.—Smaller Class B Dividend.—
The directors have declared a dividend of 60 cents per share on the class B stock, no par value, payable Jan. 20 to holders of record Jan. 10. A distribution of \$1.10 per share was made on this issue on Jan. 1 1932.
The class B stock, is entitled to receive dividends only after \$1.80 per annum has been paid on the class A stock. Regular quarterly payments of 45 cents per share on the latter stock have been maintained to date.—V. 135, p. 990.

Bush Terminal Buildings Co.—New Director.—
Charles E. Bedford, Vice-President and a director of the Socony Vacuum Corp., has been elected a director.—V. 135, p. 3695, 1659.

Butler Bros., Chicago.—Reduces Par Value of Shares.—
The stockholders on Dec. 28 voted to change the par value of the shares from \$20 to \$10 per share, without changing the number of shares of stock, authorized or issued. The effect of this change will be: (1) To increase the capital surplus of the company; (2) to reduce taxes payable by the company; (3) to reduce transfer taxes payable by stockholders; (4) to restate the asset accounts on a basis more in keeping with current financial and business conditions. See also V. 135, p. 4219.

Canada Bud Breweries, Ltd.—New Director, &c.—
E. G. Long has been elected a director to fill the vacancy created through the death of W. A. MacKenzie.

The regular dividend of 25 cents per share for the quarter has been declared on the outstanding shares, payable Jan. 16 to holders of record Dec. 31. It has already been announced that earnings for the first nine months of the company's fiscal year were sufficient to cover dividends for the entire year.—V. 135, p. 469.

Canadian Car & Foundry Co., Ltd. -Outlook - Direc-

Canadian Car & Foundry Co., Ltd.—Outlook—Directorate Decreased.—

That the current year of this company is likely to prove very lean in point of business was the statement of President W. W. Butler at the annual general meeting held on Dec. 22. The year which ended on Sept. 30 was the worst in the history of the company, stated Mr. Butler. Considerable satisfaction should be derived from the fact that the company had been able to maintain its balance sheet position so liquid, he added. Various economies had been introduced, and efforts were being directed towards a reduction in expenses wherever possible.

The shareholders approved a by-law change reducing the number of the directorate from 15 to 9.

The claim against Germany, heard by the Mixed Claims Commission in Washington, Mr. Butler reported, had been lost. This question, it is expected, will be introduced in the U. S. Senate.

The Canadian General Transit Co.., Ltd., a subsidiary, Mr. Butler said, was doing remarkably well.—V. 135, p. 4220.

Canadian Wirebound Boxes, Ltd.—Dividend Deferred. The directors have decided to defer action on the quarterly dividend due Jan. 1 on the \$1.50 cum. class A partic. shares, no par value. From July 1 1931 to and incl. Oct. 1 1932, quarterly distributions of 25 cents per share as against regular quarterly payments of 37½ cents per share previously.—V. 133, p. 804.

Cartier, Inc.—87½ Cent Preferred Dividend.—
A dividend of 87½ cents per share was recently declared on the 7% cumplative pref. stock, par \$100, payable Jan. 31 to holders of record Jan. 14. A like amount was paid on Oct. 30 1932. Previously, the company made regular quarterly disbursements of \$1.75 per share on this issue.—V. 135, p. 3361.

Checker Cab Mfg. Corp.—Earnings.—
For income statement for nine months ended Sept. 30 see "Earnings Department" on a preceding page.—V. 135, p. 1334.

Chicago Investors' Corp.—Preference and Common Stock Off List.— See Missouri-Kansas Pipe Line Co. below.—V. 134, p. 4389.

City Auto Stamping Co.—Initial Dividend.—
An initial dividend of five cents per share was recently declared on the common stock, no par value, payable Dec. 15 to holders of record Dec. 1.—V. 133, p. 126.

The company has appointed a special committee of its executives to make an immediate study of the brewing field, believing that a large ice company with its manufacturing plants, cold storage space and motor truck distribution routes may be the logical means of handling the beer business of the future.

Should Congress act favorably, this company, which now operates ice services in 26 States and in Canada, may expand its activities to include the manufacture and distribution of beer in the larger cities of its territory. This could be done with a minimum of delay, the company elieves.—
V. 135, p. 3696.

City Investing Co.—Smaller Distribution.—
The directors on Dec. 29 declared a dividend of 1½% on the common stock, par \$100, payable Jan. 16 to holders of record Jan. 10. This compares with a distribution of 2½% made on Jan. 4 and on July 11 1932.—V. 135, p. 633.

Cleveland (Ohio) Hardware Co.—Reorganized.—
The Cleveland (O.) Hardware & Forging Co. has been formed as a reorganization of the Cleveland Hardware Co., manufacturer of forgings. In the reorganization the par value of the stock has been reduced from \$100 to \$20 per share. T. P. Robbins, President and Treasurer of the old company, occupies similar executive positions with the new organization. A. J. Sanford has been elected Vice-President, Secretary, Treasurer and General Manager. Mr. Sanford was formerly connected with the Timken Roller Bearing Co., and later was sales manager of the Timken Steel & Tube Co., Canton, O. Charles E. Adams, Chairman of the board of the old company, holds a similar position with the new organization ("Iron Age").—V. 133, p. 3261.

Cleveland (Ohio) Hardware & Forging Co.—Formed.-See Cleveland Hardware Co. above.

Cleveland Union Stock Yards Co.--Smaller Dividend. The directors have declared a quarterly dividend of 25 cents per share on the common stock, no par value, payable Dec. 31 to holders of record Dec. 24. Previously, the company made quarterly distributions of 37½ cents per share on this issue.—V. 134, p. 1030.

Coen Companies, Inc.—Dividend Resumed.—
A dividend of 20 cents per share has been declared on the class A stock, no par value, payable Jan. 15 to holders of record Dec. 31. Distribution of like amount were made on this issue on April 15 and Oct. 15 1931; none since.—V. 134, p. 139.

Colgate-Palmolive-Peet Co.-Five-Day Week Increases

Working Forces.—

The operating forces of the company at the present time are approximately 7% larger than a year ago. Substantially all of the increase in force resulted from the adoption of the five-day week by the company last June as a means of spreading employment. Although company has no plan for stabilizing employment, the company has given steady and continuous employment to its operating forces over a long period of years. During the past three years and up to the time the company adopted the five-day week, the number of workers employed by the company remained almost stationary.—V. 135, p. 4389.

commercial Finance Corp., Boston.—Defers Div.—
The directors have decided to defer the annual dividend due Jan. 20 on the 7% cum. pref. stock, par \$50. A distribution of 50 cents per share was made a year ago, while in January of each year from 1926 to and incl. 1931 dividends of \$1 per share were paid.—V. 134. p. 139.

Commercial Solvents Corp.—Dividend Dates.—
The semi-annual dividend of 30 cents per share recently declared on the common stock, no par value, is payable Dec. 31 1932 to holders of record Nov. 21 1932. Quarterly distributions of 15 cents per share were made on this issue on March 31 and June 30 1932, as compared with 25 cents per share previously each quarter.—V. 135, p. 4221.

Commonwealth Insurance Corp., Ltd., Los Angeles, Calif.—Initial Distribution.—

Calif.—Initial Distribution.—
An initial semi-annual dividend of 3.425 cents per share has been declared on the Commonwealth Insurance Shares, series C, payable Dec.31.

Construction Materials Corp.—Changes Annual Meet-

ing Date.—
The directors have changed the date of the company's annual stockholders' meeting to March 16 1933 from the first Thursday in February, as heretofore.—V. 135, p. 132.

Consumers Co., Chicago.—Rights Extended.—
The directors have extended until Jan. 1 1934 rights of bearers of voting trust certificate purchase warrants which permit bearer to purchase a voting trust certificate for one share of common stock at \$5. Rights originally expired and became void Jan. 11 1931, but were extended Nov. 14 1930 until Jan. 1 1933.—V. 135, p. 4221.

Continental Motors Corp.—Builds Low-Priced Six.—
President William R. Angell states that this corporation will make ice bid for the 1933 automobile market with two six-culinder cars. Mr. Angell states:
"Both of these sixes will embody the latest refinement in grace and beauty of lines. They will be full-sized in every respect, with ample wheelbase, a surprising amount of room, an abundance of power, exceptional speed and splendid economy.
"There will be many departures in engineering design. Our engineers have not been hampered or held back by precedent or custom. Several of the major features of the cars, which mean comfort and general good performance, will be exclusive with Continental.
"Of greatest interest, doubtless, will be the light six, the model name of which will be announced later. It may set a new low price for six-cylinder cars. In appointments, appearance and performance it will have medium-priced car quality in the low-price field. Its economy will rank with the best.

"The big six to be known by a distinctive trade name later, is to be a

best.

"The big six, to be known by a distinctive trade name later, is to be a luxury car brought down to the bottom rung of the medium-price bracket. In fact, this completely new and beautiful car will replace the De Vaux models of the former Continental-De Vaux line.

"To handle the merchandising of these new sixes," continued Mr. Angell, "we are rapidly developing an adequate dealer organization. The interest displayed by established dealers in all parts of the country is gratifying.

"Of greatest importance, however, are Continental's advantages from the standpoint of plants, plant overhead, manufacturing facilities and manufacturing ability. I am sure that the combination of these factors never has offered the favorable opportunity it does to-day. And it is difficult to see when, if ever, it would occur again if this opportunity were ignored.

ignored.

"These advantages of low overhead give Continental probably the lowest fixed charge in the industry and help to make possible the low prices at which these new cars will be offered.

"Contributing to the high standards of excellence that will be maintained in design and manufacture is the experience of 30 years, during which approximately 3,500,000 Red Seal motors were sold. Continental has built motors for more than 100 passenger car companies; supplies motors for 53% of all truck manufacturers; and furnishes motors to more than 300 agricultural and industrial machinery makers.

"I believe Continental's entry into the low-priced six-cylinder ca ifield is most timely."—V 135, p. 4389.

Corporate Trust Shares.—Semi-Annual Distributions. See Administrative & Research Corp. above.—V. 135, p. 3172.

Corrigan McKinney Steel Co.—Initial Dividend.—
An initial dividend of one cent was recently declared on the common stock, par \$1 payable Dec. 15 to holders of record Dec. 5.—V. 135, p. 2836.

(The) Cunard (Steamship) Co., Ltd.—Defers Divs.—
The directors have resolved, owing to the continued depressed state of trade, to defer payment of the dividends on the 5% cum. preference stock and 6% 2d cum. preference stock due to be made on Jan. 2 next for the half year ended Dec. 31 1932.—V. 135, p. 2659.

Dallas Park Apartments, Miami, Fla.—
S. W. Straus & Co., Inc., in a letter dated Dec. 23 advise holders of the 1st mtge. serial 6½% gold bonds, dated July 8 1924 that up to the present time holders of more than 85% of the bonds have assented to the plan which provides among other things that the owners deposit with 8. W. Straus & Co., Inc. monthly, all net surplus of income after payment of operating expenses. The letter further states:
Operating statements have been received, but through Oct. 31 they have shown no surplus earnings. Low earnings have been due in part to adverse general conditions and in part to the fact that the profits of buildings of this character in Florida are made largely during the winter season which begins during November but does not get into full swing until after Christmas.

begins during November but does not get into tall standard mas.

We have received from the owners the sum of \$7,000, representing, we are informed, surplus from Nov. 1 to date (Dec. 23). Nevertheless, this is insufficient to pay the interest coupons becoming due Dec. 26 1932. However, we are advised by the owners that they are confident of being able to deposit by Jan. 26 1933, the balance of the funds necessary to pay the coupons due Dec. 26 1932. The apparent upturn in earnings for November seems to justify this confidence. There are no delinquent real estate taxes.

We do not believe that the situation would be improved, from the standpoint of the bondholders, by the institution of foreclosure proceedings.

(Alfred) Decker & Cohn, Inc.—Off Curb List.—
The New York Curb Exchange on Dec. 29 announced that it has removed from listing the 100,000 shares of common stock, no par value, of this company because the latter has failed to maintain transfer and registration facilities in New York City.—V. 135, p. 633.

Detroit Aircraft Corp.—Reorganization Approved.—
The stockholders on Dec. 29 approved a plan for reorganization of this company which is in receivership.
Under the plan, a new corporation of the same name will be organized to purchase at a judicial sale the assets of the old company. The new company will have an authorized capital stock of 200,000 shares of \$1 par value, which will be offered in exchange for the old stock in the ratio of one new share for each ten old shares.—See V. 135, p. 4221.

Devonshire Apartments, Ltd., Vancouver, B. C.—Bonds in Default.—
The company has defaulted as to interest, sinking fund and a portion of the principal, due on the outstanding \$350,000 6½% Ist mtge. serial bonds. Western City Co. Ltd. of Vancouver has undertaken the formation of a bondholders' protective committee and is asking bondholders to communicate with their office in Vancouver.

Diamond Electrical Mfg. Co., Ltd.—Omits Dividend.—
The directors have voted to omit the quarterly dividend due Jan. 1 on the 7% conv. pref. stock, par \$100. The last regular quarterly distribution of 1%% was made on this issue on Sept. 30.—V. 135, p. 1661.

Discount Corp. of New York.—Extra Distribution.—
The directors recently declared an extra dividend of \$2 per share in addition to a regular quarterly dividend of \$3 per share, both payable Jan. 3 to holders of record Dec. 31. Previously the company paid quarterly dividends of \$2.50 per share.

An extra of \$1 per share was also paid on Jan. 2 1932.—V. 135, p. 2499.

Dominguez Oil Fields Co.—Larger Dividend.—
The directors have declared a monthly dividend of 15 cents per share on the no par value common stock, payable Jan. 3 to holders of record Dec. 23. Previously the company made regular monthly distributions of 12½ cents per share on this issue. An extra dividend of 25 cents per share was also paid on Dec. 1 1932. Compare V. 135, p. 3861.

Dominion Woollens & Worsteds, Ltd.—Changes Made

Dominion wooliens & worsteds, Ltd.—Changes Made in Plan.—

With one modification of importance, bondholders and preferred and common shareholders have ratified a plan of reorganization submitted to them. Over 60% of bonds outstanding were represented at the bondholders' meeting and all present approved of the plan, as modified. In view of the number of bondholders who sent in certificates but did not attend, the bondholders' meeting was adjourned until a date to be fixed in January next.

The original plan as presented called for the delivery to bondholders, in compensation for compromises on their part of 21,170 shares of new common stock. As shareholders voiced the view that this was too large a block out of capital, the amount was cut in two, and bondholders will receive 10,585 shares. Preferred shareholders who were to receive four shares of common for one preferred share held, will receive three shares for one held, while common shareholders will receive one share of new common for each four shares of old stock held, instead of one share for three as originally planned. With respect to bondholders, the plan calls for deferment of payment of interest, such deferred interest to be made payable in 11 equal annual installments, beginning Dec. 1 1937, together with interest at 6% per annum. The company has the right to pay deferred interest before 1937. The plan release the company from payment of interest, principal or sinking fund payments will become due June 1 1933, to 1936, and increase the sinking fund payment annually of \$67,500 to \$70,000, commencing June 1 1937.— V. 135, p. 4038.

Eastern Steel Products, Ltd.—Sales Off 55%.—

Eastern Steel Products, Ltd.—Sales Off 55%.—
The preliminary balance sheet for the year ended Dec. 1 1932 disclosed that net earnings fell short of the amount necessary to provide depreciation by several thousand dollars. During the year dividends amounting to \$85,706 were paid on the outstanding preferred and common stock. Moneys necessary for these dividends were withdrawn from surplus earned in previous years.

The liquid assets of the company on Dec. 1 stood at approximately \$920,000 against outstanding liabilities of \$100,000, a ratio of slightly over 9 to 1.

After depreciation, fixed assets stand at approximately \$250,000.

over 9 to 1.

After depreciation, fixed assets stand at approximately \$550,000, or about 60% of liquid assets.

Sales for the year were 55% of 1931. During the period under review, \$9,000 of the outstanding preferred stock was purchased and retired. See also V. 135, p. 4389.

Eaton Manufacturing Co.—To Pay Notes.—
The company will pay through the Cleveland Trust Co., an issue of \$750,000 five-year 5½% notes maturing on Feb. 1 next. Holders of the notes may cash them prior to Feb. 1 and receive par plus interest to the date of payment.—V. 135, p. 3862.

Edgewater Beach Apartments.—Protective Committee.—See Bryn Mawr Beach Bldg. Corp. above.—V. 125, p. 2153.

Electric Ferries, Inc.—Obituary.—
Carroll Dana Winslow, President and Treasurer, died on Dec. 27 in New York City.—V. 135, p. 825.

Enamel Products Co. - Smaller Distribution .-

A distribution of one cent per share has been declared on the common stock, no par value, payable Dec. 31 to holders of record Dec. 30. This compares with five cents per share paid on Dec. 31 1931 and 50 cents per share on Oct. 1 1929.—V. 134. p. 140.

Equitable Mtge. & Title Guarantee Co.—Resumes Div. A dividend of 50 cents per share was paid on the capital stock, par \$10. on Nov. 15 1932 to holders of record Nov. 16. This compares with a semi-annual dividend of 25 cents per share and an extra dividend of 25 cents per share paid on Dec. 1 1931; none since.—V. 135, p. 135.

Euclid Gardens Apartments. -Bond Extension Planned .-

Extension for five years of the bonds is proposed by the bondholders' protective committee formed for the protection of holders of bonds sold through the Woodlawn Trust & Savings Bank. Interest due Jan. 2 has been deposited with the committee and will be paid to depositing bondholders. The issue was for \$147.500, but has been reduced through prepayments to \$114,500. Harvey C. Vernon is chairman of the committee and Martin C. Haedtler is secretary.

"This committee feels that it is advisable to arrange an extension of the loan and to reorganize it to fit present-day conditions," says Mr. Haedtler. "It will be necessary to have concerted action of all bondholders to achieve this result. The owner assures us that interest due Jan. 2 1933, will be paid when and as the bonds are deposited and has deposited with us funds so that we are able to pay this interest now.

"A reorganization plan has been agreed upon between the committee and the owner of the property. We have made an independent investigation and are very pleased to submit this plan to bondholders, as we feel it to be an excellent one.

"The bonds are to be extended for five years. The interest due Jan. 2 1933, is to be paid. Interest for the extended period is to be at 5% per

annum. Sinking-fund payments are to be \$1,000 the second year, \$2,000 the third year and \$2,000 the fourth year, and are to be used to purchase bonds at the lowest prices obtainable. Monthly instalments are to be deposited under the committee's direction for the payment of interest. All taxes are paid excepting one-half of 1930 taxes, which are to be paid or secured by a deposit with the committee. The owner agrees to submit to us \$4,500 of bonds for cancellation when the plan becomes effective. This will materailly improve the security."

Evans Products Co., Inc.—Earnings.—

49 West 37th St. Realty Co.-Reorganization Plan Declared Operative.

George T. Purves of Graham, Parsons & Co, chairman of the bond-holders' protective committee, representing holders of the 1st mtge. 6% sinking fund bonds announces that the plan and agreement of reorganization dated Aug. 30 1932, has been declared operative by the committee and is effective immediately. More than 93% of the outstanding bonds have already been deposited with the committee.

The time limit for the deposit of the remainder of the outstanding bonds has been extended until Jan. 6 1933. The Pennsylvania Co. for Insurances on Lives and Granting of Annuities, Philadelphia, is depositary for the committee.

In addition to Mr. Purves, the committee comprises Howard B. Brown, of Pitcairn Co., F. Eugene Newbold, of W. H. Newbold's Son & Co., and Herbert S. Welsh, of Welsh Brothers, W. P. Armstrong Jr., of 48 Wall St., is Secretary. See plan in V. 135, p. 1663.

St., is Secretary. See plan in V. 135, p. 1663.

(Robert) Gair Co., Inc.—Creates Sales Divisions.—

To meet the demand of present-day conditions for greater specialization in production and sales, the company has created three major divisions to handle its production and selling of boxboards, containers and folding cartons, according to an announcement by President E. Victor Donaldson.

The boxboard division will be headed by Robert H. Bursch, who will have charge of both manufacturing and sales. Boxboard is produced by this company in their mills at Piermont and Tonawanda, N. Y.; New London, Conn.; Haverhill and Medford, Mass.; Bogota, N. J., and Quincy, Ill.

L. H. Gaetz will continue in charge of production of the folding carton division.

L. H. Gaetz will continue in charge of production division.

F. S. Wakeman has been appointed General Sales Manager for the folding carton division. He will continue in charge of the New York sales department.

F. G. Becker has been appointed General Manager of the container group of Gair plants at New London and Shelton, Conn.; Medford, Mass.; Bogota, N. J., and Providence, R. I. Mr. Donaldson also announced the appointment of Chase Flint as General Sales Manager of the container division. Both Mr. Becker and Mr. Flint were formerly associated with the Container Corp. of America in executive capacities.—V. 135, p. 2660.

the Container Corp. of America in executive capacities.—V. 135, p. 2660.

General Electric Co.—Incandescent Lamp Sales in 1932.

A preliminary estimate of the number of incandescent lamps sold in the United States during 1932 indicates a total of 546,600,000 for both large and miniature lamps, according to a review of the electrical industry by John Liston in the General "Electric Review" for January.

This quantity includes 330,800,000 large lamps with metal filaments and 214,600,000 miniature lamps with metal filaments. The use of carbon-filament lamps, as in previous years, continues to decrease. The total of these, both large and miniature bulbs, is estimated to be 1,200,000—about one-third the total for 1931.

An outstanding development in the design of higher-wattage lamps is a "bi-post," type of construction. This is at present used on 5,000-watt studio and floodlighting lamps, and on 1,000-watt airway-beacon lamps. A number of new lamps were developed for various applications, including a new line for household use, with a low price range. Among the outstanding developments are the photoflood lamp for home motion picture photography, a pyrometer lamp for measuring industrial furnace temperatures, and a new, three-filmaent lamp for automobile headlights.—V. 135, p. 4222.

General Surety Co.—To Discolus

General Surety Co.—To Dissolve.—

Plans for dissolving the company were announced Dec. 29 by the directors. The New York State Insurance Department will be asked to undertake the liquidation.

Since its retirement from active underwriting on Dec. 31 1930, the company has reduced its premium reserves to \$32,351, of which \$6,101 represents general lines and \$26,250 secured guarantees having from five to seven years to run. Its loss reserves, including claims incurred but not reported, are under \$6,500.

The proposed application for voluntary liquidation and dissolution has just been approved by its directors. Upon final disposal of all outstanding guaranties the corporation will be liquidated for the benefit of its stockholders.—V. 132, p. 860.

Georgia Hotel Co., Ltd.—To Vote on Plan.—
Bondholders will meet Jan. 4 at Vancouver office of Montreal Trust Co.
to consider a plan for modification of the trust deed to permit reduced
interest charges for a limited period.
It is proposed to exchange present first mortgage serial bonds for new
6% first mortgage sinking fund bonds maturing June 1 1947. The new
bonds would have minimum interest requirements of 4% and if earnings
should be sufficient, would pay 6%. In any year when less than 6%
is paid, the difference between the amount paid and the coupon rate will
accumulate for later payment. All interest and principal will be payable
in United States funds.—V. 135, p. 4391.

(S. A.) Gerrard Co., Cincinnati.—Receivership.

(S. A.) Gerrard Co., Cincinnati.—Receivership.—
On petition of a noteholder, the company was placed in receivership on Dec. 27 by the U. S. District Court at Cincinnati. W. E. Kiplinger, President of Abrens-Fox Fire Engine Co., has been appointed receiver.
John H. Barr, the petitioning noteholder, who also is Secretary and Treasurer of the company, alleges the company has defaulted in interest payment on a note which he holds for \$115,000. He states that the company is solvent, but has insufficient working capital.
The company, founded in 1884 by S. A. Gerrard, finances growers in California and several other Western States besides operating large fruit groves and vegetable farms.—V. 131, p. 1104.

Gillette Safety Razor Co.—Patent Infringement Alleged—
A suit was filed in Federal Court at Wilmington. Del. by Julian W. Fretwell, hardware store employee of Danville, Va., against Gillette Safety Razor Co., charging infringement of a patent for safety razor and razor blade. Although the bill did not disclose the type of blade involved, Mr. Fretwell said the patent was granted him in 1923. He charged that

he once offered to sell his patent to the company, which refused it and then infringed on the patent.

The bill, which charged the Gillette company has made \$50,000,000 in trade and profits from the patent, asked an injunction, triple damages and called upon the court to establish the amount of damages. (Boston "News Bureau").—V. 135, p. 4222.

Goderich (Ont.) Elevator & Transit Co., Ltd.-25c. Dividend .-

A dividend.—

A dividend of 25 cents per share has been declared on the no par common stock, payable Jan. 2 to holders of record Dec. 15. This compares with quarterly dividends of 35 cents per share paid on this issue from July 1 1928 to and incl. July 1 1932.

President G. L. Parsons, in a letter which will accompany the dividend checks, will say:

"On account of a combination of conditions, peculiar to the grain trade of Canada and the United States during the year, the ordinary movement of grain has been materially restricted, with the result that there is an unusual carryover awaiting disposition. The suspense in anticipating what may be the outcome of the preferential proposal regarding the Empire movement of Canadian grain, as also the premiums asked by Western farmers on account of prevailing low prices, restricted the usual fall movement of grain to Lake and Bay ports for winter distribution. Consequently the directors have deemed it advisable to pay not more than 25 cents per share dividend, thus to avoid impairing our capital surplus.

"The directorate has been greatly strengthened by the election of Norman M. Paterson of the N. M. Paterson Grain & Steamship Companies of Fort William, Ont., and C. Gordon Smith of the Reliance Grain Co. of Winnipeg as new members of the board. Their joint experience in the various details of handling grain will prove a decided acquisition to the affairs of this company "

Gray & Dudley Co.—Dividend Deferred.—

Gray & Dudley Co.—Dividend Deferred.—
The directors have voted to defer the quarterly dividend due Jan. 1 on the 7% cum. pref. stock, par \$100. The last regular quarterly payment of 1%% was made on Oct. 1 1632.—V. 133, p. 4337, 2274.

(B.) Greening Wire Co., Ltd.—Defers Dividend.—
The directors recently voted to suspend dividends on the 7% cum. red. pref. stock, par \$100. The last regular quarterly dividend of 1%% was paid on Oct. 1.—V. 121, p. 1232.

Grigsby-Grunow Co.—Refrigerator Orders Up.—
The company will begin its 1933 refrigerator season with four times as many unfilled orders on file for scheduled shipment to distributors as at any similar time since the company has manufactured refrigerators. according to John F. Ditzell, Assistant Vice-President in charge of refrigeration. "During January 1933, we expect to call back approximately 2,000 employees to our refrigeration division," he said.

"Shipments of refrigerators during October and November, and up to Dec. 20, were three times larger than the same period of 1931," Mr. Ditzell stated. "Sales to consumers by our distributors in New York and Chicago during the past three months are double those of the same period a year ago, largely for installation in apartment houses.

"Inventories of refrigerators-in hands of distributors on Dec. 22 were less than one-third of the number on hand on the same date last year. When it is realized that in 1931 we had only three models of refrigerators compared with 14 models in 1932, it can be seen just how low our distributors inventories are."—V. 135, p. 2839.

Hawaiian Pineapple Co., Ltd.—Plan Ratified.—
The stockholders on Dec. 29 confirmed the recommendations of the directors that transfer of all assets be made to a new corporation which will be known hereafter as Hawaiian Pineapple Co., Ltd., in order to effect a financial reorganization. See details in V. 135, p. 3864.

Hercules Powder Co.—Elects New Directors.—
Two new directors were elected to the board of directors on Dec. 28. The new members are: A. B. Nixon, general manager of the company's cellulose products department; and P. B. Stull, general manager of the Virginia cellulose department.

The creation of two new members brings the number of directors to 14 and allows for the complete representation of each major department of the company on the board. All of the directors are active executives in the company. According to R. H. Dunham, President of the company and Chairman of the board, the additional representation is in line with the company's policy of having a working directorate, intimately acquainted with departmental problems and personnel.

A. B. Nixon has been general manager of the cellulose products department since 1928 and was formerly in charge of the company's nitrocelulose plant at Gillespie, N. J. Mr. Stull has been general manager of the Virginia cellulose Co. of Hopewell, Virginia, which was acquired by Hercules in 1926.

The board of directors is now composed of: R. H. Dunham, President:

Cellulose Co. of Hopewell, Virginia, Which was acquired by 1926.
The board of directors is now composed of: R. H. Dunham, President; C. A. Higgins, J. T. Skelly, T. W. Bacchus, C. D. Prickett, N. P. Rood, G. G. Rheuby, Vice-Pres.; L. N. Bent, C. A. Bigelow, C. C. Hoopes, G. M. Norman, W. J. Lawrence, A. B. Nixon and P. B. Stull.—V. 135. p. 4223.

Hershey Chocolate Corp.—Extra Preferred Dividend-Smaller Common Distribution.—

Smaller Common Distribution.—

The directors have declared the following dividends for payment Feb. 15 to holders of record Jan. 25: The regular quarterly dividend of \$1 a share and an extra dividend of \$1 a share on the conv. preference stock. Under the provisions of the articles of incorporation, before any dividends may be declared and paid on the common stock in any year, an extra dividend of \$1 a share must be declared, set aside and paid on the conv. preference stock.

An extra distribution of \$1 a share was made on the conv. preference stock on Feb. 15 1930, 1931, and 1932. From Feb. 15 1930 to and incl. Nov. 15 1931 the company made regular quarterly payments of \$1.25 a share on the common stock, while during 1932 quarterly distributions of \$1.50 per share were made on the latter issue.—V. 135, p. 3006.

Honolulu Oil Corp., Ltd.—Resumes Dividend.—
A quarterly dividend of 25 cents per share has been declared on the outstanding 944.900 shares of capital stock, no par value, payable Jan. 15 to holders of record Jan. 5. The last quarterly distribution of 50 cents per share was made on March 16 1931; none since.—V. 134, p. 1772.

Honolulu Plantation Co.—Extra Dividend.—
The directors have declared an extra dividend of \$1 per share in addition the regular monthly dividend of 25 cents per share on the capital stock, ir \$25, payable Jan. 10 to holders of record Dec. 22. Extras of \$2 per are were paid in December 1929, 1930 and 1931, an extra of \$1.50 per

share in December 1928 and an extra of \$1 per share in December 1927.-V. 135, p. 1831.

Horn & Hardart Co.—Resumes Quarterly Payment.—
A quarterly dividend of 50 cents per share has been declared on the common stock, no par value, payable Feb. 1 to holders of record Jan. 12. This compares with quarterly distributions of 62½ cents per share made from May 1 1929 to and incl. Nov. 1 1932. V. 134, p. 3647.

This compares with quarterly distributions of 62½ cents per share made from May 1 1929 to and incl. Nov. 1 1932. V. 134, p. 3647.

Hotel Pierre, Inc.—Plan Operative.—

The plan of reorganization dated June 1 1932 has been declared effective. Subscription to the income bonds of the new company referred to in the plan aggregate \$194.000. Under the agreement dated May 16 1931 with Gerry Estates, Inc. (lessor under ground lease to hotel premises) forming the basis for the plan, it was provided that the plan should not be declared effective unless and until subscriptions to the income bonds of the new company were received up to the sum of \$600.000. However, Gerry Estates, Inc., has agreed, provided that all of the terms and provisions of the agreement of May 16 1931 are met, to subscribe \$406.000 of income bonds of the new company to make up the required minimum sum of \$600,000. Therefore, as sufficient funds are available to consummate the plan, the committee has declared the plan effective, subject, however, to the right of the committee to modify the plan or abandon the same, as provided in the bondholders' deposit agreement dated as of July 15 1931.

Upon completion of the foreclosure proceedings and other legal steps necessary to carry out the plan, the securities of the new company will be available for delivery to those participating in the plan.

While the time for deposit of bonds under the plan has expired, the committee under the powers conferred by the deposit agreement will accept bonds for a limited period. Accordingly all bondholders who have not deposited their bonds are urged to send them at once to the depositary. Continental Bank & Trust Co., 30 Broad St., New York, N. Y. Compare plan in V. 134, p. 4504.

The property is to be sold at foreclosure Jan. 12 next. The auction is to satisfy a judgment of \$6,847,768 obtained by Continental Bank & Trust Co., as trustee. Joseph P. Day will conduct the sale, which is to be held in the Vesey Street salesrooms, under the direction of Stanley L. Richter, referee.—V. 134, p. 4504.

Hicther, reteree.—v. 154, p. 4504.

Hutchinson Sugar Plantation Co.—Resumes Dividend.

A dividend of 45 cents per share has been declared on the capital stock, par \$15, payable Jan. 5 to holders of record Dec. 31.

From December 1924 to and incl. April 1926, quarterly dividends of 10 cents per share were paid; none since.—V. 135, p. 1831.

Huyler's of Delaware, Inc.—Plan of Readjustment—Modification of Guaranty of 7% Cumulative Preferred Stock.—The committee in a letter dated Dec. 19 to holders of 7% preferred stock stated in substance:

The committee in a letter dated Dec. 19 to holders of 7% preferred stock stated in substance:

The preferred stockholders' committee, acting on behalf of those preferred stockholders who have deposited their preferred stock as well as on behalf of those preferred stockholders who may deposit their stock, advises that it has approved a plan of readjustment which it recommends to the preferred stockholders for adoption.

Since the organization of the committee in October last, it has examined the affairs of Huylers' of Delaware, Inc., as well as the affairs of Schulte Retail Stores Corp., the guarantor on the preferred stock. As the result of such examination and because of the present general business conditions, the committee recommends at d approves of the plan of readjustment which it has negotiated with Schulte Retail Stores Corp. and which is now contained in a written proposal made by Schulte Retail Stores Corp. dated Dec. 16 1932. The proposal contemplates a modification of the guatantee agreement dated March 1 1927 between Schulte Retail Stores Corp., Huyler's of Delaware, Inc., and others, upon the following terms and conditions:

(1) In respect of the dividends payable on the preferred stock of Huyler's of Delaware, Inc., during the five calendar years commencing on Jan. 1 1933 and ending on Dec. 31 1937, Schulte Retail Stores Corp., as guarantor, shall be obligated to make good and (or) pay on all preferred stock of Huyler's of Delaware, Inc., deposited under the preferred stockholders' agreement and which shall become bound by said modification plan, only the amount by which the quarterly dividends declared and set aside for payment on the 7% cumulative preferred stock of Huyler's of Delaware, Inc., upon any quarterly dividend date shall be less than at the rate of 4% per annum is stead of at the rate of 7% per annum.

(2) The holders of any and all shares of the preferred stock of Huyler's of Delaware, Inc., which shall have been irrevocably deposited under the deposit agreement and shall have been

entitled to \$\%\circ\ arrangements cumulative from any conjugate such option.

In the event that Schulte Retail Stores Corp. shall convert its said preferred stock at any time prior to the date of exercising such option into the same or a greater or lesser number of shares of stock, or if, as the result of the merger or consolidation of Schulte Retail Stores Corp. into or with any other corporation, said preferred stock is converted into or exchanged for stock and (or) securities of another corporation, the said option shall apply to said converted stock and (or) other securities issued

on such conversion or exchange upon the same basis or ratio as such conversion or exchange shall have been made.

(3) Schulte Retail Stores Corp. shall pay committee's compensation as well as all of its expenses. Consequently, no assessment will be made against the depositing preferred stockholders nor shall any charge or lien be imposed with respect to any of the deposited preferred stock, on account of committee's compensation and expenses.

(4) The plan of reduction of guarantee shall become operative when such an amount of preferred stock of Huyler's of Delaware, Inc., shall have been deposited with the depositary as shall be acceptable to the preferred stockholders' committee and to Schulte Retail Stores Corp.

(5) Upon plan being declared operative, the certificates for the shares of stock so deposited shall be aproppriately stamped so as to evidence the reduction of the guarantee of Schulte Retail Stores Corp.

(6) Provisions are also made for the resignation of the officers and directors of Huyler's of Delaware, Inc., in case of default by Schulte-Retail Stores Corp. and for the election of their successors to be nominated by the preferred stockholders' committee.

Inasmuch as committee has approved of the plan of readjustment, stockholders are advised that pursuant to Article Seventh of the preferred stockholders are advised that pursuant to Article Seventh of the preferred stockholders are advised that pursuant to seventh of the preferred stockholders are motice of his dissent therefrom, specifying the number or numbers of the certificate or certificates of deposit held by him and the number of shares of preferred stock represented thereby.

Since it is desirable that the greatest possible number of preferred stockholders approve and adopt the plan of readjustment, and, emphasizing the importance of united action, the committee urges that all persons who have not already deposited their preferred stock with the committee of soin mediately, and in any event not later than Jan. 3 1933. All preferred sto

Inland Mortgage Corp.—Bonds Offered.—Stern Brothers & Co., Kansas City, Mo., are offering at 100 and int. \$200,000 1st lien 6% collateral trust bonds.—

Denom. \$100, \$500 and \$1,000. First National Bank of Kansas City, Mo., trustee.

Sinking Fund.—A sinking fund, consisting of 60% of the net receipts of the corporation commences operation June 1 1933, and is to be used for the purchase of bonds at not in excess of the current redemption price and accrued interest, or the retirement of bonds through call by lot at that price.

Capitalization—

First lien 6% coll. trust bonds (this issue)—\$250,000 \$200,000 6% cum. pref. stock (\$100 par)—250,000 200,000 Common stock (no par value)—\$25,000 shs. 22,500 shs.

A private syndicate, organized by Stern Brothers & Co., has ubscribed and paid for, at \$100 per share, the entire \$200,000 of 6% cum. pref. stock (with a portion of the common stock) outstanding junior to this issue of bonds.

Corporation.—The corporation owns \$723,500 of first purchase money

A private syndicate, organized by Stern Brothers & Co., has subscribed and paid for, at \$100 per share, the entire \$200,000 of 6% cum. pref. stock (with a portion of the common stock) outstanding junior to this issue of bonds.

Corporation.—The corporation owns \$723,500 of first purchase money mortgages, secured by direct and separate first mortgage liens on 214 improved farms comprising about \$50,000 acres of farm land, located principally in the States of Missouri and Kansas.

These mortgages were created by the re-sale of farms obtained through foreclosure proceedings. Approximately 70% of such sales were mortgages and such sales were made during 1930, 1931 and 1932 at prices reflecting the drastic deflation of farm land values during those years, and about \$300,000 of the mortgages arose from such sales completed since Jan. 1 1932.

The aggregate sales price of the farms securing the mortgages was \$1,245,-184, equivalent to an average of about \$25 per acre. Of this amount, more than \$400,000 was paid in cash initially, or through subsequent principal maturities, and in many instances substantial improvements to the properties have been made or are now under way by the new owners.

The mortgages are now outstanding in the average amount of approximately \$14.50 per acre, equivalent to less than 60% of the sales price. In 155 instances where direct comparisons are available, the present loans average less than 34% of the original Land Bank loans made against the properties.

Security.—Secured through the initial pledge with the trustee of \$300,124 principal amount of first mortgages selected from the \$723,500 of mortgages owned, the pledged collateral to be maintained at all times in an amount equivalent to 150% of the outstanding bonds. Corporation holds guaranty title policies issued in connection with each mortgage by Kansas City Title & Trust Co.

The specific collateral pledged with the trustee comprises \$300,124 principal amount of mortgages covering more than 23,500 acres of improved farm land, and outs

Pro Forma Balance Sheet as at Dec. 1 1932. *\$813,999 Total__ * Real estate 2d mtge. notes aggregating \$88,044 outstanding are carried at no value. a Outstanding \$22,500 shares at stated value of \$1 per share.

Insurance Building Corp., Boston.—Div. Omitted.—
The directors recently voted to omit the quarterly dividend of 50 cents per share due Nov. 1 on the 7% pref. stock. par \$100. Quarterly distributions at this rate were made from May 1 1928 to and incl. Aug. 1 1932.—V. 126, p. 2156.

International Match Corp.—Suit Dismissal Asked.—
Frederick W. Allen and seven other directors of the company filed a motion Dec. 29 in the New York Supreme Court asking dismissal of the accounting proceeding brought against them by the Irving Frust Co. as trustee in bankruptcy. The complaint asks for an accounting of \$250.00.000.00. The defendants base their motion on the contention that the complaint fails to state a cause of action. As an alternative, in case the court refuses to dismiss the action, the defendants ask that the complaint be so amended as to have it separately state the different causes of action combined in the present complaint.

Damages aggregating \$249.981.000 were asked of the directors in a suit filed in Supreme Court of New York on Dec. 28 by Irving Frust Co. as trustee in bankruptcy for late Ivar Kreuger's concern. The bank also

filed suit for accounting of \$100,000,000 alleged to have been wrongfully paid by company in various mergers, and charged directors with "misfeasance and non-feasance." The directors named and damages asked of each are: Frederic W. Allen, \$36,258,000; Donald Durant, \$35,788,000; Henry O. Havemeyer, \$27,877,000; Francis L. Higginson, \$21,073,000; Adrian H. Larkin, \$34,595,000; John McHugh, \$34,377,000; Samuel F. Pryor, \$28,587,000, and Percy A. Rockefeller, \$31,416,000.-V.135, p. 4392.

Johnson Publishing Co.—Dividend Omission.—
The directors recently voted to omit the quarterly dividend ordinarily payable about Jan. 1 on the common stock, par \$10. Distributions of 12½ cents per share were made on April 1, July 1, and Oct. 1 last, as compared with 25 cents per share a year ago.—V. 134, p. 2734.

The directors recently voted to omit the quarterly dividend ordinarily payable about Jan. 1 on the common stock, par \$10. Distributions of 12% cents per share were made on April 1, July 1, and Oct. 1 last, as compared with 25 cents per share a year ago.—V. 134, p. 2734.

Julian & Kokenge Co.—Resumes Dividend.—

A dividend of 5 cents per share has been declared on the common stock, no par value, payable in January.

A distribution of 25 cents per share was made on the above issue on Feb. 1, May 1 and Aug. 1 1931. as compared with 43% cents each quarter from Nov. 1 1928 to and incl. Nov. 1 1930.—V. 134, p. 2921.

Kelly-Springfield Tire Co.—New Securities Ready—Capital Readjustment Plan Completed.—

New securities provided for in the capital readjustment plan will be apportioned and ready for delivery to certificate holders on and after Jan. 3. Certificates of deposit will be exchanged at the principal office of the depositary, Central Hanover Bank & Trust Co., 70 Broadway, New York. W. H. Lalley, President, states:

The capital readjustment has been completed without any new financing, and has given the company an outstanding balance sheet. The following results have been obtained by the readjustment:

1. Elimination of approximately a \$10,000,000 deficit.

2. Elimination of approximately a \$10,000,000 deficit.

2. Elimination of arry 1000 per year, interest on 10-year 6% notes.

The constitution of 177,000 per year, interest on 10-year 6% notes.

The capital readjustment plan to 1832 was 15 to 1. Statement of operations for the first six months of the current year showed a profit of \$57,101 after all charges including interest requirements for the new 10-year 6% notes.

The constitution and administration, begun in May 1931, have been continued during 1932, so that the cost of operations in manufacturing, sales, distribution and administration, and in all other deprenaments have been brought to the lowest level in the company's history.

x Less depreciation.—V. 135, p. 2182. Knapp-Monarch Co., St. Louis.—Resumes Dividend.—A dividend of 50 cents per share has been declared on the common stock, no par value, payable Dec. 28 to holders of record Dec. 23. The company paid distributions of like amount on Feb. 1 and Dec. 23 1930; none since.—V. 131, p. 4062.

(S. H.) Kress & Co.—Offers to Purchase \$500,000 of Special Preferred Stock.—

The directors have authorized purchase of not exceeding 50,000 shares of special pref. stock at par (\$10 a share). Stockholders desiring to dispose of their shares must deposit them with the Lawyers Trust Co. of New York on or before Jan. 23 1933.—V. 135, p. 4042.

Kreuger & Toll Co.—Must File Claims.—
American investors who hold debentures of the company were warned Dec. 28 in a public statement by Henry K. Davis, Federal referee, that the actual debentures, instead of photostatic copies, must be filed with

claims against the bankrupt and that Feb. 6 next is the latest date on which proofs of claim may be completed.

According to the referee, those who have filed their claims with him at 140 Nassau St., New York, should send their debentures to him also. Those who have deposited their claim with a creditors' committee should send their debentures to that committee likewise.

Referee Davis said the warning was given partly because the debentures were still traded on exchanges, and might fall into the hands of persons who did not recognize that they formed the bases of claims to share in the Kreuger & Toll assets only if filed in due time.—V. 135, p. 3701.

Lancaster Mills.—Liquidating Dividend.—
Aliquidating dividend of \$4.16 per share on the 16.810 shares of preferred stock outstarding, payable to stockholders of record Nov. 23, has been declared by Lancaster Mills, Clinton, Mass., closed a few years ago. The company has \$69.930 cash on hand after dischargir g all liabilities and liquidating all assets, and this is being paid to preferred shareholders, there being no balance for the common stock.
Filing of a claim for refund of Federal income taxes has been authorized by the directors, but they say prosecution of the claim may require several years, and in any e.e t will hot exceed about 50 cents per share of pref. stock. The company will be dissolved. At present part of the mills is occupied by the Colonial Printing Co., which is understood to have given an option on the remainder of the plant to a group of men planning to operate a brewery there when and if a beer bill is passed—("Journal of Commerce").—V. 133. p. 1936.

Lehigh Valley Coal Co.—Extends Time for Deposit of Bonds—Deposits to Date Over 80% of Issue Outstanding.—

Bonds—Deposits to Date Over 80% of Issue Outstanding.—

Extension of time from Dec. 24 to Dec. 31 for deposit of 1st mtge. 4% and 5% gold bonds, which mature Jan. 1 1933, is announced Dec. 27 in a joint statement by the Coal company and by the Lehigh Valley RR., guarantor of the bonds. The statement discloses also that to date over 80% of the \$8.684.000 bonds outstanding have been deposited under the plan, which provides for payment of \$500 in cash and \$500 in five-year 6% gold notes of the Coal company, guaranteed by the Railroad company, for each \$1.000 of 1st mtge. bonds.

Initial announcement of the plan was made early in the current month, statement by the Coal company and the Railroad company at that time pointing out that because of conditions now prevailing it is not possible to provide in the usual manner for maturity of the bonds. For the purposes of the plan, the Reconstruction Finance Corporation has authorized a loan of \$2.000.000 which will be available if sufficient bonds are deposited. Interest on the bonds due Jan. 1 1933 is being paid to each depositing bondholder at the time of deposit. Drexel & Co., Philadelphia, and J. P. Morgan & Co., New York, are depositaries for the bonds, and the E. P. Wilbur Trust Co., Bethlehem, Pa., is sub-depositary. The certificates of deposit for the bonds have been listed on the New York Stock Exchange.—V. 135, p. 4393.

Lehn & Fink Products Co.—Listing of Common Stock

Lehn & Fink Products Co.—Listing of Common Stock (\$5 Par)—Value of Trade-Marks, &c., Reduced to \$1—Changes in Surplus.—

The New York Stock Exchange has authorized the listing of certificates for 419,166 shares of common stock (par \$5 per share) upon official notice of issuance, in exchange for certificates of common stock without par value now outstanding and listed.

The stockholders at a meeting held Dec. 28 approved a plan to create an appropriation of surplus for the purpose of reducing the item carried on the consolidated balance sheet of the company under the title "trade marks, trade names, &c." at \$7,968,540 to \$1. Stockholders also approved (a) the amendment of the certificate of incorp., as amended, changing authorized capital stock, consisting of 1,000,000 shs. (no par) into 1,000,000 shs (par \$5); and (b) the reduction of the capital of the corporation from \$7,-311,953 to \$2,095,830, by the exchange of the present outstanding stock, consisting of 419,166 shares (par \$5). The proposed reduction of capital and amendment of the certificate of incorporation will substitute in the balance sheet of the corporation a stautory capital of \$2,095,830 and an earned surplus, as of Oct. 31 1932 of \$2,2526,187 in place of the present statutory capital of \$7,311,953, initial surplus of \$1,590,000 and earned surplus of \$3,288,603.

For income statement for 10 months ended Oct. 31 1932 see "Earnings Department" on a preceding page.

(Louis K.) Liggett Co.—Rent Reduction Proposals.—

Holders of about one-third of the value of L. K. Liggett Co. leaseholds represented by replies received thus far by the Liggett Landlords' Protective Committee have agreed to adopt the committee's plan of cutting rentals 25% for the year 1933. according to Roland Morris, Chairman. The plan calls for a reduction for one year, based upon the amount of rent received in 1931. It was decided at a meeting of the committee with New York landlords, Dec. 28, renting to the Liggett company that Mr. Morris, with the help of W. J. Demorest of the Real Estate Board of New York City, should appoint representatives from the New York group to work with the committee.

J. Solis-Cohen, Secretary of the committee, told the meeting that of the 555 landlords leasing to the company, 134 have agreed to the plan, 87 are considering it further, and 23, less than 10% of those heard from, have refused to consider a reduction.—V. 135, p. 4042.

McCrory Stores Co.—Defers Dividend Action.—The

McCrory Stores Co.—Defers Dividend Action.—The directors on Dec. 29 decided to defer action on the quarterly dividend due Feb. 1 1933 on the \$6 cum. pref. stock, no par value, until more definite results as to the year's operations are known. The last regular quarterly payment of \$1.50 per share was made on this issue on Nov. 1 1932.—V. 135, p. 4042.

Madison Square Garden Corp.—Earnings.—
For income statement for 3 and 6 months ended Nov. 30 see "Earnings epartment" on a preceding page.—V. 135. p. 2841.

Massachusetts Investors Trust.—New Member of Board. Charles Francis Adams, Secretary of the Navy, has been elected a member of the advisory board.—V. 135, p. 4393.

Mead Corp.—Acquisition, &c.—
The corporation has acquired a controlling interest in the Dillon Collins Co., Philadelphia, Pa., manufacturer of high-grade book and coated papers. The company, which has been in receivership, will be known hereafter as Dillon Collins, Inc. Grellett Collins will remain as President. The executive offices of the Mead Corp. will be moved in May 1933 from Dayton to Chillicothe, where the corporation's largest mill is located. The move will effect further economies in operations.—V. 135, p. 1503.

Metropolitan Ice Co.—Smaller Extra Dividend.—

The directors have declared an extra dividend of 10 cents per share in addition to the regular quarterly dividend of \$1.75 per share on the pref. stock both payable Jan. 3 to holders of record Dec. 22. Previously the company made an extra distribution of 30 cents per share each quarter.—V. 135, p. 998.

Mills Trust of Chicago.—Bondholders' Committee.—
The committee for the 1st mtge. collateral 5½% gold bonds (series A) consists of the following:
Walter H. Andersen, Chairman (Arthur Andersen & Co.), Chicago;
W. W. Armstrong (W. W. Armstrong Co.), Aurora; Julian B. Baird (First Securities Corp.), St. Paul; Gilbert Scribner (Winston & Co.), Chicago;
Lawrerce Stern (Lawrence Stern & Co.), Chicago, Horace Towner,
Sec.. 231 South La Salle St., Chicago, Sonnenschein, Berkson, Lautmann,
Levirson & Morse, Chicago, Counsel. Continental Illinois Bank & Trust
Co., Chicago, depositary.—V. 135, p. 4393.

Co., Chicago, depositary.—V. 135, p. 4393.

Missouri-Kansas Pipe Line Co.—Stock Off List.—
The Governing Committee of the Chicago Stock Exchange Dec. 20 approved the removal from the list of:

(1) Common stock of Missouri-Kansas Pipe Line Co. because of discontinuance of Chicago transfer agent and registrar.

2. Cumulative preferred stock of Penn Central Light & Power Co. because of discontinuance of Chicago transfer agent and registrar.

3. 5% secured gold notes due Dec. 1 1932, of Toledo Light & Power Co. because of maturity.

4. Ten year 6½% gold debenture bonds of Southwest Dairy Products Co. because of withdrawal from the market of sufficient bonds to afford a free market, and also the common stock of this company because of failure to file financial statements, as required by the Exchange.

5. The convertible preference and common stock of the Chicago Investors' Corp. because its separate corporate existence terminated with the merger of this corporation with the Continential Chicago Corp. into a merger corporation known as Chicago Corp.

President Parish Indicted in Row Over Bonds.—

President Parish Indicted in Row Over Bonds.

Frank P. Parish, President of the company, pleaded not guilty before Judge Collins in General Sessions at New York on Dec. 23 to an indictment accusing him of the theft of \$127,000 in bonds of a subsidiary concern, \$63,500 in promissory notes and "130 pieces of paper valued at one penny each."

accusing him of the theft of \$127,000 in bonds of a subsidiary concern, \$63,500 in promissory notes and "130 pieces of paper valued at one penny each."

The indictment was based on the complaint of William G. Maguire, Pres, of W. G. Maguire & Co., Inc., Chicago. Mr. Parish surrendered at the District Attorney's office when he learned of the indictment, and was released in \$5,000 bail.

The complainant, according to Assistant District Attorneys Hastings and Firestone, who presented the evidence to the grand jury, in which the defendant appeared as one of the witnesses, under waiver of immunity alleged the bonds, notes and other documents were part of the collateral given by the Pipe Line company on a \$180,000 loan made by him to the same corporation through the defendant in the name of Ralph B. Mayo, a director and large stockholder in the parent corporation.

After his arraignment, Mr. Parish through his lawyer, Frederick J. Sullivan, issued a formal statement in which he said:

"I am indicted because of my refusal to deliver to Maguire approximately \$175,000 of notes of the Missouri-Kansas Pipe Line Co., which are past due and collateralized by approximately \$350,000 of Kentucky Natural Gas Co. bonds. These notes and bonds were given for a loan to the Missouri-Kansas company, this loan being made out of a fund provided by Maguire as a 'war chest' to be used by me for the benefit of the Missouri-Kansas company and its stockholders at my discretion.

"If I deliver the bonds and notes to him, the Missouri-Kansas company and its stockholders at my discretion.

"If I deliver the bonds and notes to him, the Missouri-Kansas company proceedings, which I refuse to permit him to bring about. I intend to protect the stockholders in every instance and shall use these, as well as all other funds and property in my possession, to further the stockholders' interests and help defray expenses in connection with \$75,000,000 conspiracy suits now pending in behalf of the Missouri-Kansas Pine Line Co. against the Standard Oil Co.

Montgomery Ward & Co. - Makes Further Price Reduc-

The company's mid-winter flyer catalogue shows price reductions on easonal goods featured in it as compared with prices quoted in the preceding eneral catalogue, but, unlike the flyer a year ago, it makes reference in number of instances to the possibility that quoted prices may prove to e the lows and that higher prices may prevail after Feb. 28, when the atalogue expires.—V. 135, p. 4043.

Moto Meter Gauge & Equipment Corp.—Depositary.—
Manufacturers Trust Co. has been appointed depositary for the stockholders' protective committee for the common stock of the corporation.

—V. 135, p. 4394.

Munsingwear, Inc.—To Change Par Value.—
Notice has been received by the New York Stock Exchange of a proposed change in the par value of common stock of the company from no par to \$10 per share, each present share to be exchangeable for one new share.—V. 135, p. 999.

(Conde) Nast Publications, Inc.—Trustee.— Manufacturers Trust Co. has been appointed trustee for \$1,000,000 first ortgage 5½% gold bonds, due Dec. 15 1937.—V. 135, p. 4226.

National Cash Register Co.—Listing, etc.

The New York Stock Exchange has approved the listing of 238,000 additional shares of common A stock (no par value), upon official notice of issuance and distribution pro-rata as a split-up to the common A stock-holders of record on Dec. 27; making the total amount applied for 1,428,000 shares.

holders of record on Dec. 27; making the total amount applied to Alaction shares.

All action necessary to authorize (1) the issuance of such additional common A stock, (2) the issuance of a new class of stock designated as common C stock, and (3) the reduction of the capital of the corporation, represented by its stock without par value, from \$42.213.335 to \$24.420.000, was taken by the board of directors at a meeting held on Nov. 18 and by the stockholders at a meeting held Dec. 15 1932.

It is proposed to use the 238,000 shares of common A stock in connection with the contemplated distribution to present A stockholders pursuant to plan of recapitalization as outlined in V. 135, p. 4043.—V. 135, p. 4394.

National Share Corp.—Extra Dividend.—
The directors have declared an extra dividend of 6½ cents per share and the regular quarterly dividend of 43½ cents per share on the class A common stock, par \$25, both payable Jan. 10, to holders of record Dec. 31. Like amounts were paid on this issue on April 10, July 10 and Oct. 10 last, while on Jan. 5 1932 an extra distribution of 31½ cents per share was made.—V. 135, p. 309.

1 2 4

National Steel Car Corp., Ltd.-Declares Regular

National Steel Car Corp., Ltd. Dectar to Dividend, &c.—

The directors have declared the regular quarterly dividend of 20 cents per share on the capital stock, no par value, payable Jan. 2 to holders of record Dec. 22. A like amount was paid on July 2 and on Oct. 1 last, as compared with quarterly distributions of 50 cents per share made from April 2 1929 to and incl. April 1 1932.

Accompanying the current dividend will be an announcement by the company that the directors feel that they should intimate to the stockholders that it is unlikely that further dividends will be paid until conditions improve sufficiently to warrant such action.—V. 135. p. 1670.

National Steel Car Lines Co.—Merger Planned.—
The proposed formation of the Freeman Corp. to consolidate the National Steel Car Lines Co., the Industrial Equipment Corp. of America, the Merchant Marine Equipment Corp. and the Equipment Appraisal Co. was announced on Dec. 28.

Details of the exchanges of stock through which the merger will be effected are being considered by the following directors; L. S. Freeman, E. K. Haskell, E. L. Nye, P. H. Ackert, F. L. Cole and J. S. Nye, all of Freeman & Co.—V. 135, p. 829.

National Trust Shares.—Semi-Annual Dividend.—
National Trust Shares (Modified) will pay on Dec. 31 a semi-annua distribution at the rate of 14.4 cents per share.—V. 134, p. 687.

Normandie National Securities Corp.—Receivership. Isidor Kahn, New York, has filed a receivership suit in Chancery Court at Wilmington, Del., against the corporation, alleging insolvency. The bill charges that the assets of the corporation have declined in value to \$75,000 from \$5,000,000.

The bill alleges the corporation has only \$300 cash in banks, that liabilities exceed \$35,000 and that the corporation owns 22,000 shares of the stock of the National Safety Bank & Trust Co., of New York, which has a market value of about \$3 a share. Kahn states he is the owner of 2,700 shares of the preference participating stock of the defendant corporation.— V. 132, p. 325.

Northwestern Improvement Co.—Special Dividend.—
This company, all of whose \$24,800,000 outstanding capital stock is owned by the Northern Pacific Ry., has declared a special dividend of \$5,600,000 in addition to the regular annual dividend of 4% (amounting to \$992,000). In Dec. 1929 the company paid a special dividend totaling \$3,500,000 and in Dec. 1931 one of \$5,000,000.
The action of the board on this special payment amounts practically to cancellation of debts owed by Northern Pacific Ry. to the Northwestern Improvement Co. covering coal and other items. No cash will be involved, it is stated.—V. 90, p. 1175.

Peck Bros. & Co.—Preferred Dividend Deferred.—
The directors have decided to defer the quarterly dividend due Jan. 10 on the 6% cum. pref. stock, par \$25. The last regular quarterly payment of 1½% was made on this issue on Oct. 10.—V. 133, p. 814.

Pressed Steel Car Co.—New Offer to Bondholders. company has made alternative offers to holders of its 10-year 5% convertible gold bonds, due on Jan. 1 1933, in a further effort to induce deposits of all these securities outstanding. It reports that more than a majority of the bonds has been deposited under the plan announced on Sept. 28, but not enough to make the plan operative. The official announcement follows:

emough to make the plan operative. The official announcement follows:

The offer under the plan of Sept. 28 1932 has not been made effective because of insufficient deposits, although substantially more than a majority of the bonds have been deposited.

Therefore the management now makes to the bondholders the following alternative offers:

(a) The cash payment of \$250 and \$750 in 1943 debentures for each \$1,000 bond, as originally proposed, or

(b) \$550 in cash for each \$1,000 bond, with corresponding amounts for each \$500 bond.

If substantially all the oondholders accept one or the other of these offers and deposit the bonds for that purpose, the company believes that it can arrange to secure the necessary funds.

It is obvious that such deposits must be made promptly if such a plan is to be consummated. The company has accordingly instructed New York Trust Co. as depositary, to accept deposit of bonds until Jan. 16 1933. If in the judgment of the company sufficient bonds are not deposited or the necessary financial arrangements cannot be made, the plan will not be made effective.

If the company is not able to make such plan effective, the alternative is that the company will be forced into receivership.

Holders of undeposited bonds are requested to forward their bonds immediately to New York Trust Co., depositary, with instructions as to which of the alternatives they elect to receive namely: \$250 in cash and \$750 in 1943 debentures per \$1,000 bond or \$550 in cash for each \$1,000 bond. Each holder of a certificate of deposit under the offer of Sept. 28 1932, is requested to instruct the depositary immediately whether or not they wish to take \$550 cash for each \$1,000 bond; otherwise we will understand that they wish their original acceptance of \$250 cash and \$750 in 1943 debentures for each \$1,000 bond, to stand.

If and when the plan is declared operative, the Jan. 1 1933 coupons will be paid in the regular way through the company's paying agent.—V. 135, p. 4228.

Produce Merchants' Office Building, Chicago.

Reorganization Plan.

Produce Merchants' Office Building, Chicago.—
Reorganization Plan.—

The bondholders' committee has formulated and adopted a plan for the reorganization of the financial structure of the Produce Merchants' Office Building on behalf of the holders of the 6% 1st mtge. bonds dated July 1 1925, of which \$843.000 are now outstanding, unsubordinated and unpaid.
The members of the committee are Bertram M. Winston, Chairman; George W. Rossetter, Jay C. McCord, Samuel J, T. Straus and Sidney H. Kahn. M. A. Rosenthal, See'y, 310 So. Michigan Ave., Chicago.

Property.—The building is a modern 10-story fireproof store and office building designed to meet the needs for office space and other business facilities in Chicago's produce market. The building contains seven stores fronting on two streets, banking quarters on the second floor and eight floors of offices. The structure also contains an incinerating plant. The building is in good physical condition and its equipment is modern. The bank which formerly occupied the banking quarters in the building failed and this space is now vacant.

Financial Position.—By reason of an impending default in the payment of the semi-annual interest and annual principal due July 1 1931, this committee for the first mortgage bondholders were requested to deposit their bonds with the committee. At the present time 91% in principal amount of the outstanding bonds have been so deposited.

Partial payments totaling \$8,884 have been made on account of 1929 and 1930 taxes, leaving a tax balance, to which objections have been filed, of approximately \$14,750 unpaid. This figure does not include 1931 taxes estimated at \$10,600, which have not as yet been billed.

General Situation.—On April 30 1931 possession of the property was surrendered by the owner to Melvin L. Straus, as trustee for the first mortgage bondholders.

A report of the operation of the property on an accrual basis for the 10 months ended Oct. 31 1932 indicates that the building earned approximately \$19,000 during that period, afte

of foreclosure was entered by the Court on Nov. 6 1931 and a date will soon be fixed for the sale of the mortgaged property, at which sale the property will oe sold to the highest bidder. The proceeds of such a foreclosure sale, after deducting all expenses of foreclosure, will then be held for the benefit of all the holders of bonds.

Under prevailing conditions, it is probable that no outside bid reflecting what the committee regards as a fair value for the mortgaged property will be made at the forthcoming foreclosure sale by any outsider; and, therefore, the committee, in order to protect the depositing first mortgage bond-holders, and in order to prevent the purchase of the property at an inadequate price, will probably bid in the property for the benefit of the depositing first mortgage bondholders. Accordingly, the plan of reorganization provides that practically the entire ownership will go to the depositing first mortgage bondholders.

Details of the Planck.

Details of the Plan of Reorganization.

provides that practically the entire ownership will go to the depositing first mortgage bondholders.

Details of the Plan of Reorganization.

The following plan of reorganization is conditioned upon the acquisition of the property by the committee or its nominee at foreclosure sale.

New Company.—A new corporation will be organized in Illinois. I acquired at foreclosure sale, title to the property so acquired will be conveyed to the new company. The capitalization of the company will consist solely of common stock, practically all of which will be issued for the benefit of the depositing first mortgage bondholders.

Trust Agreement.—All of the shares of the capital stock will be deposited into a trust and trust certificates issued therefor. Trust certificates representing 90% of the capital stock will be issued to the depositing first mortgage bondholders and trust certificates representing the remaining 10% will be issued to S. W. Straus & Co. in satisfaction of advances totaling \$157.027 made by it on account of principal and interest and on account of its interest as the owner of the equity in the property.

Three trustees have been designated by the bondholders' committee to serve on behalf of the holders of the trust certificates. These trustees are Samuel J. T. Straus, Sidney H. Kahn and Bertram M. Winston. The trust will endure for a period of 10 years, but may be terminated prior to the expiration of this period by a majority of the trustees or by the direction in writing of the holders of 66 2-3% in amount of the outstanding trust certificates for capital stock.

If during the period of the trust an offer should be received for the sale of the property, the terms of any such sale will be submitted to the certificate holders by the trustees. In the event that the holders of 1-3 in principal amount should dissent in writing from any such proposal, the sale of the property in the terms submitted will not be made.

Distribution to Bondholders.—When the reorganization becomes operative, the holder of a cert

Quarterly Income Shares, Inc.—Opens Office.— This corporation has opened an office at 15 Exchange Place, Jersey City, J. See also V. 135, p. 4396.

Rector Realty Corp., New York.—Foreclosure Suit.—
A suit to foreclose a mortgage for \$2,100,000 on the apartment building at the northeast corner of Riverside Drive and 87th St., N. Y. City was filed in the New York Supreme Court, Dec. 29 by the Bank of Manhattan Trust Co., as trustee, under a deed of trust made by the Rector Realty Corp. in 1926. The suit is brought because of default in monthly interest payments on which \$68,775 was due on Nov. 1, and \$30,000 in principal payments. In addition, the owner has defaulted in \$168,600 in taxes.

Reo Motor Car Co.—Reduction in Capital, &c.—
The stockholders on Dec. 27 approved a proposal to reduce the authorized capital to \$10,000,000 from \$20,000,000 and to change the par value of the stock to \$5 a share from \$10 per share. Since 200,000 shares are held in the treasury, this will make available for transfer to capital surplus the sum of \$9,000,000.
The stockholders also authorized the reduction of fixed assets by \$4,70,766 and that a further amount of \$405,545 be set aside as reserve for other contingencies.

Listing of Capital Stock, Par Value \$5 per Share .-The New York Stock Exchange has authorized the listing of 2.000,000 shares of capital stock, par \$5 each, on official notice of issue, share for share, for a like number of shares of capial stock of the par value of \$10 each previously listed and outstanding (including a certain 200,000 shares now in the treasury of the company).—V. 135, p. 4046.

Rolls-Royce of America, Inc.—Protective Committee.—
The protective committee for the 7% sinking fund gold bonds as now constituted consists of: Wm. Card Moore, Chairman, 115 Broadway, New York: Mitchell Johnson, Henry W. Gilett, Hardy S. Ferguson, and George A. Rogers. John Daly, Sec., 120 Broadway, New York. Simpson, Thacher & Bartlett, counsel, 120 Broadway, New York. Depositary, New York Trust Co., 100 Broadway.—V. 135, p. 3291.

Roos Bros., Inc.—81 Cent Preferred Dividend.—
A dividend of 81 cents per share has been declared on the no par value \$6.50 cum. conv. pref. stock, payable Feb. 1 to holders of record Jan. 15.
A like amount was paid on Aug. 1 and Nov. 1 last, as against \$1.62½ per share previously paid each quarter.—V. 135, p. 311, 1005.

Roxy Theatres Corp.—Receiver to Appeal Decision.—

It is announced that an appeal will be taken by Howard S. Cullman, receiver, from the decision of Federal Judge Francis G. Caffey giving RKO Roxy Theatre in Radio City excluisve right to use name "Roxy" after its opening Dec. 29. The new RKO Theatre is under the direction of S. L. Rothafel.

Federal Judge Francis G. Caffey recently signed an injunction restraining the threatre at 50th St. and Seventh Ave. from using the name. The order, however, does not prevent the corporation owning the latter theatre from using the name and trade-mark reading "Roxy Theatre Corp." since it was registered by the corporation at the instance of Mr. Rothafel and is the property of the corporation.

Judge Caffey's order provided that if the Roxy Theatre Corp. should take an immediate appeal from the order they might continue to use the name under bond to indemnify RKO and Rothafel for any loss which the latter might suffer.—V. 135, p. 4397.

Royalton Apartments (Highland Apartment Co.),

Royalton Apartments (Highland Apartment Co.), Philadelphia.—Report to Depositors.—

The committee for the protection of the holders of bonds sold through the F. H. Smith Co. (George E. Roosevelt, Chairman), in a letter dated Dec. 14 to depositors of 1st mtge. 6½% bonds, states:

At the foreclosure sale held on Oct. 31 1932 the Royalton Apartments property was bid in by a representative of Girard Trust Co., the trustee under the mortgage, for \$120,000 and any additional amounts paid or payable by the trustee. On the application of a bonholder, the U. S. District Court for the Eastern District of Pennsylvania on Nov. 7 1932 entered an order restraining Girard Trust Co. from proceeding with the sale of the property. However, the restraining order has been vacated and the sale

has been confirmed. In the confirmation decree, entered Nov. 28 1932, the court has provided in effect that it will reconsider the entry of the confirmation order if, within 60 days from the date thereof, an offer is obtained for the property in excess of \$120,000 and any additional amounts paid or payable by the trustee.

Girard Trust Co. has informed the committee that it intends to pay the bondholders any amount realized upon the resale of the property in excess of the amounts of advances, costs, expenses, charges and claims payable from the proceeds of the sale prior to payment on the bonds, as provided in the mortgage securing the bonds and in the decree of sale. If upon the resale of the property there is no such excess realized there will be no funds available for distribution on account of the bonds.

The efforts of the committee to obtain a loan upon the security of the property in an amount sufficient to pay the charges prior to the bonds were unsuccessful and for this reason it could not bid for the property at the sale on behalf of depositors.—V. 135, p. 2666.

Russell Motor Car Co.. Ltd.—Dividend Omitted.—
The directors have voted to omit the quarterly dividend ordinarily payable on the common stock about Feb. 1. On Aug. 1 and Nov. 1 last the company made quarterly payments of 25 cents per share on this issue as companyed with 50 cents per share paid on Feb. 1 and May 2 1932, 75 cents per share on Aug. 1 and Nov. 2 1931, and \$1.25 per share previously paid each quarter.—V. 135, p. 311.

Sears, Roebuck & Co.-Price Decline Slackening.

Sears, Roebuck & Co.—Price Decline Slackening.—

The company's mid-winter flyer catalogue reflects a slackening in the pace of price declines for manufactured goods and in some instances indicates that prices will have to be raised after the end of February when the catalogue expires.

The average price decline for all lines of merchandise shown in the book is 9.2% under the fall and winter general catalogue. The company states that this is the smallest average sales catalogue decrease under a preceding general catalogue shown in about three years.

Prices quoted for cotton goods and other textiles confirm reports last summer that the company had covered its requirements advantageously at that time before the rise in prices got under way. The harness section is given more attention, reflecting the definite trend toward resumption of use of horsepower on farms throughout the country which has been noted by officials.

The company has extended through the life of the flyer the one-third reduction in prices of farm implements made last spring.

In connection with its free raw fur marketing service the company states thad paid over \$14,000,000 to fur shippers.

The flyer this year contains 176 pages, against 202 pages last year.

The catalogue shows no change in automobile tire prices from those previously in effect, including the excise tax. The differential between mail-order and retail store prices established at the end of October is continued.

By merchandise groups the price reductions in the flyer from those

tinued. By merchandise groups the price reductions in the flyer from those quoted in fall and winter general catalogue are: Copper 4½%; rubber, 4.7%; iron and steel, 7%; wool, 8.2%; machined iron and steel, 8.8%; linen, 9.1%; silk, 9.2%; household furnishings, 9.2%; cotton, 9½%; floor coverings, 10.7%; enamelware, 11%; rayon, 12.6%; furniture, 13.8;% electrical appliances, 13.9%; leather, 14.8%.—V. 135, p. 4046.

Securities Investment Co. of St. Louis.—Halves Div.—
A quarterly dividend of 25 cents per share has been declared on the common stock, no par value, payable Jan. 2 to holders of record Dec. 21.
Previously the company paid quarterly dividends of 50 cents per share.—
V. 130, p. 3559.

Deposits.—

A bondholders' committee has been formed consisting of Nicholas Roberts. Chairman, John L. Laun, James E. Friel, Charles Ridgely and Ralph C. Baker. Joshua Morrison, Sec., 565 Fifth Ave., New York. Jones, Clark & Higson, Counsel, New York

The holders of more than 66% of the outstanding \$2,024,500 1st mtge sinking fund 6% coupon gold bonds, due April 27 1937 have deposited their bonds with Continental Bank & Trust Co. of New York, depositary. The committee in a letter dated Dec. 23, says in part:

The bonds are secured by a first mortgage on land owned in fee situated at the northeast corner of 39th St. and Sixth Ave., N. Y. City, together with the 23-story fireproof loft building erected thereon. The building contains 155,740 sq. ft. of loft space; 5,750 square feet of store space and basement, part of which is occupied by a cafeteria.

Possession of the property was obtained by the trustee. Continental Bank & Trust Co., under an agreement dated as of April 30 1932. Erwin S. Wolfson has continued as managing agent for the trustee. Since that time the committee has co-operated with the trustee and with the managing agents in an effort to stabilize and improve the revenues from the property. Occupied to a great extent, however, by millinery trades the revenues from the property are largely dependent on the ability of the tenants to pay. Clear indication of the difficulties with which the property is faced is given in the fact that rents due for the period, but uncollected as at Sept. 30 1932 total \$44,645.

A statement of income and expense on a cash basis for the period May 1 1932 to Sept. 30 1932, prepared by J. Lee Nicholson & Co., C.P.A., shows the net cash income available for real estate was \$41,166. The estimated real estate taxes applicable to the period would amount to \$24,008, which would leave a net cash income after taxes of \$17,158.

After the payment of real estate taxes for the second half of the year 193

Starrett Investing Corp.—Trustee Resigns.—
The Bank of Manhattan Co. has resigned (a) as successor trustee under the indenture dated as of April 1 1930, between this corporation and Bank of Manhattan Trust Co., as trustee, under which the 5% secured gold bonds, series of 1950, have been issued, and (b) as successor trustee under the indenture dated as of April 1 1930, between the Starrett Corp., Starrett Investing Corp. and Bank of Manhattan Trust Co., as trustee, providing, inter alia, for the giving to holders of 5% secured gold bonds, series of 1950, of Starrett Investing Corp., the privilege to purchase certain shares of common stock of the Starrett Corp., and for the guaranty of payment of principal of and interest on such bonds by the Starrett Corp., such resignation to take effect on Jan. 28 1933, unless previously a successor trustee shall be appointed as provided in the indenture first above mentioned, in which event such resignation shall take effect immediately upon the appointment of such successor trustee.—V. 135, p. 147.

Straus Ruilding (565 Fifth Ave. Corp.) New York

in which event such resignation shall take effect immediately upon the appointment of such successor trustee.—V. 135, p. 147.

Straus Building (565 Fifth Ave. Corp.), New York.—
To Pay Jan. 1 Bond Interest—Serial Payment Not Made.—
The holders of the 1st mtge. 6% serial coupon bonds are advised by S. W. Straus & Co., Inc., that funds have been deposited for the payment in full of the Jan. 1 interest coupons which will be paid on that date, but serial bonds, in the amount of \$168,500, maturing on that date cannot be paid at this time.

Of the bonds originally issued, in the amount of \$3,000,000, there have been heretofore paid \$1,147,500, leaving \$1,852,500 outstanding. A circular letter further states:

These bonds are the obligation of 565 Fifth Avenue Corp., which leases the land at the corner of Fifth Ave. and 46th St., N. Y. City, from the Ritz-Carlton Hotel Corp. The entire building, erected thereon, is in turn leased by it to S. W. Straus & Co., Inc., which uses about three floors of the building for its own business and sublets the balance to outside tenants.

Because of long-continued depressed business conditions, many tenants of stores and offices have been forced to ask for relief by way of reductions in rentals and many of them, through business failures, have been forced to give up their space entirely. Moreover, such new leases as have been obtainable have been at very low figures and the proportion of delinquents has reached an unprecedented figure so that the gross amount of rent received by S. W. Straus & Co., Inc., in order to make up the deficit between this rental income and the requirements of the lease and of this bond issue, which burden comes at a time when business conditions are perhaps the worst in history.

The result has been to place an abnormal charge against S. W. Straus & Co., Inc., in order to make up the deficit between this rental income and the requirements of the lease and of this bond issue, which burden comes at a time when business conditions are perhaps the worst in his

Stutz Motor Car Co. of America, Inc.—New Vehicle.—
The company announces that its new Pak-Age-Car, a vehicle designed for economical house to house delivery purposes, will be offered for sale by the first of the year and will be shown at the annual Automobile Show which opens in New York City, Jan. 7.
In addition, Stutz pleasure car business is stated to be improving, the company having more unfilled orders on hand at present than at any time in the last six months. The factory payroll has more than doubled in the last six months. The factory payroll has more than doubled in the last 60 days. Dealers' stocks of new unsold Stutz cars are described as the lowest now in the company's history.—V. 135, p. 3706.

Stuyvesant Insurance Co. of N. Y.—Merger.—
The stockholders of the Industrial Fire Insurance Co. of Akron, Ohio, on Dec. 28 voted to merge their company with the Stuyvesant Insurance Co. of New York.
The Industrial company is headed by F. R. Ormsby of Akron., J. S. Frelinghuysen of New Jersey, former U. S. Senator, is Vice-President.
The Industrial concern was made defendant recently in a \$700,000 suit brought by two stockholders, William S. Kinney and Lenus Ayer of

Canton, Ohio, who charged improper investment of company funds. They ask to restrain the company from removing its books from Ohio and repayment to stockholders of \$700,000 that they allege was improperly invested.—V. 134, p. 3473.

Thompson-Starrett Co., Inc.—Reduces Board.—

At the annual meeting of the company held on Dec. 12, the stockholders reduced the number of directors from 34 to 22.

George T. Zimmermann, Secretary and Treasurer, said that the directors had felt the old board was too large. The reduction would also save directors' fees, he added.

"In addition," Mr. Zimmermann continued, "the directors will henceforth meet only four times a year, whereas formerly they met every other month. However, if anything important comes up, a special meeting could be called. The finance committee, which formerly met every other month, will now meet every month. It is likely that the size of the finance committee will also be reduced."

The directors re-elected were: Louis B. Abrons, J. E. Bierwirth, Albert B. Boardman, W. H. Driscoll, Leo J. Fischer, President; Samuel L. Fuller, E. W. T. Gray, William M. Greve, Charles Hayden, Louis J. Horowitz (Chairman of the board), Richard F. Hoyt, G. Herman Kinnicutt, Robert Lehman, Louis S. Levy, Robert F. McCord, Maurice Newton, Morgan J. O'Brien, William B. Scarborough, Donald Stralem, Harold E. Taloott Jr., William H. Wheelock and Thomas Williams.

Directors not re-elected were: Harold O. Barker, Walter P. Chrysler, Thomas Cochran, Edward P. Farley, Herbert Fleischhacker, John W. Hanes, John W. Prentiss, David A. Schulte, John A. Stephens, William H. Vanderbilt and Mr. Zimmermann. The death of William Wrigley Jr. last January had left a vacancy in the board.—V. 135, p. 3870.

345 West 86th Street Apartment Bldg.—Deposits, &c.—The bondholders' committee for the holders of 345 West 86th Streepartment Building, 1st mtge. serial 6% bonds, dated Feo. 1 1923, statement.

Apartment Bunding, 18th Market States of Apartment Bunding, 18th Market States of Parket States of Over 77% of the outstanding \$475,500 bonds have joined the Holders of Over 177% of the following committee to enforce their rights under the mortgage. Nicholas Roberts, Chairman, John L. Laun, Charles Ridgely, James E. Friel and Ralph C. Baker. Joshua Morrison, Sec., 9 East 46th St., New York. Jones, Clark & Jigson, Counsel, New

Sec. 9 East 46th St., New York. Jones, Clark & Jigson, Counsel, New York.

Because defaults first occurred under the junior mortgage of \$125,000 the holders of that mortgage obtained possession of the property. Then defaults under the first mortgage made it necessary for the first mortgage trustee to get control. Voluntary surrender of possession was not obtainable so it was necessary to resort to a receivership.

A discouraging situation faced the holders of this issue when defaults in payments of interest and principal made necessary the formation of a committee.

As soon as deposits of bonds enabled the committee to start action it was found that the suilding was in a badly run-down condition. The rental income at that time provided nothing towards the accruing taxes on the property. The committee's engineer made a thorough survey of the property and prepared plans for its rehabilitation on the most economical basis. Through its facilities the committee was able to borrow \$15,000 on receiver's certificates, which fund together with the small monthly income from tenants made it possible to completely rehabilitate the property. An experienced rental man was appointed to work with the receiver's managing agents in an energetic effort to lease vacant apartments. The result of this constructive work was that on Oct. 17 1932 the receiver reported that 90% or 40 of the 45 apartments were occupied. On the basis of this occupancy and without taking into account the fees of the receiver and his counsel to be determined by the court the following annual income figures, without any allowance for uncollectible accounts, were indicated:

Gross rentals.

\$66,364
Operating expense estimated.

\$18,000
Real estate taxes (estimated)

\$16,0254

Real estate taxes (estimated) 22,110

Net income after taxes \$16.254

Value of Vacancies 7,600

Real estate taxes, not including penalties, have accumulated in the amount of \$30,923.

It is desirable now to press foreclosure action vigorously and to bring the property to sale at the earliest possible date. The results as outlined in this letter merit the fullest co-operation of all bondholders with this committee. The immediate deposit of the remaining \$108,300 undeposited bonds is most important and will greatly assist in hastening action which should be taken at once.

should be taken at once.

Trinity Apartments, Ltd.—Plans to Reorganize.—
Holders of \$160,000 6½% first mortgage bonds will meet Dec. 29 to consider a proposal of reorganization. Interest due April 1 1932, is in default and the company is faced with arrears of taxes. Plan calls for sale of the company to a new organization.

Capital structure of the new company will comprise \$160,000 of bonds and 1,600 shares of no par common stock which will be distributed among bondholders rateably upon surrender of their holdings. The new bonds will be dated Dec. 1 1932, and will mature Dec. 1 1952. Interest at the rate of 4% will be paid out of net income up to 1937 and only when such income enables a disbursement of at least 2% of the principal amount of bonds. After 1937 interest will become a fixed charge at the rate of 4%.

Bondholders will be asked to sanction a first mortgage on the property to secure payment of a loan of \$30,000 bearing interest at 6½%. Proceeds will be used to defray current taxes and debts and costs incidental to formation of the new company.

Trinity Apartments owns a three-story apartment house in Montreal. Bonds were sponsored by W. A. MacKenzie Co.

Underwriters Equities, Inc.—Transfer Agent.—

Union Oil Associates.—Exchange of Stock.—

The transfer department of the Guaranty Trust Co. of New York is prepared to issue stock of Union Oil Co. of California in exchange for stock of Union Oil Associates, on a share for share basis. No endorsement of Union Oil Associates certificates is necessary in those cases where Union Oil Co. of California stock is to be issued in the same name.

The capital stock of the Union Oil Associates was removed from trading on the San Francisco Stock Exchange at the close of business on Dec. 20, although certificates will be received by the clearing house in settlement for stock of the Union Oil Co. of California, according to an Exchange notice.

The San Francisco Stock Exchange has been advised that the vectors of the control of the contr

notice.

The San Francisco Stock Exchange has been advised that the merger of that company with the Union Oil Co. is effective as of Dec. 20. The 2,-498,051 shares of Union Oil Associates will be exchanged share for share for Union Oil Co. capital stock.—V. 135, p. 4049.

United Cigar Stores Co. of America.—Commerce Department Official Named by Referee to Make Merchandizing Study.—

Partment Official Named by Referee to Make Merchandizing Study.—

Dr. Julius Klein, Assistant Secretary of Commerce, has been appointed to conduct a survey of the merchandising business of the company and its subsidiary, the Retail Chemists Corp., formerly the Whelan Drug Co., Inc., for the Irving Trust Co., trustee in bankruptcy for both companies, it was announced Dec. 29 by Cravath, De Gersdorff, Swaine & Wood, counsel for the trustee.

Irwin Kurtz, Federal referee in the United-Whelan case, issued an order Dec. 24 authorizing Dr. Klein's appointment, at a salary of \$7,500 for the first month, together with expenses incurred, with the approval of the court. The survey is expected to take several months, and the salary after the first month is to be fixed by court order.

The petition of the trustee requesting permission to employ Dr. Klein set forth that it did not intend the survey to be a mere review of the situation, but that recommendations were to be made to aid the trustee in continuing the business and developing the possibility of reorganization. It said the recommendations would cover the kind of products to be sold, the demands of the present market in various parts of the country, purchasing agreements with manufacturers and wholesale dealers, and sales problems.

Among the selling questions involved, the petition went on, were "problems presented by the present depressed business conditions in the country, and the competition of other retail chain and local stores engaged in selling unrelated lines of merchandise, but which, in addition to such unrelated merchandise, sell goods competitive with your petitioner's goods as 'ieeders', at practically no profit, for the purpose of increasing their other sales.'—V. 135, p. 4230.

United Investment Shares, Inc.—Dividends.—
A distribution of 0.962 cents per share has been declared on the United Investment Shares, series A, payable Jan. 15 to holders of record Dec. 31. This compares with 0.904 cents per share paid on Oct. 15 last, 1.2676 cents per share on July 15, 1.416 cents on April 15 and 2.192 cents on Jan. 15 1932.
An initial quarterly distribution of 1.642 cents per share has been declared on the United Investment Shares, series C.—V. 133, p. 3980.

U. S. Postal Meter Corp.—New Director.—
George Armsby, Chairman of the board of Bancamerica-Blair Corp., has been elected a member of the board of directors of U. S. Postal Meter Corp., manufacturers and distributors of devices for stamping and metering mail. Other directors of the company include Adolph Zukor and J. J. Murdick.—V. 132, p. 4432.

United States Shares Corp.—Common Stock Trust Shares, Series A, Terminated.—
Holders of common stock trust shares, series A, are being notified that the trust agreement between United States Shares Corp. and Chatham Phenix National Bank & Trust Co, dated May 5 1927, has been terminated as of Dec. 9 1932. The Guaranty Trust Co. as successor trustee calls for the surrender to it within three months after Dec. 9 the then outstanding certificates for trust shares.

At the termination of the period of 60 days after the expiration of said three months from Dec. 9, the Guaranty Trust Co. will distribute the balance of cash then held by it under the agreement and declaration of trust pro rata to the holders of the then outstanding trust shares upon surrender thereof and upon payment to it of the amount of any and all transfer fees or charges of any kind, if any, in connection therewith.—V. 135, p. 3870.

Van Camp Milk Co.—Off Curb List.—
The New York Curb Exchange on Dec. 29 announced that it has removed from listing the 15,000 shares of 7% cum. pref. stock, par \$100, of this company, as the latter has failed to maintain transfer and registration facilities in New York City.—V. 135, p. 1342.

Virginia-Carolina Chemical Corp.—Purchasing Stock.—
The corporation on Dec. 24 announced that slightly more than 81,000 shares of the 7% prior preference stock had been tendered to it by Dec. 20, under its offer to buy from shareholders 40% of their holdings at \$75 a share.—V. 135, p. 3707.

Westinghouse Electric & Mfg. Co.-Awarded Large

Westinghouse Electric & Mfg. Co.—Awarded Large Contract in West.—

A contract amounting to nearly \$110,000 for three 5,000 kv-a synchronous condensers and insulators has been warded the above company by the Metropolitan Water District of Southern California.

The equipment will be installed on a temporary power line running from Los Angeles to the Colorado River at Parker Dam. The transmission line is being erected to supply power for the building of an aqueduct which, when completed, will provide the supply water for Los Angeles, and other municipalities included in the Metropolitan water district organization. The 250 mile aqueduct will consist of tunnels, open canals and siphoning systems, all of which will largely be built by electrically driven machinery.

Obituary.—
Edwin Musser Herr, Vice-Chairman, died in New York City on Dec.
.—V. 135, p. 3707.

Willys-Overland Co .- New Vice-President .-

Appointment of G. V. Orr, as Vice-President of this company has been announced by John N. Willys, Chairman of the board. Mr. Orr, for the past three years, has been Vice-President of the Willys-Overland Pacific Co. on the West Coast, in charge of sales, his territory having embraced California, Washington, Oregon. Nevada, Arizona and the Hawaiian Islands. He is succeeded on the Pacific Coast by Norman DeVaux.

Mr. Orr will continue as Vice-President and a director of the Pacific Coast company.—V. 135, p. 4050.

Wisconsin Bankshares Corp.—Reduces Capitalization.—
The stockholders on Dec. 28 approved the reduction in the authorized capital stock of the corporation from 10,000,000 shares of \$10 par value each to 2,000,000 shares of no par value, but with a stated capital for the corporation of \$20,000,000.

The change was proposed, it was explained by President Walter Kasten, at the time the directors recommended it, to permit the corporation's investments in its affiliated banks and other companies to be carried on the books on a net tangible asset basis. Formerly those investments were carried on the basis of the amount paid for those stocks, which included the value of good will built up by these banks and other companies during long years of business in their respective communities. The value of this goodwill as an intangible asset is now being eliminated from the company's asset accounts.

The change also permits the setting up of a surplus account of \$7,905,631, a reserve for losses of \$1,750,000, and a reserve for contingencies of \$1,000,000.

The present number of shares of stock outstanding, of \$10 par value, is 9,836,367. The new basis provides for 1,967,273 shares of no par value.

\$1,000,000. The present number of shares of stock outstanding, of \$10 par value, is 9,836,367. The new basis provides for 1,967,273 shares of no par value, giving each stockholder one share of the new no par value stock for each five shares of the present stock held by him. See further details in V. 135, p. 4400.

Youngstown (O.) Sheet & Tube Co.—Change in Collat. The New York Stock Exchange has received notice from the trustee under the first mortgage dated Dec. 21 1927, of the above company that it has released from the lien of the mortgage 997 shares of the capital stock of the Iroquois Iron Co. of the par value of \$100 for cancellation in connection with the dissolution of that company. The notice further states that the Youngstown company, by supplemental indenture dated June 2 1931, subjected to the lien and operation of the first mortgage all of the lands and properties which had been conveyed to it by the Iroquois Iron Co.—V. 135, p. 3014

editorial matter, in a department headed INDICATIONS OF BUSINESS ACTIVITY.

Friday Night, Dec. 30 1932.

COFFEE on the spot was dull; Santos 4s, 9¾ to 10c.; Rio 7s, 8c. Cost and freight offers early to-day were scarce. For prompt shipment, Santos Bourbon 2s were here at 10.10c.; 2-3s at 9.40 to 9.75c.; 3-5s at 9.00 to 9.15c.; 4-5s at 8.90c. Peaberry ¾s were offered at 9.35c. On the 27th Santos futures here closed 2 points lower to 6 points higher and Rio 1 to 6 higher. Near months were the best sustained. It was the first notice day on January but no notices were issued. The sales of futures were 4,000 bags of Santos and 1,750 of Rio. On the 28th futures declined 18 to 24 points with cost and freight prices lower and spot coffee dull. Next Wednesday the Farm Board will offer 62,500 bags of its remaining 80,0000 and the predictions are that the prices paid will not be over 9¾ to 10c

deelined 18 to 24 points with cost and freight prices lower and spot coffee dull. Next Wednesday the Farm Board will offer 62,500 bags of its remaining 80,0000 and the predictions are that the prices paid will not be over 9¾ to 10c Europe and Brazil sold futures here but it was a day of light trading. Santos 4s were generally between 9.40 and 9.65c. for prompt shipment. Victoria ¼s for prompt shipment 7.30 and 7.40c.; for Jan.-March shipment at 7.15 and 7.20c. and for Jan. at 7.25c. Other Santos 4s for Jan. were held at 9.10c. and also for Jan. through March. Here spot Santos 4s were off to 10c., Rio 7s, 8¼c.; Victoria 7-8s, 8c.

On the 29th futures here were quiet with Santos off 6 to 8 points and Rio down 2 to 8 owing to a reported reduction in the Brazilian coffee tax of 67½c. a bag and a drop of 55 points in some of the cost and freight offers. A cable from Brazil to the exchange said: "The economic commission presented a plan to the Governor of Sao Paulo whereby various local coffee taxes can be reduced by approximately 9 milreis (estimated in the trade to be the equivalent to about 67c. per bag). Corresponding decree expected to be signed shortly. Commission also endeavoring to make further slight reduction in local taxes." Recently a reduction of 49 points was made in the export tax. Basis Santos Bourbon 4s for prompt shipment were 9 to 9.20c. Victoria 7-8s were held at 7.15c. Spot prices were unchanged. Santos 4s were offered at 10c. in a dull market pending the Farm Board sale next Wednesday. No. 7 Rio, 8¼c.; Victoria 7-8s 8c.; Maracaibo-Trujillo, 10 to 10¼c.; Cueuta, fair to good, 10¾ to 11¼c.; pm. to ch., 11¼ to 11¾c.; washed, 11¼ to 11½c.; Colombian-Ocana, 10c.; Bucaramanga, natural, 10½ to 10¾c.; washed, 10½ to 10¾c.; Giradot, 10 to 10½c.; Medellin, 10¾c. Mexican, washed, 12 to 13c.; Liberian-Surinam, 8½ to 9c.; East India-Ankola, 20 to 29c. To-day Rio futures here closed 1 to 3 points higher and Santos was 1 point lower to 7 points lower for the week.

Rio coffee prices closed as follows:

COCOA to-day ended unchanged to 4 points higher with sales of 71 lots. Jan. ended at 3.55c.; Mar. at 3.67; May at 3.79c.; July at 3.89c.; Sept., 3.99c.; and Dec. at 4.10c.

Final prices show a decline for the week of 8 to 9 points.

SUGAR ... On the 27th futures and spot raws declined 1

3.79c.; July at 3.89c.; Sept., 3.99c.; and Dec. at 4.10c. Final prices show a decline for the week of 8 to 9 points. SUGAR.—On the 27th futures and spot raws declined 1 point with trading small and London closed. The sales of futures were only 5,150 tons; also 10,000 bags Porto Rico due Jan. 9 sold at 2.79c. delivered. Private advises for the Puerto Rico to the trade stated that the first mill started grinding there this year on Dec. 12 and that now 13 mills are grinding. Figures of the Cuba sugar movement for the week ended Dec. 24 were as follows: arrivals, 8,072; exports, 15,862; stock, 556,538. Exports were to New York, 8,507; Boston, 1,392; Jacksonville, 143; Charleston, 3,484; Miami, 29 and France, 2,307. The sugar melt of the 14 United States refiners up to Dec. 17 shows a falling off of 240,000 long tons as compared to last year, while deliveries are down 330,000. The figures, in long tons, compiled by the Sugar Institute follow: Melt—Jan. 1 to Dec. 17 1932, 3,660,000; Jan. to Dec. 19 1931, 4,100,000. Deliveries—Jan. 1 to Dec. 17 1932, 3,545,000; Jan. 1 to Dec. 19 1931, 3,875,000. Futures on the 28th prices declined 1 point net but at one time were 1 to 2 points lower. Spot raws fell 4 points to 2.75c. delivered. The sales of futures were 10,950 tons; also cash sales of 5,000 tons of Philippines and 5,000 bags of Porto Rico due Jan. 9 all on the basis of 2.75. London was dull and weaker. There was some vague rumors of bearish news from Java. Refined here was quiet at 4.15c. On the 29th futures were unchanged to 1 point higher with

sales of 9,000 tons. There was selling as well as covering of hedges, some liquidation and also some new buying. It was a kind of semi-holiday market. Spot raws were quiet at 2.75 to 2.80c. for Cuban delivered and 2.77c. asked for Philippine due the second week in Jan. Refined was quiet at 4.15c. To-day futures closed unchanged to 1 point higher with sales of 5,600 tons. Final prices are unchanged to 1 point lower for the week.

April 3.73@3.83 | August 4.00@4.05 |
PETROLEUM.—Bulk gasoline was rather easier of late although most refiners adhered to their posted prices. United States ratior gasoline below 65 octane was reported at 6c. Sales were small at the latter figure. The Baltimore market for gasoline was weak with above 65 octane 5½ to 5¾c. tank cars at the plant; at Philadelphia, 5¾c. same basis. Fuel oils were in good demand with prices generally steady. Domestic heating oil was in fair demand for spot while industrial heating oils were moving in a satisfactory manner. Grade C bunker fuel oil was still 7c. refinery and Diesel oil \$1.65. Kerosene was in good demand and steady at 5½c. for 41-43 water white in tank cars, refineries.

Tables of prices usually appearing here will be found on an earlier page in our department of "Business Indications," in an article entitled "Petroleum and Its Products."

RUBBER.—On the 27th futures closed unchanged to 4

RUBBER.—On the 27th futures closed unchanged to 4 points lower. London was closed. The sales here were 510 tons. The Dutch East Indies shipment figures for Nov. showed a decrease in native production, totaling 20,014 tons, against 20,338 tons during Oct. and 23,883 tons in Nov. last year. Smaller shipments from East Coast Sumatra and Borneo accounted for the decline, while Java, Madoera and the rest of Sumatra shipped larger amounts last month. Java and Madoera exported 4,438 tons against 4,087 in Oct. and 7,469 last year. Dec. No. 1 standard closed at

3.10c.; June, 3.18c.; Mar. at 3.25c.; May No. 1 B, 3.33 to 3.35c.; July, 3.41 to 3.43c.; outside spot, 3 3-16c. Futures on the 28th ended unchanged to 1 point lower with sales of 880 tons. The stock at London and Liverpool decreased last on the 28th ended unchanged to 1 point lower with sales of 880 tons. The stock at London and Liverpool decreased last week 460 tons making the total 92,769 tons. London advanced 1-32 to 1-16d. No. 1 standard closed here with Dec., 3.10c.; Jan., 3.18c.; Mar., 3.25c.; No. 1 "B" for May at 3.33c.; July, 3.40c.; Sept., 3.48c.; outside spot 3 3-16c.; Jan.-Mar., 3¼c. On the 29th futures closed unchanged to 1 point lower. London declined 1-32 to 1-16d. or 1-16d. to ½ in two days. The sales here were 690 tons closing with No. 1 Standard for Jan., 3.18c.; Mar., 3.25c.; No. 1 "B" for May, 3.33 to 3.34c.; July, 3.39c.; Sept., 3.47c.; Oct., 3.51c. after touching 3.55c. Spot and Dec., 3 3-16c. Spot Standard thick latex, 3½c.; Standard thin latex, 4c.; No. 2 and No. 3 amber, 2½c.; No. 4, 2¾c.; Paras-Acre, fine, spot, 6¾ to 7c.; Up-river, fine, spot, 6¼ to 6½c.; Central-Guayuie, washed, dried, 12c. To-day prices closed unchanged to 2 points higher with sales of 17 lots of No. 1 "B". Jan. ended at 3.18c.; Feb. at 3.21c.; Mar. at 3.25c. and April at 3.29c. Final prices are 1 point lower for the week.

HIDES.—On the 27th futures closed unchanged to 10 for the double holiday. December closed at 6.35c., nominal; March old, 4.30c., new, 4.80c.; new June, 5.40 to 5.50c.; Sept., 5.90c. On the 28th futures advanced 10 to 40 points inal; March old, 4.30c., new, 4.80c.; new June, 5.40 to 5.50c.; Sept., 5.90c. On the 28th futures advanced 10 to 40 points after a weak opening. New long buying and short covering accounted for the later advance. Spot hides were steady in the domestic market but Argentine prices were a fraction off. Sales included 7,500 hides in New York and 5,000 in Chicago at prices not reported; also 2,000 frigerifico light steers at 5 13-16c. Dec. closed here at 6.50c. nominal; March, old at 4.70c.; bid new at 5c.; new June at 5.62 to 5.68c. Sept. at 6.15c. On the 29th futures advanced 3 to 20 points with sales of 1,480,000 lbs., also 43,000 spot hides in Chicago and 18,000 frigerifico steers at 5%c., a further decline. Futures closed with Dec. new, 6.60 to 6.70c.; March, old, 4.85c. bid; March, new, sold at 5.20c.; June new, 5.60 to 5.75c.; Sept. new sold at 6.18c.; New York City calfskins, 9-12s, \$1.15; 7-9s, 65c.; 5-7s, 60c. To-day prices ended 20 to 25 points higher with sales of 42 lots. Final prices are 60 to 65 points higher than a week ago.

OCEAN FREIGHTS were rather quiet.

COAL.—At Hampton Roads trade has been more active at higher prices. Steamers there on Saturday and Sunday took 151,813 long tons of bituminous coal, a good showing for any week-end in the past four years. Norfolk was more active and slightly higher. The current holiday shutdowns in southern West Virginia have already strengthened the tone of most smokeless products. Run of mine: Central Illinois No. 5, \$1.50; No. 6, \$1.50; western Kentucky, 75c.; Western No. 6, \$1.35; Indiana 4th vein, \$1.40; 5th vein, \$1; Brazil, \$1.60; Booneville, 90c.; Pocahontas and Sewell, \$1.25 to \$1.75; Beckley, \$1.50 to \$1.75. Foregoing are bottom prices, the tops are 10c. to 15c. more. Southern smokeless slack is quoted 60 to 80c., other slack, 50 to 75c. The demand for the smallest screenings continues good.

TOBACCO.—Withdrawals of all tobacco products in No-

TOBACCO.-Withdrawals of all tobacco products in No-TOBACCO.—Withdrawals of all tobacco products in November were under the corresponding period of last year with the exception of snuff. Cigarettes' loss was comparatively small and considerably less than the general record for the year to date, while cigars made also a somewhat better record than the eleven months average. As the result of objections voiced by tobacco interests the House Committee on Agriculture struck out of the provisions of the domestic allotment plan, all reference to tobacco. The Richmond tobacco market which handles only the sun cured product closed on Dec. 21 and will not reopen until Jan. 3. The market has been open for two weeks but the sales so far, because of conditions have been unusually light and the prices low. Many producers have been holding back their crops but with proper weather conditions in January an increase low. Many producers have been holding back their crops but with proper weather conditions in January an increase in offerings is expected. Advices from Toronto last week stated that eight million pounds of Canadian tobacco have been sold to an English tobacco company. This order, according to the Provincial Minister of Agriculture has relieved the situation among Ontario tobacco growers who had been unable to sell their crops. Some weeks ago, after a conference with the Provincial Minister the growers planned to form a co-operative company to market the crop. A report from Tampa to the U. S. "Tobacco Journal" states that practically all Tampa cigar factories have suspended operations for inventory taking. Some will reopen January 3 and others later on in the month. Persistent rumors continue of an impending cut in standard cigarette prices, although it has been impossible to verify them, and they have up till now been emphatically denied. The report has been that some of the more popular 15 cent brands would be reduced to 11 or even to 10 cents but some conservative members of the trade scout the idea that retail prices will sell

below 12½c. a package at the most. Trade in the south has been what might have been expected over the holidays. Prices have been generally unchanged and business has kept within seasonal limits.

within seasonal limits.

SILVER.—The market was closed Saturday. On the 27th inst. futures closed 40 to 50 points lower with sales of 375,000 ounces. Dec. and Mar. were switched at 19 points premium. Six transferable notices were issued. Jan. was in the best demand and closed at 24.76c.; May ended at 25.10 to 25.12c. On the 28th inst. new lows were made. Commercial bar silver fell ¼c. to 24¾c., a new all-time low. Futures dropped 15 to 20 points with Dec. closing at 24.55c.; Jan. at 24.55c.; March at 24.73c. and May at 24.90c. On the 29th inst. futures dropped 8 to 20 points with sales of 700,000 ounces. Commercial bar at New York dropped ¼ to 24¼c. while London was 16¾d. Jan. here closed at 24.47c.; March at 24.63 to 24.75c.; May at 24.74c.; July at 24.85c.; Nov. at 25.25c., and Dec. at 25.35c. To-day futures closed 23 to 37 points higher with sales of 900,000 ounces. Jan. ended at 24.70c.; Feb. at 24.79c.; March at 24.88c.; April, 24.94c.; May at 25.00c.; June, 25.11c.; July, 25.22c.; August, 25.32c.; Sept., 25.42c.; Oct., 25.52c.; Nov., 25.62c., and Dec., 25.72c. Final prices are 42 to 55 points lower for the week.

COPPER was more active for foreign account recently

points lower for the week.

COPPER was more active for foreign account recently with a sale of one lot of 600 tons reported at 5.15c. Generally 5.10c. was quoted but some sales were said to have been made at 5.05c. The domestic market was still quiet. Sales of futures on the 29th inst. consisted of two lots with the closing as follows: Jan., 3.70 to 4c.; Feb., 3.79c.; Mar., 3.85c. bid; April, 3.90c. with 5 points higher for each succeeding month, all nominal. In London on the 29th inst. standard advanced 7s. 6d. to £28 17s. 6d. for spot and £29 5s. for futures; sales 50 tons spot and 600 tons of futures; the bid price of electrolytic was 12s. 6d. to £34 7s. 6d.; asked price up 5s. to £34 10s. To-day copper for domestic delivery was quoted at 5c. and for foreign account 5.10c. Futures here closed with Jan., 3.74c.; Feb., 3.79c.; Mar., 3.84c.; April, 3.89c.; May. 3.93c.; June, 3.97c.; July, 4.01c.; Aug., 4.05c.; Sept., 4.09c.; Oct., 4.13c.; Nov., 4.17c.; Dec., 4.21c.; all nominal; no sales. nominal; no sales.

TIN was quiet with spot Straits 22.80c. Futures on the 29th inst. were unchanged with sales of 10 tons and with Jan. 22.10c. and 10 points higher for each succeeding month. In 22.10c. and 10 points higher for each succeeding month. In London on that day spot standard advanced 15s. to £149 2s. 6d.; futures up 10s. to £150 5s.; sales, 190 tons spot and 220 tons of futures; spot Straits advanced 15s. to £154 7s. 6d.; Eastern, c. i. f., London, unchanged at £153 10s. To-day futures closed with Jan., 22.10c.; Feb., 22.20c.; March, 22.30c.; April, 22.40c.; May, 22.50c.; June, 22.60c.; July, 22.70c.; Aug., 22.80c.; Sept., 22.90c.; Oct., 23.00c.; Nov., 23.10c.; Dec., 23.20c., all nominal; sales, nil.

LEAD was rather quiet but steady at 3c. New York and 2%c. East St. Louis. Jan. was the most wanted. Ore prices have been unchanged in the tri-State district for many weeks. In London on the 29th inst. spot was unchanged at £10 15s.; futures off 1s. 3d. to £11 2s. 6d.; sales, 100 tons

ZINC was steadier with a little more interest being shown in some quarters. The price was unchanged at 3½c. East St. Louis. In London on the 29th inst. spot fell 2s. 6d. to £15 6s. 3d.; futures off 1s. 3d. to £15 7s. 6d.; sales 175 tons of futures; at the second session prices dropped 2s. 6d. on sales of 250 tons of futures.

on sales of 250 tons of futures.

STEEL.—It was reported early in the week that a structural steel award involving 60,000 tons for the Belt-Line Railroad bridge at New Orleans had been made. 20,000 tons of this are reported as going to the American Bridge Co. and 40,000 to the McClintic-Marshall Corporation. Good sized orders are pending for cast iron pipe from Seattle and Chicago. The Santa Fe Railroad will also buy 3,000 tons of track fastenings. Although there is considerable doubt as to just how big a month January will be for the trade it is expected that there will be a noticeable improvement over December. It is also gratifying to note that production has at no time gone below 13% of capacity although at one time it was feared that July's low level of 12% would be broken. Automobile demand has helped. Composite prices of iron and steel as compiled by the "Iron Age", are unchanged at 1.948c. a pound for finished steel and \$6.92 a ton for steel scrap. and \$6.92 a ton for steel scrap.

PIG IRON has been as a rule quiet; 1,000 tons of Eastern Pennsylvania recently sold at \$12.50. The total sales at New York for the last week are stated at 750 to 1,000 tons.

WOOL.—Boston wired a government report as follows: "Wool is mostly quieter than last week. Continued inquiries, however, are being received and some business is being reported. Most of the demand is for various types of 64s and finer Western grown wools. The more or less scattered selling indicates fairly steady prices. Short French combing and clothing staple lines from Colorado, New Mexico and Arizona bring mostly 37 to 38c.; scoured, basis, in original bags. Good French combing offerings from similiar lines are held at 39 to 40 scoured basis." Boston wired on the 29th that scattered purchases of wool are mostly very moderate and covered a rather wide selection of wools although short combing 64s and finer Western wools

comprise the larger portion of the purchases. Strictly combing 56s fleeces are receiving some call at 19½ to 20½c. in the grease for the bulk of the Ohio lines, and around 19c. for the best semi-bright wools. Wool prices generally are steady to firm in spite of a slow market.

WOOL TOPS futures to-day closed unchanged to 50 points higher. Sales included March at 53.20c. and April at 53.80 to 53.40c. Jan. and Feb. ended at 52.20 to 54.20c.; March at 53 to 54.20c.; April and May, 53 to 53.80c.; June, 53 to 54.40c.; July, 53.40 to 54.40c.; Aug., 53.40 to 54.90c.; Sept., 53.50 to 55c.; Oct., 54.20 to 55.20c., and Nov., 54.20 to 55.70c.

SILK.—The futures market was closed on Saturday but reopened on the 27th inst. and closed at a decline of 2 to 4c. with sales of 920 bales. New lows for the movement were made. Jan. ended at \$1.31; Feb. at \$1.31 to \$1.32; March to June at \$1.32 to \$1.33; July at \$1.33 and Aug. at \$1.32 to \$1.33. On the 28th inst. after early weakness, recovered and at the end showed net gains of 1 to 3c.; sales, 1,900 bales. Japanese cables were weaker. Jan. ended at \$1.32 to \$1.33; Feb. at \$1.33 to \$1.35; March, \$1.35; April, \$1.34 to \$1.35; May, June and July, \$1.35, and Aug., \$1.34 to \$1.35. On the 29th inst. futures were more active and 1 to 3c. higher. Cables were higher. Local sales totaled 1,420 bales. Jan. ended at \$1.33 to \$1.35; Feb. at \$1.38 to \$1.39; March at \$1.36 to \$1.38; and April to Aug., \$1.37 to \$1.38. To-day prices ended unchanged to 3 points higher with sales of 980 bales. Jan. and Feb. ended at \$1.36; March, \$1.37; April to Aug. incl., \$1.37 to \$1.39; Final prices are 2 points higher than a week ago. SILK.-The futures market was closed on Saturday but

COTTON

Friday Night, Dec. 30 1932.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening the total receipts have reached 182,588 bales, against 162,170 bales last week and 262,064 bales the previous week, making the total receipts since Aug. 1 1932, 5,751,196 bales, against 6,181,369 bales for the same period of 1931, showing a decrease since Aug. 1 1932 of 430,173 bales.

* Estimated.

COTTON has at times weakened under hedge selling and scattered liquidation, but of late trade demand and a scarcity of contracts have reasserted themselves and caused a noticeable rally. The Southern cotton farmer, like the Western grain growers, has grown very discouraged with the prolonged prevalence of low prices, and as he has sold much of the present crop he is disposed to market the rest slowly with an eye to possible improvement later. As the case stands, the cheapness of American cotton in the world's slowly with an eye to possible improvement later. As the case stands, the cheapness of American cotton in the world's market has caused an increase in the world's consumption of the American product. Latterly hedge selling has fallen off noticeably, and at the same time American, European and Japanese trade interests have been steady buyers. Under the circumstances, selling of cotton for the decline has latterly been less confident. The spot markets at the South remain on a very high basis, and if they are not at all active it is largely because of this fact and the smallness of the offerings. of the offerings.

of the offerings.

On the 27th inst. prices ended 2 points off to 1 point up in a dull market, with a holiday in Liverpool. There was more or less trade buying, and no great pressure to sell. The New York Cotton Exchange Service said: "Consumption of American cotton throughout the world totaled in November about 1,159,000 bales, against 1,168,000 bales in November last year and 929,000 bales in November two years ago. In the four months ended on Nov. 30 the total was about 4,473,000 bales compared with 4,018,000 bales in the same period last season and 3,555,000 bales two seasons ago. The decline of 0.8% from October to November compares with an average decline of 2.3% in the seven years from 1925 to 1931, inclusive. However, the number of working days in October this year was less than usual, while November had more than usual. Daily rate of world consumption declined from October to November by about 2%, whereas in the last seven years it has increased about 3%. On this basis, world consumption from October to November moved contrary to the seasonal trend."

Production of cotton in India for the 1932-33 season has been officially estimated at 3,542,000 bales, an increase of only 141,000 bales, or 4%, over the unusually small crop last year, according to reports reaching the Department of Agriculture. The estimate of cotton acreage in that country as of Dec. 1 is 20,779,000 acres, about 7% below last year's total. There is evidently considerable trade opinion, however, that the Government estimate is rather low and a larger demand for American cotton there is looked for owing to the reported lower quality of the Indian long staple crop.

reported lower quality of the Indian long staple crop.
On the 28th inst. prices advanced 5 to 7 points on trade buying and lessened offerings. Contracts were scarce. Speculation was dormant and the spot business at the South Speculation was dormant and the spot business at the South fell off noticeably, with the basis remarkably firm and the South no anxious seller. Worth Street was quiet but steady. Manchester was slow. Everywhere trading was light, but everywhere the tone was firm. These were the outstanding features of the day aside from a fair demand from the trade, which was the best buyer. Stocks and wheat advanced.

On the 29th inst. there was a rise of 14 to 17 points, with contracts scarce and the trade, shorts and others steady buyers. The South was still a reluctant seller at current low prices, with more than 50% of the crop and the interior crop disposed of. American cotton has been cheap compared with

buyers. The South was still a reluctant seller at current low prices, with more than 50% of the crop and the interior crop disposed of. American cotton has been cheap compared with foreign cotton. The Cotton Exchange Service takes the ground that the increase of 455,000 bales in world consumption of American staple in the first four months of the season was due to active buying of cotton goods here and abroad, when prices of raw material were rising in August; to consumption in the United States of cotton turned over to the Red Cross by the Government; to the low price of the American staple, compared with foreign growths, and to currency inflation throughout the Far East. But one of the chief reasons for the firmness of prices recently noticeable was the smallness of offerings by discontented farmers at the South, many of whom are expecting helpful legislation of some sort at Washington. Worth Street on the 29th inst. reported sheetings and fine goods quiet but firm; print cloths quiet at 3%c. for 38½-inch 64x60's.

To-day a net decline of 9 to 13 points occurred after a morning rally had carried prices about 4 points higher than the previous close. Liverpool came 4 to 5 points better than due, and continued strong to its close. Manchester reports were cheerful. An expansion of operations there was predicted for shortly after the new year, and an increasing demand for cloth from India was forecast. Weather reports were unfavorable. Despite this, hedge selling increased later in the day and the weakened technical position encouraged liquidation and some short selling for a turn. The orderliness of the decline was helped by the persistent trade demand. Worth Street was quiet. Mills are believed to be in a well-sold condition and with considerable requirements yet to be filled during the next few months. Final prices are 9 to 34 points higher for the week. Spot cotton ended at 6.10c. for middling, or 15 points higher than a week ago.

are 9 to 34 points higher for the week. Spot cotton ended at 6.10c. for middling, or 15 points higher than a week ago.

The world cotton production for the 1932-33 season was estimated to-day by the Department of Agriculture at 24,000,000 bales, or the smallest in five years. This is 200,000 bales below the estimate of Dec. 8 and 3,500,000 bales below the estimate of Dec. 8 and 3,500,000 bales 200,000 bales below the estimate of Dec. 8 and 3,500,000 bales under last year's crop. Foreign production was estimated at 11,300,000 bales, or 900,000 more than last season and 600,000 less than 1930-31. Cotton textile mills continued to operate at higher levels in November, with total consumption the largest than for any month since April 1931. Consumption of domestic mills in November was 504,000 bales, compared with 502,000 bales in October and 425,000 bales last year.

Staple Premiums 60% of average of six markets quoting for deliveries on Jan. 6 1933. Differences between grades established for deliveries on contract Jan. 6 1933 are the average quotations of the ten markets designated by the Secretary of Agriculture. .08 .08 .08 .08 .08 Striet Midding

Vieleburg Above zero of gauge		20 5

RECEIPTS FROM THE PLANTATIONS.—The following table indicates the actual movement each week from the plantations. The figures do not include overland receipts nor Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports.

^{*} Includes the combined totals of 15 towns in Oklahoma.

Week Ended	Rece	elpts at P	orts.	Stocks	ut Interior	Towns.	Receipts	from Pla	ntation

				2,256,650					
				2,260,614					
				2,231,716					
				2.213.374					

The above statement shows: (1) That the total receipts from the plantations since Aug. 1 1932 are 6,503,091 bales; in 1931 were 7,548,269 bales, and in 1930 were 8,024,019 bales. (2) That, although the receipts at the outports the past week were 182,588 bales, the actual movement from plantations was 164,246 bales, stock at interior towns having increased 18,342 bales during the week. Last year receipts from the plantations for the week were 220,741 bales and for 1930 they were 98,714 bales.

1932		1,000		8,000	41,000	234,000			
1931		2,000		24,000	45,000	183,000			
1930	3,000	16,000	34,000	53,000	110,000	459,000	673,000	1,242,000	

According to the foregoing, Bombay appears to show an increase compared with last year in the week's receipts of 3,000 bales. Exports from all India ports record a decrease of 16,000 bales during the week, and since Aug. 1 show a decrease of 168,000 bales.

MANCHESTER MARKET.—Our report received by cable to-night from Manchester states that the market in yarns is firm and in cloths is steady. Demand for India is improving. We give prices to-day below and leave those of previous weeks of this and last year for comparison:

ALEXANDRIA RECEIPTS AND SHIPMENTS.—We now receive weekly a cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years:

Alexandria, Egypt, Dec. 28.	1932.		1931.		1930.	
Receipts (Cantars)— This week Since Aug. 1	3.09	70,000	4,80	50,000 02.008		85,000 78,934
Exports (Bales)—	This Week.	Since Aug. 1.	This Week.	Since Aug. 1.	This Week.	Since Aug. 1.
To Liverpool To Manchester, &c To Continent and India To America	17,000	49.072 43.985 208.657 15.812		$\begin{array}{r} 105,882 \\ 72,721 \\ 243,724 \\ 9,895 \end{array}$	9,000	69,731 57,319 238,882 4,295
Total exports	17.000	317.526	18,000	432.222	23,000	370,227

Note.—A cantar is 99 lbs. Egyptian bales weigh about 750 lbs.

This statement shows that the receipts for the week ended Dec. 28 were 170,000 cantars and the foreign shipments 17,000 bales.

BREADSTUFFS

Friday Night, Dec. 30 1932.

On the 27th inst. prices declined 5c., with trade

dull and wheat lower. WHEAT prices closed the week with a firm tone. The market is becoming more and more affected by the small country offerings, which is necessitating purchases by mills in the terminal markets. The virtual "sellers' strike" which corn growers have been conducting for some time appears to be spreading to wheat growers. In a dull speculative market this tendency is having a steadying effect on prices

now and should become even more of an influence with the holidays out of the way. There has been a fair amount of hedge selling, but no export business is possible yet. The crop movement should increase after the turn of the year.

On the 24th inst. prices closed unchanged to 1/4c. higher

the year.

On the 24th inst. prices closed unchanged to ½c. higher in a pre-holiday market, in which a demand for December was something of a feature. Winnipeg closed ¼ to ¾c. higher. Liverpool and Buenos Aires were closed. No export business was reported. India was reported to have bought a cargo of Australian wheat. Parts of the Southwest that have needed rain the most got none.

On the 27th inst. prices fell ½ to ½c., with Buenos Aires off 1½c. and Winnipeg 1½ to 1½c. Scattered liquidation in Chicago met with no support. May wheat sold down to 43¾c. a bushel. or the lowest price at which the May delivery ever so'd on the Chicago Board of Trade. This is only slightly more than one-half the cost of production. According to a Chicago wire, dealings in future deliveries of all grains totaled only 5,700,000 bushels in Chicago on Saturday, a new low record. contrasting with a daily volume of 54,930,000 for the entire year of 1928. Peter B. Carey, President of the Chicago Board of Trade, said: "The market has been subjected to a gradual restriction of trade throughout the life of the Federal Farm Board. Records show also that our volume declined precipitately after the last Congress passed a prohibitive tax of 5c. on every \$100 commodity future sale, a tax boost of 400%."

In a dull market prices on the 28th inst. closed ½ to ¾c. higher. Eearlier in the day new record lows were made by May and July wheat, but short covering set in, which in the absence of selling pressure and with the influence of a higher stock market turned prices unward. Buving against bids was also a factor in the rally. Cash markets were firm but inactive. Liverpool was off the equivalent of ¾ to ¾c. while Winnipeg's advance about paralleled Chicago's.

On the 29th inst. prices closed ½c. lower to ¼c. higher. In the main the tone was firm, with the mills forced to

buy in terminal markets by the smallness of the offerings in their own territory either because the farmers do not care to sell at present prices or else have not the wheat. There was more or less covering of hedges as cash wheat was sold. Some of the No. 1 hard bought at Missouri River points was sold at equal to 3c. above Chicago May. There may be fairly large deliveries of December in evening up transactions.

Washington wired, Dec. 29, that an estimate that 745, washington when, Dec. 23, that an estimate that 130, 000,000 bushels of wheat remained on Dec. 1 as the surplus carryover for export in Canada, Australia, Argentina and the United States was made to-day by the Bureau of Agricultural Economics. This amount, which is 37,000,000 bushels larger in the four countries than at the same time last year, appears in the face of restricted markets throughout the world and with wheat exports from the United States. last year, appears in the face of restricted markets throughout the world, and with wheat exports from the United States from July 1 to Dec. 1 nearly 16,000.000 bushels behind the total for the corresponding period last year. Exclusive of foreign shipments from stocks of the Grain Stabilization Corporation, the United States in the last five months has exported only 3,530,247 bushels to foreign countries, compared with 19,443,000 in the corresponding period last year. More than half the total surplus carryover for the four countries, moreover, was held on Dec. 1 by the United States, with 416,000,000 bushels. Three of the countries had smaller stocks on that date than at the same time last year, but Canada's increased surplus from 237,000,000 bushels in but Canada's increased surplus from 237,000,000 bushels in 1931 to 311,000,000 bushels in 1932 was more than sufficient to offset reductions in the other three, and left a net gain of 37,000,000 bushels. The surplus carryover in each of

of 37,000,000 bushels. The surplus carryover in each of the four principal wheat exporting nations on Dec. 1 1931 and Dec. 1 1932 was shown in bushels as follows: United States, 416,000,000 against 433,000,000 in 1931; Canada, 311,000,000 against 237,000,000 in 1931, and Argentina, 18,000,000 against 25,000,000 in 1931.

To-day prices closed ½ to 1½c. higher at about the day's best prices. Active covering near the close, together with buying by sellers of privileges, gave it a final push. Continued dry weather in the Southwest, reports of smaller estimates of yield from the Argentine, together with indications of colder weather spreading from Canada over the winter wheat belt all helped sentiment to be more bullish. Attention was also paid to the possibility of a clash in the Far East, which would have the most far-reaching consequences. Aside from the above, the principal factor in wheat's growing strength is the scarcity of offerings in this country. Primary receipts are very small everywhere, and

To-day prices closed % to %c. higher. Trading was more active, and the gain in wheat was an influential factor. Receipts of corn during December were estimated at 1.750,000 bushels. This company with December 1999.

RYE has been mostly firm, with wheat as an example, though rye itself has not been without a certain independent strength, even if not at present very active. On the 24th inst. prices ended unchanged to ¼c. off. On the 27th inst. prices declined ½ to 1c. on small trading. On the 28th inst. prices closed ½c. lower to ½c. higher, December and May being the steadiest. On the 29th inst. prices ended ½ to ½c. higher, partly in sympathy with the firmness of wheat. To-day prices advanced 5% to 1c. There was no particular speculative feature, and wheat's advance was followed by rye. Final prices are ½c. lower to %c. higher for the week. BARLEY has of late been firm, though rather quiet,

BARLEY has of late been firm, though rather quiet, awaiting some stimulus to larger trading such as beer legislation. On the 24th inst. prices closed ¼c. lower. On the 28th inst. prices closed ¼c. higher, May ending at 28%c. On the 29th inst. there was an advance of ¼c. May closed at 28%c. in response to the rise in other grain. To-day May barley closed at 29c., or ½c. higher. Barley's continued dullness seems to foreshadow doubt of the passing of the Collier Bill during this session of Congress. For the week, May shows a decline of ½c.

WEATHER REPORT FOR THE WEEK DEC. 28.—The general summary of the weather bulletin issued by the Department of Agriculture, indicating the influence of the weather for the week ended Dec. 28, follows:

DEC. 28.—The general summary of the weather bulletin issued by the Department of Agriculture, indicating the influence of the weather for the week ended Dec. 28, follows:

Following two weeks of abnormally cold weather in most northwestern, central and eastern portions of the country, the week just closed brought a reaction to abnormally high temperatures everywhere from the Great Plains eastward. There was a complete thaw in all districts, and many sections in the interior valleys that had weekly mean temperatures 15 deg. to 18 deg. above normal for the current week. December has had decided contrasts in warmth. The first week of the mely cod weather, and this was succeeded, in turn, by decidedly high temperatures for the season.

Chart 1 shows that all States from the Great Plains eastward were from 6 deg. to about 10 deg, warmer than normal, with the greatest plus departures in northern sections. There were some sharp contrasts in temperatures of the season.

Chart 1 shows that all States from the Great Plains eastward were from 6 deg, to about 10 deg, warmer than normal, while the northwestern portions in near-by localities in the more western States. For example, Montana was some 10 deg, warmer than normal, while the northwestern portions in fact, all central and southern districts west of the Rocky Mountrains were decidedly cold, with the greatest minus departures from normal in the western portions of Wyoming, Colorado, and New Mexico, and also in Utah and Arizona; most of this area had average temperatures from 7 deg, to 10 deg, below normal.

Chart If shows that precipitation was heavy in much of the South. The heaviest falls occurred in Oklahoma, northwestern Arkansas, east-central Texas, and the interior the week. Bentouville, Ark., 6.6 inches; Abilene, Tex., 3 inches; Vicksburg, Miss., 3.6 inches, and Atlanta, Ga., 3.2 inches. The falls were heavy also in Missouri and were moderate to heavy in much of the upper Mississippi Valley and western Lake region. The extreme Southeast had little or no rain,

THE DRY GOODS TRADE

New York, Friday Night, Dec. 30 1932.

While the volume of the movement of textiles out of primary channels has suffered noticeable contraction during the few days since the Christmas week-end, a considerable amount of filling-in business remains in evidence as the New Year prepares to make its appearance, with the tendency to take a more hopeful view of the outlook, usually prevalent even at the end of such an arduous year as 1931 proved to be, accentuated by buyers' willingness to translate their greater confidence into a certain amount of ordering. Retail activity stepped up substantially in the few days preceding Christmas. Retailers are at the moment concentrating their attention on closing the year with light inventories, meanwhile surveying prospects for January. They will offer very many unusual values in the January sales and expect that the public will respond not merely to the excellent values which will be generally obtainable, but also take the opportunity, which many consumers have doubtless been waiting for, of making deferred purchases of clothing and household goods at the liquidation prices which the public has come to expect after the holiday business is completed. Output in primary channels continues at a high rate, with the rayon division operating at capacity and day and night, and cotton goods machinery engaged at some 97% of single-shift capacity. Silk and woolen goods output is much more moderate, however, and in view of the currently better buying interest, which many think indicates rather urgent buying needs which will be released in a continuous stream of orders during the early weeks of 1933, some observers would not be surprised to see current production rates in cotton goods maintained intact for the balance of the winter-without necessarily weakening prices materially. The outlook for rayons is viewed with more optimism than for several years. Notwithstanding full production, shipments have continued to go forward heavily in recent weeks, and the industry is closing the year with what are estimated to be unprecedentedly low stocks. Most mills, meanwhile, are sold ahead through February, and immediate plans are for continuation of capacity output through the first quarter of 1923. Silk goods worked are received. first quarter of 1933. Silk goods markets are pretty quiet,

but dealers in greige goods report a continuous though moderate demand for matelasse cloths, as a feature of current conditions. Converters are reported to be covering their needs for as much as two months ahead in this connection. Stocks are generally light, and in a number of directions at the lowest levels since the war. Prospects for the new year are regarded with mixed feelings, ranging from the confident sentiments of those mills which have already booked substantial spring business to the uncertainty of those which have not yet booked much business and are consequently dubing about the total endering likely to be deep quently dubious about the total ordering likely to be done for spring.

DOMESTIC COTTON GOODS.—Persistent firmness of prices in the face of similarly insistent pressure for concessions is the most encouraging feature to report of cotton goods markets for the week. The quietude which always characterizes the market in the closing weeks of the year has the trade in its grip, though scattered filling-in demand in a number of directions is reported, but a rising trend in the raw market, and the already improved price-basis in gray goods markets, fortified by the recent buying spurt which considerably improved statistical conditions in the latter, prevented the now lagging demand from shattering the priceprevented the now lagging demand from shattering the price-scale. Inquiry has shown some broadening of late for future devileries of prints and carded broadcloths, it is reported, and the considerable number of buyers who continue to show interest appears to substantiate the truth of the contention that a good proportion of the new season's needs are still to be contracted for. Some requests for speedy deliveries of forward contracts, in advance of the date specified, are also encouraging, and in some cases revealed an insufficiency of goods for quick shipment. There has been no general movement on the part of buyers to lay in merchandise for January sales, though ordering for this purpose has not been entirely lacking. Repeated attempts by buyers to undermine prices in gray goods met with by buyers to undermine prices in gray goods met with practically complete defeat, and such attempts were as repeatedly followed by the placing of moderate amounts of business at the market figures. Slight concessions occasionally were allowed on small quantities of carded broadsloanly were anowed on small quantities of carded broad-cloths, but large quantities were consistently held for full quotations, with a definite scarcity of such fabrics evident for delivery before February. Narrow sheetings were similarly hard to get in quantity below the quoted market price. A warning note is being sounded by those opposed or only partly in favor of co-operative curtailment policies relative to efforts in the trade to get united action on stabilization of print cloths prices, the projected consumer tax on cotton, and toward putting through modifications of current anti-trust legislation. They fear that part of the trade may be misled into the assumption that success of these movements would enable sellers to dictate prices, whereas conservative interests continue to maintain that prices must continue to be made on the basis of buying capacity, which can only be expanded by production on such an economical basis as will conform to the great reduction in purchasing power brought about by the depression. Print cloths 27-inch 64x60's constructions are quoted at 2%c., and 28-inch 64x60's at 2½c. Gray goods, 39-inch 68x72's constructions are quoted at 3%c., and 39-inch 80x80's at 4%c.

WOOLEN GOODS.-Markets for woolens and worsteds are ending the year in conditions of some confusion. ness trends are mixed and the outlook obscured by the irreguness trends are mixed and the outlook obscured by the irregular and inconsistent tenor of buying. Salesmen returning from initial spring trips are reported to have met with a preponderance of disappointment, though some houses specializing in worsted garments retailing at around \$15 are reported to have obtained substantial orders from the South and Southwest Linguistics appropriate and distributors reported to have obtained substantial orders from the South and Southwest. In general, converters and distributors are being held back from anticipatory buying by the tight credit situation as well as the general effect of the depression, and retailers re similarly affected notwithstanding the very small supplies which most of them have on hand. Retailers, hard pressed by financial conditions, are tending to specialize in cheap but durable fabrics and, are reported to be meeting with a good measure of success in this reliev to be meeting with a good measure of success in this policy, as customers are more concerned, in many cases, with price and wearing capacity now than with styling and design. However, it is hoped that a definite change in this trend will become apparent soon after the turn of the year, when sellers intend to promote style and color vigor year, when sellers intend to promote style and color vig-orously in new offerings, and when clearer indications of style trends should make buyers less cautious in picking out fabrics. Fleece finished cloths are the currently active out fabrics. Fleece finished cloths are the currently active feature of women's wear, with the great majority of other fabrics in that division seasonally dull. However, spring lines have been very widely sampled and commended, and it is thought that buying will prove substantial and fairly confident once it gets under way. The appearance of the genuine spring movement is expected around the middle of Tanuary

FOREIGN DRY GOODS.--After having moved a substantial volume of household linens for holiday consumption, local linen markets are now beginning to record some initial ordering of dress goods and suitings. Prices are firm. The holiday atmosphere intensified the characteristic quietude in burlaps, though some scattered covering kept prices steady. Light weights are quoted at 3.05c., and heavies at 4.25c.

State and City Department

NEWS ITEMS

Alabama.—Special Legislative Session Called to Act on State Finances.—According to news dispatches from Montgomery on Dec. 22, Governor B. M. Miller has issued Montgomery on Dec. 22, Governor B. M. Miller has issued a call for an extra session of the Legislature to convene on Jan. 31 for enacting measures to meet the State's financial situation. He is said to have asked that provision be made for the payment of debts and additional income to balance the State's budget. Other requests are for a constitutional amendment for the issuance of "bonds, warrants or certificates to pay the State's debts and unpaid appropriations," the submission of an income tax amendment and a sales tax to continue in force until the income tax becomes effective. On Nov. 8 the voters of this State rejected a proposed \$20,000,000 bond issue and an income tax proposition.—V. 135, p. 3550. -V. 135, p. 3550.

California.—Supreme Court Denies Writs of Mandate Previously Granted to Irrigation Districts on Priority of Tax Liens.—Reversing its previous stand on the question of priority of tax liens as between counties and irrigation dispriority of tax liens as between counties and irrigation districts on lands contained within such irrigation districts, the State Supreme Court has recently ruled that general taxes take precedence over special assessments of any kind, and denied the writs of mandate for the cancellation of certain taxes that were granted to the four complainant districts on March 1—V. 134, p. 2948. This later decision has the effect of denying that property acquired by an irrigation district in satisfaction of delinquent assessments is State property, and as such is exempt from taxation. A Sacramento dispatch to the "United States Daily" of Dec. 22 reports on the ruling as follows:

The Supreme Court of California, after granting rehearings on four appli-

reports on the ruling as follows:

The Supreme Court of California, after granting rehearings on four applications for writs of mandate to be directed to the boards of supervisors and district attorneys of San Diego, Glenn, Merced and Riverside counties directing them to make and approve orders cancelling certain taxes, assessments, tax sales, liens and tax deeds, has denied them all. Cases were all similar, and were brought by the La Mesa; Lemon Gorve and Spring Valley Irrigation District, the Glenn-Colusa Irrigation District, the Merced Irrigation District and the Palo Verde Irrigation District, the Merced Irrigation District and the Palo Verde Irrigation District, "alter egos" of the State. The irrigation districts all wanted the counties to be compelled to forego their prior liens for unpaid taxes because the lands are now State property. The Court found:

1. In the absence of a statutory or constitutional provision a district priority exists in favor of general taxes over special assessments of every kind, and every presumption is against the legislative attempt to prefer the lien of special assessments to those of general taxes.

2. Liens of county and municipal taxes and special assessments, under the authority of State agencies for puolic purposes are all on an equality, and where property is purchased by an irrigation district because of the failure of the owner to pay the irrigation district assessments the district is not entitled to have the liens of county and municipal taxes, on the property at the time the land is purchased by the district, canceled.

Illinois.—Protective Committee Formed on Municipal

Illinois.—Protective Committee Formed on Municipal Bonds in Cook, Lake and Du Page Counties.—According to Associated Press dispatches from Chicago on Dec. 26 the organization of a bondholders' protective committee in the interest of improvement bonds that have been issued by municipalities in Cook, Lake and Du Page counties, was announced on that date by Knight Blanchard, Chairman of the committee. He is reported to have said that the committee of the committee the committee. He is reported to have said that the committee intends to combat vigorously the deliberate nonpayment of taxes.

Knoxville, Tenn.—Bond Refunding Plan Ready for Consideration.—Copies of a refinancing plan which has been evolved at conferences between the city officials investment, bankers and bond attorneys, will shortly be sent out to the holders of city bonds maturing from 1933 to 1939, aggregating about \$8,500,000. The plan calls for an exchange of new refunding bonds maturing in 1958 for the present bonds and it is considered to be the most feasible solution of the funded debt problem of the city.—V. 135, p. 1358. A refunding arrangement was made necessary on some of the city's obligations because of very slow tax collections and extremely heavy maturities during the next seven years. The New York "Times" of Dec. 28 carried the following report on the refinancing plan:

on the refinancing plan:

Holders of bonds of the City of Knoxville, Tenn., which will mature from 1933 to 1939 in the aggregate amount of approximately \$8.500,000, will receive soon formal notification of the city's refunding plan, which calls for the exchange of new bonds, general obligations of the city, that will mature in 1958.

The plan represents an effort by city officials and bankers to avert the heavy maturities in the next seven years. The banking group, headed by the American National Co. of Nashville, includes the Equitable Securities, the Cumberland Securities Corp., and Clayton, Evans & Clayton, all of Nashville, and the Fidelity-Bankers Trust Co. of Knoxville.

The new bonds, which are to carry the same rates of interest as those to be refunded, will be callable in the first five years at 105 and then at decreasing premiums to par at maturity. Water bonds are not included, as the city's water system is self-supporting. A sinking fund is expected to retire the new issue at maturity.

New York City.—Hofstadter Legislative Committee Counsel Issues Final Report on City Inquiry—Wide Changes in Present Charter Recommended.—Far reaching changes in the structure of the government of the City of New York were advocated on Dec. 27 in the final report of Samuel Seabury, counsel for the Hofstadter legislative committee, the culmination of 28 months of official investigation of the city's courts and administrative procedure. Mr. Seabury's charter proposals emphasized the need for a proportional representation of minorities and have been made in an effort to curb the power of Tammany Hall. He urged an emergency measure by the Governor to the Legislature asking that body

to provide for a city referendum next spring which would act on his suggestions. It is his recommendation that the charter be revised as soon as possible so that next fall's municipal election can be held under the new document. The following 10 fundamental changes were proposed to correct evils now present in the city government:

The following 10 fundamental changes were proposed to correct evils now present in the city government:

1. The election of a single legislative chamber, or council, to succeed to the powers of the Board of Estimate and Apportionment, the Board of Aldermen and the Commissioners of the Sinking Fund.

2. That the members of the Council shall be elected by boroughs, upon a non-partisan ballot, without party designation or party emblems and under a system of proportional representation, the result of which would be that every group sufficiently strong to be entitled thereto would be represented in the Council, each according to its relative strength:

3. That the Mayor and the Comptroller shall be nominated by petition, thus eliminating a nomination in the primary and voted for upon a non-partisan ballot without party designation or party emblems, under a system of preferential voting;

4. That there should be established a genuine executive budget, the provisions concrning which are modeled largely upon the provisions contained in the State Constitution;

5. That the Borough Presidents' offices should be abolished and their duties vested in a Commissioner of Public Works, to be appointed by the Mayor;

6. That there be ten specified departments, exclusive of education, by which shall be performed the various executive and administrative functions now performed by the various executive and administrative functions now performed by the various city departments;

7. That within one year the old charter be revised so as to permit the retaining of the basic and fundamental provisions that properly belong in the charter, and the incorporation of other of its provisions, if they still be useful, in an administrative code. Provision is also made in the proposed charter shall remain in full force and effect;

8. That there be a Commissioner of Inquiry to be appointed by the Council, and removable only by a two-thirds vote thereof, would inure to the one of the city government;

9. There should be a non-partisan, not a bi-p

Board of Estimate Votes Pay Cuts of 6 to 33% for City Employees Drawing Over \$2,000.—On Dec. 29 the Board of Estimate adopted a salary reduction program for all city employees receiving more than \$2,000 a year, based on a minimum 6% reduction and rising to 33.9% for the highest brackets. In a second resolution the Board ordered the minimum 6% reduction and rising to 33.9% for the highest brackets. In a second resolution the Board ordered the Budget Director to begin work on recommendations for other reductions in the 1933 budget which will eliminate another \$20,000,000—V. 135, p. 4242. It was estimated by Charles L. Kohler, Budget Director, that the salary reduction schedule adopted will cut the city's general pay rolls approximately \$18,000,000. The other \$2,000,000 will be taken from the appropriations of the Board of Transportation, Board of Water Supply and other city departments which receive their payrolls in a lump sum. He announced also that the Surrogates, General Sessions judges and Supreme Court justices have agreed to a voluntary 10% salary reduction. The resolution embodying the schedule of pay reductions approved by the Board reads as follows:

The rates of compensation received by each and every officer or person on Dec. 15 1932 shall be reduced east follows:

The rates of compensation received by each and every officer or person on Dec. 15 1932, shall be reduced as follows:
Group 1. Officers or persons receiving a rate of compensation of \$2,000 a year but not exceeding \$3,000 cut 6% of the compensation not in excess of \$2,000, 7% of the compensation in excess of \$2,000 but not in excess of \$3,000.
Group 2. Officers or persons receiving the rate of compensation of \$3,000

\$2,000, 7% of the compensation in excess of \$2,000 but not in excess of \$3,000.

Group 2. Officers or persons receiving the rate of compensation of \$3,000 a year but not in excess of \$4,000, the same reduction as officers or persons in Group 1 and in addition 8% of the compensation in excess of \$3,000 but not in excess of \$4,000.

Group 3. Officers or persons receiving the rate of compensation of \$4,000 a year but not in excess of \$5,000, the same reduction as officers or persons in Group 2 and in addition 9% of the compensation in excess of \$4,000 but not in excess of \$5,000.

Group 4. Officers or persons receiving a compensation of \$5,000 a year but not in excess of \$10,000, the same reduction as officers or persons in Group 4. Officers or persons receiving a compensation of \$5,000 but not in excess of \$10,000.

Group 5. Officers or persons receiving a compensation of \$10,000 a year but not in excess of \$15,000, the same reduction as officers or persons in Group 4 and in addition 15% of the compensation in excess of \$10,000 but not in excess of \$15,000.

Group 6. Officers or persons receiving compensation in excess of \$15,000, the same reduction as officers or persons in Group 5 and in addition 33 9-10% of the compensation in excess of \$15,000 provided that in making such reductions the compensation of an officer or person shall not be reduced in \$2,000 and provided further that if the above reduction result in a rate of compensation for the year 1933 shall be less than \$2,000 and provided further that if the above reduction result in a rate of compensation shall be fixed at the next lower direct multiple of \$5, then the rate of compensation shall be fixed at the next lower direct multiple of \$5, then the rate of compensation shall be fixed at the next lower direct multiple of \$5.

Oregon.—Legislature Called in Special Session for Jan. 3. A call for the State Legislature to convene in special session on Jan. 3, a week in advance of the regular session, has been issued by Governor Meier, reports the "United States Daily" of Dec. 28. The subjects specified for consideration at the session, it is said, are:

(1) To consider ways and means for raising revenue to take the place of general property tax levied for State purposes and (2) to consider ways and means for providing relief for the unemployed in the State of Oregon.

West Virginia.—New Constitutional Amendment Limits Both Direct State Tax and Aggregate Real Estate Tax.—At the general election on Nov. 8 the voters approved a constitutional amendment limiting both the direct State tax on property and the aggregate tax on real estate of various classes, intangible personal property and other classes of property. A bulletin issued as of Jan. 1 by the National Association of Real Estate Boards reported on the new amendment as follows:

amendment as follows:

The West Virginia amendment provides both for classification of property for tax purposes and for tax limitation, and also makes possible the imposition of a State income tax. It was adopted by an overwhelming vote. Text is as follows:

"Subject to the exceptions in this section contained, taxation shall be equal and uniform throughout the State, and all property, both real and personal, shall be taxed in proportion to its value to be ascertained as directed by law. No one species of property from which a tax may be collected shall be taxed higher than any other species of property of equal value; except that the aggregate of taxes assessed in any one year upon

personal property employed exclusively in agriculture, including hortculture and grazing, products of agriculture as above defined, including livestock, while owned by the producer, and money, notes, bonds, bills and accounts receivable stock and other similar latangible personal property shall not exceed 50 cents on each \$100 of value thereon and upon all property owned, used and occupied by the owner thereof exclusively for residential purposes and upon farms occupied and cultivated by their owners or bona fide tenants, \$1; upon and all other property situated outside of municipalities, \$1.50; and upon all other such property situated within municipalities, \$2; and the Legislature shall further provide by general law, for increasing the maximum rates, authorized to be fixed, by the different levying bodies upon all classes of property, by submitting the question to the voters of the taxing units affected, but no increase shall be effective unless at least 60% of the qualified voters shall favor such increase, and such increase shall not continue for a longer period than three years at any one time, and shall never exceed by more than 50% the maximum rate herein provided and prescribed by law; and the revenue derived from this source shall be apportioned by the legislature among the levying units of the State in proportion to the levy laid in said units upon real and other personal property; but property used for educational, literary, scientific, religious or charitable purposes, all cemeteries, public property, the personal property including livestock, employed exclusively in agriculture as above defined and the products of agriculture as so defined while owned by the producers may by law be exempted from taxation; household goods to the value of \$200 shall be exempted from taxation; the Legislature shall have authority to tax privileges, franchises, and incomes of persons and corporations and to classify and graduate the tax on all incomes according to the amount thereof and to exempt from taxation incomes

BOND PROPOSALS AND NEGOTIATIONS

ABERDEEN, Grays Harbor County, Wash.—ELECTION DETAILS.—We are advised by the City Clerk that the vote was 3,763 "for" as compared to 798 "against," in the approval of the \$175,000 warrant funding bonds on Dec. 5, previously reported in V. 135, p. 4242. The bonds will nature in 16 years. No definite date of sale has as yet been determined.

BOND OFFERING.—Sealed bids will be received, according to report, until 5 p. m. on Jan. 18, by the City Clerk for the purchase of an issue of \$175,000 warrant funding bonds. These bonds were favorably voted at the election on Dec. 5—V. 135, p. 4242.

ALLIANCE CITY SCHOOL DISTRICT, Stark County, Ohio.—BONDS NOT SOLD.—The issue of \$30,000 6% school bonds offered on Dec. 27—V. 135, p. 4063—was not sold, as no bids were received. Dated Jan. 15 1933 and due \$10,000 on Jan. 15 in 1934, 1935 and 1936. Private sale of the issue may be made.

ANNE ARUNDEL COUNTY (P. O. Annapolis), Md.—TAX RATE DECLINES.—The tax rate for 1933 has been fixed at \$1.77 per \$100 of assessed valuation, which compares with the present year's levy of \$2.45. The taxable basis in 1932 was \$56,361,438, resulting in revenue amounting to \$1.274,426. The debt service item during the current year totaled \$185.875.

ANTRIM COUNTY (P. O. Bellaire), Mich.—PURCHASE OF RELIEF BONDS REFUSED.—The Reconstruction Finance Corporation has refused to accept \$21.800 calamity bonds of the county as collateral for a relief loan, because of the amendment to the State constitution approved at the general election on Nov. 8, which limits the tax levy on real property for all purposes, State and local, with certain exceptions, to \$1.50 per \$100 of assessed valuation.—V. 135, p. 3720. The county, however, is expected to obtain the relief funds through the proceeds of a loan made by the Corporation to the State, under the provisions of Section C of the Emergency Relief and Construction Act of 1932. The county was advised of the Michigan State Unemployment Commission, which read as follows:

"Due to the 15-mill tax amendment passed November election the R. F. C. will not accept Calamity Bonds of your municipality. Your application is transferred from Section E to C. Your money is here in Lansing. Send your attorney to Lansing to arrange agreement with Attorney-General for repayment of money to State. Bring information delinquent taxes for years 1929, 1930, 1931 and amount of this you can pledge, also your share of gas and weight tax."

AUBURN, Cayuga County, N. Y.—BOND SALE.—The \$415,000 coupon bonds offered on Dec. 27—V. 135, p. 4413—were awarded to B. J. Van Ingen & Co. and Merrill, Lynch & Co., both of New York, jointly, as follows:

B. J. Van Ingen & Co. and Merrill, Lynch & Co., both of New York, jointly, as follows:

\$215,000 bonds sold as 3.60s, at par plus a premium of \$268.75, equal to 100.125, a basis of about 3.57%. The total includes \$134,000 public impt. and \$81,000 emergency relief bonds. The impt. issue matures Jan. 1 as follows: \$13,000 from 1934 to 1939, incl., and \$14,000 from 1940 to 1943, incl. The relief issue is due Jan. 1 as follows: \$20,000 from 1934 to 1936, incl., and \$21,000 in 1937.

200,000 water bonds sold as 3¼s, at par plus a premium of \$40, equal to 100.02, a basis of about 3.74%. Dated Jan. 15 1933 and due \$10,000 on Jan. 15 from 1934 to 1953, incl.

The complete award of \$415.000 bonds is being reoffered for general nvestment on a yield basis, according to maturity, as follows: 1934, 2%; 1935, 2.50%; 1936, 3%; 1937, 3.25%; 1938, 3.50%; 1939, 3.55%; 1940 to 1943, 3.60%; 1944 to 4.947, 3.65%; and 3.70% for the maturities from 1948 to 1953, incl. The bonds, according to the bankers, are legal investment for savings banks and trust funds in the States of New York, Massachusetts and Connecticut. In addition, it is said, they constitute direct and general obligations of the entire City payable from unlimited ad valoreum taxes against all the taxable property therein.

The following is an official list of the bids received at the sale:

BALTIMORE COUNTY (P. O. Towson), Md.—TAX RATE REDUCED.—The Board of County Commissioners has fixed the tax rate for 1933 at \$1.50 per \$100 of assessed valuation, which compares with this year's levy of \$1.75. The taxable basis for 1932 was \$237,175,474, which produced revenue in amount of \$3,242,332, it was said. Debt service requirements in 1932 were \$539,011.

BAY COUNTY (P. O. Bay City), Mich.—NOTE OFFERING.—Sealed bids addressed to Oscar M. Lalonde, County Clerk, will be received until 2 p. m. (eastern standard time) on Jan. 3 for the purchase of \$31,800 notes, issued in anticipation of 1929 and 1930 delinquent taxes.

BEACON, Dutchess County, N. Y.—CERTIFICATES OFFERING.—Henry E. Emery, Commissioner of Finance, will receive sealed bids until 2 p. m. on Jan. 3 for the purchase of \$62,000 not to exceed 6% interest certificates of indebtedness. Dated Jan. 3 1933. Denom. \$1,000. Due Jan. 3 as follows: \$1,000 in 1934 and 1935; \$2,000 in 1936 and 1937, and \$56,000 in 1938. Certificates will be in coupon form, registerable as to interest only, or as to both prin. and int. Rate of int. to be expressed in a multiple of ¼ or 1-10th of 1%, and must be the same for the entire issue. Prin. and int. (J. & J. 3) are payable at the Matteawan National Bank, Beacon. A certified check for \$1,250, payable to the order of the City, must accompany each proposal. The approving opinion of Clay, Dillon & Vandewater of New York will be furnished the successful bidder.

BETHLEHEM, Litchfield County, Conn.—FUNDING BAUTHORIVED.—At a special Town meeting held recently it was to issue \$42,000 bonds to fund a total deficit of \$42,399.86

BOULDER COUNTY (P. O. Boulder), Colo.—BOND SALE.—The \$200,000 issue of 4% semi-ann. court house construction bonds offered for sale on Dec. 27—V. 135, p. 4413—was awarded to Boettcher, Newton & Co. of Denver at a price of 100.877, a basis of about 3.89%. Due from 1937 to 1946.

BOWMAN COUNTY SCHOOL DISTRICT NO. 13 (P. O. Scranton), N. Dak.—CERTIFICATE OFFERING.—Sealed bids will be received until 1 p. m. on Jan. 4, by R. W. Cornell, District Clerk, for the purchase of a \$3,000 issue of certificates of indebtedness. Interest rate is not to exceed 7%. Denom. \$500. Dated Jan. 4 1933. Due on April 4 1934. A certified check for 5% must accompany the bid.

BRENTWOOD (P. O. St. Louis), Mo.—BONDS VOTED.—It is reported that the issuance of \$45,000 in grade school bonds was approved the city

CAMBRIDGE, Guernsey County, Ohio.—BOND OFFERING.—Collin Moore, City Auditor, will receive sealed bids until 12 M. on Jan. 14 for the purchase of \$25,000 6% sanitary sewer construction bonds. Dated Oct. 15 1932. Dat.om. \$1,000. Due Oct. 15 as follows: \$4,000 from 1933 to 1937 incl., and \$5,000 in 1938. Int. is payable in A. & O. Bids for the bonds to bear interest at a rate other than 6%, expressed in a multiple of ½ of 1%, will also be considered. A certified check for \$250, payable to the order of the city, must accompany each proposal.

CANTON, Stark County, Ohio.—NOTE SALE.—Samuel E. Barr, City Auditor, states that the issue of \$150,000 6% coupon emergency poor relief bonds unsuccessfully offered on Nov. 21—V. 135, p. 3721—has been replaced by notes of that amount, which latter have been sold to the Reconstruction Finance Corporation.

CARBONDALE, Lackawanna County, Pa.—BOND OFFERING.—James A. Moffit, City Clerk, will receive sealed bids until 1 p. m. on Jan. 16 for the purchase of \$200.000 5% coupon debt funding bonds. Dated Jan. 1 1933. Denom. \$1,000. Due \$10,000 on Jan. 1 from 1934 to 1953 incl. Interest is payable semi-annually in January and July. The bonds, it is said, are free of all taxes in Pennsylvania and legal investment for trust funds. A certified check for 10% of the bonds bid for, payable to the order of the City Treasurer, must accompany each proposal. The approving opinion of Townsend, Elliott & Munson, of Philadelphia, will be furnished the successful bidder. These bonds were voted at the general election on Nov. 8 1932.

CAVALIER COUNTY (P. O. Langdon), N. Dak.—CERTIFICATES NOT SoLD.—The \$25,000 issue of certificates of indebtedness offered on Dec. 23—V. 135, p. 4414—was not sold, as only one bid, an offer by a local investor to take \$1.500 at 6½%, was received, and that was rejected. The County Auditor states that these certificates will probably be re-offered for sale in January.

CENTER INDEPENDENT SCHOOL DISTRICT (P. O. Center), Shelby County, Tex.—EGNTD SALE.—The \$31,000 issue of 5% s rial school bonds that was registered on Nov. 9—V. 135, p. 3553—has since been purchased by the State Permanent School Fund.

school bonds that was registered on Nov. 9—V. 135, p. 3553—has since been purchased by the State Permanent School Fund.

CHICAGO, Cook County, III.—OUTSTANDING TAX ANTICIPA*
TION WARRANTS AGAINST 1928, 1929 AND 1930 LEVIES TOTAL \$4,067,500.—M. S. Scymczak, City Comptroller, announced on Dec. 28 that of the original \$137,899,277 tax anticipation warrants of the city issued against tax levies of 1928, 1929 and 1930, only \$4,067,500 are now outstanding. This balance, comprising 1929 city corporate and 1930 Library tax warrants, will soon be retired as tax collections are increasing rapidly. Mr. Scymczak declared. The Comptroller stated that since Nov. 28 receipts of city and school taxes from the County Collector have been \$2,425,000 on 1930 taxes and \$118,569 on 1929 taxes. The Comptroller further commented on the city's financial condition as follows; "The city of Chicago has not defaulted on its bonds or interest and is keeping constant vigilance over the maturity on Jan. 1 1933. Chicago is also cutting the cost of government, in keeping with the changing times and conditions. The 1930 appropriation, payable from taxes, was \$99,822-194, and of this amount \$8,225,302 was salvaged. The 1932 appropriation was reduced by \$18,918,379 below the 1931 figure, and the 1933 appropriation will be \$77,850,000, which represents a reduction of \$21,972,000 below the 1931 basis. As a consequence 1931, 1932 and 1933 tax bills will be lower, which will tend to restore confidence and bring tax collections back to normal."

SCHOOL WARRANTS CALLED.—Lewis E. Meyers, President of the Board of Education, has issued a call for the redemption, on or before Jan. 5 1933, of the following described tax anticipation warrants: Educational fund, 1930, Nos. E-1337 to E-1396, for \$5,000 each, 5¼%, dated Nov. I 1930. Warrants will be paid upon presentation, through any bank to the City Treasurer's office, Halsey, Stuart & Co., Chicago, or at the Guaranty Trust Co., New York.

CHICAGO, Cook County, III.—\$15,036,000 ReFUNDING BONDS SOLD.—City Comp

chicago, or at the Guaranty Trust Co., New York.

CHICAGO, Cook County, Ill.—\$15,036,000 REFUNDING BONDS SOLD.—City Comptroller M. S. Scymczak on Dec. 29 accepted the offer of a Chicago banking group composed of the First Union Trust & Savings Bank, the Harris Trust & Savings Bank, Continental Illinois Co., Inc., and the Northern Trust Co. to purchase at par and accrued interest \$15,036,000 6% refunding bonds, which had originally been intended for sale on Dec. 22—V. 135, p. 4414. The bonds are dated Jan. 1 1933 and will mature on Jan. 1 1938. In addition to purchasing the bonds, the bankers also agreed to buy \$1,700,000 of Board of Education bond and interest tax warrants. The sale of \$16,736,000 bonds and warrants makes possible the payment of \$23,489,100 bond principal and interest obligations of the city and of the Board of Education which mature on Jan. 1 1933, it was said, as the city's aggregate of funds contains enough available cash to meet the balance of the payments.

In making public announcement of the purchase of the bonds, the banking group stated that retail offering of the issue would not be made until after Jan. 3 1933, pending which holders of the bonds of the city and school board which mature Jan. 1 1933 and Feb. 1 1933 will be privileged to purchase the refunding bonds at par and accrued interest in place of their maturing obligations. Holders of the bonds becoming due, in a letter made public by local bankers on Dec. 19, were urged to exchange their securities for the refunding issue on the ground that failure of the refunding plan would "be harmful to the city and its credit position and would delay for an indeterminate period the payment of principal and interest about to mature." In this connection, it was reported on Dec. 30 that many holders of the maturing bonds had agreed to the exchange proposal. The old bonds, it was pointed out, bear interest at the rates of from 4 to 5%, as compared with 6% on the refunding issue. This latter issue will be approved as to legality by Chapman & C

1928, 1929 and 1930, will operate to purchase such of these bonds as may be from time to time offered to it, at not to exceed par and accrued interest. It was further said that these bonds will, in the opinion of Messrs. Chapman & Cutler, attorneys, constitute direct and general obligations of the City of Chicago, payable from unlimited ad valorem taxes levied against all the taxable property therein and the full faith and credit of the city will be pledged to their payment; and will be further secured by the pledge of the uncollected taxes levied for bond and interest purposes for the years 1928, 1929 and 1930. These uncollected taxes so pledged exceed \$16,000,000. As officially reported, assessed valuation for taxation (1931) is estimated at \$3,285,000,000 and total debt is \$152,608,911. Population, U. S. Census (1930) is 3,376,438.

CHICAGO WEST PARK DISTRICT (P. O. Chicago), Cook County, III.—PLAN SALE OF \$4.000.000 BONDS AT 15% DISCOUNT.—It was reported on Dec. 28 that negotiations are in progress between the Board of Park Commissioners and an Eastern banking institution regarding the proposed sale to the latter of \$4.000.000 bonds at a discount of 15%, or on the basis of a price of \$85 for each \$100 bond. The Board has been advised that such a sale would be legal, it was said. The bonds are scheduled to bear interest at not more than 5% and mature within 20 years. Proceeds of the sale would be used for various purposes, including payment of defaulted bonds and obligations due in January 1933, the report continued. The District is in default on more than \$1,000,000 in bond principal and interest, it was further stated.

CLARK COUNTY (P. O. Springfield), Ohio.—BOND SALE.—The \$136.218.33 poor relief bonds offered on Dec. 24—V. 135, p. 4244—were awarded as 4½s to Braun, Bosworth & Co. of Toledo at par plus a premium of \$451, equal to 100.33, a basis of about 4.41%. Dated Dec. 30 1932. Due March 1 as follows: \$24,218.33 in 1934; \$26,000, 1935; \$27,000, 1936; \$29,000 in 1937, and \$30,000 in 1938.

\$29,000 in 1937, and \$30,000 in 1938.

CLEVELAND, Cuyahoga County, Ohio.—ADDITIONAL INFORMATION.—In connection with the award on Dec. 14 of \$1,372,000 bonds (of \$5,332,000 offered) as 6s to the Guardian Trust Co., of Cleveland, at 100.02, a basis of about 5.99%—V. 135, p. 4244—we are advised by Ray L. Lamb, Director of Finance, that conditional bids received at the sale were as follows: Magnus & Co. and Walter, Woody & Heimerdinger, Inc., both of Cincinnati, jointly, offered par plus a premium of \$221 for the issue of \$200,000 general sewer bonds at 6% interest, while a group composed of the Provident Savings Bank & Trust Co., Cincinnati, the Banc Ohio Securities Co., Columbus, Seasongood & Mayer and Van Lahr, Doll & Isphording, Inc., the latter two of Cincinnati, bid par for \$672,000 bonds at 6% interest, comprising the \$400,000 street opening issues, \$200,000 water works, \$40,000 public health and welfare and \$32,000 final judgment bonds. The offering by the city consisted of seven issues aggregating \$5,332,000.

*This covers the first half of 1932 tax collections on real, utilities and tangible personal, and real and utilities for second half.

The city has received \$682,788.81 from intangible personal for the first half 1932, not included in above figures. No tangible or intangible personal received for 2nd half.

CLERMONT COUNTY (P. O. Batavia), Ohio.—BOND SALE.—The \$68,074.38 road construction bonds offered on Dec. 8—V. 135, p. 3722—were awarded to Stranahan, Harris & Co., of Toledo, at par plus a premium of \$47.70, equal to 100.07. Dated Nov. 15 1932. Due Nov. 15 as follows: \$7,000 from 1934 to 1941 incl.; \$6,000 in 1942, and \$6,074.38 in 1943.

CLINTON COUNTY (P. O. Clinton), Iowa.—BOND SALE.—An issue of \$110,000 5% judgment funding bonds is reported to have been jointly purchased by the White-Phillips Co., of Davenport, and the City National Bank of Clinton, for a premium of \$325, equal to 100.29

CLOQUET, Carlton County, Minn.—BOND SALE.—The \$15,000 issue of poor reflief bonds offered for sale on Dec. 27—V. 135, p. 4414—was purchased by the First National Bank of Cloquet, as 5s, at par. Dated Jan. 2 1933. Due \$3,000 from Jan. 2 1935 to 1939, inclusive.

COKE COUNTY ROAD DISTRICT NO. 2 (P. O. Robert Lee), Tex.—PROPOSED BOND CANCELLATION.—We are advised that a special election has been called for Jan. 7 in order to have the voters pass on a proposal to cancel \$150,000 of a total issue of \$175,000 road impt. bonds that was authorized at an election held on Sept. 26 1931 and registered on Jan. 13 1932—V. 134, p. 705. The entire issue of bonds was to be used for improvements in Road Districts Nos. 2 and 4 and it appears the \$150,000 to be cancelled represented the share of District No. 2.

COLUMBUS Freeding Country Object No. 2.

COLUMBUS Freeding

COLUMBUS Country Columbus Columb

COLUMBUS, Franklin County, Ohio.—BOND OFFERING.—Samuel J. Willis, City Clerk, will receive sealed bids until 1 p. m. (Eastern standard time) on Jan. 12 for the purchase of \$94,951 4½% (series No. 195) special assessment street impt. bonds. Dated Feb. 1 1933. Due March 1 as follows: \$9.951 in 1935; \$10,000 from 1936 to 1939 incl., and \$9,000 from 1940 to 1944 incl. Prin. and int. (M. & S.) are payable at the office of the fiscal agency of Columbus in N. Y. City. Bids for the bonds to bear interest at a rate other than 4½%, expressed in a multiple of ½ of 1%, will also be considered. A certified check for 1% of the bonds bid for, payable to the order of the City Treasurer, must accompany each proposal.

CORPUS CHRISTI, Nucces County, Tex.—LOAN APPLICATION.—The city is reported to have applied to the Reconstruction Finance Corporation for a loan of \$500,000 with which to reconstruct a dam above the city. This dam is said to have been washed out in a flood on the Nucces River in 1930, and the supply of drinking water to the city is threatened seriously unless the dam is rebuil. It is understood that the loan would be repaid with revenue raised by the city water works.

BOND PURCHASE AGREEMENT.—It was announced by the Reconstruction Finance Corporation on Dec. 23 that it had agreed to purchase the above stated \$500,000 5½% water plant repair bonds.

The text of the Corporation's statement on the loan reads as follows:

The R. F. C. agreed to buy at par \$500,000 of 5½% water plant repair bonds of the City of Corpus Christi, Tex. The bonds are to mature serially from Feb. 1 1934, to Aug. 1 1945, and are to be secured by a pledge of the city's water revenues.

The money is to be used to repair the LaFruta Dam on the Nucces River which is a part of the main stroage reservoir for the water supply of Corpus Christi. The dam was completed in the fall of 1929 and partially destroyed in 1930.

It is estimated that an experience of 1920.

which is a part of the main stroage reservoir for the water supply of Corpus Christi. The dam was completed in the fall of 1929 and partialy destroyed in 1930.

It is estimated that an average of 400 men will be directly employed on this project for six months. According to the estimates, about \$170,000 is to be spent for labor on the site; while the purchase of \$330,000 worth of materials will afford indirect employment for many more men. In its application the city stated that work can be commenced within 60 days and should be completed in six months.

The water supply of Corpus Christi is inadequate without the stroage capacity that the LaFruta dam was constructed to provide, for at times the flow of the Neuces River is less than the city's consumption of water. Delay in making the proposed repairs will increase the damage that has been done to the dam and also increase the cost of repairing it.

To construct the LaFruta Dam the city of Corpus Christi issued and now has outstanding \$2,626,000 of 6% water plant revenue refunding bonds maturing serially from 1933 to 1960 incl. The Corporation's agreement to purchase the repair bonds is conditioned, among other things, upon consummation of a plan of readjustment of the existing debt whereby the bonds to repair the dam will be given prior rights.

A further condition is that the present dam, which is proposed to be repaired, shall be inspected and declared to be of a satisfactory and adequate design by a consulting engineer to be seleted by the Corporation and who shall also maintain supervision over the construction of the project.

CORTLANDT (P. O. Peekskill), Westchester County, N. Y.—

CORTLANDT (P. O. Peekskill), Westchester County, N. Y.—BOND OFFERING.—S. Allen Mead, Town Clerk, will receive sealed bids until Jan. 17 for the purchase of \$73,086.95 not to exceed 6% interest highway bonds, due May 1 as follows: \$1,086.95 in 1934 and \$4,000 from 1935 to 1952 inclusive.

CORVALLIS, Benton County, Ore.—BONDS CALLED.—It is stated by F. E. McKenna, Clerk of the Water Commission, that the said Commission is calling for payment \$25,000 of water bonds, issue of Jan. 2 1906, variously numbered from 20 to 148. Interest on these bonds will cease on Jan. 2.

COWLITZ COUNTY (P. O. Kelso), Wash.—WARRANTS CALLED.—It is reported that \$108,000 warrants were called for payment on Dec. 20 as follows: \$55,000 school district; \$29,000 road district; \$5,000 diking; \$20,000 Longview; \$14,000 Kelso, and \$1,000 indigent soldiers' fund warrants.

BONDS NOT SOLD.—We are informed that the \$108,500 issue of war-rant refunding bonds offered on Dec. 22—V. 135, p. 4414—was not sold as there were no bids received.

CRANFORD TOWNSHIP (P. O. Cranford), Union County, N. J.—NOTES AUTHORIZED.—The Township Committee on Dec. 28 authorized the issuance of \$142,000 notes in anticipation of receipt of unpaid 1931 taxes and \$288,000 notes in anticipation of uncollected taxes for the current year.

CRAWFORD COUNTY (P. O. Bucyrus), Ohio.—BOND OFFER-ING.—Sealed bids addressed to the Board of County Commissioners will be received until 10 a. m. on Jan. 7 for the purchase of \$48,000 6% poor relief bonds. Dated Dec. 20 1932. Due March 1 as follows: \$8,500 in 1934; \$9,000, 1935; \$9,600, 1936; \$10,200 in 1937 and \$10,700 in 1938. Interest is payable in March and Sept. Bids for the bonds to bear interest at a rate other than 6%, expressed in a multiple of ½ of 1%, will also be considered. A certified check for \$4,800 must accompany each proposal.

DAYTON, Montgomery County, Ohio.—INTEREST RATE ON \$322,000 BONDOS REDUCED—\$112,000 PURCHASED BY FEDERAL RELIEF AGENCY.—The City Commissioners passed an emergency ordinance on Dec. 21 reducing the rate of interest on the issue of \$322,000 poor relief bonds, unsuccessfully offered as 6s on Nov. 30—V. 135, p. 3887—to that of 3%, E. E. Hagerman, Director of Finance, explained that the Reconstruction Finance Corporation had agreed to purchase \$112,000 worth at 3% interest, with the possibility that it would purchase the balance at the same rate later in the year.

DEARBORN, Wayne County, Mich.—\$112,000 RELIEF LOAN OBTAINED.—Mayor Clyde M. Ford announced on Dec. 23 that the city had received a loan of \$112,000 for welfare purposes from Henry Ford at 3% interest, and repayable in five yearly instalments. The city has made application to the Reconstruction Finance Corporation for a loan of \$270,000 to provide for relief needs in January and February 1933, it was said.

DELAWARE, Delaware County, Ohio.—WATER PLANT PUR-CHASE BONDS AUTHORIZED.—The City Council recently adopted an ordinance providing for the issuance of \$740,000 5% mortgage bonds to finance the purchase of the plant facilities of the Delaware Water Co. It is believed that opponents of the proposal may force submission of the bond _sue to a vote of the electorate.

DES MOINES, Polk County, Iowa.—PROPOSED BOND SALE.—are now informed that the \$190,000 issue of judgment funding bontentatively reported to be scheduled for sale—V. 135, p. 4415—will offered about Feb. 1 1933.

DETROIT, Wayne County, Mich.—\$20,000,000 BOND ISSUE BILL SIGNED BY GOVERNOR.—Governor Wilber M. Brucker on Dec. 30 signed the bill adopted on the previous day by the State Legislature authorizing the city to issue \$20,000,000 5-year tax anticipation bonds. The Legislature was called in special session on Dec. 27 upon the petition of city officials and industrial leaders, who claimed that unless a bond issue was authorized the city would be forced to default in its obligations maturing in January and subsequent months in 1933—V. 135, p. 4414. Governor Brucker, in his message to the Legislature pointing out the grave financial difficulties confronting the city and the necessity of enabling bond legislation, stated that the city has a bonded indebtedness of \$368,946,583 and notes outstanding in amount of \$44,696,000. He further said that at delinquency in the city amounted to \$63,277,000 and warned of the far-reaching consequences throughout the State should the city be obliged to default in its bond principal and interest charges. The Detroit "Free Press" of Dec. 28 quoted from the Governor's message as follows:

1. Its securities will instantly become seriously depreciated to the point of being comparatively valueless and unmarketable, which will result in the loss of millions to those who have trusted this municipality of our State.

2. Its securities will find either no market at all or a seriously impaired market, which will add still more millions to the burden of its taxpayers to be immediately collected instead of hairs award out for the part of t

result in the loss of millions to those who have trusted this municipality of our State.

2. Its securities will find either no market at all or a seriously impaired market, which will add still more millions to the burden of its taxpayers to be immediately collected, instead of being spread out for repayment.

3. Its credit will at once become practically worthless because its securities will cease to be "legal for savings and trust funds" in Michigan and sister States the country over. It will remain u. der this financial handicap by the law of the several States for a period of from 10 to 25 years after such default.

4. Securities of other Michigan municipalities will be adversely affected and will be impaired in price and market, because there is nothing more sympathetically sensitive than the bond market.

5. Securities of the State of Michigan will be likewise adversely affected because Detroit furnishes a large share of the taxable property upon which State bonds are predicated.

6. The credit of the largest city in our State will be demoralized and this would add to the contagion of broken financial confidence in our State.

which State bonds are provided with the credit of the largest city in our second this would add to the contagion of broken financial confidence in this would add to the contagion of broken financial confidence in State.

7. The effect of the default will be cumulative, in that it would undoubtedly be but the beginning of greater default in Detroit and elsewhere. The history of default in municipal bonds shows that where one occurs the tax collections drop 50% the next year because of its effect upon the taxpayers themselves.

Chartagua County, N. Y.—BOND OFFERING.—

Dated Dated

DUNKIRK, Chautauqua County, N. Y.—BOND OFFERING.—Frank J. Janice, City Treasurer, will receive sealed bids urtil 8 p. m. on Jan. 3 for the purchase of \$152,000 5½% deficiency bonds. Dated Jan. 1 1933. Denom. \$1,000. Due Jan. 1 as follows: \$15,000 from 1934 to 1941 Incl., and \$16,000 in 1942 and 1943. Prin. and int. (J. & J.) are payable at the City Treasurer's office. A certified check for 5% of the amount bid, payable to the order of the City Treasurer, must accompany each proposal. The apprving opinion of Arthur B. Towne, City Attorney, will be furnished as to the validity of the issue.

DU PAGE COUNTY (P. O. Wheaton), III.—BIDS REJECTED.—BOND ISSUE REOFFERED.—Clarence V. Wagemann, County Clerk, states that the bids received at the offering on Dec. 27 of \$150.000 series of 1933 5% relief bonds were rejected, and that the issue is now being reoffered for award at 10 a.m. Jan. 6. Sealed bids should be addressed to Mr. Wagemann. The bonds will be dated Jan. 1 1933 and mature \$15,000 annually on Jan. 1 from 1934 to 1943, incl. Denom. \$1,000. Prin. and int. (Jan. & July) payable at the County Treasurer's office. The bonds, it was said, will constitute general obligations of the county, payable from ad valorem taxes levied on all the taxable property therein. The county will furnish the printed bonds and approving opinion of Chapman & Cutler of Chicago, and all bids must be so conditioned. Proposals must be accompanied by a certified check for 1%, payable to the order of William H. Baethke, Chairman of the Board of County Supervisors.

The 1932 assessed valuation of DuPage County is \$75.595.255. There are outstanding \$840.000 road bonds and about \$15.000 anticipation warrants—no other debt. The tax rate for general purposes is 25 cents per \$100 assessed valuation. Maintenance of roads is 11 cents and county road bond tax rate is 15 cents.

DURHAM, Durham County, N. C.—BONL'S APPROVED.—It is said that an application made by the city for a \$500,000 bond issue to be used for the construction of a sewage disposal plant was approved by the Local Government Comn ission when it was subnitted on Dec. 13 for official sanction by that body. The City Manager is reported to have said that the bonds will not be placed on sale until the condition of the bond market justifies such action.

EASTON, Northampton County, Pa.—BONDS NOT SOLD.—The issue of \$470,000 coupon or registered sewer assessment funding bonds offered at not to exceed 4% interest on Dec. 27—V. 135, p. 4244—was not sold, as no bids were received. Dated Dec. 1 1932. Due \$47,000 on Dec. 1 from 1933 to 1942, inclusive.

Representatives of the investment banking firms of E. H. Rollins & Sons and Edward Lowber Stokes & Co., both of Philadelphia, informed city officials on Dec. 27 that they were prepared to purchase the bonds if their attorneys, Townsend, Elliott & Munson, of Philadelphia, gave them a favorable opinion on the constitutionality of the issue. The absence of a State tax-exemption clause in the notice of sale is responsible for the lack of bids, it was said.

EL PASO COUNTY (P. O. El Paso), Tex.—PROPOSED BOND SALE.—It is said that an effort is being made by the County Commissioner's Court to sell \$116,000 of road and drainage bonds to the State Board of Education. According to report, if the bonds are sold, \$28,000 of the total will be used to reimburse the road and bridge fund account for funds expended on the McKelligon Canyon Road, and \$7,000 will be used for drainage bonds.

EPHRATA, Grant County, Wash.—BOND SALE.—The \$14,000 issue of warrant funding bonds offered for sale on Dec. 3—V. 135, p. 3722—was purchased by the State of Washington as 6s at par. Due serially in from 2 to 16 years from date and optional after 10 years. No other bids were received.

ERIE COUNTY (P. O. Buffalo), N. Y.—ADDITIONAL INFORMA-TION.—In connection with the report of the recent sale of \$1,500,000 4 ½ % tax notes, dated Jan. 3 1933 and due on Feb. 16 1933—V. 135, p. 4415—we learn that the issue was purchased jointly by the Marine Trust Co., the Liberty Bank of Buffalo and the M. & T. Trust Co., all of Buffalo.

ETOWAH, McMinn County, Tenn.—BOND EXCHANGE REPORT.

The \$37,500 issue of 6% semi-ann. refunding bords offered for sale on Dec. 2—V. 135, p. 3554—was not sold at that time as there were no bids received, but it is stated that arrangements have been made with Little Wooten & Co. of Jackson to exchange the bonds. Dated Aug. 1 1932. Due \$20,000 in 1947, and \$17,500 in 1952.

EUGENE, Lane County, Ore.—BOND RETIREMENT.—It is reported that the Water Board called for retirement on Dec. 20 a block of \$100,000 in sinking fund bonds.

FERGUS COUNTY SCHOOL DISTRICT NO. 1 (P. O. Lewiston), Mont.—BOND OFFERING.—It is reported that bids will be received until 8 p. m. on Jan. 16, by Ruth Crosap, District Clerk, for the purchase of a \$10,000 issue of school bonds. Interest rate is not to exceed 6%, payable J. & J. Dated Jan. 1 1933. Bids will be received on both serial and amortization bonds, of which the latter form will be the first choice of the School Board. A certified check for \$500 must accompany the bid.

FOSTORIA, Seneca County, Ohio.—BONDS NOT SOLD.—The issue of \$43,150 6% refunding bonds reofféred on Dec. 24—V. 135, p. 4065—was not sold, as no bids were received. Dated Sept. 1 1932 and due on Sept. 1 from 1934 to 1942, incl. The issue was originally awarded on Sept. 10 as 5\%s to the BancOhio Securities Co., of Columbus, at 100.11, a basis of about 5.73%. The award was not consummated and reoffering of the issue followed.

FRANKLIN COUNTY (P. O. Greenfield), Mass.—TEMPORARY LOAN.—The \$13,000 emergency loan issue offered on Dec. 27—V. 135, p. 4415—was awarded to the Merchants National Bank, of Boston. at 1.23% discount basis. Dated Dec. 28 1932 and due on June 28 1933. Only one bid was submitted for the issue.

FREEPORT, Nassau County, N. Y.—PROPCSED BOND ISSUE.— The Village Board on Dec. 28 voted to issue \$52,500 municipal impt. bonds, subject to the condition that the State and county welfare agencies provide \$100,000 for local work relief purposes concurrently with the municipal

appropriation. The issue is to mature over a period of 20 years and will be subject to a permissive referendum if requested within 30 days, after which bids will be invited.

GALLIPOLIS, Gallia County, Ohio.—BOND SALE.—The \$16,500 refunding bonds offered on Dec. 17—V. 135, p. 4065—were awarded as 6s, at a price of par, to the First National Bank, of Gallipolis. Dated Dec. 20 1932. Due Oct. 1 as follows; \$1,500 in 1934; \$2,000, 1935 and 1936; \$1,500, 1937; \$2,000, 1938 and 1939; \$1,500 in 1940 and \$2,000 in 1941 and 1942.

HAMDEN, New Haven County, Conn.—I ROPOSED BOND ISSUE. At the next session of the State Legislature, which convenes on Jan. 1933, the Town will seek authority to increase the amount of proposhigh school building construction bonds to \$700,000 from the figure \$500,000 mentioned in a bill previously introduced in the Legislature.

HAMPTON, Rockingham County, N. H.—BOND CALL.—Street railway bonds numbered from 77 to 86 and 91 and 92, bearing 5% interest, dated Jan. 1 1921, are called for payment at par at the First National Bank of Boston on Feb. 1 1933.

HARFORD COUNTY (P. O. Bel Air), Md.—LOWER TAX RATE FOR 1933.—The County Commissioners have fixed the tax rate for 1933 at \$1.20 per \$100 of assessed valuation, which compares with \$1.40 during the current year. This year's taxable basis totaled \$56,438,090 and produced revenue of \$602,573. Debt service figure in 1932 amounted to \$42,900, it was said.

\$42,900, it was said.

HARRISON, Hudson County, N. J.—EOND OFFERING.—Francis J. McDonald, Town Clerk, will receive sealed bids until 8:30 p. m. on Jan. 10 for the purchase of \$33,000 4½% coupon or registered public work bonds. Dated Jan. 30 1933. Denoms. \$1,125 and \$1,000. Due \$4.125 on Jan. 30 from 1935 to 1942 incl. Principal and interest (Jan. & July 30) are payable at the Hudson County Trust Co., Harrison, or at the Bankers Trust Co., New York. No more bonds are to be awarded than will produce a premium of \$1,000 over \$33,000. A certified check for 2% of the bonds bid for, payable to the order of the Town, must accompany each proposal. The approving opinion of Hawkins, Delaffeld & Longfellow, of New York, will be furnished the successful bidder.

HASKELL COUNTY (P. O. Haskell), Tex.—BONDS APPROVED.— In issue of \$119,000 5 ½ % court house impt. funding, series of 1932, nonds was approved by the Attorney-General recently.

HIGHLAND PARK, Wayne County, Mich.—NOTE SALE.—Thomas E. Shawcross, City Clerk, states that following the failure to receive a bid for the \$490,000 tax anticipation notes offered on Dec. 21, the securities were sold privately as follows; \$260,000 to the Sinking Fund. \$130,000 to the Firemen's and Policemen's Pension Funds and \$50,000 each to the Highland Park State Bank and the Peoples Wayne County Bank, both of Highland Park.

Highland Park.

HILLSIDE TOWNSHIP (P. O. Hillside), Bergen County, N. J.—

BOND OFFERING.—Sealed bids addressed to the Township Clerk will be received until 8 p. m. on Jan. 11 for the purchase of \$666.000 5, 5¼, 5½, 5¾ or 6% bonds, divided as follows:

\$538,000 general improvement bonds. Due Dec. 15 as follows: \$12,000 in 1938; \$15.000, 1939 to 1957; \$20,000, 1958 to 1968, and \$21,000 in 1969. Principal and interest are payable at the Hillside Trust Co., Hillside.

128,000 assessment bonds. Due Dec. 15 as follows: \$70,000 in 1939, and \$58,000 in 1940. Principal and interest are payable at the Hillside National Bank, Hillside.

Each issue is dated Dec. 31 1932. A certified check for 2% must accompany each proposal. The approving opinion of Hawkins. Delafield & Longfellow, of New York, will be furnished the successful bidder. These bonds are part of the total of \$855,000 offered on Sept. 14 1932, at which time no bids were received. Since that time the township has endeavored to exchange the bonds for outstanding issues.

HOLMES COUNTY (P. O. Millersburg), Ohio.—BOND OFFERING.—H. E. Gray, County Auditor, will receive sealed bids until 1 p.m. on Jan. 11 for the purchase of \$10,000 5½% poor relief bonds. Dated Oct. 1 1932. Due March 1 as follows: \$1,800 in 1934; \$1,900, 1935; \$2,000, 1936; \$2,100 in 1937 and \$2,200 in 1938. Interest is payable in March and Sept. A certified check for 5%, payable to the order of the County Auditor, must accompany each proposal.

HOUSTON, Harris County, Tex.—REFUNDING BONDS APPROVED.—It was announced by Harry A. Giles, City Comptroller on Dec. 21 that the issuance of \$494,000 in refunding bonds had been approved by State officials. The Houston "Post" of Dec. 22 reported on the action as follows: "Cancellation of period bonds in the amount of \$494,000 and the issuance of refunding serial bonds in a like amount bearing interest at a slightly lower rate has been approved by the Attorney-General and State Comptroller, City Controller Harry A. Giles announced on his return from Austin, Wednesday.

"The \$494,000 worth of period bonds were the last of an issue of \$1,500,000.

Wednesday. "The \$494,000 worth of period bonds were the last of an issue of \$1,500,000 Mr. Giles explained. Practically all of the bonds that have been paid off have been paid since 1928, he explained. "Of the period bonds, most were 40-year bonds bearing interest at a rate of $4\frac{1}{2}$ to 5%. The new bonds will bear interest at the rate of $4\frac{1}{2}$ to $4\frac{1}{2}$ %."

"Of the period bonds, most were 40-year bonds bearing interest at a rate of 4½ to 5%. The new bonds will bear interest at the rate of 4½ to 4¼ %."

ILLINOIS, State of (P. O. Springfield).—LOAN GRANTED.—The following is the text of an announcement made by the Reconstruction Finance Corporation on Dec. 29 regarding a loan of \$7.255,000 granted to this State on that day, bringing the total of loans to Illinois up to \$32,-493,228, or more than any other State:

The R. F. C., upon application of the Governor of Illinois, made available \$7.255,000 to meet current emergency relief needs in 27 counties of that State during the month of January 1933.

Of this total, \$6.770.000 is made available to Cook County (Chicago) under Title I, Section 1, subsection (e) of the Emergency Relief and Construction Act of 1932, and \$485,000 to 26 other Illinois counties under subsection (c) of that act.

Governor-elect Horner, in supporting the application of Governor Emmerson, in a message to the Corporation said:

"I heartily endorse the application presented yesterday by Mr. Ryerson in behalf of Illinois Emergency Relief Commission. While I do not assume office until Jan. 9, before which time the new Legislature will not be able to legislate upon the problem, we already have assurances from the leaders of both the Illinois Senate and House that they will promptly act upon such measures as may be necessary to provide resources to meet our tremendous and unescapable problem.

"By granting the application to cover our necessities for January you will give the Illinois Relief Commission the opportunity to tide itself over until the January meeting of the Legislature.

"In behalf of the dependent unemployed of our State and their families who but for emergency relief would be starving and unclad and shelterless, I appeal for your further co-operation, with my assurance that in the fullest good faith I will marshall every effort at my command to carry out Mr. Ryerson's representations and promises to you."

The R. F. C. heretofore has mad

emergency relief needs in the State of Illinois.

INDIANA, State of (P. O. Indianapolis).—LOAN GRANTED.—A relief loan of \$1,111,776 was granted to this State on Dec. 23 by the Reconstruction Finance Corporation for aid purposes in six counties and two municipalities. The text of the loan notice reads as follows;

"The R. F. C., upon application of the Governor of Indiana, to-day made available \$1,111,776 to meet current emergency relief needs in six counties and two municipalities in that state covering generally the period from Jan. 1 to Feb. 28 1933.

"These funds are made available under Title I, Section 1, subsection (c) of the Emergency Relief and Construction Act of 1932.

"It is understood that the State of Indiana, with its Legislature in session in January, will make every effort to meet relief needs or to enable its various political subdivisions to raise additional funds for such purposes, in order that the State and its political subdivisions may meet this emergency situation as soon as it is possible for them to do so.

"The R. F. C. has heretofore made available \$663,628 to meet current emergency relief needs in various political subdivisions of the State of Indiana."

INTERNATIONAL FALLS. Koochiching County, Minn.—BOND

INTERNATIONAL FALLS, Koochiching County, Minn.—BON SALE.—We are informed by the City Clerk that the \$40,000 issue of 4¼ semi-ann. water fund bonds voted on Dec. 19—V. 135, p. 4246—has be purchased by the State Investment Board. Due in 1947. They we approved by a count of 640 "for" to 42 "against."

JACKSON COUNTY (P. O. Jackson), Ohio.—BONDS NOT SOLD.— The issue of \$24,000 4 \(\frac{4}{3} \) poor relief bonds offered on Dec. 15—V. 135, 9, 4066—was not sold. Dated Dec. 15 1932. Due March 1 as follows: \(\frac{4}{3},300 \) in 1934; \(\frac{4}{3},500, 1935; \(\frac{4}{3},800, 1936; \(\frac{5}{3},100, 1937, \) and \(\frac{5}{3},300 \) in 1938.

JACKSONVILLE SCHOOL DISTRICT, Morgan County, Ill-PROPOSED BOND SALE.—The Board of Education voted on Dec. to issue \$110,000 bonds without approval of the electorate, but subject favorable legislative action by the State Legislature. Proceeds would used to redeem \$37,000 of outstanding teachers' warrants and for scho construction and operating purposes. A Davenport, lowa, bond firm hagreed to purchase the bonds at par, charging the District 6% interest f handling the issue, it was said. Bonds would bear interest at 5%.

JACKSONVILLE SCHOOL DISTRICT NO. 117, Morgan County, III.—BOND SALE.—The Harris Trust & Savings Bank, of Chicago, purchased during the early part of December an issue of \$18,000 5½% coupon school building bonds at a price of par. Dated Dec. 31 1932. Denom. \$1 000. Due Dec. 31 as follows: \$5 000 in 1940 \$6 000 in 1941 and \$7 000 in 1942. Prin. and int. (J. & D. 31) are payable at the aforementioned institution. Legality to be approved by Chapman & Cutler of Chicago. Public reoffering of the issue is being made at prices to yield 4.80%. The bonds in the opinion of the bankers are eligible as security for Postal Savings deposits and are being offered for investment subject to the opinion of counsel that they will be direct general obligations of the entire district payable from taxes levied against all the taxable property therein. The district is co-extensive with the city of Jacksonville which is the county seat of Morgan County.

Financial Statement (As Officially Reported by Chairman of Finance Committee Nov. 30 1932).

KEARNY (P. O. Arlington), Hudson County, N. J.—BONDS NOT SOLD.—The \$2,333,000 coupon or registered bonds, comprising five separate issues, offered at not to exceed 6% interest on Dec. 28—V. 135, p. 4246—were not sold, as no bids were received.

KELLER SCHOOL DISTRICT NO. 8 (P. O. Larson) Burke County, N. Dak.—CERTIFICATE OFFERING.—It is reported that sealed bids will be received until 2 p. m. on Jan. 3. by Margaret Schmitt, District Clerk, for the purchase of a \$2,000 issue of certificates of indebtedness.

KING COUNTY (P. O. Seattle), Wash.—BOND OFFERING.—Sealed bids will be received until 2 p.m. on Jan. 17, by George A. Grant, County Auditor, for the purchase of two issues of coupon serial bonds, aggregating \$1,750,000, as follows:

aggregating \$1,750,000, as follows:
\$1,000,000 funding bonds, series A. Dated Feb. 1 1933. Due in from two to 20 years after date.

750,000 indigent relief bonds. Dated March 1 1933. Due in from two years after date.

These bonds were authorized by resolutions passed by the Board of County Commissioners on Dec. 12. A certified check for 5% of the bid is required. Said bonds to be in denominations of one hundred dollars (\$100) or multiples thereof not to exceed one thousand dollars (\$1,000). The maximum amount of interest which said bonds shall bear is 6 per centum (6%) per annum, payable semi-annually. Each bidder submitting a bid shall specify: (a) The lowest rate of interest and premium, if any, above par at which such bidder will purchase said bonds; or (b) The lowest rate of interest at which the bidder will purchase said bonds at par. Bonds shall be sold to the bidder making the best bid, subject to the right of the Board of County Commissioners of said County to reject any or all bids and re-advertise. None of such bonds shall be sold at less than par and accrued interest, nor shall any discount or commission be allowed on the sale of such bonds.

(The above report supersedes the tentative notice given in V. 135,

(The above report supersedes the tentative notice given in V. 135, p. 4416.)

KNOX COUNTY ROAD DISTRICT NO. 5 (P. O. Benjamin), Tex.—BOND REDEMPTION.—It is reported that the county has bought back \$60 000 of a total issue of \$280 000 road bonds at a price of 96.00. The county is expected to retire \$128 000 bonds by March 1 at the same price. The State is to assume payment of the balance of bonds under the new road bond assumption law—V. 135 p. 2198.

the new road bond assumption law—V. 135 p. 2198.

LAKE COUNTY (P. O. Painesville), Ohio.—BOND SALE.—The issue of \$35,000 poor relief bonds was sold privately as 6s at a price of par after no bids had been submitted at the public offering on Dec. 28—V. 135, p. 4246. LIMA, Allen County, Ohio.—BOND OFFERING.—C. H. Churchill,
City Auditor, will receive sealed bids until 12m. on Jan. 14, for the purchase of \$53,500 6% bonds, divided as follows:
\$43,500 poor relief bonds, payable from taxes levied outside the 15 mill limitation. Dated Dec. 20 1932. Denom. \$500. Due Dec. 20 as follows:
\$7,000 from 1934 to 1937, incl.; \$7,500 in 1938, and
10,000 municipal hospital, second series bonds. Dated Jan. 15 1933.
Denom. \$100, or any multiple of \$100 as requested by the successful bidder. Due \$400 on Jan. 15 from 1934 to 1948, incl. Bonds are issued for the payment of notes heretofore sold by the city.

Principal and interest January and July and June and December) are payable at the office of the Sinking Fund Trustees. Bids for the bonds to bear interest at a rate other than 6%, expressed in a multiple of ¼ of 1%, will also be considered. Expense of delivery outside of Lima and of attorney's opinion is to be paid for by the successful bidder. Bonds are to be sold on the approving opinion of Peck. Shaffer & Williams, of Cincinnati. Bids must be accompanied by either a certified check on a solvent bank, payable to the City Treasurer, or a bond in the sum of not less than \$500 for the \$10,000 issue and \$2,000 for the \$43,500 issue.

PLIMA, Allen County, Ohio.—PROPOSED BOND OFFERING.—Charles H. Churchill.

LIMA, Allen County, Ohio.—PROPOSED BOND OFFERING.—Charles H. Churchill, City Auditor, is expected to offer for sale shortly the issue of \$43,500 poor relief bonds recently authorized by the State

Relief Commission. The city sinking fund commission and several State institutions have refused to purchase the issue, it was said. In approving the bonds, the State Relief Commission suggested that a legal opinion be obtained prior to the issuance of the obligations as the legislation under which they were authorized expires on Dec. 31 1932, and the Act requires that the bonds be advertised for sale 21 days prior to their issuance.—V. 135, p. 4416.

LOGAN COUNTY (P. O. Sterling) Colo.—WARRANTS CALLED.—It is reported that various county and school warrants were called for payment at the office of the County Treasurer on Dec. 29, on which date interest shall cease.

interest shall cease.

LOS ANGELES, Los Angeles County, Calif.—BOND OFFERING.—
We are informed that sealed bids will be received by the City Clerk until
Jan. 5 for the purchase of approximately \$2,000,000 4\frac{4}{3}\times\$ water bonds.
Due \$50,000 from 1934 to 1973 inclusive.

LOS ANGELES METROPOLITAN WATER DISTRICT (P. O.
Los Angeles), Calif.—MATURITY.—Pursuant to the report given in
V. 135, p. 4246, of the sale of \$2,016,000 Colorado River Aqueduct construction bonds to the Reconstruction Finance Corporation as 5s at par, Dec. 12,
we are now informed that the bonds mature \$57,600 from Nov. 1 1948 to
1982 inclusive.

we are now informed that the bonds mature \$57,600 from Nov. 1 1948 to 1982 inclusive.

LOUISIANA, State of (P. O. Baton Rouge)—BOND OFFERING.—Sealed bids will be received until 11 a. m. on Jan. 16, by L. B. Baynard Jr., Secretary of the Board of Liquidation of the State Debt, for the purchase of a \$5,000,000 issue of State bonds. Interest rate is not to exceed 6%, stated in multiples of ¾ of 1%. No bid for less than the entire issue will be considered, but different interest rates may be named and it shall not be necessary that all bonds of the issue bear the same rate of interest. Denom. \$1,000. Dated Jan. 1 1933. Due on Jan. 1 as follows: \$100,000, 1934 to 1938; \$200,000, 1939 to 1943; \$300,000, 1944 to 1948, and \$400,000, 1949 to 1953, all incl. The bonds will be awarded to the bidder offering to purchase the same at a price and bearing the interest rate or rates which will result in the least interest cost to the State. The interest cost to the State will be computed by ascertaining the total amount of interest required to be paid by the State during the life of the bonds and deducting therefrom the amount of the premium, or adding thereto the amount of the discount, if any, bid. Interest payable J. & J. All bids must be unconditional. The approving opinion of Thomson, Wood & Hoffman of New York, will be furnished. A certified check for 1% of the bonds bid for, payable to the above Board, is required.

These are the bonds that were authorized by the voters on Nov. 8 through an amendment to the State Constitution—V. 135, p. 3550. Proceeds will be used for the construction of buildings for the State University and for other State purposes. (The last sale of bonds by this State was reported in the "Chronicle" of Dec. 24.)

LOWER RIO GRANDE VALLEY WATER CONSERVATION ASSOCIATION (P. O. San Banito). Cameron Caunty. Tex.—LOAN APPLI-

reported in the "Chronicle" of Dec. 24.)

LOWER RIO GRANDE VALLEY WATER CONSERVATION ASSOCIATION (P. O. San Benito), Cameron County, Tex.—LOAN APPLICATION NOT CONTEMPLATED.—Replying to our request for detailed information on a report that this Association intended to make application to the Reconstruction finance Corporation for the loan of funds to carry on the construction of flood protection works in the valley, we are informed under date of Dec. 20 by F. S. Robertson, Secretary-Treasurer, that no request has been made for any amount. He says that the Association has been endeavoring for some time to induce the Federal Government to take over and complete the flood control works in the valley as a Federal project, but not to be in any way financed through the R. F. C.

over and complete the flood control works in the valley as a Federal project, but not to be in any way financed through the R. F. C.

LOWER SAUCON SCHOOL DISTRICT (P. O. Bingen), Northamp ton County, Pa.—BOND OFFERING.—Sealed bids addressed to Stewart E. Fluck, District Secretary, will be received until 3:30 p. m. on Jan. 7 for the purchase of \$45,000 4½% bonds. Dated Jan. 15 1933. Coupon bonds, registerable as to principal only. Due Jan. 15 as follows: \$15,000 in 1943, \$15,000 in 1963. Interest is payable semi-annually. Bidders are privileged to bid for the entire issue or for any one of the respective maturities. The bonds, according to the notice of sale, will be payable without deduction for any tax or taxes, except succession or inheritance taxes, levied or assessed thereon, or on the bonds, or on the debt secured thereby, under any present or future law of the Commonwealth of Pennsylvania, which said taxes the district assumes and agrees to pay. A certified check for 2% of the bonds bid for, payable to the order of the District Treasurer, must accompany each proposal. The bonds will be sold subject to approval of the legality of the issue by the Secretary of the Pennsylvania Department of Internal Affairs in accordance with the Acts of the Assembly. Asher Seip of Easton, Pa., is Solicitor for the district. (The above report of the offering supersedes that given in V. 135, p. 4417.)

MADISON COUNTY (P. O. Edwardsville) Ill.—PROPOSED BOND ISSUE —The Board of County Commissioners has authorized the issuance

*Proceeds of bond sale will be used to reduce this item.

MADISON COUNTY (P. O. Edwardsville) III.—PROPOSED BOND ISSUE—The Board of County Commissioners has authorized the issuance of \$400,000 6% unemployment relief bonds, to be dated Jan. 1 1933 and mature as follows: \$12,000 from 1933 to 1936 incl.; \$14,000, 1937 to 1940; \$20,000, 1941 to 1944; \$24,000 from 1945 to 1948, and \$30,000 from 1949 to 1952 incl. Denoms. \$500. Interest will be payable in January and July.

MALDEN, Middlesex County, Mass.—TEMPORARY LOAN.—Walter E. Milliken, City Treasurer, reports that after no bids had been received at the public offering on Dec. 23 of a \$400,000 temporary loan, the issue was then sold privately to the National Shawmut Bank, of Boston, at 3.10% discount basis. The loan is dated Dec. 28 1932 and due \$200,000 each on June 16 and July 17 1933. Notes, evidencing existence of the debt, will be certified as to their genuineness by the aforementioned bank. The issue is payable at the National Shawmut Bank, Boston, or at the Shawmut Corp., New York. Legality approved by Ropes, Gray, Boyden & Perkins, of Boston.

MASSACHUSETTS (State of).—\$20,000,000 RELIEF BOND BILL FILED.—Under the provisions of a bill filed in the State Legislature by Representative Pratt of Saugus a \$20,000,000 bond issue would be sold for the purpose of advancing funds to cities and towns for poor relief purposes, and a tax of 6% levied on intangibles to effect repayment of the borrowings.

and a tax of 6% levied on intangibles to effect repayment of the borrowings.

MASSILLON, Stark County, Ohio.—BOND OFFERING.—Lewis
Holcomb, City Auditor, will receive sealed bids until 12 m. (Eastern standard time) on Jan. 7 for the purchase of \$7,000 5% property portion improvement bonds. Principal and interest (April and Oct.) are payable at the State Bank in Massillon. Bids for the bonds to bear interest at a rate other than 5%, expressed in a multiple of ½ of 1%, will also be considered. A certified check for 3% of the bonds bid for, payable to the order of the City Treasurer, must accompany each proposal. Successful bidder to print at his own expense the necessary bonds and coupons.

MESA COUNTY SCHOOL DISTRICT NO. 2 (P. O. Fruita), Colo.—BONDS DEFEATED.—We are advised by the District Superintendent that at the election held on Dec. 20—V. 135, p. 4067—the voters defeated the proposal to issue \$16.000 in 5½% warrants refunding bonds by a count of 44 "for" to 111 "against." This result cancels the pre-election sale the bonds to Heath, Larson & Co. of Denver.

of 44 "for" to 111 "against." This result cancels the pre-election sale the bonds to Heath, Larson & Co. of Denver.

METHUEN, Essex County, Mass.—LOAN NOT SOLD.—No bids were received at the offering on Dec. 24 of a \$100,000 temporary loan, to mature on June 15 1933. The City Treasurer states that he is selling the notes privately to the Shawmut Corp., if Boston, at 5% interest.

MILWAUKEE COUNTY (P. O. Milwaukee), Wis.—BOND SALE REPORT.—It is stated by Frank Bittner, County Auditor, that he has negotiated the sale of \$300,000 of a total issue of \$540,000 Metropolitan Sewerage Area bonds, bearing date of May 1 1932—V. 135, p. 3556—with the Investment and Annuity Board of Wisconsin, the sale of which was consummated on Dec. 20. He states that the Sewerage Commission will not be in need of any additional funds for at least three months, and hence it is not expected that the remaining \$240,000 will be sold before the first of April. In connection with this report we quote in part as follows from the Milwaukee "Journal" of Dec. 19:

"The State Teachers' Annuity Fund Board will take \$300,000 of the Sewerage Commission bonds to be issued by Milwaukee \$300,000 of the County Finance Committee. This will make it unnecessary for the county to go into the open market for a buyer for the bonds.

"Before leaving Sunday for Washington, D. C., to confer with the Reconstruction Finance Corporation on an additional loan to Milwaukee

County, Bittner offered the Sewerage Commission bonds to the State. He was assured by Albert Thrathen, Director of the Investment and Annuity Board, that the Board will take \$200,000 of the bonds immediately and another \$100,000 in three or four weeks at 95. The bonds bear $4\frac{1}{2}\%$ interest. The offer includes the \$70,000 Metropolitan Commission issue and \$230,000 of the \$470,000 Milwaukee Commission bonds.

Good Bargain Seen.

Good Bargain Seen.

"Bittner reports that he consulted Newman L. Dunne of the First Wisconsin Co., George F. Kiewert of the Chase-Harris-Forbes Corp., New York City, and Joseph T. Johnson of the Milwaukee Co., who advised him that the offer of the State is a good one, considering the situation of the securities market, and that the county is fortunate to dispose of the bonds at the price offered.

"Bittner told the committee that the county had difficulty recently in selling \$1,000,000 of 5% relief bonds of 6½ years maturity, the price received being 98.06, making the real interest rate 5.32%.

ceived being 98.06, making the real interest rate 5.32%.

Cash for Contracts.

"Sale of the \$300,000 in bonds to the State will enable both sewerage commissions to meet payments on contracts due during the next three months. By that time the county expects to have a ruling from the State Supreme Court clarifying the recent decision to the effect that tax levies for the payment of bond principal and interest of bonds are included in the 1% tax limit fixed for county levies.

"This is the second time the State has taken Milwaukee County bond issues for its trust funds. In 1923 the State took \$100,000 of county bonds."

MINNESOTA, State of (P. O. St. Paul).—BGND SALE.—An issue of \$1,500,000 3\cdot \cdot \cdot

ad valorem takes on all property therein.

and Blodget, Inc., and Justus F. Lowe & Co., Inc., bid 100.3298.
First of Boston Corp., Phelps, Fenn & Co., Darby & Co. and Kerfoot,
Leggett & Co. bid 100.1299.

Legett & Co. bid 100.1299.

MINNESOTA, State of (P. O. St. Paul).—LOAN GRANTED.—The following is the text of a.1 announcement made by the reconstruction Finance Co. poration on Dec. 25 regarding a loan granted on that day to this State for emergency aid in 23 units:

"The R. F. C., upon application of the Governor of Minnesota, to-day made av. liable \$696.464 to meet current emergency relief needs in 23 political subdivisions. Funds were requested for Jan. and Feb. in 20 political subdivisions and for Jan. only in three.

"The Corporation formerly made available a total of \$655,376 to meet current emergency relief needs in 20 counties of the State of Minnesota for the period Oct. 15 to Dec. 31 1932. Supporting data state that a number of the political subdivisions named in the former application will have substantial balances from supplementary Federal funds, formerly made available, to carry forward into the early months of 1933.

"In support of the Governor's application, it was stated that the financial condition in various counties, cities and villages included in this application has not changed since the former action of the Corporation making supplementary funds available. Without exception, these counties have outstanding warrants which they are unable to pay. It is further stated that the municipalities have practically exhausted their credit.

"The State Board of Control is in charge of the relief activities in the State working through county executive committees."

MOBILE, Mobile County, Ala.—ECND SALE CONTEMPLATED. The city is reported to be planning to sell a \$35,000 issue of paving bonds.

MONROE COUNTY (P. O. Rochester), N. Y.—BOND OFFERING.—Harry J. Bareham, County Treasurer, will receive sealed bids until 11 a. m. on Jan. 5 for the purchase of \$200,000 not to exceed 6% interest coupon or registered emergency bonds. Dated Jan. 5 1933. Denom. \$1,000. Due \$40,000 on Jan. 5 from 1934 to 1938 incl. Rate of interest to be expressed in a multiple of ½ of 1% and must be the same for all of the bonds. Principal and interest (Jan. and July 5) are payable at the Union Trust Co., Rochester, or at the Marine Midland Trust Co., New York. A certified check for \$5,000, payable to the order of the county, must accompany each proposal. The approving opinion of Clay, Dillon & Vandewater of New York will be furnished the successful bidder.

MORGAN, Morgan County, Utah.—BOND SALE.—We are informed that the \$65,000 issue of power plant construction bonds that was voted at the November election—V. 135, p. 3556—has been purchased by the Edward L. Burton Co. of Salt Lake City.

MOUNT PLEASANT SCHOOL DISTRICT NO. 4 (P. O. Rolla), Rolette County, N. Dak.—CERTIFICATE OFFERING.—It is reported that sealed bids will be received until 10 a. m. on Jan. 3 by George A. Regan, District Clerk, for the purchase of a \$6,000 issue of certificates of indebtedness. Interest rate is not to exceed 7%, payable semi-annually. Denom. \$500. Dated Jan. 10 1933. Due on April 10 1934. A certified check for 2% is required.

NAMPO, Canyon County, Ida.—BONDS CALLED.—It is reported that Nos. 1 to 20 of the funding bonds dated July 1 1922 are being called for payment, interest ceasing on Jan. 1 1933. Due on July 1 1942 and optional on July 1 1932.

NEVADA, State of (P. O. Carson City).—LOAN GRANTED.—
The following is the text of a loan notice made public on Dec. 29 by the
Reconstruction Finance Corporation, regarding a grant of \$48,300 that
was made on that day to this State for aid purposes in three counties:
"The Corporation, upon application of the Governor of Nevada, made
available \$48,300 to meet current emergency relief needs in three counties
of that State for the period Jan. 1 to Feb. 28 1933.

"Those funds are made available under Title I, Section 1, subsection (c)
of the Emergency Relief and Construction Act of 1932, with the understanding that every effort must be maintained and developed in order
that the political subdivisions and the State of Nevada may meet this
emergency situation as soon as it is possible for them to do so.

"In support of his application the Governor stated that the resources
of the State, including money available or which can be made available
by the State, its political subdivisions and private contributions, are
inadequate to meet relief needs,

"The R. F. C. heretofore has made available a total of \$70,967 to meet
current emergency relief needs in various political subdivisions of the
State of Nevada."

NEWARK, Essex County, N. J.—BOND AGENT DESIGNATED.—The Continental Bank & Trust Co., of New York, has been designated agent for the preparation and certification of \$1,269,000 poor relief bonds, dated Dec. 15 1932. These bonds, coupled with an issue of \$1,062,000 for public works, were awarded on Dec. 20 to Lehman Bros., of New York, and associates—V. 135, p. 4417.

TEMPORARY FINANCING.—John Howe, Director of the Department of Revenue and Finance, on Dec. 28 was authorized to borrow \$5,000,000 on temporary tax revenue bonds, to be issued as needed to meet current expenses, and to issue \$2,000,000 tax revenue bonds to take the place of an issue of that amount held by banks in New York City and maturing on Dec. 31 1932.

NEWPORT, Newport County, R. 1.—BOND SALE.—B. F. Downing City Treasurer, states that the issue of \$18,000 4½% coupon Freebod Park Stadium bonds offered on Dec. 29 was awarded to the Chase Harri Forbes Corp., of Boston, at a price of 100.82, a basis of about 4,00% Dated Jan. 1 1933. Due \$3,000 on Jan. 1 from 1934 to 1939 incl. Principa and interest (Jan. and July) are payable at the office of the City Treasurer or, at holder's option, at the First National Bank, of Boston. The bond will be engraved under the supervision of and certified as to genuinenes by the aformentioned institution. Legality to be approved by Roped Gray, Boyden & Perkins, of Boston. Bids are reported to have been a follows:

follows:

and \$5,500. April and Oct. 1 1934 and 1935.

ROCHESTER, Monroe County, N. Y.—REPORT ON SURVEY OF CITY FINANCES.—The report of the Administration Advisory Board relative to the detailed study made of the financial condition of the city. as presented to the City Council, was published in full text in the Rochester "Democrat" of Dec. 14. The Board, during the course of its remarks, urged that substantial economies be made in municipal operating costs and advocated that stringent methods be adopted to bring about the collection of delinquent taxes. In urging adoption of the recommendations made in the report, the members of the committee stated that such action is necessary if a serious crisis in the city's financial affairs is to be prevented.

made in the report, the members of the committee stated that such action is necessary if a serious crisis in the city's financial affairs is to be prevented.

ROCK COUNTY (P. O. Janesville), Wis.—BOND OFFERING.—It is announced by Arthur M. Church, County Treasurer, that he will receive sealed bids until 2 p. m. on Jan. 9 for the purchase of the \$400.000 4½%, semi-annual relief bonds offered for sale without success on Dec. 20—V. 135, p. 4419. It is stated that these bonds are being re-advertised for the correction of legality only.

Regarding the rejection of the single bid received on Dec. 20, we take the following report from the Janesville "Gazette" of Dec. 21:

"Rock County was offered but \$96.51 for its new issue of relief bonds at its advertised sale here Tuesday, and there was but one bidder. The offer was rejected, and it is probable that a new sale date will be advertised soon.

"The bid was offered by Stone & Webster and Blodgett, Chicago bond house, and was calculated to yield 5% on the proposed purchase price of the 4½% issue. The \$400.000 relief issue was authorized by the Board of Supervisors last October.

"County Treasurer A. M. Church said Wednesday that no decision has been made as to how the bonds will be marketed, but indicated that probably new bids will be called. The country is unlikely to attempt the sale of so large a block of bonds "over the counter," Mr. Church said. Bond houses frown on the practice of municipal units selling a portion of an issue and calling for a bid on the part left unsold.

Is Not First Time.

"Rock County highway bonds, sold over the counter here several years ago, were offered at \$20 less than par on a \$500 bond, which had the effect of raising the yield by 1%. It is not proposed to alter the rate of interest on the present issue.

"Bonds issued for poor relief purposes are apparently not highly regarded in financial circles, and several counties, including Milwaukee County and Walworth County, have encountered difficulty in getting them onto the market at thei

market at their face value.

Court Ruling Held Cause.

"Among the factors at present discouraging the bidding on bonds of this type is said to be an Oconto County case recently decided by the Supreme Court. A rehearing on portions of the ruling of the court at the insistance of Milwaukee County is now pending. The question involves the legality of assessments levied by counties in excess of the 1% of their valuation fixed by statute. While few counties are said to be actually affected, the dispute has had a derpessing effect on the bond market until it can be settled.

"The principal loss to Rock County will be in the delay which will come as a result of the rejection of the single bid. It had been hoped that funds would be available in the County Treasury immediately, but it probably will be necessary to wait for a month or more before any cash changes hands."

ROCK ISLAND COUNTY (P. O. Rock Island), III.—PROPOSED BOND ISSUE.—The Board of Supervisors plans to issue \$300,000 poor relief bonds, under the provisions of the Meentz law, under which the county is empowered to issue up to \$800,000 of such obligations, according to report. The issue under consideration would bear interest up to a limit of 6% and mature in 20 years. Repayment of principal and interest would be made from the motor fuel tax refunds, it was said.

ROYAL OAK, Oakland County, Mich.—\$82,000 IN SCRIP AU-THORIZED.—The Board of Education on Dec. 22 authorized the issuance of \$82,000 in scrip. series E, which will be used as needed to pay the salaries of eachers and other employees during the last half of the school year. So far, all salaries have been paid in cash, it was said. The amount authorized is \$37,000 less than that issued during the previous school year.

RUSK COUNTY (P. O. Henderson), Tex.—BONDS APPROVED An issue of \$157,000 5% county court house refunding bonds is report to have been approved by the Attorney-General.

ST. CLAIR COUNTY (P. O. Belleville), III.—ADDITIONAL INFORMATION.—Regarding the \$500,000 4½% 20-year relief bonds authorized by the Board of Supervisors on Dec. 10—V. 135, p. 4250, B. C. McCurdy. County Superintendent of Highways states that the bonds were voted under the provisions of the Meents Act passed at the Fourth Special Session of the Fifty-seventh General Assembly and that definite decision as to the sale of the issue will be considered at the next session of the Board on Jan. 7. Mr. McCurdy advises that the present outstanding bonded indebtedness consists of \$682,000 road bonds, on which principal and interest has been paid promptly since their issuance in 1915. The county has a population of 157,775 and an assessed valuation for 1932 of \$123,200,370.

SAN FRANCISCO (City and County), Calif.—BOND OFFERING.—It is reported that sealed bids will be received until Jan. 9, by J. S. Dunnigan, Clerk of the Board of Supervisors, for the purchase of a \$2,-160,000 issue of relief bonds. Interest rate to be stated by the bidder. Due \$180,000 from 1936 to 1947, inclusive.

Due \$180,000 from 1936 to 1947, inclusive.

The last important sale of bonds by this city took place on Sept. 26 and was described in V. 135, p. 2370, as follows;

The four issues of bonds aggregating \$4,554,000, offered for sale on Sept. 26—V. 135, p. 2205—were purchased by the Bankamerica Co. of San Francisco, all as 4½s, paying a premium of \$10.169, equal to 100.223, a basis of about 4.47%, on the bonds divided as follows;

\$2.160.000 relief bonds as 4½s. Due \$180.000 from 1936 to 1947 incl. 731.000 4½% county jail bonds. Due \$43,000 from 1936 to 1952 incl. 588,000 4½% boulevard bonds. Due \$33,000 in 1936 and \$37,000, 1937 to 1951.

1.075,000 434% hospital bonds. Due as follows; \$67,000 in 1938; \$68,000, 1939 to 1941, and \$67,000, 1942 to 1953, all incl.

\$68.000, 1939 to 1941, and \$67.000, 1942 to 1953, all incl.

SAN MATEO COUNTY (P. O. Redwood City), Calif.—LIST OF BIDS.—The following is an official list of the other bids received for the \$112,000 relief bonds that were awarded to the National City Co. of California, of San Francisco, as 3½s and 3¾s, at 100.038, a basis of about 3.60%—V. 135, p. 4250:

Bidder— Premium Bid.— P

SCHENECTADY, Schenectady County, N. Y.—50NDS AUTHOR-IZED.—The Common Council adopted an ordinance on Dec. 20 providing for the issuance of \$300,000 home relief work bonds.

SCOTT COUNTY (P. O. Davenport), Iowa.—BOND SALE DETAILS,—The \$94,000 issue of poor and soldiers' relief fund bonds that was exchanged for warrants—V. 135, p. 3391—is due on Nov. 1 as follows: \$5,000, 1939 to 1943; \$20,000, 1945; \$24,000, 1946, and \$25,000 in 1947. The bonds were exchanged for warrants with the White-Phillips Co. of Davenport as 5s.

SENECA COUNTY (P. O. Tiffin), Ohio.—MAY ISSUE NOTES.—Attorney-General Gilbert Bettman has ruled that the county may issue temporary notes in anticipation of the proposed sale of welfare bonds. The bond issue contemplated amounts to \$25,000.

SMITHLAND, Woodbury County, Iowa.—BONDS NOT SOLD.—The \$4,500 issue of 5% coupon refunding bonds offered on Dec. 26—V. 135, p. 4419—was not sold as there were no bids received, according to the Mayor. Denom. \$500. Dated Nov. 1 1932. Due \$500 from Nov. 1 1933 to 1942, incl. Interest payable M. & N.

SNOHOMISH COUNTY (P. O. Everett), Wash.—WARRANTS CALLED.—The County Treasurer is reported to have called for payment at his office on Dec. 12 at par various school district and county warrants.

SOUTH ORANGE, Essex County, N. J.—BONDS AUTHORIZED.—The Board of Trustees recently authorized the issuance of \$500,000 bonds to finance municipal operating expenses and \$5,000 for relief purposes. The bonds, to be issued in anticipation of 1932 tax collections, will mature in six months.

SPRING VALLEY SCHOOL DISTRICT NO. 76 (P. O. Washburn), McLean County, N. Dak.—CERTIFICATES NOT SOLD.—We are advised by the District Clerk that the \$1,500 certificates of indebtedness offered on Nov. 25—V. 135, p. 3727—were not sold. Due on Dec. 20 1933. STARK COUNTY (P. O. Canton), Ohio.—BONDS NOT SOLD.—The issue of \$334.900 6% poor relief bonds, which was offered for award on Dec. 28 and not on Dec. 30 as previously reported—V. 135, p. 4251, was not sold, as no bids were received. Dated Jan. 3 1933 and due on March 1 from 1934 to 1938 inclusive.

from 1934 to 1938 inclusive.

STRUTHERS, Mahoning County, Ohio.—BOND OFFERING.—Albert G. Jones. City Auditor, will receive sealed bids until 12 M. on Jan. 10 for the purchase of \$80,839.53 6% bonds, divided as follows: \$76,395.76 Yellow Creek Sanitary Sewer Dist. No. 3 bonds. Due Oct. 1 as follows: \$15,000 in 1934 and 1935; \$16,395.76 in 1936, and \$15,000 in 1937 and 1938.

4,443.77 sewer construction bonds. Due Oct. 1 as follows: \$1,000 in 1934 and 1935; \$443.77 in 1936, and \$1,000 in 1937 and 1938.

All of the bonds will be dated Feb. 1 1933. Int. is payable in A. & O. Bids for the bonds to bear interest at a rate other than 6%, expressed in a multiple of ¼ of 1%, will also be considered. A certified check for \$1,000 must accompany each proposal.

SYRACUSE. Onondaga County, N. Y.—TAX RATE ESTIMATE.

\$1,000 must accompany each proposal.

\$YRACUSE, Onondaga County, N. Y.—TAX RATE ESTIMATE.

—Preliminary figures indicate that the tax rate for 1933 will be more than
\$5 under the current year's levy of \$26,50 per \$1,000 of assessed valuation, according to report. Refunding of \$2,270,000 bonds maturing in 1933, as authorized by the recent special session of the State Legislature—V. 135, p. 4251, will result in a saving of \$5.67 in the tax levy, if full advantage is taken of the new legislation, it was said. Taxes unpaid for 1932 amount to about 15%.

TARRANT COUNTY WATER CONTROL AND IMPROVEMENT DISTRICT NO. 1 (P. O. Fort Worth), Tex.—BONDS PARTIALLY SOLD.—Of the total \$655,000 bonds offered for sale on Dec. 21—V. 135, p. 4251—a block of \$262,000 par value coupon series D bonds was purchased by a syndicate composed of the Trinity-Farm Construction Co., the McKenzie Construction Co., and the Uvalde Construction Co., at a price of 90.00 and accrued interest. Due from Sept. 1 1939 to 1964.

TOLEDO, Lucas County, Ohio.—BOND OFFERING.—Carl C. Tillman, Acting Director of Finance, will receive sealed bids until 11 a.m. on Jan. 17 for the purchase of \$8.000,000 6% coupon or registered Lake Erie Project water works construction and extension bonds. Dated Feb. 1 1933. Denom. \$1,000. Due \$250,000 on Aug. 1 from 1935 to 1966, incl. Principal and interest (Feb. and Aug.) are payable at the Chemical Bank & Trust Co., New York. Bids for the bonds to bear interest at a rate other than 6%, expressed in a multiple of ¼ of 1%, will also be considered. Bids may be made separately for all or any part or for "all or none." A certified check for 2% of the bonds bid for, payable to the order of the Commissioner of the Treasury, must accompany each proposal. All proceedings incident to the proper authorization of the issue have been taken under the direction of Squire, Sanders & Dempsey, of Cleveland, whose opinion as to the legality of the bonds may be procured by the successful bidder at his own expense.

TRENTON, Mercer County, N. J.—ADDITIONAL INFORMA-

TRENTON, Mercer County, N. J.—ADDITIONAL INFORMATION.—In answer to our inquiry for further information regarding the reported sale of \$435,000 tax revenue bonds to Graham, Parsons & Co., of Philadelphia—V. 135, p. 4420, City Treasurer H. E. Evans advises that the bonds were actually purchased by the sinking fund commission of the city, at par. Of the total, \$285,000 at 4¼% interest, mature on Dec. 1 1933 and \$167,000, at 5%, are due on Dec. 1 1934.

TULSA, Tulsa County, Okla.—BONDS NOT SOLD.—We are informed by the City Auditor that the \$350,000 issue of street impt. bonds offered on Dec. 13—V. 135, p. 4071—was not sold.

TURTLE CREEK, Allegheny County, Pa.—PLAN LOAN OF \$25,000. The borough has made application for court approval of its plan to borrow \$25,000 to provide funds for salary payments and relief purposes. Under provisions of an Act passed at the last previous session of the State Legislature, boroughs may borrow on back taxes with approval of the court. The application cited tax delinquency in the borough as necessitating the borrowing, it was said.

UNION COUNTY (P. O. Elizabeth), N. J.—NOTES AUTHORIZED.—The Board of Freeholders on Dec. 23 authorized County Treasurer Nathan R. Leavitt to borrow \$400,000 on tax anticipation notes, payable on March 20 1933.

UNION COUNTY SCHOOL DISTRICT NO. 1 (P. O. La Grande), Ore.—BONDS NOT SOLD.—The \$80,000 issue of school bonds offered on Dec. 17—V. 135, p. 4251—was not sold, according to the District Clerk. Interest rate is not to exceed 6% payable J. & D. Dated Dec. 1 1932. Due from Dec. 1 1935 to 1950.

UPPER ARLINGTON, Ohio.—BOND OFFERING.—Fred Ridenour Village Clerk, will receive sealed bids until 12 m. (Eastern standard time) onulan. 10 for the purchase of \$5,600 6% sewer construction bonds. Denominations \$300 and \$500. Coupon in form, registerable as provided by law. 3Due Sept. 1 as follows: \$500 from 1934 to 1937, incl., and \$600 from 1938 to 1943, incl. Prin. and int. (March and Sept.) are payable at the City National Bank & Trust Co., Columbus. Bids for the bonds to bear interest at a rate other than 6%, expressed in a multiple of ½ of 1%, will also be considered. A certified check for 1% of the issue, payable to the order of the Village Treasurer, must accompany each proposal. Transcripts of proceedings will be furnished successful bidders and sufficient time allowed within 15 days from the time of said award for the examination of such transcripts by bidder's attorney, and bids may be made subject to approval of the same. (Previous mention of this issue was made in V. 135, p. 4420.)

WADSWORTH, Medina County, Ohio.—BOND OFFERING.—Wade Hart, City Auditor, will receive sealed bids until 12 m. on Jan. 13 for the purchase of \$28,000 6% special assessment improvement bonds. Dated Nov. 15 1932. Denom. \$1,000. Due Oct. 1 as follows: \$3,000 from 1934 to 1942 incl., and \$1,000 in 1943. Interest is payable in April and October. Bids for the bonds to bear interest at a rate other than 6%, expressed in a multiple of ½ of 1%, will also be considered. A certified check for \$300, payable to the order of the City, must accompany each proposal.

WALL, Allegheny County, Pa.—BOND OFFERING.—The Borough Secretary will receive sealed bids until Jan. 2 for the purchase of \$10,000 434% bonds, due serially from 1936 to 1944, incl. An issue of \$10,000 434s was unsuccessfully offered on Nov. 30 1931, it was said.

WASHINGTON COUNTY (P. O. Marietta), Ohio.—BOND SALE.—The \$47,000 poor relief bonds offered on Dec. 29—V. 135, p. 4252—were awarded as 4% to Braun, Bosworth & Co. of Toledo, at par plus a premium of \$211, equal to 100.448, a basis of about 4.60%. Dated Dec. 15 1932. Due March 1 as follows: \$8,300 in 1934; \$8,900, 1935; \$9,400, 1936; \$9,900 in 1937, and \$10,500 in 1938.

Carbo & Son of Alexandria at par—V. 135, p. 3392—was awarded as 6% bonds. Due from 1935 to 1957.

WEST VIRGINIA, State of (P. O. Charleston).—LOAN GRANTED.
—The following is the text of an announcement made by the Reconstruction Finance Corporation on Dec. 29, regarding a relief loan of \$2,440,397 granted to this State on that day for use in towns and cities:

"The Corporation. upon application of the Governor of West Virginia, made available \$2,440,397 to meet current emergency relief needs in 34 political subdivisions of that State for the period Jan. 1 to Feb. 28 1933.

"These funds are made available under Title I, Section 1, subsection (c) of the Emergency Relief and Construction Act of 1932 with the understanding that every effort must be maintained and developed in order that political subdivisions and the State of West Virginia may meet this emergency situation as soon as it is possible for them to do so.

"In support of the application of the Governor, it is claimed that the family case load of the State has increased over original estimates by "totally unexpected amounts" Coincident with the increase in the number of destitute persons requiring assistance, it is stated that there has been a falling off in private contributions due to the exhaustion of private resources.

"Supporting data set forth that the Governor, whose term expires in Mar. will recommend to the Legislature when it convenes Jan 11 enactment of an emergency measure providing at least \$1,000,000 for relief of destitution and other measures authorizing political subdivisions to transfer certain funds now under their control to special funds for relief purposes.

"The R. F. C. heretofore has made available \$2,170,174 to meet current emergency relief needs in various political subdivisions of the State of West Virginia.

WHEATFIELD CIVIL TOWNSHIP, Jasper County, Ind.—BOND

WHEATFIELD CIVIL TOWNSHIP, Jasper County, Ind.—BOND SALE.—The issue of \$12,000 5% central high school building construction bonds for which no bids were received on June 25—V. 155, p. 336—was purchased subsequently at a price of par by A. YAKIMA COUNTY (P. O. Yakima) Wash.—BONDS AUTHORITED.
—The County Commissioners are reported to have passed a resolution providing for the issuance of \$190,000 in bridge construction bonds.

YEADON SCHOOL DISTRICT, Pa.—BOND SALE.—The issue of \$150.000 high school building construction bonds voted at the general election on Nov. 8—V. 135. p. 3560—was purchased subsequently by E. H. Rollins & Sons, of Philadelphia.

YOUNGSTOWN, Mahoning County, Ohio.—BOND SALE.—The \$119,000 emergency poor relief bonds offered on Dec. 10—V. 135, p. 3892—were purchased as 6s, at a price of par, by the State Teachers' Retirement System. Dated Nov. 15 1932. Due Oct. 1 as follows: \$19,000 in 1934, and \$20,000 from 1935 to 1939 incl.

ZANESVILLE, Muskingum County, Ohio.—NOTE SALE.—Henry F. Stemm, City Auditor, reports that the First National Bank of Zanesville, has purchased an issue of \$25,000 6% special assessment sanitary sewer construction notes at a price of par. Dated July 1 1932 and due on July 1 1934.

CANADA, its Provinces and Municipalities

AMHERST, N. S.—BOND SALE.—An issue of \$15,000 5% bonds has sen purchased by A. E. Ames & Co., Ltd., at a price of 95.03, a basis of out 5.44%. The bonds mature on Dec. 1 1950.

been purchased by A. E. Ames & Co., Ltd., at a price of 95.03, a basis of about 5.44%. The bonds mature on Dec. 1 1950.

AYLMER, Que.—TOWN IN DEFAULT.—The Quebec Municipal Commission plans to make application in the Quebec Superior Court to have the town declared in default for non-payment of interest charges, reports the Dec. 23 issue of the "Monetary Times" of Toronto.

"The principal creditor is the Quebec Government to which the town owes \$399,000, capital on account of its provincial housing loan, with accrued interest which will bring the total to nearly half a million dollars. "No interest has been paid on the indebtedness for over a year, according to officials of the Department of Municipal Affairs."

**CALGARY, Alta.—PROVINCIAL GOVERNMENT ASKED TO FORCE EXCHANGE PAYMENT BY CITY.—In connection with the recent action of the City Council in voting to ignore the exchanges, amounting to approximately \$300,000, in the payment of \$2,609,000 bonds due in New York funds on Jan. 1 1933—V. 135, p. 4420—it is reported that holders of the bonds involved have forwarded telegrams urging the Alberta Government to take action to force the city government to pay the difference resulting in the discount on Canadian funds in New York City. A dispatch from Edmonton to the Totonto "Globe" of Dec. 22 commented on the matter as follows:

"Telegrams urging the Alberta Government to take action to force the city of Calgary to pay exchange in meeting debentures totaling over \$2,-500,000, due in New York Jan. 1, were received to-day by Premier Brownlee of Alberta. The requests were made by actual debenture holders, because the Calgary City Council voted to make the debenture payments in Canadian funds only, ignoring the adverse exchange, requiring \$300,000 additional to meet the bonds in United States funds."

\$1,000,000 LAON ARRANGED.—The Bank of Montreal has agreed to loan the city \$1,000,000, at 6% interest, in order to meet current expenses from Jan. 1 to June 30 1933, subject to certain stipulations by the bank regarding ad

regarding administration of the city's affairs and the school board.

NEWFOUNDLAND (Government of).—PLAN LOAN TO MEET \$2,447,000 INTEREST CHARGES.—The Government has been negotiating with Great Britain and Canada for a loan with which to meet \$2,447,000 interest charges due Jan. 1 1933, it was reported on Dec. 23. It was also stated that the British Government contemplates sending a commission of Treasury experts to institute a refunding loan scheme for the purpose of assisting in the rehabilitation of Newfoundland finances. The bonded indebtedness of the latter is said to amount to \$95,000,000.

\$1,250,000 LOAN OBTAINED.—Prime Minister F. C. Alderdice announced on Dec. 29, that the governments of Great Britain and Canada had agreed to furnish in equal proportion a sum of \$1,250,000 to assist Newfoundland to meet its obligations maturing on Jan. 1 1933. The Premier announced at the same time that the two countries would set up a commission in Newfoundland "for the purpose of making a thorough study of the country's financial condition and fiscal system, with the direct object of overhauling and making reforms before the next external debt payments become due in July."

ST. MARC DE FIGUERY, Que.—BOND OFFERING.—Sealed bids

ST. MARC DE FIGUERY, Que.—BOND OFFERING.—Sealed bids addressed to A. Roy, Secretary-Treasurer, will be received until Jan. 20 for the purchase of \$3,000 6% bonds, dated Jan. 1 1933 and due serially in from 1 to 15 years. Issue is payable at Amos, Quebec

SCARBOROUGH TOWNSHIP, Ont.—MORATORIUM GRANTED AS TOWNSHIP DEFAULTS \$250,000 BOND PRINCIPAL.—Because of tis inability to meet bond principal in amount of \$250,000 which became due on Dec. 15, the township has been granted a moratorium by the Ontario Municipal Board, according to the Dec. 23 issue of the "Monetary Times" of Toronto, which continued as follows:

"Under the provision of the Municipal Act by which the moratorium was granted, action against the municipality by any creditors will be stayed pending proceedings before the Board.

"Scarborough is the minth municipality to be granted a moratorium. Other municipalities at present in default are Tecumseh, East Windsor, Sandwich Town, Sandwich East and West Townships, Riverside, Lasalle and Windsor."

WALKERVILLE, Ont.—PRINCIPAL AND INTEREST REQUIRE-MENTS PAID.—Through arrangements with its bankers, the town was able to meet \$436,659 in bond principal and interest charges which fell due on Dec. 14, thereby escaping the fate of other border municipalities, whose affairs, following default on bonded debt requirements, have been placed under the supervision of a Board of Control. 'The \$436,659 payment comprised \$284,145 in principal and \$152,514 in interest payments, the total of debenture charges due in 1932, it was said.

The Baltimore and Ohio Railroad Company

To Holders of Twenty-Year Four and One-Half Per Cent. Convertible Bonds, due March 1, 1933:

Holders of more than 84% of the Bonds have accepted the offer of the Railroad Company to pay 50% of the principal amount of the Bonds, with accrued interest, in cash and to deliver, in respect of the remaining 50%, a like principal amount of its 5% Refunding and General Mortgage Bonds, Series F, due March 1 1006 March 1, 1996.

The offer must be accepted by holders of substantially all the Bonds in order that the transaction may be consummated. To insure prompt consummation of the Plan, and in view of the fact that the Bonds are widely scattered, and many holders who desire to accept the offer have been unable to present their Bonds within the time fixed, the Railroad Company will continue, up to the close of business on January 9, 1933, to pay in cash, upon presentation of Bonds for stamping, 10% on account of the principal thereof.

Bonds should be presented promptly for stamping to THE BALTIMORE AND OHIO RAILROAD COMPANY 120 Broadway, New York, N. Y.

Stamped bonds will be forthwith returned to the bondholders, together with the 10% cash payment, which bondholders are to retain, even if the Plan is not carried out.

No further extension of the time within which bond-holders may receive an advance cash payment will be made.

Copies of a letter giving the details of the Railroad Company's offer and a form of letter of transmittal which may be used for forwarding the Bonds may be obtained from the Railroad Company.

Dated Baltimore, Md., December 27, 1932.

THE BALTIMORE AND OHIO RAILROAD COMPANY, by George M. Shriver, Senior Vice-President.

COMMITTEE FOR

INTERBOROUGH RAPID TRANSIT COMPANY

FIRST AND REFUNDING MORTGAGE 5% GOLD BONDS DUE JANUARY 1, 1966.

To the Holders of Interborough Rapid Transit Company First and Refunding Mortgage 5% Gold BONDS DUE JANUARY 1, 1966, AND OF CERTIFICATES OF DEPOSIT THEREFOR:

On December 29, 1932, following further hearing by the Court, an order was entered resettling the previous order of the Court of December 21, 1932, under the terms of which it is expected that there will be paid on January 3, 1933, by the Receivers of Interborough Rapid Transit Company the interest and sinking fund due on January 1, 1933, on the First and Refunding Mortgage 5%

In the event of the receipt of funds by the Depositary of the Committee there will be mailed to the holders of record of Certificates of Deposit at the close of business on Tuesday, January 3, 1933, checks representing the six months' instalment of interest due January 1, 1933, in respect of the Bond or Bonds represented by such Certificates of Deposit.

On December 7, 1932, the Circuit Court of Appeals unanimously sustained the validity of the orders appointing the Interborough Receivers and the other Court orders dealing with the administration of the Interborough properties. Promptly thereafter the Court considered the application of the Receivers for instructions with respect to the payment of interest and sinking fund on the Interborough 5% Bonds. The Committee actively participated in the hearings before the Court on this application, and through counsel has frequently been heard by the Court on important questions affecting the 5% Roughbolders and involving the administration by the Court important questions affecting the 5% Bondholders and involving the administration by the Court of the Interborough properties. Such activity on the part of the Committee has continued since it became a formal party to the Court proceedings on September 1, 1932.

In the administration of such vast properties the interests of the Bondholders are constantly involved in the many questions almost daily presented to the Court for its determination. Consequently the Committee urges the holders of 5% Bonds who have not already deposited their Bonds with the Committee to send their Bonds promptly to the Depositary of the Committee, Messrs. J. P. Morgan & Co., No. 23 Wall Street, New York City. It is important to each holder of Bonds who has not already deposited, as well as to the holders of the deposited Bonds, that there shall be unity of action on their behalf and that the Committee, although now representing a substantial amount of the Bonds, may as a result of additional deposits more completely represent the interests of the Bondholders. the interests of the Bondholders.

Upon the deposit of such Bonds in negotiable form the Committee's Certificates of Deposit be issued. If accompanied by interest coupons maturing on January 1, 1933, the Committee will be issued. If accompanied by interest coupons maturing on January 1, 1933, the Committee will attend to the collection and distribution to depositors of an amount equivalent to the coupon due January 1, 1933, and thereafter will collect and distribute to the depositors such further interest as may be received by it in respect to the Bond or Bonds so deposited without further action on the part of the depositors.

New York, N. Y., December 30, 1932.

COMMITTEE FOR

INTERBOROUGH RAPID TRANSIT COMPANY

TEN-YEAR SECURED CONVERTIBLE 7% GOLD NOTES DUE SEPTEMBER 1, 1932.

To the Holders of Interborough Rapid Transit Company Ten-Year Secured Convertible 7% Gold Notes Due September 1, 1932, and of Certificates of Deposit Therefor:

On December 29, 1932, following further hearing by the Court, an order was entered resettling the previous order of the Court of December 21, 1932, under the terms of which it is expected that there will be paid on January 3, 1933, by the Receivers of Interborough Rapid Transit Company the interest and sinking fund due on January 1, 1933, on the First and Refunding Mortgage 5% Gold Bonds. Accordingly, Bankers Trust Company, the Trustee under the Collateral Indenture securing the 7% Notes, will receive upon the 5% Bonds held as security for the 7% Notes an amount sufficient to make a distribution at the rate of \$41.40 on account of the aggregate amount due on September 1, 1932, in respect of each \$1,000 7% Note and in respect of the semi-annual coupon which matured September 1, 1932.

In the event of the receipt of funds by the Depositary of the Committee, there will be mailed to the holders of record of Certificates of Deposit at the close of business on Tuesday, January 3, 1933, checks representing the amounts distributable on the aforesaid basis in respect of the Note or Notes represented by such Certificates of Deposit.

The Committee is informed that the Trustee is publishing notice to Noteholders to present their Notes on and after January 3, 1933, to it at its Corporate Trust Department, No. 16 Wall Street, New York City, for the purpose of receiving their distributive share upon presentation for proper stamping respectively of such Notes and accompanying coupons which matured September 1, 1932.

On December 7, 1932, the Circuit Court of Appeals unanimously sustained the validity of the orders appointing the Interborough Receivers and the other Court orders dealing with the administration of the Interborough properties. Promptly thereafter the Court considered the application of the Receivers for instructions with respect to the payment of interest and sinking fund on the Interborough 5% Bonds. The Committee actively participated in the hearings before the Court on this application, and through counsel has frequently been heard by the Court on important questions affecting the 7% Noteholders and involving the administration by the Court of the Interborough properties. Such activity on the part of the Committee has continued since it became a formal party to the Court proceedings on September 1, 1932.

In the administration of such vast properties the interests of the Noteholders are constantly involved in the many questions almost daily presented to the Court for its determination. Consequently the Committee urges the holders of 7% Notes who have not already deposited their Notes with the Committee to send their Notes promptly to the Depositary of the Committee, Messrs. J. P. Morgan & Co., No. 23 Wall Street, New York City. It is important to each holder of Notes who has not already deposited, as well as to the holders of the deposited Notes, that there shall be unity of action on their behalf and that the Committee, although now representing more than a majority of the Notes, may as a result of additional deposits more completely represent the interests of the Noteholders.

Certificates of Deposit will be issued upon the deposit of Notes in negotiable form. In respect to all Notes deposited after January 3, 1933, the Committee will distribute to depositors of unstamped Notes with September 1, 1932, unstamped coupons attached, the sums received from the Trustee on account of the above mentioned distribution.

By such deposit not only will the Noteholders receive the benefit of such unity of action through the Committee, but will be assisted in the collection of such sum and of any further sums that may be so distributed.
